

Issue 202a EUROPEAN, ASIAN AND
BRITISH BUILT MACHINES

THE WORLD'S LARGEST RANGE OF PREMIUM MOTORCYCLE BRAKES AND CLUTCHES

Full range of UK-made
stainless steel braided
brake lines now in stock

Mit/Avec
R90 Compliant

EBC[®] BRAKES

Brake pads, discs, braided stainless brake lines,
clutches and much more, with four manufacturing
plants in the UK and USA producing over 10 million
components each year.

CLUTCH KITS FOR STREET / DIRT / ATV

STREET - 3 choices

1. Standard - CK Series

Almost identical to original equipment clutch plates, the CK series are a cork based product impregnated with aluminium particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle. Kit includes a complete "engine set" of friction plates only.

2. Race/Sport - SRC Series

A paper lined plate set complete with heavy duty clutch springs (for bikes fitted with diaphragm type springs we cannot supply a heavy duty spring kit), the SRC kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SRC series are longer life, higher heat resistance, although this clutch has a more aggressive / faster take up than the CK cork series.

3. Race/Sport - SRK Series

SRK complete kits include aramid fibre lined friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DRC program for off road. Some of the kits will now feature new DIAPHRAGM springs bikes to provide a complete clutch rebuild kit for every sportbike possible.

CSK CLUTCH SPRING SETS

DIAPHRAGM TYPE SPRING

COIL TYPE SPRING

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 8-10% stiffer than standard and are sold in engine sets. As stated in general fitting/safety instructions, advise customers that lever will feel slightly 'heavier' when uprating springs, and to test ride/acquaint themselves with this change in control.

CLUTCH APPLICATIONS

DIRT/ATV - 2 choices

1. Full Kit - DRC Series. The US #1 selling off road clutch.

Why are these the best??...

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss of stack height
- EBC DRC kits are built with swaged aluminium carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

2. Standard - CK Series

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

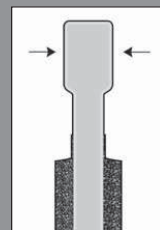

EBC only sell complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminium separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the drive case, change the oil and rebuild the clutch with a complete DRC kit which includes STEEL separator plates that not only prevent wear but increase flywheel effect of the engine and improve performance.

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.

EBC Coil Spring Kits

Full engine sets of heat treated and tempered spring steel coil springs with a guaranteed tension of 15% above standard. Clutch springs are an extremely important part of a motorcycle transmission system and we take very seriously the accuracy of spring tension in the EBC range of CSK kits. See application pages for part numbers.

Spring Tension Measuring Machine

You simply cannot engineer coil springs correctly without such a device as shown here. EBC have one of these digital clutch spring tension calibration machines at each of its locations to guarantee the accuracy and consistency of spring batches.

The machine is calibrated based on the nominal spring deformation and then a tight tolerance of variation is achieved within the target and 15% upgrade range.

EBC have tested many original and aftermarket clutch springs and the variation in tension is enormous and varies so dramatically, that we took the decision to measure and calibrate every clutch spring in-house to be sure of their accuracy.

EBC Diaphragm Clutch Springs

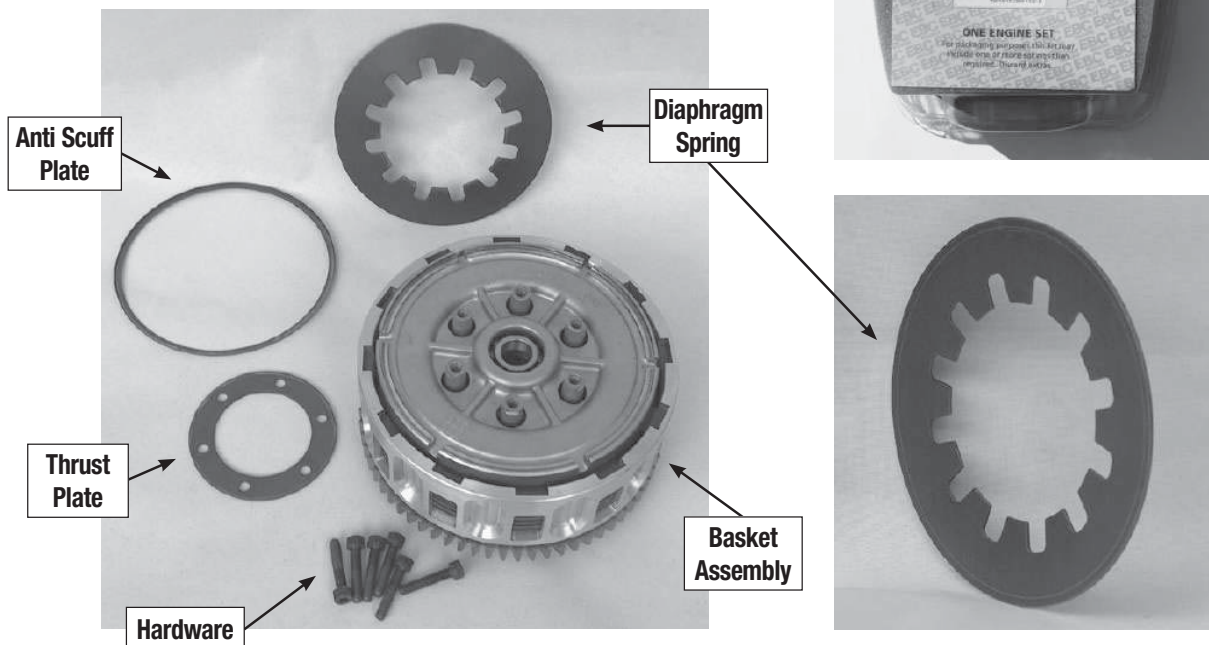

EBC SRK clutch kits, shown on the following pages, include the new diaphragm spring range. Full engine sets of heat treated and tempered spring steel diaphragm springs with a guaranteed 15% tension upgrade.

The pictures below show a typical aftermarket billet clutch and how the assembly looks.

It is essential when replacing the diaphragm spring that the anti-scuff plate is in good condition. This is a rather flimsy steel pressing and can become bent or distorted in which case it must be replaced, this is a genuine part available from your main dealer only.

CLUTCH APPLICATIONS

CKF Clutch Kits

See application pages for availability and fitments.

CKF is the name of the new EBC carbon fibre impregnated for motocross ATV and now some street bikes. They are built tough to last longer, grip better, feel better and drive better than stock cork based units.

PLUS the high heat ability of these CKF Carbon Fiber clutch plates handles much higher stresses and temperatures encountered in racing yet feel gentle and smooth in everyday riding.

One day all motocross bikes and ATV will be built using a clutch like this, but for now the only way to get the best clutch in the game is to step up to an EBC CKF plate set or go the whole hog and invest in the DRCF clutch kits which are sold as an assembly with a stack height measured to precisely reset your bike to the original sizing.

DRCF Clutch Kits

The toughest off road clutch yet.

Tested for 12 months in the toughest moto-x applications, these new heavy duty kits are ideal for fast off road use especially on modern 4 stroke engines.

The ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fibre lined clutch plates plus a full set of steel plates and heavy duty springs.

CLUTCH APPLICATIONS

Clutch Removal Tools

A range of clutch tools to allow easy install of all EBC clutch kits. Range covers 95% of motorcycles and ATVs and allow positive holding of the clutch basket or centre boss to allow untightening and retightening of securing nuts.

Clutch application pages show appropriate tool and the table below is a list of the current available programme.

Costing far less than OE manufacturer tools, EBC strongly recommend selling a clutch tool for every clutch sold.

Many dealers have already ordered one of each tool and loan these to customers with a deposit to gain tool loan income.

Heavy Duty Clutches & Springs

EBC Clutches are totally Asbestos Free, made from a cork based “anti-swell” facing and impregnated with aluminium particles to reduce wear and heat fade.

Kits are sold in pre-measured engine sets and should always be replaced in engine sets. **USE ONLY MANUFACTURERS** Drive case oils and avoid lead or other anti-friction additives.

SOAK PLATES in drive case oil before installing. EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip. Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

CAUTION – SAFETY WARNINGS FOR CONSUMERS

The following warnings now appear on the underside of our clutch packaging. For stocks in older packaging that do not display these safety warnings, we strongly recommend that you photocopy these essential points and advise customers.

- Never start a motorcycle whilst in gear with clutch depressed.
- Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed.
- Hold front brake lever on when selecting gears from standstill.
- Never engage gears from a standstill with engine revs above 1500 rpm. Check oil levels regularly.
- When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle. Assemble the clutch as per the original manufacturers workshop manual.
