Private contractor hired to remove hazardous waste

by Karen Rivedal
News Editor

I don't think we'll get rid of all the waste that we (UWSP) have this year, simply because there isn't enough money to do it."

Chemistry Prof. Steven Wright and Director of Risk Management Al Kursevski represented UWSP interests at an informational meeting on hazardous waste held in Madison last Tuesday, Nov. 4. At the meeting, representatives from all 26 four-year schools and two-year centers in the UW System met with spokesmen from Chem Waste Management, Inc., an Illinois-based firm that has been contracted by the system to dispose of its hazardous wastes.

Just how much hazardous waste UWSP lays claim to seems to depend on whom you ask in the system. Mike Schmoldt was hired by the UW System in October of 1985 to conduct an all-campus inventory of the toxic and hazardous material present. His survey, which was considered conservative, estimated a total of 274,706 lbs. of hazardous waste. UWSP weighed in at 5,680 lbs.

The UW System has received a \$501,000 grant from the State Building Commission to begin a hazardous waste clean-up. Due in part to new federal guidelines passed this September, the system must remove the waste that has accumulated or face heavy fines threatened by the Environmental Protection Agency and other state and federal regulatory agencies.

Kursevski, however, has challenged those findings and estimates a total of 600 lbs. of hazardous waste on campus. The conflict seems to revolve around an alleged difference between hazardous waste and hazardous materials.

Although \$501,000 may sound like a lot, the large amount of waste to be disposed of and the costs of a private contractor to do the job could rapidly deplete that resource. Dr. Wright comments on the situation:

Dr. Wright places the hazardous substances in two categories: "One is waste and one is material. Waste is what you've used and a hazardous material is a hazardous substance that hasn't been used yet. It's sitting on the shelf, but it's going to be used."

"We have \$501,000 to do the job this year and that won't cover it. We're talking about 13 four-year schools and 13 two-year centers. Everybody's got to get rid of their stuff."

"When you report the amount of hazardous material, it makes it sound like it's the amount of hazardous waste, and it's not."

They're trying to streamline the process as much as possible so that for the \$501,000 you get rid of the maximum amount of material. The people who are running the show seem to be doing a commendable job in considering this.

According to this argument, a hazardous material left setting in a stockroom could become dangerous, but generally speaking, it won't. Wright explains using the example of di-ethyl ether, a potentially hazardous organic solvent:

"There is ether around. People use it as a solvent in organic labs, so we have it on cam-

Regents plan to utilize Center System

by Debbie Kellom
Editor

The plan, approved last Friday by the Study Group on the future of the UW System, now goes to the Board of Regents.

With the UW System Board of Regents concerned about overcrowding at the System's four-year institutions, the UW Center two-year campuses are being

looked at more and more as an outlet to alleviate this perceived problem of the future.

In the regent's paper on the future of the System, "Planning the Future," the board proposes a plan to allow more ease for students to transfer credits from these institutions and offers other incentives for the stu-

dents than to stay enrolled for the full two-year term—or what is referred to as an associate degree. Currently, a disproportionate 63 percent share of the approximate 12,000 students at the Center's 13 campuses have freshman standing. Only 23 percent are classified as sophomores and 16 percent are spe-

cial students.

The regents' plan is an attempt to utilize the Centers' capability of handling more students. To entice more students to attend these campuses, which are located in cities ranging

EDITOR'S DESK

The Unknown Editorial

Editorials usually have a direction—a message. It's my turn to write the editorial and I'm stuck. I do not have any messages, no one I feel like nagging at, no issue I feel righteous enough to whine about. There are issues, though, which confuse me.

Every once in a while, as a kid, I'd get involved with picking on someone. This was rare and plenty of fun, since I got a good deal of crap myself, being a bit of a geek back then (complete with plaid, highwater bellbottoms). But while it was fun to help tie Myron the worm to Mr. Belcher's Saint Bernard, I naturally felt bad. It just wasn't the right thing to do and I knew it.

I get feelings like that today—conflicting viewpoints. They aren't on matters like arming the Contras or financial aid for beer, on which I have strong, well-based opinions. Instead, these are matters that I just don't know how to take.

Homosexuality, for example, confuses me. I have nothing against homosexuals. It's their life. Personal freedom, that's my motto, as long as it doesn't hurt anyone else.

Yet I was approached by a homosexual once and, man, all that understanding could have been Gerber baby food, creamed liver even. I was horrified. I had the willies. I was suddenly very unsympathetic to the homosexual cause.

I still have nothing against homosexuals, but there's no way I can look at two men showing more affection than a "good pass" pat on the back and feel any desire to have a beer with them.

I'm not afraid of catching AIDS; you have to work pretty hard to get that disease. It's just that homosexuality, when I see it, makes me nervous.

Again, on one level I realize that gays are not evil, sick, or even wrong. They just see things in a way that I can't or won't. And it makes me mad to see some idiot running around screaming, "Kill the faggots, kill the faggots," like some Ayotholla crusader.

It is serious conflict, though. I have two strong reactions kicking each other in the teeth. One is a strong desire to be fair and understanding and the other is a deep social fear of homosexuality. (Some might say: "Hey, Bernie, your hostility is a result of repressed homosexual leanings," upon which I give a more or less goofy look and say, "Fine, I'll keep repressing them.")

Women's liberation confuses me, too, though not as intensely. I'm all for the principles—equality and justice, equal pay, equal opportunities, equal rights to pay for dinner. Women still get a lot of crap dumped on them, too, like having to listen to Cathy Rigby talk about feminine protection.

But when did I have to suddenly start treating women like men?

This may come as a surprise to some people, but women are very, very different from men. That's why we don't understand each other. Women have that thing called PMS, when they turn into very sensitive werewolves. They also have larger breasts than men. And men get sudden urges to go out and pound their bodies to oatmeal. They also think of sex differently than women.

My chances of treating a woman as I would treat a man are about the same as Pat Robertson whopping me across the forehead and curing those terminal Point Bock runs.

All this results in some natural injustices. I'll open a door for a woman, which many consider demeaning. I rather enjoy gawking at pictures of naked female bodies, which many consider disgusting. And I don't fart around women either (some may argue that). This is certainly good for the ladies, but a major setback for women's liberation. It means that I'm not relaxed enough around women, that I often see them as outsiders, as different enough to deserve some courtesy.

I guess it's all a matter of how you look at things. Me, I'm just confused.

Sigma Tau: Not just for socialites anymore

by Lisa Strack
Staff Reporter

Sigma Tau Gamma, a social fraternity at UWSP, has started an incentive program to promote academic excellence among its members.

In addition to granting monetary awards to the student with the highest grade point average, Sigma Tau Gamma has now begun to give awards to all those members who have GPA's above a 3.0 and to all the chapter members as a whole, if they pull together and improve their group's cumulative average grade point.

These new awards amount to \$10 for each one-tenth of a point

that a member's semester GPA exceeds 3.0 and \$10 to every member for each one-tenth of a point that the fraternity's current semester average exceeds the cumulative average at the end of the preceding semester.

The fraternity is funding the awards from an account it has been building for several years with proceeds from the annual spring "Brat Fest." The awards, though, are not actual cash awards but rather, a credit that is given to the student toward payment of his fraternity dues. The dues are \$75 a semester, therefore, the most anyone can be awarded is \$75.

For example, the first recipient of the individual award was Kurt Hartwig of Eagle River

who received \$50 toward payment of his fraternity dues for a 3.53 GPA.

The chapter award was not given this fall because the members' grades, when pooled for averaging, went up less than one-tenth of a point.

Richard Burnes, assistant professor of accounting and one of three advisors of Sigma Tau Gamma, explained that last fall the chapter started thinking of ideas that would motivate its members to increase their academic performance. Awarding those persons with GPA's above 3.0 and awarding the chapter members as a whole if they improve their cumulative GPA were two ideas that Burnes just happened to think of. He then

presented the proposal to the chapter in January 1986. They decided to go with it, and last spring, the two new awards were established.

Burnes explained that the awards were designed because he and the other advisors were concerned that the fraternity members were not doing as well academically as they should be. They want the fraternity to be a leader on the campus academically, and with chapters in other universities doing very well, they see no reason why UWSP's chapter can't do just as well.

Burnes stated that many people have an "animal house" opinion of fraternities. Sigma Tau Gamma, however, doesn't want this image and feels that

other things are more important.

With the addition of the team and individual awards, Sigma Tau Gamma now has a total of five awards. Two of the awards, for highest semester GPA and most improved GPA, are part of the fraternity's constitution. The third is a \$2,000 scholarship that is awarded to a current Sigma Tau Gamma member from the Bud Steiner Memorial Scholarship Fund. Burnes explained, however, that not enough time has passed to tell if the two new awards will be effective. He hopes that chapter members will become motivated enough to work harder but feels that it may take a couple semesters before they really start moving in this direction.

Corner Market prices compared

by Gene A. Cisewski
Staff Reporter

Frequently, students level allegations at University institutions without discovering the facts. Of late, a number of charges have been leveled that students are being gouged by high food prices on the UWSP campus. This article is the first in a series which will try to sort the fact from the fiction with regard to what students are paying for nourishment at Point.

We start our investigation today by comparison shopping, beginning with a look at the "Corner Market" located in the UC.

If you're looking for a soda to quench your thirst between classes, the Corner Market is the last place in Stevens Point you'll want to stop if economy is an issue with you. A can of Classic Coke (or any other brand name soda) is 60 cents. Down the hall and around the corner in the UC Concourse it's

55 cents. At convenience stores such as the Campus Corner on Main and Michigan and the Eastside IGA, you'll find your best bargain at 40 cents a can.

If you're looking for a simple meat and cheese sandwich, the Corner Market is again the most expensive place to shop. A bologna and cheese sandwich at the Corner Market came in at \$1.34. Meanwhile, comparable sandwiches at the two convenience stores cited above were 99 cents and contained more meat.

If you're looking to nuke a sandwich for that hot, melty cheese effect that a microwave oven can produce, the Corner Market is again the most costly. At \$1.65 for a ham & cheese on a bun, the UC is considerably higher than the 99 cents you'll pay at either competitor.

If you've got a craving for something sweet, how about a slice of pie? You'll pay 85 cents for a slice at the Corner Market for a slice of a real pie. At the

convenience outlets, you'll have to settle for Dolly Madison or Hostess pies, but you'll only pay 59 cents.

Finally, we found a category in which the Corner Market was on par with the competition: milk. Everywhere we've shopped so far, the half-pint cartons of milk were 45 cents.

With the exception of milk, the Corner Market in the UC is the most expensive place to shop. Their prices ranged from 20% to 66% higher than their competition for the same or similar products. Often, the less costly items at off-campus competitors proved to be of higher quality. Next week, we'll try to find out why this situation exists.

Is it worth the bucks?

Faculty re-examines SMART package

by Elly Watson
Staff Reporter

The controversial SMART package was debated at the Nov. 5 Faculty Senate meeting.

Last spring's proposal to introduce an integrated software system has yet to receive full support from the student body or faculty.

The faculty agreed to move ahead with further examination of a computer software system, although it was done with a great deal of skepticism. Not everyone was confident that the SMART package was the best choice. Don Dietrich, Chairman of the Academic Affairs Committee, (a standing committee of the Faculty Senate) assured the Senate that other programs had been, and would continue to be explored.

The one thing that the Senate agreed upon was that the package would be a comprehensive one, meaning that if and when an integrated software system is introduced at UWSP it will be standard throughout the campus.

The Student Government Association was there to announce its opposition to the package. SGA felt that the package was too costly for students and too difficult to be taught en masse to the faculty and the students. SGA also questioned the systems (overall) academic advantage.

The proposed package would cost \$85 for one semester, \$90 for two semesters, and \$100 for four semesters. The money for the package would be returned in full if the package were returned unopened. The reason for the mandatory purchase

even if a student may not use it, is due to copyright legalities. It is feared that without such a mandate, the disks would be copied onto other disks and passed off as the authentic package.

The SMART package has already been introduced to UWSP. Based on attitudes expressed at the Senate meeting, it appears the basic premise of a computing environment would be welcomed by students and faculty alike, if more details could be released. For this reason the entire package was sent back to the Academic Affairs Committee for further examination. The actual mandate for students to buy a computer package remains some time and several more heated debates away.

Regents, from p. 1

from Wausau, Waukesha and Sheboygan to Baraboo, Rice Lake and Marshfield, the regents plan to allow students transferring from these schools to have their credits accepted in full. Part of this plan is to establish a System-wide credit rating so students courses from different campuses will follow a uniform system, intended to ease the students' movement from campus to campus.

Another aspect of the proposal is that students graduating from these two-year schools with an associate degree will be considered as having fulfilled the general education requirements at the four-year schools.

This is intended to allow students easier access to junior and senior level courses. This is currently not the policy of most System campuses. The plan also calls for the Center campuses to streamline their course offerings to avoid duplication.

The regents' proposal for the four-year institution calls for increased tuition, stiffened admission standards and likely enrollment caps, which student lobbyists fear would force future students to unwillingly start their education at a two-year campus.

Newly appointed UW Center System Chancellor Steven Portch, however, said the plan could help both the two- and four-year systems, but cautioned against the perception that the Centers could handle a great influx of freshmen.

"The plan could help improve quality everywhere, because at the Centers, the longer students stay the better they do," Portch said in an interview Monday. "Students who stay 2 years at the Center do as well if not better as students in the four-year schools."

Portch said the average size of classes at the Centers is 20

Cont. p. 4

Hazardous waste, from p. 1

pus. Is it five or six years old (the time at which either would become hazardous)? I doubt it, because we're using it all the time."

Misconceptions concerning exactly what hazardous waste is may exist. Hazardous waste as defined by the new guidelines accumulates all over campus, not just in the chemistry stock-room.

Kursevski describes hazardous waste as "a myriad of things" including solvents like paint thinner used in maintenance, waste from chemistry labs, research done by faculty at UWSP to a small degree, and material used in the Fine Arts Building and the grounds area of the CNR Building.

Under the new guidelines, all of these things must now be stored and removed within 90 days. In the past, UWSP as a small generator was able to store waste indefinitely. The novelty of the present situation contributes to the problem, according to some university officials:

"The difficulty is that this is a new process for everybody," says Wright, "because the new regulations are coming at us in droves. We've never had to do anything like this before."

"Now we've got to gear up and do it. In order to do a good job, you've got to take small steps at first, leading towards a smooth-running operation."

"We're taking some very good steps right now. It's just going to take some time and some money."

Drums are already on campus to begin the removal process, but it may be some time before anything is removed. UWSP officials must first conduct another inventory of hazardous waste on campus and send it to Mike Schmoltd, the UW System Hazardous Substances Management Officer.

Schmoltd will then use these figures from all the campuses to design a priority list. Those universities determined to suffer the most severe hazardous waste build-ups will be attended to first. It is uncertain at this point where UWSP will stand in the listing.

The inventory, which will be conducted by Kursevski and Wright, is scheduled to begin within a few days.

Fleishauer as new Academy president

Frederick W. Fleishauer, a circuit judge in Portage County, was recently chosen to be the president of UWSP's Academy of Letters and Science for the 1986-87 school year. Fleishauer, who lives in Stevens Point, has been a member of the Academy since its inception in 1983.

The Academy of Letters and Science is an organization who's purpose, according to its charter, is to recognize "civic contribution, intellectual and academic interest, professional achievement, and significant support by individuals in the promotion of liberal studies in the UWSP service areas." The organization has put notable effort into achieving these primary goals.

by Janelle Crooks
Staff Reporter

Howard Thoyre, currently a math professor at UWSP, was dean of the College of Letters and Science in 1983 and is responsible for the creation of the Academy. According to Thoyre, the Academy has done several things to fulfill its purpose.

example, it sponsors a public lecture series in the fall, honors students, faculty and community leaders in a spring banquet, and offers career counseling programs intended to promote the value of a liberal education.

The first lecture of this year's series was presented Nov. 6 by UW-Madison professor Michael P. Petrovich.

Currently, the Academy consists of 15 members who were

recommended by the faculty of the College of Letters and Science and appointed by the dean of that college. Members are selected because of their liberal educational backgrounds and success within their given fields. Fleishauer was elected to his position by the Academy's four-member executive board, as was the organization's new vice president, Caroline Fribrance. According to Fleishauer, the Academy hope eventually to develop a four-year rotation of membership.

The Academy of Letters and Science is currently funded by private contributors.

Regent plans, from p. 3

compared to the over 30 average for the rest of the System. This allows for more professor-student interaction and enhances the quality of the education.

He said this, coupled with the lower tuition for the Centers, could make the campuses more attractive for some students. "Students going to Centers can save, in costs, one year of college," he said.

Portch said that many Center System students tend to transfer to the four-year campuses after one year. This could be due to social reasons or the current credit transfer policy, which students might be worried about, he said. He said the Center's part of the regents' plan would be to ensure that students stay at the Centers another year and receive their associate degrees.

"We do have the room for more students at the sophomore level, but I don't know about accepting more freshmen. Our part of the deal, as I understand it, is that we'll take more sophomores," he said.

Portch added that he didn't feel the regent's proposals would force students into choosing a center campus over a four-year campus.

"I don't think what the regents are talking about is shifting students from Stevens Point to, say, Wausau. What we're talking about is those who go to a Center campus would stay here a year longer," he said. "We don't want students who don't want to be with us...that doesn't do either of us any good."

News in brief

The Bud Steiner Memorial Scholarship has raised \$18,000 as of September in answer to a challenge posed by Steiner's mother, Mrs. Turney, of Park Falls, Wisconsin. Steiner, an administrator in the Student Life Division, died on a fund raising bicycle tour of Canada.

There will be two annual scholarships coming from the fund, each consisting of \$2000. One will go to a Sigma Tau Gamma upperclassman with an overall grade point average of 3.0 overall. The other scholarship will go to an upperclassman who majors in Health Promotion Wellness, also with an overall grade point average of 3.0.

At the November 6 meeting of

SGA, it was reported that 32 runners ran a marathon of 115 miles to Madison in support of the proposal for the plan to remodel the Health, Physical Education, Recreation, and Athletic Building. Along with presenting the proposal to state officials, the runners presented the petition that was circulated among students last week. The petition in support of the proposal contained more than 2,400 student signatures.

The Office of Financial Aids in the Student Services Building moved across the hall as of Friday, Nov. 7. Some student services offered by Financial Aids may suffer some subsequent delays due to the move.

Stephen Feinstein, UW-River

Falls professor, gave an illustrated program entitled, "A Modern View of China," last evening in Room 324 of the Collins Classroom Center.

The presentation was open to the public and gave area residents an introduction to the places in China they could visit by participating in a study-travel program that will be held December 26 to January 14.

UW-Stevens Point campus director for the trip is political-science professor Jack Oster. According to Oster, this is the first time Stevens Point has been involved in the program and he is hoping to gain much interest.

Anyone interested in the seminar can contact Oster at 346-4112 for further details. Application deadline is November 15.

AS I SEE IT ...

Questions about Nicaragua

by Ed Torpy

Last week, the Pointer ran two opinion pieces concerning U.S. involvement in Nicaragua. The debate centered on whether or not the U.S. should continue to fund the Contras in their battle against the government of Nicaragua.

Deb Kellom argued that unforeseen circumstances could draw the United States deeper into the Nicaraguan war just as it was drawn into the Vietnam War. To illustrate her point, she used the example of Eugene Hasenfus and concluded that the U.S. should abandon its current course of action in Nicaragua and consider diplomacy instead.

While I agree with Deb's conclusion, I think her argument is a little weak. There are better reasons why the U.S. should stop funding the Contras, and besides, the U.S. is more than capable of staying out of a conflict if it really wants to.

The other side of the Contra aid issue was represented by Gene Cisewski. Gene admitted that the aid is not enough to expect a Contra victory. In his conclusion, he suggested that the sole purpose of the aid might be to keep the Sandinistas too busy in their own country in order to prevent them from aiding Marxist rebels in neighboring countries.

However, when reading Gene Cisewski's article, I noticed two things which seemed out of place. The first was an entire paragraph devoted to explaining that the U.S. welcomed the Sandinistas when they came to power and gave them a considerable amount of foreign aid during their first 18 months. The logical question is 'what happened to make the U.S. cut off foreign aid to the Sandinistas?'

On January 23, 1981, the Reagan administration suspended U.S. aid to Nicaragua, only three days after Ronald Reagan took office. It would seem obvious that the major event that

caused the U.S. to take a 180-degree turn in its policy towards Nicaragua had little to do with anything Nicaragua did. The reason for the change in policy was the change in U.S. presidents.

The second part of Gene's article which seemed out of place was a lengthy discussion of the difference between human wishes and human rights. The question here is 'why spend so much time saying that things like the level of industrialization, the rate of economic growth and the literacy level of a nation's people are wishes which should not be concerned with human rights?' The an-

swer is simple; all these things have seen dramatic improvement since the Sandinistas came to power. The fact of the matter is, most Nicaraguans are better off now than they were when Somoza was in power. This is one promise that the Sandinistas did keep.

One common misconception about Nicaragua is its government. It is often thought that the Sandinistas are in complete control. This simply is not true. The Sandinista National Liberation Front is only one of seven political parties. And when one considers all the improvements that the Sandinistas have made, it's surprising that they have less than a two-thirds majority in the Nicaraguan National Assembly.

The final question that needs to be asked is 'what has the Reagan administration's policy toward Nicaragua established?' The current policy has succeeded in turning a friendly country dependent on U.S. aid into an enemy. By aiding the Contras, Ronald Reagan has forced Nicaragua to seek military and economic aid from Cuba and the Soviet Union. The only thing Reagan's policy has achieved is to turn a friendly country into a Soviet satellite.

For sale: UWSP students, two for a penny

by Gene A. Cisewski

You may have noticed that over Halloween you got two pieces of "junk" mail. One was from a couple of students telling you that Dave Obey should be your congressman because he is against the 21 year old drinking age. The other letter came from Student Government Association

President Lisa Thiel telling you that the following Tuesday

would be election day. The contents of those letters, however, is not the subject of this article. The focus here is on how both of these letters got to you.

If you still haven't chucked them into the cylinder file, you might want to look at the address label on each of your let-

ters. That's right, the labels with your name and address are identical on each letter.

How does it come to pass that Dave Obey and Lisa Thiel have you matched?

The UWSP Office of Records and Registration is in the mail order business. At the rate of two students for a penny, you can have labels printed by the University for all the students

enrolled. On the other hand, if you only want Fine Arts Majors (or any other major), you can buy just that list. Or, maybe it's just freshmen that you want to write to - whatever category, it's still two students for a penny.

So what's the big deal? Well, if you're Dave Obey and you know the majority of citizens in your district favor a 21 year old drinking age, you won't stand up for that issue in news releases or in your commercials. On the other hand, you can send a letter to 9,300* students who you know are on your side. Then you get out a message that needs no public debate.

In another way this list is helpful, let's say you're the Marine Corps' ROTC recruiter. You buy a list of all freshmen males, your most lucrative market. You reach them with a message designed just for them.

And, if you're an SGA President with controversies in the campus media, you have a vehicle to reach out and touch someone in your own, personal way. No matter who you are, you now have a way to market your product to a targeted audience. Invading the privacy and mailboxes of UWSP students is now made easy with the mail order operations of the Records and Registration Office.

Smarter than you think

by William Wresch

In a recent issue of the *Pointer*, Professor Seepsenwol voiced a series of concerns about SMART, a computer program currently being evaluated for widespread use on this campus. Needless to say, there are two sides to every story, and in several instances his comments were either incorrect or incomplete.

In "Problem 1:" Professor Seepsenwol asserts that SMART could be purchased for far less money if the University paid for it rather than the students. His figures may be wrong, but he is not the first to want the University to shoulder this burden as it has in the past. In a beautiful world, this might be the best solution. But we have just elected a governor who has promised to cut the University budget 5%, and we are nearly at the end of our Title III grant period. The question is always, where will the money come from? If not from student fees, will it come from class fees? If not from there, can we run to Madison to ask the Governor for it?

Professor Seepsenwol also asks a series of questions about Academic Computing's motivation for requesting the student fee. He asks, "Is Academic Computing going to get something off the top?" Surely he doesn't mean to suggest any wrong doing on their part. I assume he will want to clarify himself on this point.

In "Problem 2" Professor Seepsenwol notes that "there are several good word processing programs that are FREE." This is a very pleasant thought. Perhaps he can get some company to send us 10,000 free copies so we can save our money. What I think he means is that he would prefer a "shareware" program. These are programs that can be copied and tried by users, with the hope that people who like the program will send the authors a small amount of money. There are other campuses who use this approach, but the ethics are questionable. To be fully honest, wouldn't we want every student who uses the program to send the authors \$15 or \$20? Even if we decide not to pay the people who wrote the program (hardly an ethical approach), there is the question of manuals. Most manuals cost \$20-\$25. So this is not the perfect solution either, and it still leaves us without spreadsheets or database.

It is also in this "Problem," that Professor Seepsenwol makes a comment about "inventiveness in the face of honesty." I assume he will want to clarify his stand on software piracy.

In "Problem 3," Professor Seepsenwol complains that SMART has 11 disks. Others have also expressed concern about this, but I have never been able to see why. Three of the disks are tutorials which show users how to use the word processor, spreadsheet, and database. What's wrong with that? Three of the disks simply customize the program to work with various campus printers. Students would probably only use them once to customize SMART to the particular computer they are using. The five remaining disks are for startup, word processing, spreadsheet, database, and graphics. If you want to use the word processor, you put in the word processing disk. If you want to use the spreadsheet, you put in the spreadsheet disk. What's the problem?

Professor Seepsenwol says it would take four disk moves to generate graphics from the spreadsheet. I assume this is a typographical error. If you are using the spreadsheet and want graphics, you take out the spreadsheet disk and put in the graphics disk. Period.

It is true there are integrated programs that keep all their programs on one disk. As you can imagine, those programs aren't very expensive. SMART requires five main disks because SMART fills five disks with a wider range of capabilities than any other integrated package.

Would it be more convenient to just put SMART on the network? Sure, but then we get back to the question of who will pay. In the meantime I use SMART without a network as do most faculty. We don't have any real problems.

In "Problem 4:" Professor Seepsenwol makes some suggestions for courses about SMART. I assume he will present those suggestions at a meeting of the Computing faculty, but in the meantime I would suggest that much too much is being made of training in SMART. As I said earlier, three of the disks in the package are tutorial disks. There are also very clear tutorials in the program manuals. Numerous people on campus have taught themselves how to use SMART just through the tutorials. The tutorials aren't exciting or fun, but they are clear and thorough.

Allow me to close with a comment about money. It is clear students don't want to pay for computing software. They haven't had to pay in the past, and they naturally want things to stay that way. I could make an ironic comment about how they have money for swimming pools but not for educational materials, but let's be honest—this is just normal behavior. But it does create a problem. We have an opportunity to dramatically improve the computing resources of this campus, but it will be very difficult without some contribution from students. Maybe the taxpayers of this state will solve our problem and supply additional money for equipment and materials, but I wouldn't bet on it. The last election made voter feelings on that matter quite clear. If they do cut us back, how do we respond?

If student fees aren't acceptable, could we use class fees? This sounds like a good idea but has been against Regent policy for years because such fees tend to channel students into courses based on their ability to pay. Middle class students can usually come up with an extra 15 or 20 dollars, but what about poor students? Might they be forced out of business or computing or other technical majors because of the added costs? Could they be forced to take only those sections of English which don't use the computer? Is this fair?

The campus discussion of SMART has been useful in that it has gotten us all thinking about computing resources and how to maintain the excellent level of access we currently have. Within the next few weeks we will make the final decisions on how to proceed with the next stage of computer growth. While we do this however, we should remember that the piper always has to be paid. The costs for additional computing resources will have to come from somewhere.

Put your degree
to work
where it can do
a world of good

Your first job after graduation should offer more than just a paycheck.

If you're graduating this year, look into a unique opportunity to put your degree to work where it can do a world of good. Look into the Peace Corps.

Speak with a Peace Corps Rep!
Interviews will be held in the Placement Office on November 20. Be sure to sign up for an interview today. For more info call: 1-800-328-8282.

Students protest prior-approval

by Karen Rivedal
News Editor

Both UWSP and Marquette University require prior approval of material posted or distributed on campus. Recently, a group of Marquette students representing the Progressive Student Organization have challenged the policy as a violation of students First Amendment rights and begun a protest on campus.

Marquette had been refused to allow the student organization to distribute information on birth control to students, because university officials feel this is contrary to the school's strong Catholic belief system.

The policy of UWSP, a religiously unaffiliated, public institution, is considerably different than that of Marquette's. However, material submitted by student organizations for posting are still subject to review and possible rejection by university officials.

Jerry Lineberger, director of University Center Services, developed the prior-approval policy for the UC, Debot, and Allen Centers. The Faculty Senate then adopted this policy for the entire campus. Lineberger describes the situation and its limitations:

"In short form, they (the Faculty Senate) adopted the framework of the University Centers' policy for the campus. But we can't police the campus and we don't pretend to, so it's really up to the areas to be concerned with what belongs up and what doesn't."

Materials for posting must be affiliated with an on-campus organization. This is, according to Lineberger, "so we don't have Shopko and K Mart and all the retailers in town putting things up on the boards."

Beyond this, UWSP also bans materials in "extremely bad taste" or those that "promote alcoholic consumption."

When asked if the UC has banned any materials, Lineberger concedes:

"You always have different standards and different tastes. Some people will put up whatever they want regardless. But that's just reality."

Reality or not, Marquette students have chosen to protest the ban placed on their materials.

LETTERS

Bobby's back

To the Editor:
A WELCOME HOMECOMING FOR UWSP GRADUATE

Everything was going fine, my flight was early in Wausau on October 9th, via Louisville/Chicago. My friend was also on time to pick me up at the airport. We traveled to Bruiser's where I was welcomed by a number of friends. The night was going great, for I sure hoped it would on account of my leaving for Eau Claire on Friday before returning to Louisville, Kentucky, on Sunday. It was then about 1 a.m. when a close friend and I walked out of Grin and Beer It and were arrested for open intoxicants. I was shocked!!! It was as though we had been picked up for a murder of some kind. I was then locked up like a criminal because I didn't have the \$130 to pay the fine.

You (the Stevens Point Cop) who picked us up really have something to be proud of. You made your quota that evening. Congratulations!! I'm sure glad that I work on a quota basis as a salesman to have been able to afford to pay back a friend for my bail. You, the Stevens Point Police should welcome the college students who bring in revenue to the city and stop harassing them as though they are criminals.

Yours truly,
Robin Engel
UWSP Graduate
Louisville, KY

Reach out and touch someone?

An emergency happened—a stroke and then a death of one of my relatives, 200 miles from UWSP. The relatives were contacted, including my own family, who in turn tried to contact me. Naturally, they picked up the phone and got a busy signal. No big deal, except that it was busy for the next four hours until after 11:30 p.m. when they finally gave up for the night. The next day they were diligently trying to gain a connection only to run into the same busy signal. They grew increasingly frustrated. "The darn kid and her roommate must be sitting on the phone all day." But we weren't.

All this semester people calling me from off-campus have mentioned that they were having problems getting a hold of me and were getting a busy signal for extended periods of time. So I checked on the phone. I called the number for phone problems on campus. I was told that a busy signal, while my phone was not in use, meant that the campus circuits were over-loaded.

I would like to see the capacity of the campus phone system

improved to better meet the needs of phone users. In my case, I missed a very important call which I would have received had my family been able to get through. I'm the first to admit that I am angry with the system and am writing this letter in part to express my dissatisfaction. Secondly, I sincerely hope that my letter will inspire others to acknowledge and pay attention to the problem. I've heard many people tell of similar phone situations. The phones in each individual room are a big step, but what good are they if people can't get through?

I encourage all of you who have been affected by this to call x-2562 and tell them you would like to see improvement. No one can see the extent of the problem unless we tell them and ask for improvement. Let's let them know.

Valerie Stone
312 South Hall

To the Editor:

Is it possible that it has happened again? You guessed it, the *Pointer* "accidentally" missed relevant facts. In Karen Rivedal's article in the November 6 issue of the *Pointer* she "missed" many of the important facts of the issue concerning the possible \$10 fee for a new physical education facility.

Karen Rivedal failed to mention that the present athletic facilities were intended to serve 4500 students and now "accommodates" 9300 students. She also failed to mention that UWSP is in direct competition with UW-Platteville for the new facilities. Another missed fact is that UW-Platteville has already passed a similar amendment. If Student Senate hadn't passed their version of this amendment, it would almost assure UWSP of not receiving the money for the new facilities.

Karen Rivedal also writes "the success or failure of the petition on campus should be an accurate indicator of the students' willingness to pay the additional fee." Sorry to burst your bubble Karen, but 2300 signatures were collected in the first four days and more are still to come.

I truly hope this trend of "missed" facts does not continue. I am extending an invitation to Bernie Bleske, Debbie Kel-

lum and Karen Rivedal to attend a Student Senate meeting, with the hope that they will then be able to report intelligently and accurately, for a change.

I wouldn't go so far as to say the *Pointer* is practicing yellow journalism; but it is definitely turning beige.

John Daniels
Student Senate

Oh yeah?

To the Editor:

After reading Student Senator John Daniel's entertaining interpretation of the Nov. 6 article on a possible student fee for pool revisions, I feel compelled to explain the situation.

You missed the point of the article, John. As evidenced by its title, "Student Senate Votes for Additional Fee" its focus was a recent decision to require a student fee for a new pool. The facts concerning additional Phy. Ed. revisions were strictly secondary and treated as such. Maybe if you used some note cards, John, and worked on matching the title of articles with their contents, you'd find this reading business less confusing.

Here's another idea that might help. Check the *Pointer* that came out two weeks ago and look on page three. Here you will find a very complete article written by Senior Editor

Bernie Bleske entitled "Extensive Pool and Phy. Ed. Revisions Planned." This article mentioned some of the exact phrases you wanted me to repeat last week. I think if you use the title-article matching skills we talked about earlier for this piece, you'll be much more pleased.

Lastly, in regard to your thoughtful apology concerning my alleged "burst bubble"—heck, think nothing of it, John. I was unaware that I had inflated a bubble much less had one popped. The statement that's got you in such a tizzy—the one about the success or failure of the petition being an accurate indicator of student willingness to pay the fee—was intended to mean simply that. It was not a prediction of any sort, nor was it an expression of personal opinion. Don't dig so deep John. You only confuse the issues.

Try to keep in mind that it is not the intent of the *Pointer* staff to somehow sabotage the noble aims of UWSP's Student Government Association with any manifestations of our—what's the catchy color phrase this week? oh yeah—beige journalism. That's in next week's news stories. (Incidentally, for the coming winter season, could I suggest some journalism in natural earth tones or maybe some warm pastels?)

Sniffles and sneezes? Welcome to the cold season

by Frank Bosler
Staff Reporter

"Achoo!" Bless you. If you haven't got one already you're one of the rare ones. The cold season is here and sniffles and sneezes abound. Will dry feet keep you safe? Will vitamin C do the trick? Just why do we catch the dreaded "common cold"?

Even though people don't die from colds and seldom develop serious complications, colds are the layman's handiest reproach for the scientist: "If you can put a man on the moon, why can't you do something about the common cold?"

A cold is by definition temporary and self-limiting. The symptoms vary but generally include the usual sore or scratchy throat, sneezing, hoarseness, coughing, a runny nose - the blues.

Scientists know more than they used to about how colds are transmitted and about the viruses that cause them. About 200 different cold viruses exist. The sure way to "catch" a cold virus is to get a good dose of it directly in the upper nose, where the temperature and humidity are ideal for its growth.

Three factors influence transmission of a cold: the amount of time spent around the cold sufferer, the volume of his secretions, and the amount of virus in them.

No one is quite sure what makes a person susceptible to colds in general or to any particular cold.

Most people believe that being overtired or under emotional stress can "bring on" a cold. Others blame industrial pollu-

tion. There's no proof that I have seen one way or another. There is evidence, however, that smokers are more likely to catch colds than nonsmokers.

What about the weather? Colds do occur seasonally - peak periods in the United States are September, October and early spring - and it's hard to keep from blaming weather. But researchers have never been able to positively connect cold viruses with the weather. Getting chilled or undergoing rapid weather changes does not make you catch a cold.

One study found that 40 to 90 percent of persons with colds had the virus on their hands. The cold bug was shown to survive outside the nose for up to three hours. Cold viruses were also found on about 15 percent of nearby objects such as doorknobs, telephones, playthings, coffee cups, and glasses. Touching these objects can transmit the virus to the hands of a healthy person, and if this person puts hands to nose, the virus will probably multiply. Rubbing the eyes may have the same effect, since the virus can pass through the tear duct into the upper nose.

So how does one go about avoiding a cold? The most effective way to keep a cold from spreading is washing. If you have a cold, remember that it spreads via your fingers, so wash them frequently in soap and warm water. If you are around people with colds, in addition to washing, try to avoid putting your fingers to your nose and eyes.

Though megadoses of vitamin C have been highly touted as a means of "heading off" a cold, I have seen no clinical data that

has shown vitamin C to be more than marginally useful, (megadoses of vitamin C can cause diarrhea and other problems). Also, I have not seen data that states that over-the-counter cold preventives are significantly effective.

Most colds get better by themselves and require no visit to the doctor. But you should seek professional advice if any of the following symptoms occur: oral temperature above 103 degrees, severe pain in the chest, head, stomach, ears, or enlarged neck glands, sore throat combined with oral temperature above 101 degrees for 24 hours, oral temperatures that remain above 100 degrees for three days, and a fever, sore throat, or severe runny nose that persists for more than a week.

So what is the best way to manage a cold? Listen to your body, take care of yourself and follow the suggestions below.

1. Don't automatically "take something" for a cold.
2. A salt-water gargle is helpful for sore throat symptoms.
3. Saline nose drops (1/4 teaspoon of salt to eight ounces of water) may clear your nasal passages.
4. Hot drinks are comforting.
5. Bed rest will not cure a cold, but if you feel exhausted, rest.

Sorry, there is no miracle cure or home remedy that cures the cold. But there are loads of things that make you feel better and help pass the time. My prescription: a box of tissues, a bowl of chicken soup and someone that wants you to recover.

So until next time, be well.

Photo by Paul Becker

Chicken soup Study confirms benefits

Chicken soup has long been a parent's favorite home remedy for the common cold. While the youngster lies in bed, littering the floor with baseballed Kleenex, chicken soup is delivered to the bedside.

There is a degree of faith invested in that chicken soup, as if some mystical or magical cure-all is in the broth.

But surely the medical value of chicken soup is questionable. After all, it usually comes in a tin can and sells for 49 cents. Besides, scientists have been studying the common cold and what drugs assist the body for years. Surely if something as simple as chicken soup helped fight a cold, scientists would have tested it and reported their findings.

They have. Researchers at Mount Sinai Medical Center in Miami confirmed in a recent study that chicken soup does benefit the common cold.

In an article in the medical journal CHEST, Mount Sinai researchers claim that chicken soup increases both the rate and time that mucus moves through the nose. The result is that the virus, by being carried out with the mucus, has less time to reproduce and grow.

Researchers, however, were unable to pinpoint the specific substance that contributes to this action.

"We believe that chicken soup contains some yet-undiscovered substance that produces an effect beyond the soothing effect of the soup's hot vapor," a Milwaukee Journal article quoted Alex Chediak, a respiratory specialist at Mount Sinai, as saying. "Researchers have compared the effect of hot water and chicken soup on mucus flow and found the chicken soup causes it to flow faster, longer."

Confessions of a chocoholic

by Gene A. Cisewski
Staff Reporter

You won't find red eyes and weight loss as a symptom here. In fact, it's just the contrary. Weight gain and glossy eyes are a symptom of chronic chocoholism. With the approaching holidays, symptoms are flaring.

I've already suffered my first binge. It started simply enough, just a week ago. Figi's catalogue arrived in the mail. (You know, Figi's, like the Wisconsin Cheeseman and those other companies who will send cheese and sausage and fruitcakes to your loved ones on holidays.) My fantasies were peaked on page 55 when I spotted the Chocolate Torte.

My eyes glazed over as I read. "Heavenly chocolate cream is interwoven with fresh, moist - chocolate cake. Then...doused with the best chocolate covering, hand-decorated and voila - a 16 ounce triple chocolate extravaganza!" I couldn't resist. So, under the

guise that I had to try this if I really were to send it as a gift to a loved one this holiday season, my order went out in the next morning's mail.

Rationalizing aside, it arrived yesterday (fast service). It's gone now.

No, I didn't have any company and you're right, I didn't share. In a little over 24 hours (all right, all right, so "a little over" is only 5 minutes), I devoured a pound of triple chocolate torte. The remorse is starting to set in now, and that's why I've chosen to do my penance by writing this word of warning to you. The holidays are coming - look out for the chocolate.

I guess that the only way to completely purify my soul is to come clean with the most sordid of details. Like any addict, I, the consummate chocoholic, ordered the torte on credit. That's right, Figi's will give me until Valentine's Day to pay. But the cake is gone, and I may want more. So much for the budget, it'll be another month before I can hook up the cable.

Surviving as a couch potato

by Brenda Bergelin
Staff Reporter

So, it's happened again. Some sick slob sneezed in your face and now you're sick. Welcome to Health Hades.

Health Hades is not the meek land of pabulum ailments where headaches and tummy aches reign. No, Health Hades is coughing up your lungs and aching from the roots of your hair to the cuticles of your toenails. It's being Siamese twins with a box of Kleenex. It's sounding like Mickey Mouse whenever you talk, or more accurately croak. Perhaps most horrifying, Health Hades is being confined to the couch with absolutely nothing to do while you wheeze your way through another 24 hours.

Are you in Health Hades? Are you a runny-nosed couch potato in need of some creative ways to survive being sick? Then why not try the following suggestions while you wait for Prince Charming, alias health, to ride back into your life and renew you with the kiss of the healthy life?

-Eat all the rotten, disgusting food in your refrigerator; scary things like lima beans, liver and two-week-old tuna casserole. What the heck, you can't taste it anyway.

-Build something creative out of used Kleenex. With a little thread and a needle, you can make some rather festive Hawaiian leis for a post-couch potato "Welcome Back to Life" party.

-Breathe in the face of someone you hate.

-Call home. Sound as sick as possible. Get long-distance pity and, as fast as you can say UPS, get a Care package from Mom stuffed with Comtrex, Kleenex and Almost Home Cookies.

-Take a Comtrex. Drag yourself to class. Experience the drug-induced sensation of having your entire body fall asleep.

-Call an enemy on the phone. Tell him off. Call him a slimy dog face. He won't know if it's you or Mickey Mouse.

-Legitimately skip class for once.

-Watch TV from 8:00 a.m. until 11:00 p.m. Memorize the words to every commercial.

Write a commercial jingle sing-a-long.

-Call up a friend. Wheeze into the phone. Get more pity. Hint around that you're too sick and weak to do three week's worth of laundry or clean your bathroom. Hope your friend catches the hint. Hope your friend's a true friend.

-Try some of those homemade remedies your mother swore by when you were little. Gargle with salt water. Or some chicken noodle soup. Or be original: eat salt water and gargle with chicken noodle soup. Smoothe your neck with Vicks Vapor Rub then wrap a sock around it.

-Worry that the Tylenol tablets you are eating like candy have been tampered with.

-Write Grandma and Grandpa. Tell them you are sick, really sick. Hope they spread the word around the family tree and that, in return, you will receive 23 Care packages from various aunts and uncles.

-Drink orange juice. Wonder whatever became of Anita Bryant.

-Time the intervals between sneezes.

Conf. next page

Sprechen Sie Deutsch in Stevens Point?

by Julie Kirehloff
Staff Reporter

Have you noticed anyone speaking a foreign language on campus lately? Yes, there are several foreign students here who speak their native tongue. But I'm talking about American students, maybe friends of yours, who are speaking German.

For the first time at Stevens Point, a special wing in Roach Hall has been established where residents are encouraged to speak only in German. The encouragement comes from a native German, Korinna Trautmann, who is here for the year with a program between the German government and the state of Wisconsin.

The German program PAD, Pädagogischer Austausch Dienst (which translates to Pedagogical Exchange Service), coordinates the exchange of German and American teachers. Trautmann is a participant in PAD.

Trautmann is from West Berlin, where she taught English to 16- and 17-year-olds. To enhance her knowledge of English and to become familiar with American customs, Trautmann applied to PAD last February.

After a meticulous application process and interview in Bonn, Germany, Trautmann was accepted and attended several seminars and orientations dur-

ing the summer and upon her arrival in Milwaukee. PAD has coordinated the exchange of German teachers for the past three to four years. Past participants now help with the orientations.

Trautmann is trying to teach UWSP German students something about Germany that they never knew before. At the same time, she is learning from the students through their reactions and attitudes. It's an interpersonal learning experience because people learn from others as well as from themselves, Trautmann said.

In the language lab of the Collins Classroom Center, Trautmann holds conversation classes in groups of five. They discuss a variety of subjects dealing with cultural aspects of Germany. "It creates a special interest," said Trautmann. "Because I am a native German, people are more responsive to my questions. They realize I really want to know."

Many students are interested in corresponding with German students and Trautmann has been busy trying to establish a "pen pal" system between German and American students.

Currently, there are six German people in Wisconsin with PAD. Most of them assist teachers in high schools or elementary schools. Trautmann's situation is unique in the respect

Stevens Point music scene Are there any grassroots here?

by Jon Pike
Staff Reporter

Last week's Pointer article "Eau Claire Music Scene" examined what happens to underground music and bands when actively supported by a local scene. This week, we'll look at the opposite case. In other words: What happens when people insist on making underground music, but there is no scene to support it?

Unfortunately, I'm talking about Stevens Point.

Ask people not from Point what they think this area lacks. If they're from Madison, Milwaukee, Eau Claire or even northeast Wisconsin, chances are, they'll say local bands. There are few bands from Stevens Point who play in Stevens Point.

You would think that this would be discouraging to people who want to perform underground music here.

Fortunately it's not. In fact, this Friday, November 14th, at a concert in the YMCA, two local underground bands are going to unleash themselves on Stevens Point. The concert is sponsored by the Portage County Teen Program.

The bands TED and Balance of Terror have been around for about a year now, writing songs, rehearsing sets, and settling their personnel. Both Brad Overaker (Balance of Terror) and Dan Dieterich (TED) cited similar problems that they

encountered in wanting to perform their type of music in Stevens Point.

The problem first referred to by both Dieterich and Overaker was the lack of interest. The both agreed that there is "close-mindedness in this town," towards thrash and garage music.

A second problem brought up, was finding places to play. One example was the fact that places, like the American Legion Hall, wanted "too much money up front to hold a concert there." Luckily, the YMCA offered them a 60-40 cut to hold a concert on one of their "Teen Nights."

The third problem mentioned was recording. There simply aren't many facilities in Central Wisconsin. Dan Dieterich, recalled one experience where the staff of a recording studio botched up their tape.

Despite these and other problems, both bands are confident about their future. Brad Overaker wants his band to, "Have fun, find other places to play and give it a try at local shows in Wisconsin." TED has a demo tape out (an "audition tape presented to record companies with the hope of getting a contract). "Any day now," they expect a record to be released from Touch & Go, an underground record label.

The real question: Can underground music make it in Central Wisconsin?

Maybe. The history of rock'n'roll is a story of imitation. For example, there would have been no punk rock movement in England, if American groups like the Ramones had not gone over there and played. That's just the way it happens. Somebody gets out on stage and plays, and someone in the audience says, "Hey, I can do that, too!" It might be too much to hope for, but who knows. Maybe this Friday, thanks to Balance of Terror and TED, some kid in the audience who owns a guitar, will see them play and know that he too can do what they're doing. Like I said, it might be too much to hope for, but, if it does happen, it won't be the first time.

Couch potato cont. from p. 10

—Observe TV commercials for cold remedies. Wonder if you look as stupid and miserable as the actors in the commercials.

—Empathize with Rudolph the red-nosed reindeer.

—Consider going to the Health Center to collect on your \$80.00 worth of tuition-guaranteed health services. Decide you'll probably catch something worse than a cold there and stay home.

—Call your boyfriend or girlfriend. Hope they know it's you and not Mickey Mouse. Tell them your house or dorm room is quarantined and that you'll call them back in a week or so. With your watery eyes, Kleenex-scrapped nose, matted hair and bunny-slipped feet, you don't want to be seen by ANYONE, much less your boyfriend or girlfriend.

—Buy stock in the Kleenex Corporation.

—Look up the word phlegm in the dictionary.

—Try to remember what it feels like to breathe.

—Guiltlessly pig out on ice cream, Popsicles, Eskimo Pies and all those other cool confectionaries that soothe the throat and provide caloric energy to ward off those nasty germs that have already invaded your body.

—Wonder why a cold is called a cold, after all, a fever is not called a "hot."

—Get out a medical book. Look up how long the average cold lasts. Seven days!?

—Realize you're going to need a lot more creative ideas to keep you sane while you are a couch potato.

Hopefully these suggestions will keep you sane while you are waiting to return to the Land of the Living. In the meantime, chin up. The average cold lasts about a week. Then you'll be up and at 'em... until some other slob sneezes in your face and sends you back to the couch with another cold.

Reviving the soul

Luther Van Dross

"Give Me the Reason"

Epic Records

by Jon Pike
Staff Reporter

Back in the '60s, male singers with distinctive voices tore up both the "black" R & B charts and the "white" pop charts. Well, the '60s ended, and somewhere along the line, "R & B" became "black-urban." It lost something in the change: that undefinable quality, called "soul."

Well, "soul" is back, and in more ways than one. Check out happy hour some Friday. What gets played on the jukebox? That's right, Smokey, Marvin and the Temptations. Also, white soul-imitators from Britain, like Simply Red, are making noticeable impacts on the charts. Not only that but, more importantly, the real stuff's back.

You see, Luther Van Dross and his producers remember that one quality that made all

those old soul records great: the voice. Dross exemplifies this quality on "Give Me the Reason," on Epic Records.

The production, instrumentation, vocals, and lyrics on this record are all slaves to Luther's voice. The sole purpose of these elements (which are done very well) is to provide Luther with the best environment in which to pour out over these ballads.

And indeed, the black-urban charts have been kind to Luther. There's no reason why it should stop with this disk. My personal picks for black-urban hits on this record include "Give Me the Reason" and "There's Nothing Better than Love."

But that's not to say that these are exceptional tracks on a superb album, rather they possess the appropriate marketing gimmicks for current hit singles. "Give Me the Reason" is a duet with Gregory Hines, one of Hollywood's hot commodities.

Before I get out of here, here's a tip: the next time you lure that "special someone" to your room for a little "who-knows-what," flip this sucker on the turntable and see if it doesn't provide that little, special something.

(If it doesn't work out, don't blame Luther. You'd probably have had a better chance seducing a grapefruit.)

A recording artist's perspective

Independent vs. major labels

by Jon R. Pike
Staff Reporter

Walk into a local record store today, and you see a greater variety of albums than you're used to. The reason for this: the rise of the independent record label.

Independent record labels (or "indies") are small, independently owned and operated companies that produce only records, as opposed to major record labels, which are parts of the CBS Corporation.

Independent record labels, however, are not new. In fact, some major labels, like Atlantic and Elektra, started out as independent labels. The '80s has seen a large number of individuals, who decided not to deal with major labels, and struck out on their own.

Besides the way each label is owned, are there any other differences between independent and major labels?

Recently, I was able to talk with Tommy Keene, a recording artist who has recorded for both independent and major labels. I decided (since he has the experience) to ask Tommy.

A little background might be in order: Tommy was raised in Chicago, and now calls Maryland his home. He's a guitar player, singer and songwriter. Some critics have likened his type of bare-bones, jangly pop to that of such American artists of the '60s as Bob Dylan and the Byrds.

Tommy, however, sees his music as being more influenced by Britain and the 1970s. Cover songs on his records by such artists as The Rolling Stones, Roxy Music and Lou Reed attest to this.

Some critics call Keene's lyrics vague. But this might be because he tries to match the lyrics to the moods created by his songs.

Tommy Keene has recorded a mini-album titled "Back Again...(Try)" for Dolphin Records, an independent label. He has also recorded for the major label Geffen Records, a subsidiary of The Warner Communications empire. His records for Geffen include an LP called "Songs From The Film," and his current release, a mini-album titled "Run Now."

"Right now," Keene said, "there's not a lot of difference between working for an independent label like Dolphin and a major label like Geffen. There really isn't a difference until you really start to take off."

"Initially, with a company like Dolphin, you'll have five people working a record. With Geffen, you'll have 30. Initially, that's the difference; more people are involved with working on and promoting the record."

"With independent labels, you have an opportunity to get out and be visible. The Artist and Repertory people from major labels can take a look at you and decide if they want to sign you. (Artist and Repertory, or "A & R," people are responsible for getting and maintaining recording artists.)

"Then," Keene continued, "if you get on to a major label, you

have the opportunity to sell a million copies. Of course, there's that other side, too. Major labels can take absolutely nothing and make it sell, like A-Ha. There you had absolutely nothing to begin with and it sold a million copies.

"My relationship with Geffen is really good. Of course, when you have that many people involved with making a record, it can be confusing. I do occasionally have problems with all that input. But, I imagine that sometimes they have problems with me too."

Some say "no nukes" Others say "know nukes"

Did you know that for more than ten years, you've been playing your stereo, lighting your hallway and toasting your bread using electricity from the Kewaunee nuclear power plant?

That's good news because the Kewaunee plant doesn't burn fossil fuels like coal.

In fact, instead of burning nearly 20 million tons of coal, in its first eleven years the Kewaunee plant used only a small amount of uranium - which is easy to obtain from rocks and not useful for much else besides energy. That's conservation. Because coal can be used in the future for lots of other things. Like pharmaceuticals, dyes, fertilizers, and things we haven't thought of yet.

For more information about nuclear energy and the environment, write:

Announcing Three Pluses For Students

A special program
to introduce the new AT&T Plus Card
to the University of Wisconsin System

1. The easy way to own an AT&T PC.

With your Plus Card, you can purchase an AT&T high-speed, high capacity personal computer and needed printers, modems and software. The Plus Card lets you pay through convenient monthly payments.

AT&T PC's were designed with expansion in mind and are uniquely qualified for university work, with growth potential to meet the demands of school and a future career.

2. No payments for 6 months.

If you purchase your PC between now and March 1, 1987 using the AT&T Plus Card you will not have to make any payments before June 30, 1987. (Finance charges accrue from purchase date. Payment delay cannot be applied to telephone calls.)

3. A chance to win a free AT&T PC.

No purchase is necessary. And it's easy to enter your name. Just visit the AT&T display table in your student union tomorrow, or call your campus representative for all the details. The name and number are below.

For all the facts about the Plus Card, dial either number below. *Only the campus rep* can also tell you about the special UWS program—the free PC and the deferred payment plan.

OUTDOORS

Killer storm

Armistice Day brings chilling memories for hunters

As I huddled, shivering while hunting in a marsh this past weekend, starting into a 30 mph wind from the north, I remembered the story my grandfather told me about the Armistice Day blizzard of 1940.

Outdoors Editor Chris Dorsey

Grandpa and a friend, Leonard Bransen from Green Bay, planned a duck hunt along the bay near Oconto. They met at a local diner for breakfast, as the

story goes. It was tradition to start the day with a big breakfast before the hunt began sometime before dawn.

After the two finished eating and swallowed their last gulp of coffee, they packed up and left for the bay and the migrating mallards that were sure to greet them in flocks.

They paddled into the early morning light and shot many ducks that were lured close by decoys and calls.

It was a hunt we can only dream about today, but for many hunters that day the dream turned into a nightmare.

The temperatures reached nearly 60 degrees by mid-morning, but by noon icy winds began screaming across the bay and blew my grandfather's decoys into the reeds before he could paddle out to retrieve

them.

Grandpa and Leonard managed to paddle their skiff to a small island in the bay where they weathered the storm in a small groove in the rocky shoreline. They were amongst the lucky.

Newspaper accounts from that time told of duck hunters along the Mississippi who froze to death in their blinds. They were trapped by the sudden ferocity of the storm and were unable to cross the moat of treacherous November waters.

Some hunters made it to small islands where they took shelter beneath their overturned boats. Many huddled next to each other and their dogs for warmth.

Hunters who did manage to

Select deer hunters receive two permits

MADISON, WI - Almost 9,000 Wisconsin deer hunters will receive two permits for the 1986 gun deer season this year, according to Department of Natural Resources' licensing officials.

Dick Royston, supervisor in the license section, said this will occur because in eight of the deer management units in the state there were more permits available than there were applicants for them. "As a result," Royston said, "some of the successful applicants for hunter's choice permits in those units

will be issued an antlerless permit along with their hunter's choice permit." That will enable them to take two deer during the 1986 gun season, one of which must be an antlerless deer, Royston added. All of the permits will be issued by mail.

Royston said the mailing of the hunter's choice permits to successful applicants began on Monday, October 27 and the final batch of permits will be mailed Tuesday, November 11th.

Cont. p. 18

Bow hunting improves as deer become more active

by Bud Gourlie
DNR Information Office

Deer are beginning to move throughout the state and archers report improved success. Motorists are alerted to be on the lookout for deer along the roadways.

In the northwest, bow hunters are having good success in the Brule and Cumberland areas. Trappers are enjoying good success around Park Falls. Ruffed grouse hunters report good action in Iron and Ashland counties. Walleye fishing is good on Lake St. Croix and anglers are taking brown trout and salmon in the Saxon Harbor area.

Farther south in the west central counties, duck hunting is improving in the La Crosse area as water levels on the Mississippi River drop. More northern mallards are being seen in the Eau Claire area. Limit catches of bass and walleyes are being taken by anglers in the La Crosse area.

In north central Wisconsin, duck hunters report some success in the Wisconsin Rapids area and ruffed grouse hunting remains good in the Woodruff area. Smaller lakes and ponds are beginning to freeze there. Walleye action continues to be good on the Wisconsin River in the Rapids area. Trappers are doing well there on muskrat and mink and the raccoon harvest is good.

In the northeast, mallard hunting is good in the cornfields in Waupaca County and there is fairly good bluebill shooting on lakes Poygan and Winneconne in Winnebago County. Limits of diving ducks are being taken on Shawano Lake. Bow hunters are having excellent success in Shawano County and are enjoying good success in the Oshkosh area. There is good walleye and northern action on the Wolf River in Waupaca County and walleyes are hitting in the Fox River at DePere.

In the south and southwest, pheasant hunting is improving in Dane County as the corn is being picked. Archery hunters are registering some nice bucks in Columbia County and have found good success also in Fond du Lac County. Bow deer hunting has improved throughout

the Dodgeville area. About 160,000 Canada geese remain in the Horicon-East Central area of Wisconsin. Walleyes are hitting in the Mississippi River in Grant County and there is good panfish action on Big Green Lake in Green Lake County.

UWSP Fire Crew hosts tour in conjunction with state meeting of Society of American Foresters

by Scott Lindow

The UWSP Fire Crew recently conducted a tour of the Fire Science Center in conjunction with the State Society of American Foresters general meeting. Participants viewed the computer center, a tool sharpening demonstration, fire weather monitoring, and the fire cache including a fire truck on loan to the fire crew from the Wisconsin Department of Natural Resources.

The Fire Science Center is located in Plover and is used for classes and as a dispatch center for the Fire Crew.

The UWSP Fire Crew assists the DNR and the U.S. Forest Service in fighting fires as well as conducting prescribed burns for organizations like The Nature Conservancy and the International Crane Foundation. The Fire Crew serves a

twofold purpose in that students receive hands-on experience while providing fire protection.

Editor's Note: The Fire Crew will hold an organizational meeting tonight (Nov. 13) at 7:30 p.m. in

CNR room 112. DNR fire specialist Bill Hoffman will be the featured speaker.

An ax to grind

Quinn McCarthy of South Hall demonstrates the finer points of sharpening an ax while at the Fire Center's recent tour in Plover.

When deer hunting it's the thought that counts

by Tim Albers
Staff Reporter

It was another week without much time to hunt. I got out only one night for a couple of hours. In those hours I saw five deer. All five had been across the field from where my stand is but at one point something startled them and three headed toward me. The one in the lead was a doe. Then there was a fawn and a buck. Judging from past experience, I would guess that the buck was a year and a half old. He had a forked rack but is probably an offspring of the "Old Buck" of the area. The Old Buck is a 10-point beast which I have seen on several occasions and was also one of the other deer in the field.

The deers' progress led them to within 20 feet of me where they stopped to see what had spooked them. It was also where they caught my scent. They just milled around for a while but they were watching where I was.

I let my pounding heart return to normal and then, attempted to turn toward them for a shot. I must have moved too fast because they moved away from me. They stopped about 20 yards from me and tried to figure out what I was.

When they realized I was a man, they took for the woods.

That was the extent of my hunting for the week but it was definitely worth it.

Most of the free time I managed to squirrel away was at night, so I spent some of it preparing for the gun season. Mentally, I traced every foot of our hunting area. Our drives will be different than last year's, but I think we will have a good year anyway. I am already getting mentally prepared for the long nights and early mornings. Ah ... the good times of hunting season. Sometimes I wonder if I go to the shack for the hunting or just for the fun of it.

Part of the fun is setting up the shack. You see, we hunt in a state forest and do not have a permanent shack. On the weekend before the opener, we load up the trucks with the shack, bunks, carpet, staves, and all the other necessities. When we get to the pit we start with the walls. They are two-by-four framed plywood. The outside dimensions are 24' by 16'. After the walls are up, we put the floor down and then the roof. We then proceed to put everything in where it belongs. The final step is to go to one of the local establishments to help one

of the guys celebrate his anniversary a week early. The wives and girlfriends join us, but we still manage to have a good time.

A week later, the shack starts teeming with the group's arrival. (I'm usually first.) A couple of hours later, the food and supplies usually show up with the next arrivals. By the time everyone gets there and people are ready to go to bed, it is midnight and there are 15 eager

hunters waiting for the season to open.

With all those mouths to feed and the limited space, breakfast preparation begins at three with Wayne stoking the wood stove. He then starts his other tasks and by the time he gets back in the shack I'm up and ready to begin my tasks. The rest of the crew filters down one-by-one until the whole gang is fed. By the time Wayne and I are done eating, most of the others are

ready for the woods so we hurry into our orange coveralls because we don't want to be late getting to our stands.

Ah yes ... each November these thoughts become reality. Some people think of the deer they hope to see while in their stands. But for me, the friends and atmosphere are what cause me to gravitate to the northwoods for one week each November.

DNR accepting applications for trees and shrubs from state nurseries

MADISON, WI - Application forms to order trees and shrubs from state nurseries are now available, according to Albert Kubiske, state forest, nursery and wild river specialist in the Department of Natural Resources' Bureau of Forestry.

The forms may be obtained from department field stations, U.W. County Extension offices and all department foresters.

Seedlings available include a

variety of both hardwood and softwood trees, and shrubs for wildlife. In addition, wildlife packets and windbreak-shelterbelt packets are available.

Over 20 million trees and shrubs were distributed in 1986 and about the same number are available for 1987. However, according to Kubiske the demand for seedlings is expected to be high again this year. It is recommended that landowners

place their orders early in order to obtain the species they need. While the present inventory is excellent, supplies of some of the more highly desired species are expected to be exhausted early.

A reminder that trees and shrubs purchased from state operated nurseries can be used only for conservation purposes. They cannot be used for landscaping or commercial Christmas tree production.

ATV owners reminded of new law change in registration

MADISON, WI - Owners of snowmobiles and all terrain vehicles (ATVs) are reminded that a recent rule change requires that the registration decal be displayed on the machine before it is put into use.

Gary Hornuth, Recreation Vehicle Safety Officer in the Department of Natural Resources, said the only exception is when an individual purchases a new or used machine from a dealer. "In that case," Hornuth explained, "the dealer is required to apply for the registration and the owner of the newly acquired snowmobile or ATV can operate it while waiting for the decal to arrive by receiving from the dealer and carrying a copy of

the registration application."

He noted, however, that in the case where the machine is purchased from a private party, it may not be operated by the new owner until the registration has been applied for and a decal received and placed on the vehicle. "The supervisor of ATV and snowmobile registrations in the license section of the de-

partment advises it will take about one week for the registration to be processed and the decal returned to the new owner."

Applications for registering snowmobiles and ATVs are available from any department office or from your local Conservation Warden.

First glimpse of Turkey Stamp entries

MADISON, WI - Entries in the 1987 Wild Turkey Stamp Design Contest will be available for public viewing on Thursday,

November 13, in Room 417 of GEF 2, 101 South Webster Street, Madison.

Judging of the 45 designs submitted in the contest is expected to be completed by 1:30 p.m. with the design which will be on the 1987 wild turkey stamp selected. Public viewing of the contest entries will be allowed from 9:00 a.m. to 1:00 p.m. and again at 1:30 p.m. following the judging until 3:30 p.m.

The 1987 wild turkey season in Wisconsin will consist of four hunting periods; April 22-26, April 29-May 3, May 6-10, and May 13-17. There are 6,040 permits available for the 1987 hunt to be held in seven zones in southwestern Wisconsin. Applications for permits must be postmarked no later than Friday, November 7, 1986.

Hunters bagged 793 turkeys last spring when 3,496 permits were issued. That is a success rate of almost 23 percent. FOR INFORMATION, CONTACT: Ed Frank - 608/226-8940.

Next Week

DNR to begin nine-month investigation of chemical and non-chemical weed control

MADISON, WI - The Wisconsin Department of Natural Resources is starting a nine month study to assess the risks of chemical and nonchemical weed controls. The department is now seeking names and addresses of individuals interested in reviewing the environmental assessment when it is completed at the end of summer, 1987.

The assessment will take a hard look at the risks of using chemical and other techniques to control algae, rooted plants and swimmer's itch (carried by snails) in water. The advantages and disadvantages of different lake nuisance controls like chemicals, plant harvesting, plant cutting and other techniques will be compared.

"The Department wants a broad spectrum of people to review the assessment since the document will be used to form state policies and regulations on controlling nuisance plants and snails in our lakes," said Ed Jepsen, Bureau of Environmental Analysis and Review.

Rooted lake plants provide shelter, food and oxygen vital

for thriving fish populations. However, human activities can overfertilize lake waters when rain carries lawn chemicals, barnyard wastes and leaking septic system wastes into the water. Water and sediments with excessive amounts of phosphorous and nitrogen stimulate algal blooms and thick shoreline weed growth. Chemical and mechanical weed controls are often used to keep boat launches, beaches and piers clear for summer recreation.

The environmental assessment will describe ecological and social trade-offs of chemical controls: mechanical controls like cutting and raking; and biological techniques like fish stocking and intentionally planting more desirable lake vegetation.

The DNR has formed two panels of lake interests to formally review the environmental assessment. The first consists of state and federal agency experts in lake management. The second citizen panel has members from local govern-

ment, environmental groups, the aquatic nuisance control business, lake districts and lake property owners.

"To accurately gauge public opinion about alternative weed controls, we'd like a variety of lakeshore residents, environmental groups, the aquatic chemical industry, anglers and other people interested in lakes to take part in this discussion," Jepsen said.

People who want to receive a copy of the draft environmental assessment when it is available next summer, or want to be notified of meetings to discuss the assessment, should telephone Mary Ellen Vollbrecht, DNR Lakes Program at (608)267-2453 or Ed Jepsen, Bureau of Environmental Analysis and Review, (608)266-5386. You can also contact Vollbrecht and Jepsen by writing the Wisconsin Department of Natural Resources, P.O. Box 7921, Madison, WI 53707.

FOR INFORMATION, CONTACT: Ed Jepsen - 608-266-5386.

German wing, from p. 11

that she is the only one involved at the university level.

There are six UWSP students who live on the wing: Eric Garbisch, Josh Macht, Marcia Norman, Rachel Schwenzfeier, Shane Sprecher, and Marcus Zbinden. All are either 200 or 300 level German students with rather divergent backgrounds. Some have studied the language for six years and others for only one. Some of the students have been to Germany for extended periods of time and others have never been outside this country.

In speaking with some of the wing members, I perceived a positive reaction to the entire program. Every person I spoke with felt they were learning something from living on this special wing.

Shane Sprecher felt that speaking German was the best part of the program. "This program helps us in bettering our German. We learn to use our German on a daily basis," he said.

Marcus Zbinden highlighted the comradeship of the wing. "The comradeship is the best thing about this program. We spend a lot of time together and get to know each other."

The residents agreed that the program is successful, and they

appreciate Korinna. "She's a super teacher and she's very patient," Sprecher said. Zbinden added that, "She concentrates a lot on pronunciation, which is really what we need."

The residents get "firsthand knowledge" through their interaction with Korinna. "We're finding out things that we never would hear otherwise," said Rachel Schwenzfeier.

Every other Wednesday evening, wing residents have a gathering in one of their rooms. Anyone who wants to speak German is welcome to attend. Sometimes they invite professors or former high school teachers to attend the discussions or to talk on a specific topic. The next meeting will be in two weeks.

All of the participants spoke highly of Professor Richard Ruppel, the major force behind the program at UWSP. Ruppel made the initial efforts toward PAD and continues to be responsible for many of the activities of the wing.

The question remains, however, as to whether the program will continue next year. The residents recommended that it continue because of its significant benefits.

Their enthusiasm was powerful.

Armistice blizzard, from page 16

make it to shore found their vehicles frozen and too cold to start. Others who were able to start their vehicles could not drive as most of the roads were impassable.

The high winds and heavy snow prevented any rescue attempts as hunters were on their own. Families of the hunters sat near radios and telephones expecting to hear word

on the fate of their kin. My grandmother recalls the night as the longest of her life. "No one else was home," she said, "and the phone lines were down, I felt trapped."

The blizzard which blew across the Dakotas and the plains of Minnesota only hours earlier had killed dozens from the Mississippi to Little Muskego Lake in eastern Wisconsin.

For people like my grandparents, the memories of that

Armistice Day bring a chill each time November skies send hints of a storm.

Two permits, from p. 16

This will complete the distribution of permits for this season, and there will not be any more issued either prior to or during the season.

The deer management units and the number of antlerless permits which are being issued to successful applicants for hunter's choice permits in those

- units is as follows:
- EXTRA PERMITS
 - 70 2,137
 - 70A 2,599
 - 70E 504
 - 72 638
 - 73 432
 - 73C 1,782
 - 76 589

duo combined for 36 points and 22 rebounds per game average. Another starter, Amy Gradecki, also returns to the squad. A sharpshooting guard, her services will become more valuable with the addition of the three-point stripe this year. All three were All-WWIAC selections last year.

The Lady Pointers return four other letterwinners to the squad. Diane Beyer, Donna Pivonka, and Patti Trochinski all saw action last year and will be valuable assets to this year's team. Also, Mary Miller, younger sister of Karla, returns after being sidelined by an injury last season and will add much needed depth on the inside.

A strong recruiting class also looks to add strength to the Lady Pointer line-up. "We had an excellent year recruiting and have picked up three or four players that should be of immediate benefit to the team. We were able to add some depth to our inside game and have bolstered the outside game by bringing in some excellent young guards," said Wunder.

Renee Bourget, an inside player who prepped at Eau Claire Regis, is a top recruit who also plays on the Lady Pointer volleyball team. Other freshman recruits who should help are Debbi Shane (Hortonville) and Debbie Metzger (Waukesha North). Shane came from a good basketball program and should see action, according to Wunder. Metzger is also a solid prospect, but has been slowed by a foot injury and will not be at full strength until second semester.

"Barring any unforeseen circumstances, we should have a very successful year," Wunder said. "If we pick up on the style of play we started last season, we will have a very solid team.

Coach Davis and I are looking forward to what the upcoming season has in store."

Dogfish, cont.

breaststroke (2:18.56).

Qualifying for nationals were the 400 medley relay team of Pisciotta, Steve Nold, Rudeen and Kevin Parham in 3:44.83 (second place) and Parham in the 50 freestyle in :22.10 (second place).

Other second place finishes were awarded to Dave Martorano in the 200 butterfly (2:07.59), Parham in the 100 free (1:49.15) and Neil Fandel in the three-meter diving (227.85).

Picking up third places were Sam Siegel in the 1,000 free in 10:53.74, Brumbaugh in the 200 free in 1:49.82, Nold in the 200 breaststroke in 2:20.47, Mike Kerig in the one-meter diving (225.60) and Tim Thoma in the three-meter diving (228.45).

"Our divers were tough," said Rudeen and Brumbaugh. "Kerig, Fandel and Tim Thoma all turned in great performances. Scott Thoma is also a bright spot in the future for our diving."

Earning fourth places were Zenbi in the 1,000 free (1:04.37), Jorgenson in the 50 free (:23.45), Nold in the 200 IM (2:10.64) and Siegel in the 500 free (5:15.23).

The Pointers are in action today hosting UW-Oshkosh.

SPORTS

Host Pointer classic this weekend

Point icers open with sweep

by Karen Kulinski
Sports Information Assistant

UW-Stevens Point's hockey team displayed a high-powered offense in chalking up a pair of home victories over UW-Superior this weekend at Willett Arena.

Before a near-capacity turnout of 1,006 fans, the Pointers gained a 10-1 victory Friday night, then returned Saturday with a 6-2 decision that completed the sweep.

Friday's game was the season opener for both teams, who hold dual membership in the Wisconsin State University Conference and Northern Collegiate Hockey Association. The win was worth two points for UWSP in the NCHA standings.

"I didn't think this was a 10-1 game at all," said Pointer

coach Mark Mazzoleni. "When their first goalie went down, it took the wind out of their sails."

Pat McPartlin put the Pointers on the board early with a short-handed goal at 1:14 of the first period on an assist by Doug Dietz. John Engstrom added another UWSP goal, working on the power play at 7:40, with assists from Joe Butcher and Shawn Wheeler.

The Pointers broke the game open in the second period with five goals. The first came at 8:03 from Rick Dodd (assists from Engstrom and McPartlin), followed by another power play goal from Dodd on an assist from Engstrom at the 9:07 mark. Butcher picked up a goal at 14:31 on assists from Tim Coe and Ralph Barahona.

Rick Fleming scored at 15:21, assisted by Charles Harris, fol-

lowed by a Craig Hedstrom goal at 15:43, assisted by Jason Wentler and Pete Supple.

The Yellowjackets scored their only goal when Jonne Kartsu slipped the puck past Pointer goalie John Basill at 15:58. Dan Stauber and Tim Sundstrom assisted on the goal.

Superior suffered a blow when starting goalie Bob Montrose sustained a thigh injury early in the second period and had to leave the game.

UWSP scored three cushion goals in the third period—by Hedstrom (unassisted), Barahona (Dietz assist) and Butcher (Barahona and Dietz assists).

"I was pleased with the balanced scoring from all of the lines," said Mazzoleni. "We used four lines and six defense-men. That's what we wanted to do and that's what you need to

do in this league. Last year we were never able to do that."

A major factor in the game was that, with 21 penalties called, UWSP was able to convert three of seven power play opportunities while the Yellowjackets didn't score on any of their 10 attempts.

Mazzoleni cited the play of goalie Basill. "Games like this are the hardest to play in," he said. "It's hard to hang in there and keep the concentration level up."

Basill, who recorded 22 saves, felt he was backed up by good defensive support.

"I felt I had to keep my concentration so when the puck came my way I was ready," he said.

Fans brought brooms to Point's hockey game on Saturday night at the Willett Arena

and thanks to a hat trick by freshman winter Shawn Wheeler, they were put to use.

The Pointers concluded a sweep of a weekend series against UW-Superior with a 6-2 win. UWSP is now 2-0 in the Wisconsin State University Conference while picking up four points in the Northern Collegiate Hockey Association. The Yellowjackets fall to 0-2.

"We expected a hard game," said Mazzoleni. "It's hard to get up for a game after you beat them 10-1. I thought our defense played better, yet was still a little out of control. We bottled them up and they had a hard time coming out."

The Yellowjackets did mean business, scoring their first goal only 24 seconds into the game. Paul Stanaway scored on an assist from Jon Koski.

Wheeler, of Fort McMurray, Alberta, tied the game up at 1-1 at the 7:26 mark when he scored his first goal on an assist from Tim Coghlin and Pat McPartlin. The Pointers took

The Pointer hockey team converged on Superior's goal during Friday's game at Willett Arena. UWSP kicked off the new season by winning both games of the weekend homestand.

Angelfish swamped by Eau Claire

by Karen Kulinski
Sports Information Assistant

EAU CLAIRE—A lack of depth in the diving department hurt the UW-Stevens Point women's swim team in a 106-70 loss to UW-Eau Claire on Saturday.

However, there were quite a number of bright spots despite the loss.

"We had a great meet," said Pointer coach Carol Huettig, "as we were able to take five of

nine first places."

Capturing firsts for the Lady Pointers were Barb Kolitsch in the 1,000 freestyle (11:35.51), Jan Gelwicks in the 200 individual medley (2:18.69) and 200 breaststroke (2:36.62), and Elaine Cole in the 50 free (:26.16) and 100 free (:57.50).

Meeting national qualifying times were Gelwicks in both of her events, as well as the 400 medley relay of Roxie Fink, Cole, Gelwicks and Dorothy Murray in 4:21.22 (second place).

"Barb's time was 20 seconds faster than her time in this meet last year," said Huettig. "I've nominated her for swimmer of the week. Jan had notable performances as did Elaine, who took a year off to work in Sweden."

"The 400 medley relay's time was only one second off a school record."

Third place finishes for UWSP went to Murray in the 200 backstroke (2:26.94) and Kolitsch in the 200 breaststroke (2:42.71). Fourth places were awarded

to Lynn Palmquist in the 200 free (2:11.88) and 500 free (5:57.17) and Sarah Celichowski in the 100 free (:59.93).

"We're going to be very strong," said Huettig. "We only had 13 swimmers today, so our performance is positively impressive. We are waiting anxiously for our divers to finish recovering from knee surgery. We'll show our real strength around the end of the semester."

The Lady Pointers return to action today as they host UW-Oshkosh.

Lanier to appear at tournament

Lite Beer representative Bob Lanier, who with more than 19,000 points is the 12th all-time leading scorer in the history of the National Basketball Association, will appear Friday, Nov. 21, and Saturday, Nov. 22 at the third annual UWSP/Lite Beer Tip-Off Tournament. He will present team and individual awards to the tourney field, which should be the strongest ever with UWSP, St. Thomas Aquinas, Kearney State and Concordia.

Lanier began his standout basketball career at St. Bonaventure University, where he was voted first team All-American in 1970.

He was the top NBA draft pick in a draft that also included Dave Cowens—who would also later star in the NBA.

Lanier was NBA Rookie of the Year in 1971 and All-Star Game's Most Valuable Player in 1974. Lanier spent nine seasons in Detroit before joining the Milwaukee Bucks in 1979.

Lanier led the Bucks to five straight playoff appearances before retiring in 1984. During his playing career, Lanier was named to the NBA's All-Star team seven times.

The Buffalo, N.Y., native served as president of the NBA Player's Association for five years. He also has been recognized for his community service efforts. In 1978, Lanier was given the Walter Kennedy Citizenship Award by the Basketball Writers Association of America. He also has received the Jackie Robinson Award for leadership, citizenship and service from the Buffalo YMCA.

WSUC Football Roundup

Pointers eye share of WSUC title

by Kent Walstrom
Sports Editor

EAU CLAIRE, WI - It wasn't a particularly good day for football Saturday, unless you happened to be rooting for UW-Stevens Point.

The Pointers, battling for a share of the league title, came one step closer with a 13-0 win over Eau Claire at Carson Park.

With a game-time temperature of 25 degrees and a 5-below wind chill factor that limited the offensive capabilities of both teams, UWSP's vaunted defense came up with another quality performance while helping the Pointers (6-1, 7-3) to their seventh consecutive win.

The victory over Eau Claire also set up a showdown at River Falls this Saturday. The surging Pointers are one game behind the Falcons and tied with La Crosse for second. If the Pointers win next week's final regular season game at River Falls, and if La Crosse defeats visiting Stout, there would be a three-way tie for first in the WSUC.

Eau Claire (3-4, 4-5), which won the opening coin flip, chose to defer their pick until the second half. The Pointers then kicked off to start the game, a decision that gave the Pointers the wind at their back and helped them to score all of their 13 points in the first quarter.

With the Pointer defense again assuming a commanding role, Eau Claire threatened to score only once in the first half. But kicker Evan Sveum missed a 47-yard field goal try early in the second quarter.

While the Pointer defense con-

tinued their mastery over conference opponents by limiting the Blugold offense to a minus one yard rushing in 28 attempts and only 71 yards in total offense, UWSP connected on field goals of 21 yards and 39 yards by Kim Drake to grab an early lead.

Then, with 52 seconds remaining in the quarter, strong safety Tom Finco stepped in front of a pass from Blugold quarterback Bob Gelhaus and returned the interception 21 yards for the game's only touchdown. Drake's extra point made it 13-0.

Although the Pointer offense was not dominating, it controlled the ball for sustained periods of time during the third quarter when the Blugolds had the wind behind them.

Quarterback Kirk Baumgartner connected on just eight passes for 70 yards, but sent halfback Mike Christman through the line for 83 yards in 24 carries. Kevin Knuese ripped off another 43 yards and Ken Stelmacher added 42.

Defensively, it was the play of linebackers Steve Day, who managed six solo tackles, three assists, three sacks and a pass breakup, John Bechard, three solos, one assist, one quarter-

back sack, three tackles for losses, and Brent Harder, four solo tackles, that carried the Pointers. Rich Smigaj and Greg Dantoin were also credited with four solo tackles. In addition, Finco, Smigaj, and cornerback Scott Nicolai had interceptions.

The Pointers face River Falls at 2 p.m. Saturday at Ramer Field.

In other games, UW-La Crosse (6-1, 8-1) downed UW-Whitewater, 27-14, and UW-Oshkosh (2-5, 4-5) drilled winless UW-Superior 37-16.

At Whitewater, Ted Petraskey ignored a painful toe injury while rushing for 194 yards in 41 carries to lead La Crosse. More importantly, the win kept the Indians tied for second place in the conference standings with just one game to go. A win next Saturday at Stout would ensure La Crosse of a share of the WSUC title.

Whitewater fell to 3-3-1 and 5-4-1 overall.

Petraskey, who entered Saturday's game as the leading conference rusher with 891 yards, surpassed the coveted 1,000 yard mark while scoring three touchdowns during the contest. Petraskey now totals 1,085 yards in seven conference games.

At River Falls, quarterback Mark Cota picked up 107 yards rushing from the wishbone formation and scored twice to pace the Falcons (7-0, 8-1). The defending WSUC champions kept possession of the ball for more than 40 minutes while gaining their entire 375 yards of

offense on the ground.

At Superior, the Titans jumped to a 24-0 lead as Rob Frahm churned for 191 yards and four touchdowns in the WSUC game.

Superior's Scott Tiedens passed for a touchdown and ran for another in the loss.

TWO FOR THE SHOW — Pointer guard Craig Hawley drives for a basket during UWSP's exhibition game against the Yugoslavian national team. Hawley finished the contest with a game-high 27 points as the Pointers won, 68-64.

UW-Stevens Point's men's basketball team rallied from an 11-point deficit with less than eight minutes remaining to post a dramatic 68-66 victory over the Club Bomsa national team of Yugoslavia Monday night at Quandt Fieldhouse.

Coach Jay Eck's Pointer's playing without star forward Tim Neegeli, found a clutch performance from guard Todd Christianson, whose heroics began with a three-point 29-foot jumper with 4:21 to play and ended with a steal at midcourt to ensure the victory for the defending WSUC champions.

Christianson finished with 19 points, 15 of those coming in the climactic second half, and three steals, while Hawley, the veteran co-captain, netted a game-high 27 points, four assists, and added four steals with a superb defensive effort.

Club Bomsa continued its tour at St. Cloud State (Minn.) Wednesday. The Pointers, meanwhile, open the regular season by hosting the 22nd annual Tip-Off Tournament on Friday and Saturday, Nov. 21-22.

PORTER PARTNERS IN WELLNESS

Lady Pointers to challenge for crown

by UWSP Sports Information Office

STEVENS POINT—The 1986-87 version of the UW-Stevens Point women's basketball team looks toward another fine season after coming off one of its

best campaigns ever in 1985-86. Under first year coach Linda Wunder, the Lady Pointers finished second in the Wisconsin Women's Intercollegiate Athletic Conference (WVIAC) and had an overall record of 15-7. Wunder, the third coach in

the history of Lady Pointer basketball, returns for her second year as head coach. In addition, Tresa Davis has been added to the staff as an assistant. Wunder is looking at the upcoming season optimistically and stated, "I would be very disappointed if we didn't finish in

the top two or three with all of the people we have returning. The conference will be tough again and I look for Whitewater and La Crosse, along with us, to challenge for the top spot. I also feel that Platteville will be a contender as they had a young team last year and came on

strong toward the end." The Lady Pointers are hoping to challenge for the top spot in the WVIAC and very well should. Returning to the squad are UWSP's version of the "twin towers," Sonia Sorenson and Karla Miller. Last year the
Cont. p. 19

Icers, cont. from p. 20

the lead after a John Engstrom goal (Ron Shnowske and Rick Dodd assisted) one minute later.

Joe Butcher increased the UWSP lead to 3-1 when he scored at 7:29 of the second period, on an assist by Tim Coeau. Two power play goals gave the Pointers a commanding lead heading into the final period.

Coghlin scored the first at the 12:22 mark on assists from Wheeler and Comeau while Wheeler was credited with the second goal at 14:56, assisted by Rick Fleming and Comeau.

Wheeler picked up his hat trick early in the third period with a goal at the 1:38 mark. Jim Klenk picked up the assist.

"Coach Mazzoleni has an offensive movement that we work around," said Wheeler, "and if we play the system the way he designs it, it'll work. I was in the right place at the right time.

"I knew Superior would come out harder and we just had to be mentally prepared. I'm on a big high. I can't put it into words. A hat trick is something you dream about and it's all over so fast, but it did come true."

The Yellowjackets rounded out the scoring when Ron Davidson's shot bounced off Pointer goalie John Basill and into the net at 15:48.

"I thought their goalie played better," said Mazzoleni. "I didn't think we played very well in the first period. They were more intense and beat us in the one-on-one situations.

"In the last two periods, we had good movement and our goals came off what we wanted to do and not their breakdowns. I'm not happy with all of our penalties, but I am pleased with the way we were able to kill all of them."

Yellowjacket coach Steve Nelson, in his first year at the UW-S helm, felt that both he and his team learned a lot.

"We improved from one night

to the next," he said. "I'm coming out of a high school and didn't know what to expect. Point could be the best team in the league and I respect them. It hurts a little to lose, but now we know what we have to do to come back."

Basill recorded 16 saves for the Pointers while John Van Cleave had 37 for the Yellowjackets.

UWSP will host St. Johns, Augsburg and Notre Dame in the first Pointer Classic this weekend. Games are at 5 p.m. both days.

Linda Wunder

Blugolds down Dogfish

by Karen Kulinski Sports Information Service

EAU CLAIRE—The UW-Stevens Point men's swim team captured five of nine first places but couldn't overcome the depth of a strong UW-Eau Claire team on Saturday.

The Pointers lost to the Blugolds, 117-98.

"We were underdogs going in and just couldn't overcome their depth," said co-captains John Rudeen and Ken Brumbaugh. "We did take five of

nine first place finishes, which is something to build on.

"We're a very young team with nine freshmen, and those guys showed a lot of character against a tough EC team."

Finishing first for the Dogfish were freshman Nino Pisciotta in the 200 individual medley (2:03.29) and the 200 backstroke (2:05.84), Peter Zenobi in the 200 butterfly (2:04.85), Brumbaugh in the 500 free (4:55.66) and Andy Woyte in the 200

POINTER PROGRAM

SPOTLIGHT

Big Twist and the Mellow Fellows

The last time this legendary Chicago rhythm and blues band appeared in Point, they sold out the 800-seat PBR. Now they're back, playing this Wednesday, Nov. 19, in the UC-Encore at 9 p.m. Their latest album, *Playing For Keeps* (1983), received rave reviews (*Guitar Player Magazine*: "This band smokes.") in addition to providing a nationally played video. SEE this band. Tickets are on sale at the UC info desk. \$5.00 with ID, \$6.00 without.

M'ZIMA, an "electric" four piece group which combines jazz, classical and folk into a completely new and fresh sound, plays Friday and Saturday nights in the UC Encore. **M'ZIMA** (the name comes from Kenya's Tsavo National Park springs) covers tunes by Van Morrison, Bruce Cockburn, Chick Corea, and the progressive Timbuk 3. Only \$1 with ID. Sponsored by UAB Alternative Sounds.

This week's fabulously free and relaxing TGIF, sponsored by Campus Activities, features the Jazz combo Geary Larrick. From 3 to 5 in the Encore.

See Jane Fonda and Robert Redford in Neil Simon's romantic comedy (aren't all of his plays romantic comedies?) **Barefoot in the Park**. Presented by UAB Visual Arts Tuesday and Thursday, Nov. 18 and 20, at 7 and 9:15 p.m. in the PBR. Admission is \$1.50 for students, \$2.25 public.

Chariots of Fire is this week's award winning RHA video. Showing for free Mon. in Amigo's, Tues. in the Depot Run, and Wed. in Jeremiah's, all at 7 p.m. You can even eat while you watch. How about that!

Theater SPORTS

Annie, the musical comedy based, of course, on the comic strip "Little Orphan Annie," opens Friday, Nov. 14, in the Jenkins Theatre. The play, featuring a cast of 27 and a 16 piece orchestra, runs Nov. 14, 15, 18-22 at 8 p.m. and at 2 p.m. this Sunday. Tickets are on sale in the COFA box office.

University Athletics once again brings incredible sports with Pointer Hockey, as they take on St. Johns, Augsburg, and Notre Dame this Friday and Saturday at 5 and 8 p.m. in the Willett Arena.

Hey people, it's another fabulous **Campus Preview Day** this Saturday; which means, yes, mom's, dad's, and prospective freshmen everywhere. Treat them well and show them a good time. Various programs will also be going on around campus for the tourists.

90FM radio theatre presents "The Cask of Amontillado," by Edgar Allan Poe, Thurs. at 9:30 p.m. Following that is an original adaptation called "A Case of a Local Beck Beer," written by Bob Lewis.

ANNOUNCEMENTS

Business and Economics clubs will have representatives in the Concourse all next week. Stop by and check each of the clubs out. There may be one which may interest you and relate to your major.

S.N.I.F. and The History club will be sponsoring a panel discussion on nuclear arms build-up which will be held in room D-102 of the science building, on Thursday Nov. 20 from 7-9 p.m. The panel will consist of an historian, a political scientist, a political activist and an environmental philosopher. As an informational and educational forum, the panel will discuss the effects of the nuclear arms race on our culture and our global society. All are welcome.

Do you feel your group is misunderstood? Or maybe you don't feel that your organization is known well enough around campus. If you are a member of an organization suffering from these symptoms, I have an offer for you. I'm producing a new feature on SETV titled "Organizational Spotlight" designed to clear up misunderstandings of this type. For more info. call me at 346-2951, or leave a message at the SETV office and I'll get back to you, ask for Chris.

Garbage to Gold. Dr. Iga Razui will be presenting a video on composting - the act of turning garbage into useable soil. The meeting will be held on Nov. 18 at 7:00 p.m. in the Communications Room of the UC. All are welcome to attend. Sponsored by SCSA.

A S.T.A.R. IS BORN! Students Taking Action Against Rape needs a campus volunteer coordinator. Stipend-\$900/sem. Training provided. For more info. contact S.L. Schwartz (608)263-3422, or pick up application at your Student Association office.

Would you believe it? The **YEARBOOKS** are here. The Horizon yearbook staff will be in the concourse Mon. Nov. 17 - Wed. Nov. 19. If you ordered one you can pick it up then or stop by the office (just off the

main lounge in the UC) between 9-4 Mon.-Thur. If you haven't ordered last year's book yet there is a reorder list. It's only \$15.

It's not the cover of the Rolling Stone, but you can get your picture on the cover of the Horizon Yearbook. The theme of the yearbook this year is shoe sizes - one size fits all. We want your photographic, artistic and written interpretations of the theme. All photographs must be in 35mm color print film. We will have a panel select the best essay and photograph or artwork for the cover of the yearbook. Deadline is Dec. 4 at 4:00. Call Horizon x2505 for a complete information mailer.

Enjoy wilderness: X-C Skiing in Boundary Waters over X-mas break. Need to bring skis & clothing, all else provided. Come to Trippers Meeting or check with Rec. Services.

Catch "Eco-waves" - Environmental topics and issues on radio station WWSP (90FM) at 4:30 Monday through Friday! A three-minute presentation by CNR students and professors sponsored by EENA (Environmental Educators and Naturalists Association). Stay tuned!!!

Lutheran students: Join us for a lively, refreshing worship celebration this Sunday, 10:30 a.m. at Peace Campus Center, Vincent & Maria Dr. right behind Hal's Grocery. Sponsored by Lutheran Student Community.
