CHOOSE THE RIGHT EBC PADS FOR YOUR MOTORCYCLE OR ATV

EBC Brakes offer an extensive range of pad compounds for every style of riding and the guide below will help you get the best value for money and offset the chances of any damage to your new rotors.

Numerous lightweight composite rotor materials are now on the world markets that are expensive and using the wrong pads will simply SHRED these rotors. EBC has tested popular offerings and found no frictional/brake performance advantage at all in using these rotors. Also friction levels were found to be extremely low and brakes ineffective in the wet. We do not recommend the use of any EBC pads in connection with composite rotors of any kind and no warranty exists in their use.

Also certain Classic and heavier bikes feature 6 or 7mm thick rotor blades and EBC make those with what we call a "Billet Steel". This steel is LESS HARD than OEM discs and the use of Vee pads is the perfect solution for those. Inside each box is a warning note for consumers, at the bottom of this page also is a list of EBC rotors made in BILLET STEEL that demand the use of Vee pads only to avoid rotor galling.

Type of Brake Rotor	Best Pad To Use
OEM Stainless Steel	Any
EBC Stainless Steel X, XC or SBD Series	Any
EBC Billet Rotor (front or rear) (see list below)	FA Series Organic Pads or Vee/VLD Pads
EBC Oversize Rotors (OS and SM Series)	EBC X Series Carbon, R Series Sintered, MXS Series Sintered or EPFA Series Sintered
EBC Stainless Steel Rear Brake Rotors (MD Series)	Any
EBC Stainless Off Road Series for Moto-X or ATV (MD Series)	Any
Composite lightweight rotors (such as carbon fiber, metal matrix, silicone carbide)	DO NOT USE any EBC product on these rotors. Tests have shown rotor damage

EBC NEW V Pads™

**New for
2013**

- Life of sintered pad - feel of an organic pad
- Zero brake noise
- Zero rotor galling, gentle on rotors

Another world first debut of a SEMI-SINTERED™ pad compound. This new material uses a 30% weight percentage of copper in a high density matrix that combines the best of both worlds. Longer life, similar to sintered and great brake "feel" with lower heat transfer and less rotor abrasion. The new V Pads™ are available for ALL Cruisers and Big Twins and for rear applications on numerous Sportbikes where extended wear life may be an advantage.

How to order - select regular part number from application listings in the appropriate column.

NEW VLD Limited Edition Chrome Pads

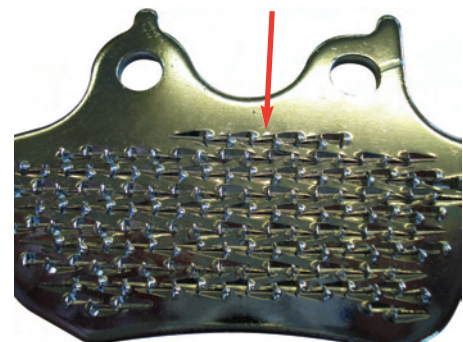

- Life of sintered pad - feel of an organic pad
- Zero brake noise
- Zero rotor galling, gentle on rotors

Using the exact same compound as Vee pads above, a limited range of pads for the cruiser market is now available with polished chrome backing plates. Bonding of friction material onto backing plates could not be achieved without the NUCAP of Canada NRS system featuring a hook pattern which EBC Brakes applies to its backing plates under licence from NUCAP.

**British
Made** 

NRS HOOKS

STANDARD PAD NO	CHROME BACKED NO.

How to order - select the correct pad for your application and suffix with VLD. Please note only the above references available for 2013.

EBC Brakes - World Leader in Manufacturing

The new Northampton headquarters of EBC Brakes includes full press shop facilities (lower right) and brake rotor manufacturing (lower left). Examples of the new NRS backplate hook system produced under licence from NUCAP Canada are shown in the lower center picture above.

Manufacturing the largest range of organic brake pads in the world, the ISO approved facilities at EBC Bristol produce world class products which conform to every known industry standard. The two production facilities have ability to produce over 12 million pieces of disc brake pads per year.

of Motorcycle Brake Rotors and Pads

**EBC USA Inc,
Los Angeles, USA**

EBC Brakes USA - LA Distribution

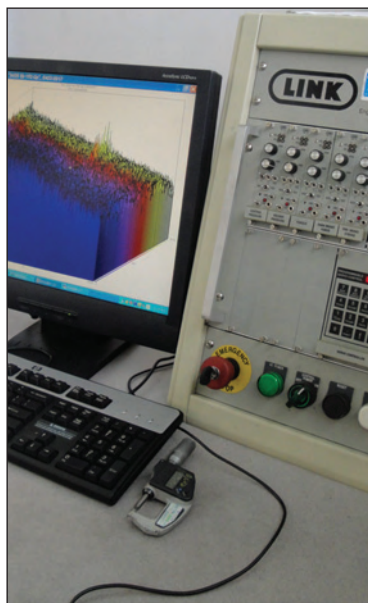

EBC Brakes USA Inc. in Los Angeles holds massive inventory of EBC Brakes products for same day shipment and has a facility to ship dozens of pallets and up to 4000 parcels per day on its automated packaging line.

EBC Brakes USA Sintered Pad Plant

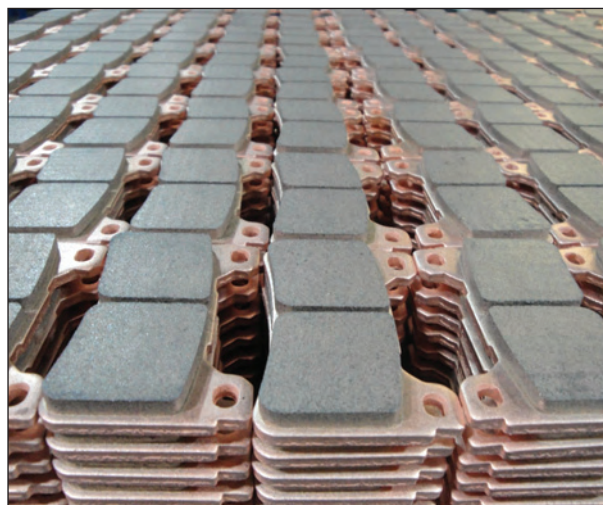

North America's premier sintered pad manufacturer is located in Ohio and as part of the EBC family of companies is fully ISO compliant with its own R&D facilities including two LINK dynamometers and full time chemists producing parts for original equipment and the EBC aftermarket program of sintered brake pads.

**EBC Sintered Pad
Manufacturing Plant,
Cleveland, Ohio**

Equipped with full R&D facilities including two of the latest LINK dynamometer banks for full product development and quality control.

CX Extreme® Moto-X Brake Rotors

- Heat treated and tempered stainless steel
- Lightest weight profile with new Vee design
- Great looks for modern motocross machines
- Balanced front and rear designs

A new ultra lightweight performance brake rotor to provide superb visual appeal for riders wishing to replace or upgrade their original brake rotors. The new Vee-Notch™ design offers a self cleaning high pressure contact pad-to-rotor brake enhancement.

The rotors are available for all modern fitments as shown on the chart below.

To order simply change the "D" or "C" suffix of a standard rotor to the suffix "CX".

EBC[®] BRAKES

GPFA Full Race Pads EPFA Trackday Pads

- **MORE** stability
- **FASTER** bed-in
- **MORE** bite
- **STAINLESS** radiator plates
- **Better** heat cycling
- **LONGER** life
- **REDUCED** rotor damage

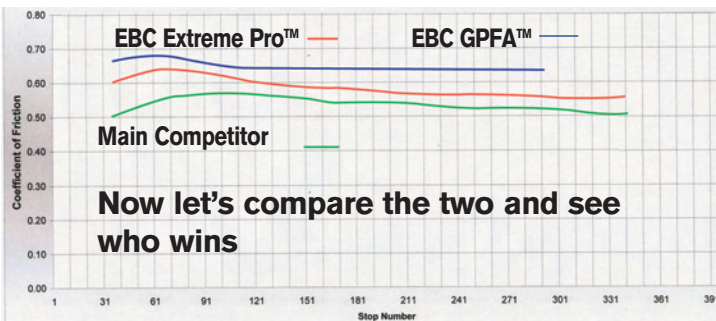

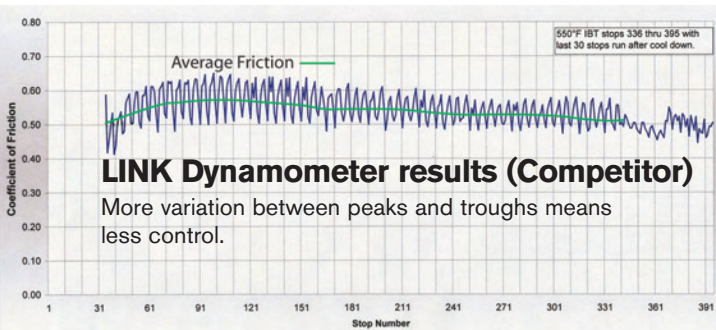

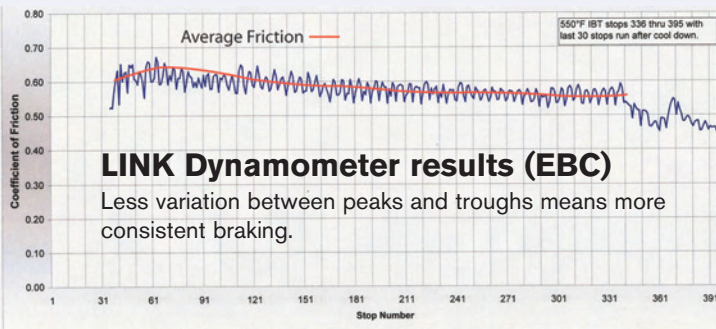

Two great choices for high end pad requirements from EBC.

The EPFA series is a premium long life street pad with improved fade resistance and heat cycling and improved noise characteristics making a great pad for heavy streetbikes and cruisers and also faster superbikes including intermittent track use. For exclusive track use we recommend our GPFA range.

GPFA pads are an ultra high friction race only pad and not designed for the street due to their friction level. They have been used globally for two years now by numerous professional race teams.

GPFA pads are priced identically to EPFA, range available shown below.

EBC Off Road PAD Options

“X” Series Moto-X Sport and Enduro Pads

Cool running carbon based brake pad compound for sport use in moto-x and ATV applications. For mud, sand or wet conditions requiring longer life, use our sintered range opposite.

British Made 

EPFA High Friction Off Road Race Pads

A high friction sintered copper-carbon alloy with better heat cycling and brake effect for race use such as supercross.

Made in the USA 

“R” Series Sintered ATV and Moto-X Replacement Pads

US made sintered copper alloy pads for sport and utility riding alike in normal off road riding.

Made in the USA 

“SV” Series Severe Duty ATV Pads

High density sintered copper alloy for longest possible life in utility applications on ATV, especially in wet, mud, dust and dirt conditions.

Made in the USA 

“MXS” Moto-X Race Pads

Ultra high friction American made sintered copper alloy pads with diamond ground surface finish for fast brake-in, these pads come complete with external hex drive slider pins and are suitable for all fast moto-x riding.

Made in the USA 

EBC Off Road ROTOR Options

EBC CX EXTREME™ Vee-Rotors™ for Modern Moto-X Machines

The latest radical profile rotors delivering reduced weight and improved brake control from EBC are again 100% British made in heat treated stainless steel and available for all popular moto-x and enduro fitsments.

British Made 

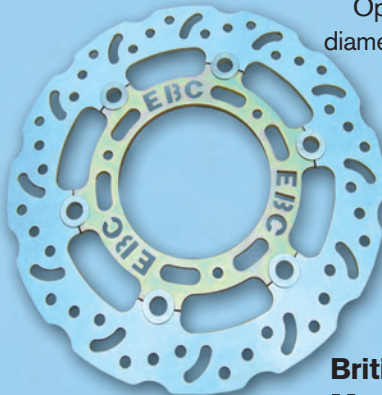

NEW Enduro CE Series

Made from tough German mill rolled heat treated stainless steel, the new Enduro rotors have no vent holes in the pad sweep area to improve pad and disc wear in enduro riding.

British Made 

Moto-X Mini Oversize Kit for 50/60/65/80 cc MX bikes

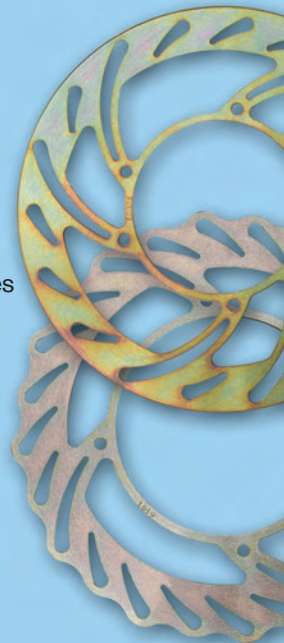

Optimum 250mm diameter and comes complete with relocation bracket. All rotors feature contoured profile as standard.

British Made 

EBC OE Replacement and Supercross Contour Rotors

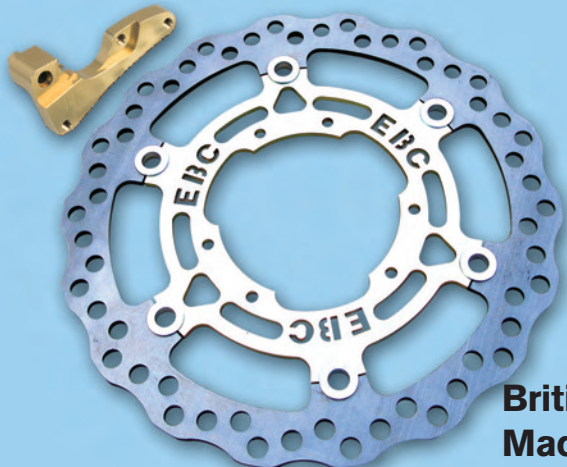

EBC D-Series (full circle) and C-Series (light profile) rotors are available for all moto-x and ATV and are 100% British made using heat treated stainless steel.

British Made 

EBC Oversize MX Disc Kits

280mm oversize disc kit complete with relocation bracket for improved brake power and control. Part number is the same for both full circle and contour, as stocks rotate all rotors will be made in contoured profile.

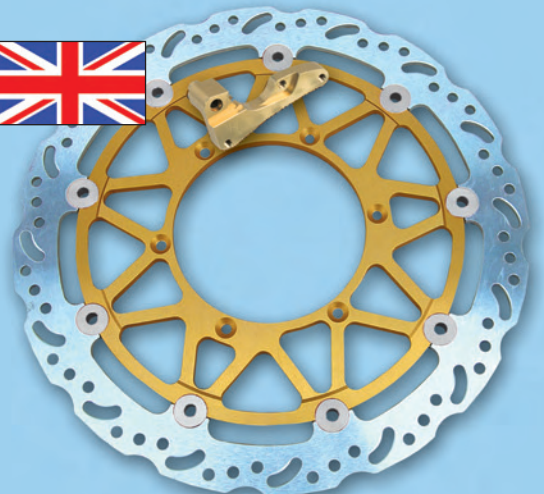

British Made 

EBC Supermotard Contour Rotor Kit

320mm rotor upgrade kits complete with relocation bracket. To order prefix with SM, example SM6037C. Most models now made with contoured profile.

British Made 

EBC Street & Road Race PAD Options

EBC Organic Brake Pads

FA series organic pads provide fingertip stopping power and are the preferred choice for many sportbike riders, having low disc attack characteristics and medium lifetime.

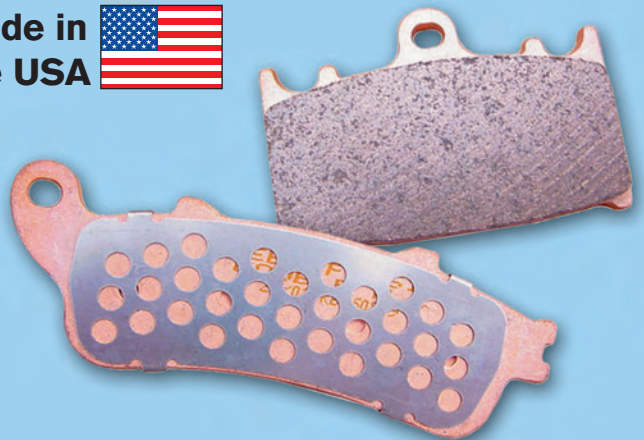

British Made 

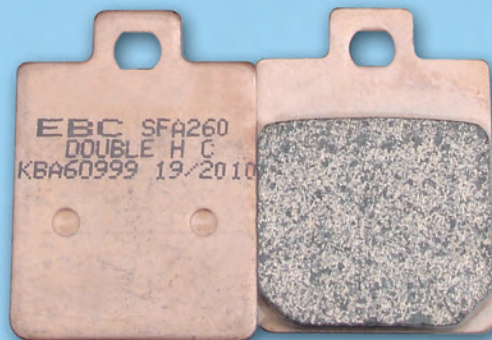

EBC Double-H™ Superbike Pads

FA series, with HH suffix, denotes EBC's American made ultra high friction Double-H sintered copper alloy brake pads for maximum stopping power and lifetime. Fitted with stainless steel radiator plates for bikes without built in piston insulators to reduce heat transfer into hydraulics and new double compact vented technology for wider pads, reducing backplate bending.

Made in the USA 

Unique EBC stainless steel radiator plates to reduce heat transfer to brake system

Made in the USA 

EBC SFA and SFA-HH Scooter Brake Pads

As scooters become more popular, EBC have introduced their highly successful and LOWER PRICE POINT SFA scooter pad range for the US, Canada and Mexico markets and the longer lasting SFA-HH pads in sintered copper alloy for longest lifetime.

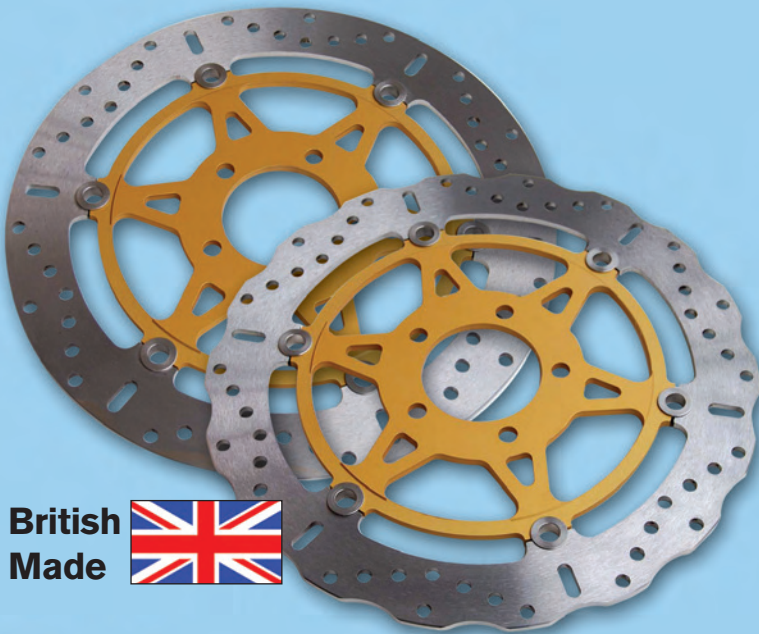

British Made 

EBC Street & Race Brake Rotors

EBC Pro-lite Street & Race Hybrid Brake Rotors

The new X and XC series rotors perform so well with the new stainless steel rotor blades, ultra light 6 button construction and new SD system square drive technology that these rotors are now standard fitment for both road race use and street sport applications. These units are riveted together and are no longer rebuildable due to the infinite service life obtained with the SD square drive button system. To order add suffix X or XC, example MD3058X or MD3058XC.

British Made 

EBC Stainless Steel Rear Brake Rotors

Now made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction. Full circle rear rotors part numbers are MD1004 or MD1004C for contour.

British Made 

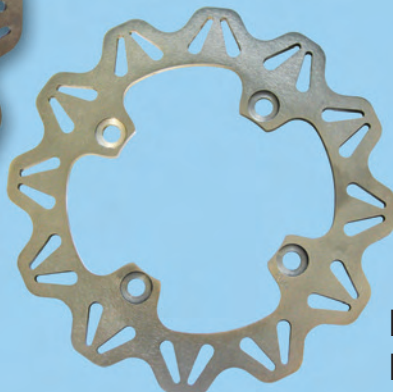

Custom Rotors for Naked Bikes

Universal for left and right with stainless steel rotor blade and polished and heat lacquered alloy center hubs. Part number example MD3058CC, add letters CC to denote this series.

New for 2013

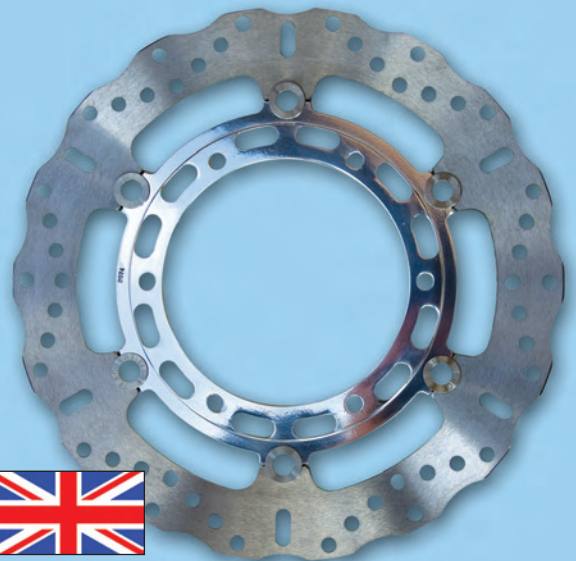

New Vee-Rotors™

See page 449 for more details.

British Made 

British Made 

AMERICAN MOTORCYCLE PAD OPTIONS

Organic Pads

- Superb brake feel and modulation
 - Super quiet in operation
 - Made in the UK

Organic pads have always been extremely popular amongst big twin and cruiser bike users, especially those using custom brake rotors due to the reduced dusting and reduced rotor galling that organic pads deliver. These quality pads 100% made in the UK have been a world market number one seller in their category with over 35 million sets sold worldwide.

How to select your pads

Select part number from application pages E.g. **FA400**

Semi-Sintered Pads

- 30% copper content extends life
 - Super quiet in operation
 - Made in the UK

Combining the very best features of organic pads with the lifetime of a sintered pad, these part sintered 30% copper content organic pads extend lifetime considerably over organics or any other semi metallic pads significantly. On a scale of 1-10, a semi-metallic pad would last 10,000 miles, the semi-sintered pad would last 25,000 and a sintered pad probably 30,000 miles.

How to select your pads

Select part number from application pages and suffix with letter V
E.g. **FA400V** (Note limited edition FA400VLD available with chrome backplate)

Extreme Pro Sintered Pads

- Longest life of any sintered material
 - Super quiet in operation
 - Made in the USA

Made in the USA, the EBC Extreme Pro range is a highly refined copper alloy including extra expensive ingredients to further enhance lifetime and quieten the brakes during operation. If you are looking for the ultimate in lifetime and brake performance on a big cruiser, these are the brakes to buy.

How to select your pads

Select part number from application pages and prefix with letters EP and suffix with letters HH E.g. **EPFA400HH**

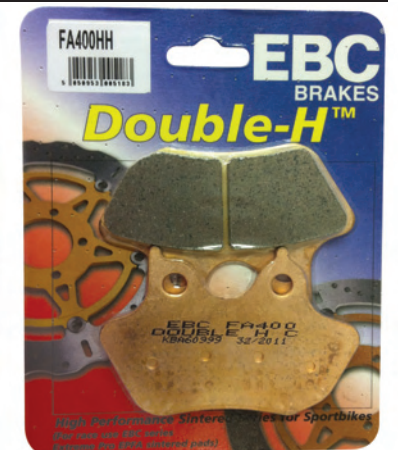

Double-H™ Sintered Pads

- Original equipment grade sintered pad
 - Super quiet in operation
 - Made in the USA

Made in the USA, the EBC Double-H sintered pads are an exact equivalent of the sintered pad grade supplied in your motorcycle when it was made. Lifetime is extremely high with a high friction brake effect that gives fingertip stopping power. Best used on heat treated stainless steel discs.

How to select your pads

Select part number from application pages and suffix with letters HH E.g. **FA400HH**

EBC Stainless Steel Custom Rotors for American Motorcycles

All rotors fit standard 5 bolt hubs and are 11.5"/292mm diameter.
Front rotors use 3/8"/5mm rotor thickness, rears use 1/4"/6mm rotor thickness.

IMPORTANT NOTE

Ⓣ - remove old disc outer ring from center carrier. Ⓣ - remove ABS ring from old rotor and refit to new EBC rotor.

Note: Ensure all mounting surfaces are clean and when refitting bolts use a thread lock cement to hold them in place.

NEW STREET BIKE ROTOR PROGRAMS FOR 2013

EBC Vee-Rotors™ - Front

- Fully floating design
- Lightest weight rotor profile
- Features patented SD system hardware
- Black hubs as standard
- Color options - see page 450

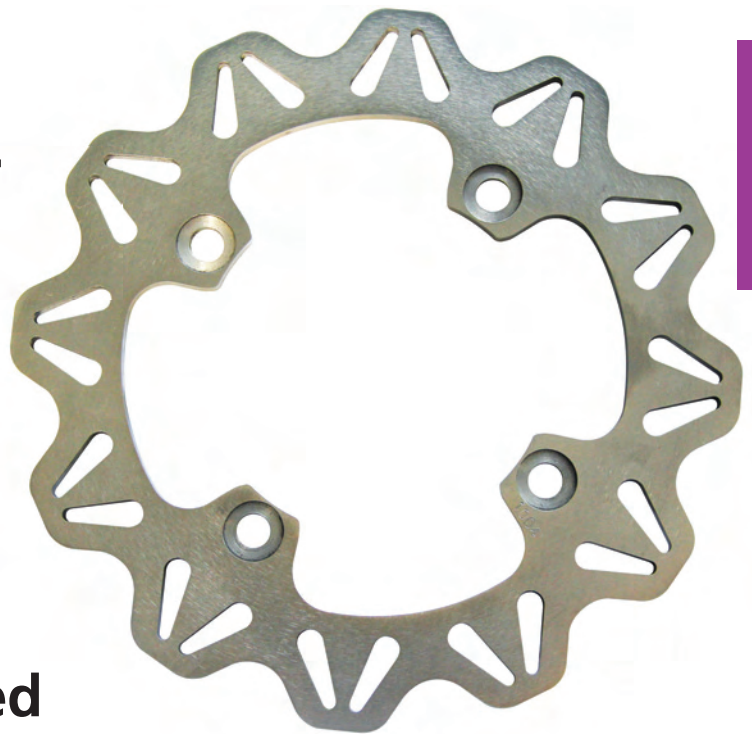

In line with the ongoing trend for riders to customize machines rather than simply replace parts, the new Vee-Rotors™ from EBC Brakes offer an exciting new lightweight rotor program with an exciting range of color options. The standard offering of hub color is BLACK.

EBC Vee-Rotors™ - Rear

- Heat treated stainless steel
- Lightest weight rotor profile
- Matching design to Vee-Rotor™ fronts

To compliment the front floating rotors in the Vee-Rotor™ range, these British made heat treated and tempered stainless steel brake rotors are available for most popular bikes.

STREET BIKE ROTOR PROGRAM

Heat Treated & Tempered

This product is fully stainless steel heat treated and tempered back to the optimum hardness.

BEWARE - of companies merely stating their product is stainless steel. Some of these are not hardened and of those that are, some are hardened to the excess and can exhibit cracks through over hardness between the holes and edges. EBC has worked long and hard on choosing the exact correct hardness and temper procedure for their brake rotors.

NEW STREET BIKE ROTOR PROGRAMS FOR 2013

Color Options for EBC Vee-Rotors™

- Option of five hub colors
- Features patented SD system hardware
- Black hubs are standard
- Color options - see below

Although the standard hub color for the Vee-Rotor™ program is BLACK these colors are available by special order options. Historically, red and blue anodized alloy fades badly over a period of 1-2 years in the sunlight. The special color application process that we have devised for our Vee rotors uses a "FIX" process that seals the color and minimizes color loss.

NEW STREET BIKE ROTOR PROGRAMS FOR 2013

STREET BIKE ROTOR
PROGRAM

How To Order

Five new color options exist for the new Vee rotor range as described above. To specify your chosen hub color, add the suffix letters after the part number, e.g. MD1003XC as a standard brake rotor becomes VR (Vee-Rotor™), followed by the part number (in this case 1003) and the hub color selection, BLU for blue etc. In this case the new number will be VR1003BLU.

Please note optional hub colors are not available for any other EBC rotor programs except the new Vee-Rotor™ series.

To special order rotors not identifiable in our catalog please copy this page - fill in all details and fax to our technical department on (818) 362 2196.

RACE / SPECIAL ROTORS

CLUTCH KITS FOR STREET/DIRT/ATV

STREET - 3 choices

1. Standard - CK Series

Almost identical to original equipment clutch plates the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

Note: Do not use fully synthetic oil

2. Race/Sport SRC Kevlar® Series

A Kevlar® paper lined plate set complete with heavy duty clutch springs (for bikes fitted with diaphragm type springs we can now supply a heavy duty spring kit), the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series.

3. Race/Sport SRK Series

New SRK complete kits include Kevlar® fiber lined friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DRC program for off road. Some of the kits will now feature new **DIAPHRAGM** springs as used in many larger new bikes to provide a complete clutch rebuild kit for every sportbike possible.

CSK CLUTCH SPRING SETS

DIAPHRAGM TYPE SPRING

COIL TYPE SPRING

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 10-15% stiffer than standard and are sold in engine sets.

As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

DIRT/ATV - 2 choices

2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sell complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminum separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the drive case, change the oil and rebuild the clutch with a complete DRC kit which includes STEEL separator plates that not only prevent wear but increase flywheel effect of the engine and improve performance.

1. Full Kit - DRC Series

The US #1 selling off road clutch

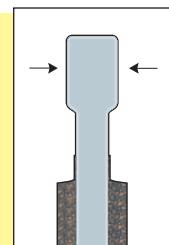

Why are these the best???

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.
- Complete engine set of friction plates, HD springs and **STEEL SEPARATOR PLATES** prevent premature driven plate wear, oil muddying and loss of stack height.
- EBC DRC kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

Note: do not use fully synthetic oil.

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.

CLUTCH APPLICATIONS

DRC-F Clutch Kits

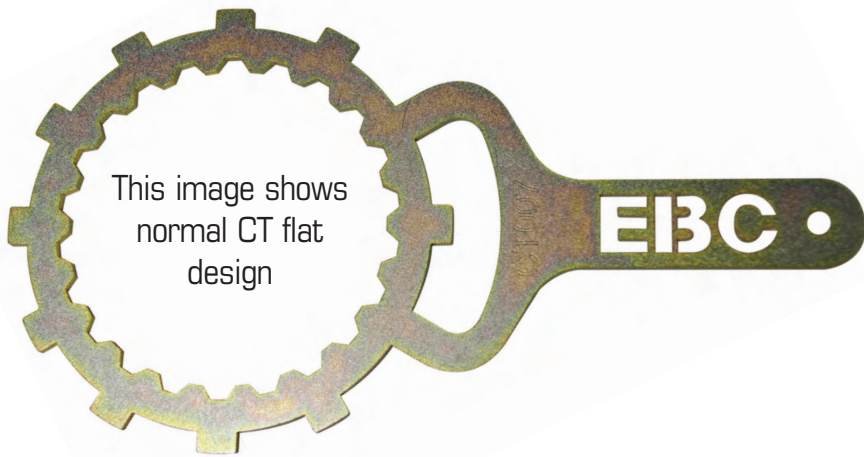

The ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fiber lined clutch plates plus a full set of steel plates and heavy duty springs. These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

CLUTCH APPLICATIONS

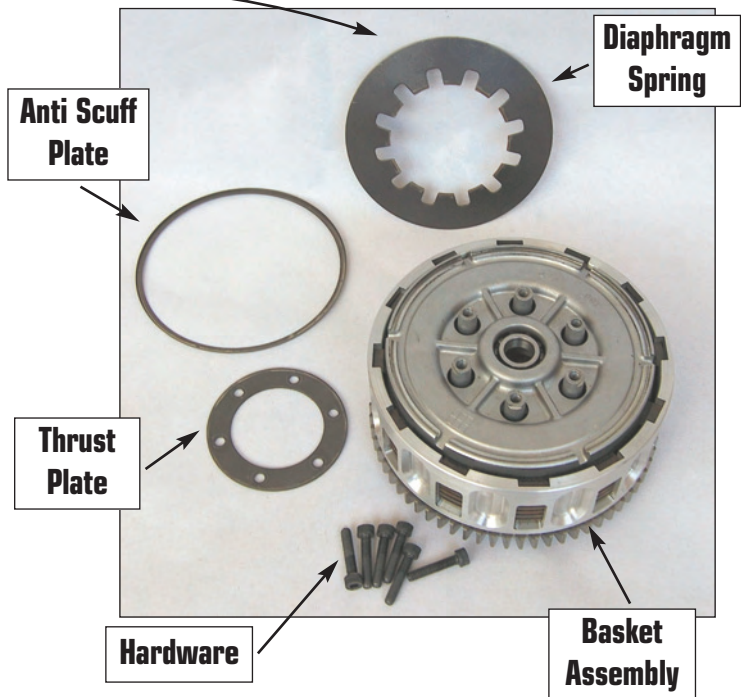

EBC Diaphragm Clutch Springs

EBC SRK/SRC clutch kits, shown on the following page now include the new diaphragm spring range.

The picture opposite shows a typical aftermarket billet clutch and how the assembly looks. It is essential when replacing the diaphragm spring that the anti-scuff plate is in good condition. This is a rather flimsy steel pressing and can become bent or distorted in which case it must be replaced, this is a genuine part available from your main dealer only.

Diaphragm Spring

EBC CLUTCH KITS - ATV

EBC Clutches are totally Asbestos Free made from a cork based "anti-swell" facing impregnated with aluminum particles to reduce wear & heat fade. Kits are sold in pre-measured engine sets and should always be replaced in engine sets. **USE ONLY MANUFACTURERS Drive case oils and avoid lead or other anti-friction additives. SOAK PLATES in drive case oil before installing.** EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Diaphragm type springs are not available. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

CAUTION – SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend you photocopy these essential points and advise customers. **Never start a motorcycle whilst in gear with clutch depressed. Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed. Hold front brake lever on when selecting gears from standstill. Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly. When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle. We do not recommend the use of fully synthetic oils.**

How To Make Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. This year EBC Brakes sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.

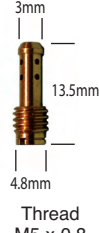

A-BAX Precision Engineering Ltd Pilot Jets for Mikuni Carbs (Sold in packs of 4)

ACCESSORIES

BRAKE FLUID

DOT 4 - A refined specification polyglycol fluid as fitted to most faster street bikes now produced.

DOT 5 - Silicone fluid as used in Harley Davidson Motorcycles and many special High Performance Brake systems.

COMBO - Contains 2 each of DOT 4, and BF307+

BF307 - Highly refined Dot 3 Brake fluid, ideal for Racing or High performance Road bikes. Can be used in all systems specifying Dot 3 or Dot 4 but **NOT** with (Dot 5) silicone fluids.

**EBC Brake Fluid is available in
DOT 4 or DOT 5 (Silicone) Grades
or BF 307 Race Grade.**

TO ORDER USE THESE NUMBERS

BRAKE CALIPER LUBE

These sachets of dedicated, high viscosity greases are perfect for all of your customers' brake service needs. Always use sparingly on caliper slider pins and rails, but to NOT get near the pad surface and do NOT use as anti-squeal as it will not help at all. Each sachet contains 5 grammes of grease.

TO ORDER USE THESE NUMBERS

Ten Sachets	LUBE010
Fifty Sachets	LUBE050

EBC Mountain Bike Disc Brake Pads & Disc Kits

**Oversize Disc
Conversion Kit
including Bracket
(MTBD230)**

Now Available:

- Mechanical Systems
- Closed Systems
- Open Systems
- Hydraulic Systems

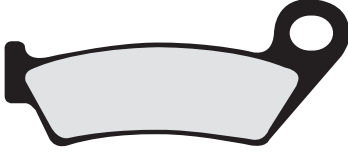

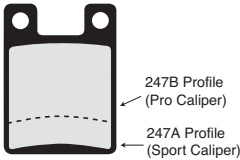

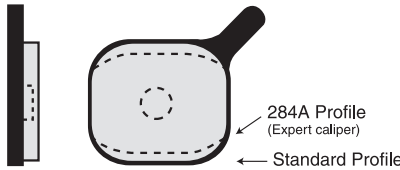

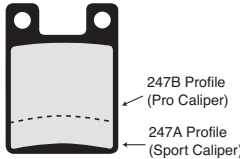

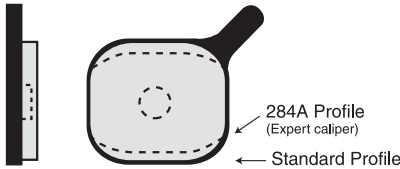

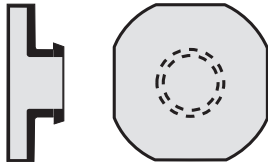

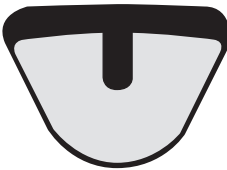

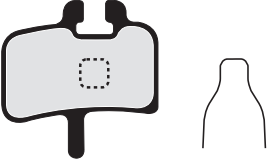

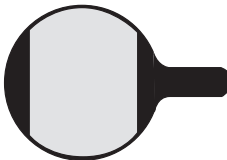

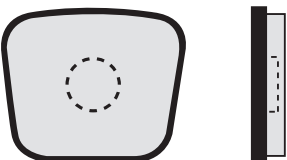

Oversize Brake Disc Kits

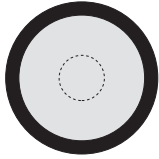

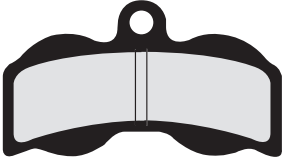

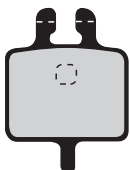

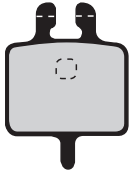

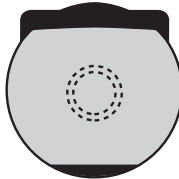

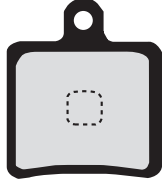

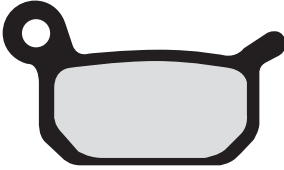

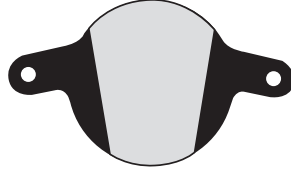

EBC offers two upgrade options with these oversize brake disc conversion kits - 160/165mm-180mm (medium power upgrade) and 160/165mm 203mm (mega power upgrade) and the option of full circle profile or new lightweight contoured profile.

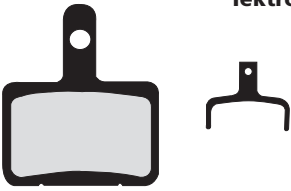

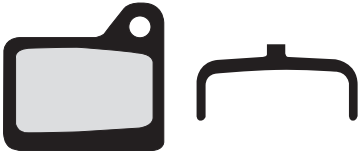

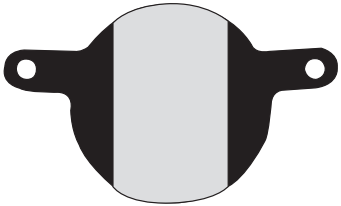

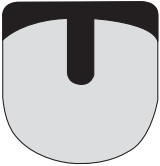

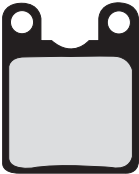

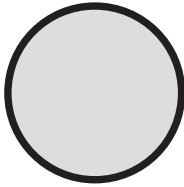

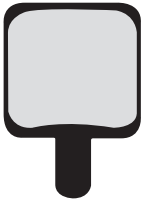

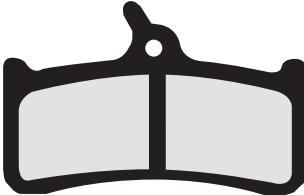

These mount on most standard 6 bolt wheel hubs and together with the bracket provided, which again fits most 50mm centre forks, your caliper is relocated outwards giving you a stronger brake and better brake feel. Easy to fit - no other changes are necessary to your caliper, cables, hydraulics or lever. All you need are two allen keys. These are premium quality heat treated stainless steel discs, diamond ground and compatible with every type of mountain bike brake pad. Kits are available to convert standard 160/165mm up to 180mm or 160/165mm to 203mm or 180mm to 203mm.

					Compound Selection Guide			
					<i>X-country - No Suffix</i>			
					Green	Crosscountry/Trekking grade for general use.		
					<i>Downhill - Suffix R</i>			
					Red	High friction "Soft" compound for Downhill race use only.		
					<i>Wet Riding - Suffix HH</i>			
					Gold	High durability sintered metal compound for longer life in arduous conditions such as wet riding or use in mud or sand. NOT to be used for Downhill race use unless system is fitted originally with gold (sintered) brake pads to avoid brake overheating.
