

Rumen-Eze

Emulsified Treatment
for Frothy Bloat in Cattle and Sheep

Indications: For use as an aid in the treatment of frothy bloat in cattle and sheep.

Advantages:

- Convenient long-necked bottle for ease in administration
- Ideal dispensing container
- Time proven formulation reduces need for retreatment
- Specially designed as an oral drench
- Relieves legume bloat in minutes
- Efficacious for some dry bloat, too

Ingredients: Rumen-Eze is an emulsion containing vegetable oil, emulsifiers and preservatives.

Administration:

Administer the contents of this special dosing container orally as a drench to relieve bloated conditions in average size mature cattle. Young cattle and sheep should receive 6 to 12 fluid ounces as the severity of the condition indicates.

How Supplied:
12 fluid ounce dosing bottle
List No.....1161
