Mission + Vision

Revolutionise agricultural industry with innovative probiotic solutions.

Promote sustainable farming.

Reduce the amount of antibiotics used in the farming industry in Africa.

The Problem

70% of all antibiotics globally is used in the agricultural industry.

Unsustainable use of antibiotics in livestock farming has led to the **emergence of antibiotic-resistant bacteria**, posing a significant threat to public health.

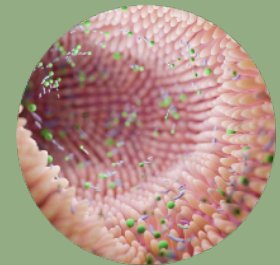

The **overuse of antibiotics** in livestock farming has led to increased consumer demand for alternative solutions to promote animal health.

Current probiotics on the market **lack specificity and efficacy**, leading to suboptimal results in promoting animal health and reducing antibiotic use.

The Solution

Probiotics

- Promotes gut health
- Provides pathogen protection.
- Improves animal health and growth performance.
- Reduces the need for antibiotics, promoting sustainable farming

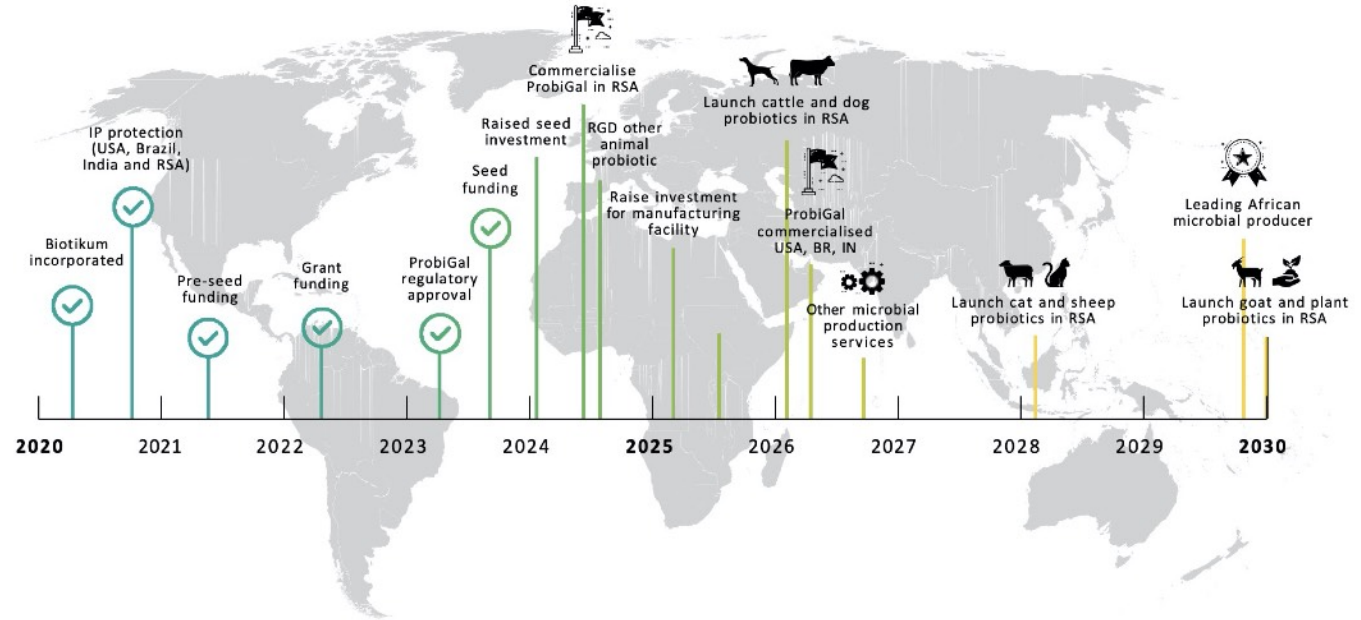

Biotikum's first product to the market

Key features:

- Chicken specific
- Multi-strain (6 different species)
- Decreases pathogens levels in the gut
- Enhances immune responsiveness
- Promotes microbiome development
- Produces digestive enzymes increasing nutrient availability
- Promotes sustainable farming, reducing the need for antibiotics

Traction to date & future goals

Meet the team

The ask

RAISING R5 MILLION

Milestone #1 (33%)

Aggressive marketing and sales strategy leveraging partnerships with poultry industry players, attending relevant industry conferences, and implementing digital marketing campaigns.

Milestone #2 (55%)

Initial working capital to start the business which includes outsourcing the manufacturing of ProbiGal for the first 2 years.

Milestone #3 (12%)

RGD other animal probiotics (farming and domestic) to expand product offering to capture a wider market share.

THANK YOU.
