# KHS

## HISTORY

KHS proudly designs, manufactures and sells more than 150 different bicycles around the world, with distribution in more than 35 countries. A family owned and operated business for more than 40 years, KHS builds bicycles for riders of every style, size, age, and level of performance. And KHS is one of the few global bicycle brands that still owns and operates its own bicycle factory!

## OUR TECHNOLOGIES

With its design headquarters located in the United States, KHS focuses on developing unique technologies for each and every bicycle it makes. From top of the line bicycles racing in the Olympics as well as national and world championships, to commuter bicycles helping people get to work and school, to comfort and family bicycles just for fun, the KHS development team is focused on finding the right designs, the right materials, and the right components to make every KHS customer experience a great one.

### PERFORMANCE

KHS is proud to support cycling at every level. We're just as proud of our school program teaching young riders safe riding skills as we are of our sponsored racers, including high school, college, Olympic, and professional athletes. We're proud to have been a part of helping riders from around the world to break speed records and win Olympic gold medals, world championships, state championships, and even masters and junior racing championships. At KHS, we believe there is the spirit of a champion inside every rider!

### VALUE

Bicycle design and manufacturing has seen massive changes in the past decade. Unfortunately, consumers have seen huge increases in prices, too. That's why KHS is dedicated to maximizing value for every level of rider. Side by side, no company packs in as much value, as much performance, and as much quality, in as many different categories and models of bicycle as KHS. But don't just take our word for it...find a KHS dealer and test ride one today!

# ROAD

## RACING

Racing bikes are the thoroughbred racers of the cycling world. They are the lightest, fastest bicycles made. These bikes utilize the very latest in high performance materials (such as carbon fiber) and components. Racing bikes feature aerodynamic frames and put the rider in an aggressive aerodynamic position. Whether you want to race or just ride fast on the road, there are no faster bikes!

## PERFORMANCE

This is one of the most popular and fastest growing road categories. These bikes feature performance similar to that of full blown racing bikes, but typically in slightly more affordable versions. They are great for race training, endurance riding, entry-level racers, and hardcore weekend cyclists.

## SPORT

Sport bikes have the look and feel of a racing bike, in a slightly more comfortable and highly more affordable package. These bikes are great for fitness, commuting, light touring, and fun road riding.

## SPECIALTY ROAD

KHS makes a several different models of specialty road bikes. These include messenger bikes, touring bikes, triathlon/time trial bikes, and gravel bikes. If you're looking for a specialty road bike, there's a high performance specialty road bike from KHS with your name on it!

# MOUNTAIN

## GRAVITY & DOWNHILL

KHS has a long heritage of making championship-winning downhill bikes. Whether you are interested in downhill racing or simply high performance gravity riding, these bikes have long suspension travel (up to 200mm), high performance components, and rugged durability.

## ENDURO & ALL MOUNTAIN

These are among the most popular category of performance mountain bike. With approximately 160mm of suspension travel, these bikes are much more able to ride uphill than gravity bikes. Still designed with a focus on downhill performance, these bikes deliver plush, rugged all mountain performance.

## TRAIL

Trail bikes are all around mountain bikes. With typically 140–150mm of suspension travel, these bikes are great on virtually any off-road terrain, including trails, singletracks, doubletracks, gravel roads and even rugged paved roads. These bikes are fun to ride, and are some of the most versatile rides of the mountain bike world.

## XC (CROSS COUNTRY)

XC bikes are mountain bikes' equivalent of road racing bikes. They are light and fast, and designed to deliver performance. They will typically have shorter travel (120mm or less), sometimes suspension in the rear, though sometimes "hardtails". The top cross country mountain bike racers of the world race on these bikes.

## XC SPORT

XC Sport bikes are all-around performance, mountain bikes, with short but effective front suspension, sometimes rear suspension. These bikes are made to be fun to ride in a variety of conditions as well as being affordable to purchase. These bikes come in Traditional and Plus wheel sizes.

## FOUR SEASONS

Also known as "fat bikes," these models feature ultra-wide tires that allow riders to take on snow, sand, rocks, trails, and just about any other obstacle. They are easy to pedal, lighter than you'd expect, and just plain fun to take out and ride.

## ULTRASPORT

These bikes are a hybrid between mountain and road bikes. They are lighter than most mountain bikes, so they are great on roads. They are also more durable than road bikes, so they can take on trails and roads less traveled. These are some of the most versatile bikes available.

# COMFORT

## COMFORT BIKES

Many categories of bicycles are designed for specific types of riding. Comfort bikes, on the other hand, are designed to be very easy and comfortable to ride. The riding position is typically more upright, putting less stress on the back, hips, shoulders and arms. These bikes also typically sport cushy saddles and grips, easy shifting gears, and often comfortable front suspension.

## SMOOTHIE

Smoothie bicycles feature our special Easy-Ride™ frame design. This lets you ride comfortably, but more importantly, they let you sit slightly back and lower to the ground to let you still have your feet easily touch the ground.

## TC

For more than a decade our TC line has been our top selling models. These 26" wheeled bikes look similar to mountain bikes, but with multi-purpose tires, a more comfortable riding position, and comfy grips and saddle. They are great for fun riding, fitness riding, and short distance commuting.

## HYBRID

These bikes are much like our TC line, but with 700c wheels that are suited perfectly to streets, roads, bike paths, and light trails. They are easy to ride, great for fitness, and comfortable for the average rider.

# COMMUTER

## COMMUTER BIKES

Commuter bikes are designed to ride comfortably, efficiently, and reliably. And with the high price of gas, more and more are turning to bicycles for commuting. KHS has created two distinct lines bikes to cater to every commuter's needs.

## GREEN (CITY)

These bikes feature classic looks with new high tech materials and components. They offer great styling, easy riding, and a variety of gear sets to give you the versatility you need. We offer city bikes in mens, ladies, and mixte frame styles.

## URBAN

Urban bikes offer minimalist graphics, tone on tone colors, and highly durable components. These bikes are built not only to get you where you're going, but to withstand the rigors and challenges of downtown and urban riding.

A new style of bicycles has emerged, called the fitness bike. These bikes are designed with style and performance, and are particularly suited to riding for aerobic conditioning. Whether you want to cross train for a sport, lose a few pounds, or just stay in shape while pedaling through the great outdoors, KHS has a fitness bike for you!

## VITAMIN

This is KHS's dedicated outdoor fitness line of bikes. These bikes are slim, sleek, and fashionable. Our Vitamin line of bikes will let you reach new levels of personal fitness and fashion!

## ULTRASPORT

Our UltraSport bikes have been called the most versatile bikes in the world. They're built as easy-to-ride fitness bikes that can go just about anywhere, with highly efficient 700c wheels with all terrain tires, and a comfortable suspension fork.

## A BIKE FOR EVERY NEED

KHS has proudly built bicycles for nearly half a century. It's no wonder KHS makes just about every kind of bicycle for every style and type of riding. Our specialty bikes get the same care and attention as our mainstream bikes, delivering our signature quality, performance and value. Specialty bikes include e-assist bicycles, tandem bicycles, folding bicycles, police bikes, and adult tricycles.
