- Better heat cycling
- LONGER life
- REDUCED rotor damage

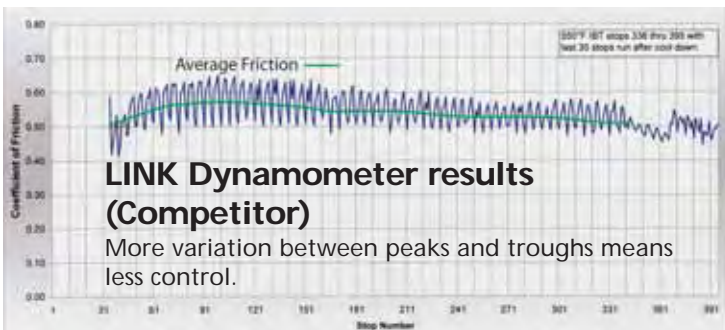

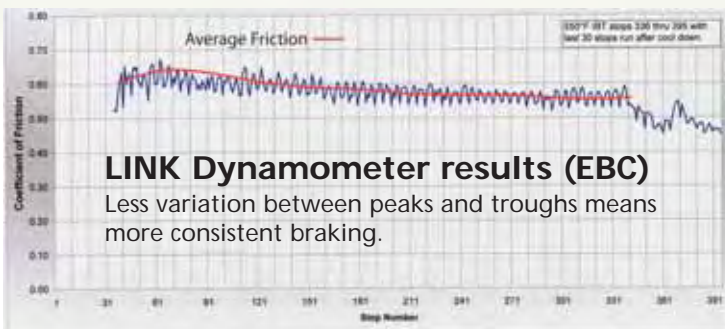

If anyone thought EBC didn't need another range of pads, think again. There are so many technical advancements in materials and methods we have to keep up. The Extreme Pro is a range targeting the Race market both street and off road but so many bikers have expressed an interest in the product we have extended it to a number of popular sportbikes and cruisers. For this reason we can expect sales to the high end Street market also on this new line.

The pads are a VERY expensive blend of sintered bronze including new age materials such as Tungsten and Moly metal to bring you the grippiest, most fade resistant pad we have ever tested.

We tested 7 other materials in developing Extreme Pro and the graphs opposite show the BEST of those competitors whom we have comfortably beaten with our new blend.

Extreme Pro completely replaces the GFA range which will be now phased out.

WHICH PADS WORK BEST ...

For almost 30 years Harley riders have appreciated the softer organic pads (EBC Kevlar® formula pads) which offer fingertip stopping, great brake feel and much less rotor damage. EBC now also offer longer lasting American made sintered metal pads for improved life.

280mm or 320mm discs constructed with forged alloy centre hub for weight reduction and tough billet steel 4mm thickness brake rotor for maximum stopping power. These rotor rings have extra weight reducing scraper holes and are riveted together with a nine button sturdy rivet system.

The rotors **COME COMPLETE WITH ANODISED ALLOY RELOCATION BRACKETS** for the various models listed below and are supplied as a kit with the complete rotor unit and anodised bracket. The brake hose will need to be replaced with a longer version.

CLUTCH KITS FOR STREET/DIRT/ATV

STREET - 3 choices

1. Standard - CK Series

Almost identical to original equipment clutch plates the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

2. Race/Sport SRC Kevlar Series

A Kevlar paper lined plate set complete with heavy duty clutch springs (for bikes fitted with diaphragm type springs we cannot supply a heavy duty spring kit), the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series.

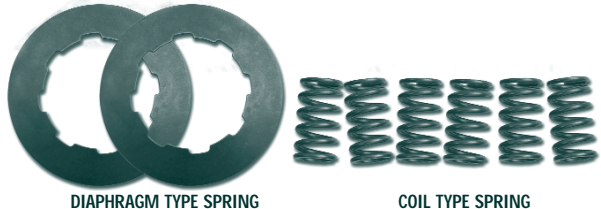

3. Race/Sport SRK Series

SRK complete kits include Kevlar® fiber lined friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DRC program for off road. Some of the kits will now feature new DIAPHRAGM springs as used in many larger new bikes to provide a complete clutch rebuild kit for every sportbike possible.

CSK CLUTCH SPRING SETS

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 8-10% stiffer than standard and are sold in engine sets. As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

DIRT/ATV - 2 choices

BEST CHOICE

2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sell complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminum separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the drive case, change the oil and rebuild the clutch with a complete DRC kit which includes STEEL separator plates that not only prevent wear but increase flywheel effect of the engine and improve performance.

1. Full Kit - DRC Series

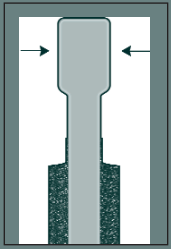

The US #1 selling off road clutch

Why are these the best???

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss of stack height.
- EBC DRC kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.

CLUTCH APPLICATIONS

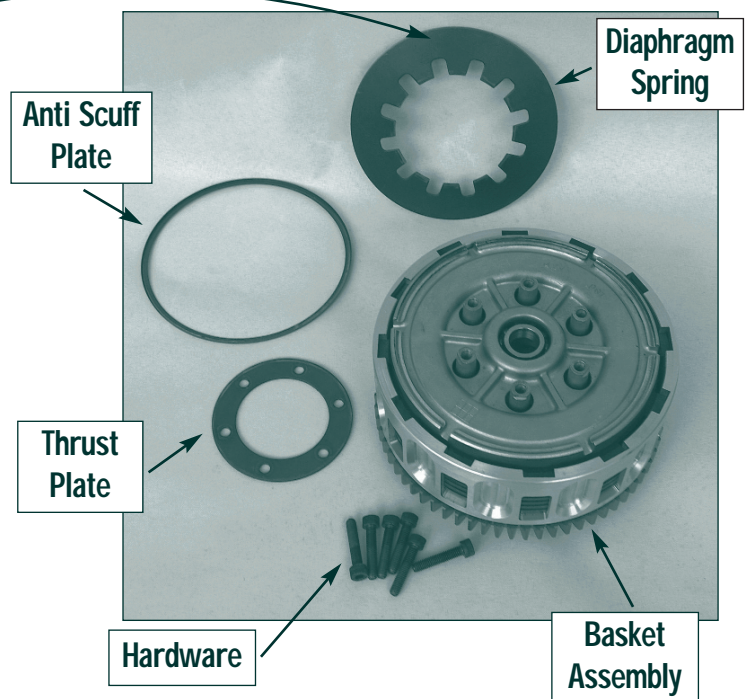

EBC SRC Diaphragm Clutch Springs

EBC SRK clutch kits, shown on the following pages, include the new diaphragm spring range.

The picture opposite shows a typical aftermarket billet clutch and how the assembly looks. It is essential when replacing the diaphragm spring that the anti-scuff plate is in good condition. This is a rather flimsy steel pressing and can become bent or distorted in which case it must be replaced, this is a genuine part available from your main dealer only.

HEAVY DUTY CLUTCHES & SPRINGS

EBC Clutches are totally Asbestos Free made from a cork based "anti-swell" facing impregnated with aluminium particles to reduce wear & heat fade. Kits are sold in pre-measured engine sets and should always be replaced in engine sets. USE ONLY MANUFACTURERS Drive case oils and avoid lead or other anti-friction additives.

SOAK PLATES in drive case oil before installing. EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

CAUTION – SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend you photocopy these essential points and advise customers.

Never start a motorcycle whilst in gear with clutch depressed. Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed. Hold front brake lever on when selecting gears from standstill.

Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly.

When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle. Assemble the clutch as per the original manufacturers workshop manual.

hy-tech racing reeds

For STREET Bikes New CW38 Fibre for higher durability and perfect Reed block seal in high revving 2 stroke motors.

For DIRT Bikes New TWO STAGE Action. By using a lighter fibre on the lower reed block position New Hy-Tech "D" suffix. Reed Kits open earlier and give perfect TWO STAGE response without turbulence or early primary stage reed petal fatigue or New Carbon Fibre CF Series. See below.

CARBON FIBRE REEDS for most Street and Dirt Bike models Prefix **CF** for Carbon Fibre.

ROAD BIKE REEDS ALSO AVAILABLE IN CARBON FIBRE
