

ARTIVIVE

AR ART EXHIBITION ON-DEMAND

Walkie Talkie

SUMMARY

A NEW POSTER MOVEMENT

Animated posters create a new narrative space: typography and images break their bidimensional boundaries and start moving in the space of the viewer. The AR tool Artivive allows creatives to include a digital layer of animations and sound to their poster design. The original haptics of the poster design stays untouched while the digital layer can be unlocked only through a smartphone and tablet. Posters become a medium for performative art. Advertisements become an artwork, a performance to be experienced.

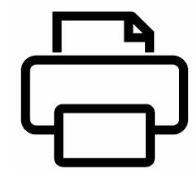

Artworks: 12

Format: AI Posters

Featured artists:

Aljoscha Höhborn, Alona Vinç, Anna Froese, Asta Cink, Balázs Pusztai, Herwig Scherabon, Katja Protchenko, Lucas Hesse, Marian Fitz, Mario Naegele, Hans Findling, Christian Hohloch, Simon Kubik, imam m ridwan

Drinkable Water*

Serving Size 1 Bottle (1000L)

More than 22 million people live in Mexico City. These people are consuming more than 287 billion gallons of water per year. 70% of the water is coming from subterranean aquifers underneath Mexico City. 23% of the water is pumped from outside the city. Only 7% of the used water is recycled. The city is draining its groundwater too fast and preventing nature from refilling it. As a result, Mexico city water is among the most expensive to distribute in the world. Mexico City faces growing water crisis and the government has no solution until now.
