

Galerie Rauminhalt at ICFE

From May 14. -. 17. 2016 the ICFE fair will open its doors.

A third time participant will be Galerie Rauminhalt from Vienna, established in 2003 and one of Europe's leading galleries for 20th Century Modern and Contemporary Design positions.

The Gallery offers expert projects by its represented designers, issued in limited special editions and crafted to perfection. For **Harry Bichler**, owner and curator of the gallery this is an opportunity to showcase young designers from his portfolio to an American audience.

This year the choice will be **Sebastian Menschhorn**: his tables and other furniture pieces form a combination of close to nature elements and artificial finish. They originate a fascinating contrast between objectness and organic or, put differently, a tension between nature and culture. An interplay between rough and finished surfaces creates the distinct esthetics. Also his work is represented for the first time at the ICFE fair.

Sidetable "Eden" by Sebastian Menschhorn, oakwood sealed with acrylic lacquered, colored glass, different sizes
