“Out of the box, this LaRue trigger is exactly how I would have tuned it. Design and machining quality are fantastic. I personally cannot stand over travel in a precision oriented trigger as I feel it’s the one thing that will destroy your groups and this thing has next to none... Any less and I’d be questioning reliability. Reset is a sharp snap that will bring a smile to your face.” - Anonymous

“Absolutely LOVE these mounts. This is my 3rd one. Installation is easy. They return to zero every time you take them off and put them back on your rifle. They are always shipped with a box full of goodies.” - Anonymous

“Everything I have ever purchased from LaRue has been exceptional and this is no different. I bought of these mounts for my AR-15 DMR. I absolutely love it and will soon be buying another. The mount is extremely solid and simple. I get a return to zero every time...period” - Anonymous

Got a story or photo of a hunt, a memorable shot, or a day at the range? Share a moment when you said, “Wow, glad I had my LaRue.” We want to hear from you. Send articles and photos to editor@LaRue.com. If selected, you will win a free gift and your story or photos may appear in our next issue.

LaRue Accuracy Report

Contents Copyright 2018 LaRue Tactical Issue 4, 2018

Publisher: Mark LaRue

Contributing Editors:

Todd Hodnett
Katie Godfrey

LaRue products are meticulously examined and tested for quality before shipping. The accuracy of each LaRue Rifle is proven at our 100-yard tunnel using match-grade ammunition. LaRue firearms do not leave the facility unless they obtain accuracy of less-than 1 MOA (1.047") at 100 Yards.

Hello, and welcome to the Dead Center of Precision™.

I’m Mark LaRue and this is my Page 3 column ...

The holidays are long behind us, the snow has melted, and it’s time to hit something you can’t see with your naked eye.

My 20 year-old daughter is spending this very morning at the amazing Austin Gun Club, with her Marine recruiter and our contributing writer Pete Gould, for the sole purpose of hitting something they can’t see with a naked eye ... The One Mile Target.

If you follow my ramblings, you will recall she bagged a bull elk at 652 yards with a 14.5" LaRue 308, back when she was 14 and a half years old. Ethical distances vary by skill level ;-)

Every Marine is a Rifleman ... and the Marines have pretty much standardized on LaRue QD mounts. Yes, you can bet if they can’t break them, neither can you.

We got busy and missed the spring catalog, so I’ve hyperspaced to the Summer Edition.

Work is continuing on our bolt action ---> If you bought one of our Tranquilo suppressors, stay tuned. I’m gonna make something special that a TranQuilo “Tran – Keelo” will be perfect for and you get first dibs on it.

By the time this catalog gets into your hands, LAC may be up and running. LAC = LaRue Ammo Club. We’ll be striving to find, approve, and keep in stock reasonably priced fodder to send thru your LaRue cannons.

As usual, we’ve got some great long-range articles tucked in here - find ‘em, read ‘em, there’ll be a quiz.

Buy with confidence – we are continuously polishing our act.

Top Selling

Kit out your rifle with slings, mounts, mags, rings, scopes, gun cases and maintenance supplies from your precision shooting headquarters, LaRue Tactical. Complete the package with a bipod, shooting bag, spotting scope, and range finder, all from top-of-the-line manufacturers.

Index Clips and Rail Covers

These handy low-profile clips are designed to be attached on the rail, against optics, lasers and other MIL-STD-1913 mounted accessories, providing a quick-index to return to the same point..... especially in the dark.

LaRue Index Clips install easily, and stay put. Set of 72 clips, 60 regular and 12 to hold tapeswitch wires.

LaRue M-Lok or Keymod Grip Adapter Panels aggressive texture provides extra traction and protects your handguard without any wiggle or rattle.

Index Colors: Black, Camo, FDE, UDE, OD Green, Foliage, Blue, Red, Blaze Orange, White, Pink, Patriot: Red White & Blue

E-Lander 6.5 Grendel 10 Round Magazine Features a 6.5 Grendel specific design, heat-treated steel body, durable body coating, reinforced floor plate tags, steel floor plate with integral locking plate, fully-deburred feed lips, and white state-of-the-art, anti-tilt follower.

QD LT104

SPR / M4 Scope Mount

Your scope mount is **just as important as the scope itself**. LaRue QD scope mounts are well known and respected world-wide as the gold standard of high quality.

Our popular **LT104** places the centerline of the optic at **1.5" height and provides correct eye relief and a consistent cheek weld** for the AR platform.

-Learn more on page 13.

LaRue Tactical Aimpoint Micro Mount LT660

Allows a 1/3 co-witness with the Iron Sights on M4 Carbine and AR-15 Flattop. One of our most popular series of mounts.

Like all LaRue mounts, they are precision-machined out of bar-stock aluminum and matte black anodized. The locking LaRue

Speed Lever provides outstanding return to zero; the optic can be removed, and replaced, without loss of zero. Guaranteed.

-See page 15.

LaRue TAC (Trigger Action Chassis) and MBT 2S Trigger Combo

When we handed out samples of the new LaRue TAC (Trigger Action Chassis) at SHOT Show 2017, people went nuts over them! The TAC

perfectly supports an **MBT-2S Trigger** (or just about any AR15 trigger) in proper alignment with a grip and allows for full function of the trigger. Now, you can *safely practice trigger manipulation without the need for a complete rifle*.

More than an interesting display-piece, it's a great training and demo instrument that can make you a better marksman. "Feeling" a trigger will only get you to a certain skill-level. With the TAC, you can clearly observe all the internal components as they work in concert. The TAC will give you a much-better visual understanding of exactly how a trigger works. Most importantly, the TAC reveals precisely when (and how) a hammer releases. This is one of those simple tools that will give you a big advantage over traditional dry-firing.

The chassis' glass-filled polymer design allows the user to freely drop the hammer with no damage whatsoever for a lifetime. After each part is molded, critical areas are CNC-machined for precise fit. The LaRue TAC was designed and manufactured in-house, in Texas, USA.

**grip sold separately*

MBT-2S

Introducing the **MBT-2S** (Meticulously Built Trigger), a 2-stage innovation from LaRue that gives you target precision with battle-tough engagement, for predictable release every time.

No question, we're particular about accuracy. Everyone knows that one of the **smartest improvements an AR-owner can make** to their rifle is a precision trigger upgrade. Everyone also knows that LaRue Tactical has a track record of doing things right. The LaRue MBT-2S was purposefully designed and manufactured to render the greatest benefits from our legendary line of accurate rifles. The MBT-2S can also replace the stock trigger on any mil-spec AR lower receiver.

Sparing no expense, **all major components are precision-machined from S7 Tool Steel**. The result of this extra effort is a **glass-smooth, hyper-consistent trigger** that will satisfy even the most scrupulous competition shooter, but also be overly rugged for the battlefield.

The MBT-2S breaks crisply at 4.5 lbs (2.5 lb first stage, 2 lb second stage) and has a smooth and positive reset. Each trigger comes with an additional heavier trigger spring that increases the pull weight to 6 lbs. Made in-house, in Texas, in the USA.

Learn more about the MBT-2S on page 87.

LaRue MBT™
Meticulously Built Trigger

Ultimate Upper Kits

In Small Block 5.56/ 300BLK/ 6.5 Grendel / 224 Valkyrie

We listened: For a limited time, you can get the satisfaction of putting together the finest AR-15 upper build kit ever offered on the planet Earth, and at a smokin' price, pick from 4 great calibers.

or....Big Block 7.62/.260/6.5 Creedmoor

For years we've offered and sold thousands of our complete 7.62 and .260 rifles. And this Big Block kit's innards are just like our Ultra-Precision, world renowned 7.62 and .260 offerings. Same nut-bustin'-gorgeous LaRue chrome bolt carrier group with all of it's ultra-cool features that I slipped into it. Same awesome competition-winning Ultra-Precision LaRue barrels. Same crazy close tolerances on the inside of the billet-machined Upper Receiver. A LaRue MBT trigger is in the box

too. Handguard mates up like it's a monolithic upper, but it's better, because it comes apart for easy barrel swaps. I could go on and on, but I'll give it a rest.

Check out the options on the website, then put together your dream rifle. - Or have our expert gunsmith assemble and test fire it for you.

www.LaRue.com

Stealth 2.0 Receiver and Handguard

In Keymod or M-Lok

These components are the same used in the latest generation Stealth™ design introduced at SHOT 2016. You have a choice of a 10.5" or 13" Handguard. The Receiver arrives complete with dust cover and forward assist installed. When assembled, a full length of uninterrupted MIL-STD-1913 flat top is created. The Handguard installs onto the Receiver in minutes, using the supplied hardware and hex wrench.

- M4 feedramp
- 10.5" or 13" length
- Barrel Nut Included

LaRue Ultimate 556/224/6.5/300 SUURG Kit

Suppressed Ultimate Upper Receiver Group

A military org sent out on the wires an invite to the industry to make them something. Must be this long, weigh no more than this much, etc.

Soon after submissions were submitted back in summer of 2016 to the test facility, gov't backed up and punted, and some months later, a new SUURG invite went out with a few more features added to their laundry list of wishes. It could be a little heavier, a little longer, yada, yada. We took the new features wanted into account, then modified our SUURG 1.0 submission to become - voila' - SUURG 2.0. We added some length onto the can, and added our LBG / LaRue Burn-Guard, put a little more meat in the barrel, etc.

In a nutshell, the SUURG is a lot like the UU Kits, but with more stuff. It was suggested we add the SUURG 2.0 to the kit roster, so BAM, we are doing exactly that.

Calibers you can order = 5.56, 224 Valkyrie, 6.5 Grendel, or 300 Blackout. The barrel length is 11.5" long on all calibers, the LaRue SUURG brake is 'pin and welded' onto the barrel so it's fits the "over 16 inch" barrel regulation (keeping you from having to pay a Short Barrel Tax). The SUURG kit comes with one LaRue SUURG suppressor ... which has the same Class 3 transfer stuff any suppressor is subject to.

-Mark LaRue

Five Steps to a

Good Wind Call

I hear the questions all the time. "Which wind matters the most?" The argument can be made

for several points, the wind closest to the gun starts the bullet's deflection and causes the greatest amount of drift. Then, one could argue that the middle of the flight path is the best because it provides a good average for a wind call. Next, the last 1/3 of the bullets flight path is when the bullet is at its slowest and has the longest time of flight in this portion, thus the greatest impact on bullet drift. All of these points, could have an effect on the wind call. The truth is we need to look at ALL the of the bullets flight path and make a complete wind call.

I have always heard, "Wind at your position

means nothing." My thought is, this is the ONLY KNOWN we have in this big guessing game we know as a wind call.

Let us look at a complete wind call.

1 First, I try to find the actual direction of the wind. I believe this is one of the biggest problems for most shooters. They will look at their Kestrel to find the perfect wind speed, but then after all that they will just take a guess at the angle of the wind. When

shooting in light winds this may not be that big of a deal, but when you're shooting in a good wind, the cosine is a hit or miss. Let me explain.

Take a 20mph wind from 5 o'clock. This is a cosine of 60 degrees off of full value and this gives us 50% of the wind as a full crosswind component. The wind is 10mph for this shot.

But if the shooter thinks the wind is 4:30 in clock direction, the cosine would be 75% (rounded). Thus, making it a 15mph wind call. The difference in these to wind call is about .6 mils or 2 moa. At 600m, this is over 12" of MISS.

For a quick look at the wind direction, I will point my hand, thumb up, into the wind and move my arm back and forth like a tetrahedron. I am trying to feel when the wind changes from my palm to the back of my hand. Moving it back and forth usually will allow me to get close to the direction of the wind. But for better results I will take my Kestrel, open the wind cover, and then turn the Kestrel to where the side of the Kestrel is to the wind. I will then turn it slightly to the left until the impeller spins, then I will turn it back the other direction until the impeller stops and goes the other direction. Doing this several times I then look down the seam

of the Kestrels top, which will now be pointing into the direction of the wind.

Now I look at the target line and try to visualize the angle the wind is blowing across the target line and then do my cosine based off that. I start guys by pointing at the target with one arm and then pointing at a 90-degree angle with the other arm. Then I try to third the distance with each arm for clock direction and place the wind line on a clock based off this visual.

1. *Wind speed*
2. *Cosine*
3. *Full crosswind baseline wind call*
4. *Effects of terrain across the flight path*
5. *Grass movement for direction along flight line*

I will also look at grass for direction by scanning across to find where the wind looks like it is blowing directly towards me or away from me. This can be a great tool for wind direction if you

have tall enough grass. Sometimes even the direction of cloud movement across the ground may be beneficial but remember wind direction can change above the ground, so the cloud movement may not be perfect. Now I have my first number and this is my baseline full crosswind component.

2 Next, I will look at the flight path of the bullet and determine how terrain features can manipulate the wind flow pattern; Look for lac-

es where wind may funnel and pick up speed as it channels thru an area, or for a portion of the flight path where wind is blocked by terrain. There may be an area where wind is compressing as it moves upslope and creates an Orographic wind, making the need for a higher wind call than what the Kestrel may be showing

for speed. You may find that a portion of the flight path is in dirty air from the flight being on the lee side of terrain, and then the bullet crosses across a canyon where the wind is being funneled thus

increasing wind in that portion. We have to look at what portion of the flight path is in what value of wind. All these points are needed for a terrain featured wind call. Also remember you can let the terrain help you with wind direction if your flight path is across a canyon and your bullet is staying below the top of the terrain.

But this is not so when your bullets flight path is above the terrain.

3 Before I make the shot, I have now completed my baseline line wind call and while I am aiming at the target I try to stay on top of any change in direction and wind speed changes.

Again, I am looking at

the direction of the grass along the flight path, trying to judge the angle of the wind and see if it maintains the same direction until the shot goes off.

4 I use wind dots in the TRMoR reticles for any wind call under 10 mils, but after that I will

cont'd on p 72

LaRue Stealth Uppers 5.56

LaRue Tactical 5.56 Stealth Sniper System LT011

Just pull the pins on your old upper, swap it with the Stealth. The Stealth has earned a great reputation for its **sub-MOA accuracy**, with reports of consistent hits on 4-inch steel plates out to 400 yards with 77 grain Mk262 ammunition.

Assembled using our CNC-machined Stealth Billet Upper (LT-007) as the backbone, complete Stealth Uppers are available in 12", 14.5", 16", 18", & 20" barrel-lengths with the LT hand-guard length of your choice. Complete Stealth Uppers come expertly-assembled and tested with Receiver, Free-float Handguard, Barrel, Low-Profile Gasblock and Tube, Mil-Contract M16 Bolt Carrier Group and Charging Handle.

Barrels:

LaRue Barrels are chambered in .223 Wylde (to handle .223 and 5.56 safely while increasing accuracy), with 1-in-8 twist rifling in medium-weight contour.

Stealth

Barrels

Stealth 5.56 Barrels:

Many Stealth Upper owners boast of groups smaller than 1/2 MOA. Stealth Barrels are available individually in lengths from 12", 14.5", 16", 18", & 20". Stealth barrels are chambered in .223 Wylde, 1-in-8 twist rifling in medium-weight contour.

Recommended barrel length / handguard lengths:

20" Barrel:	13.2"	12.0"		
18" Barrel:	13.2"	12.0"	11.0"	10.0"
16" Barrel:	13.2"	12.0"	11.0"	10.0"
14.5" Barrel:	13.2"	12.0"	11.0"	10.0"
12" Barrel:	11.0"	10.0"	9.0"	7.0"

Optional hardware available separately: USGI Barrel Nut, LaRue LT202 Low-Profile Gas Block, Gas Tube and Gas Tube Pin.

Barrels arrive with a LaRue Precision Barrel Extension installed, threaded muzzle (1/2x28), precision gas hole, and gas block divots at the 6 o'clock position. All barrels are available with either Standard or M4 Feed Ramps.

Free-Float Integrated Rail System:

Our two-pin proprietary barrel nut system, with its locking anti-slip plate, sets LaRue's CNC-machined handguards apart from the competition. Once properly installed, there is **no chance of movement whatsoever**.

The side and bottom rails are narrow and streamlined, while rails work with both mil-issue and standard covers. **QD sling-swivel socket integrally-mount at the base of each side** for 2-point slings.

Additionally, our Free-float Rail system provides an excellent heat-sink feature that pulls heat away from the chamber area.

Upper Receiver:

The LaRue Stealth receiver is an improved version of the currently fielded mil-spec flat-top receiver.

Machined from billet aluminum, the Stealth is designed with **more material in critical areas** to stiffen and strengthen the receiver, **maximizing the weapon's overall accuracy**.

About Our M16 Bolt-Carrier Group:

Assembled to TexasSpec™ our Bolt Carrier Groups use the same mil-spec hardware used military-wide. Additionally, LT assembly enhancements greatly minimize bolt-related failures. Mil-spec gas-key contact areas are **precision surface-ground** flat for zero gas leakage and then **max-staked** to eliminate all chances of vibration-induced failures.

*Not sold separately

LaRue mounts **set the gold standard** in the shooting community for their **close-tolerances, exacting quality, and combat-ready ruggedness**. Precision-machined from billet aluminum and anodized, mounts lock securely to MIL-STD-1913 rails in an incredible range of scope height/eye relief/bell sizes.

Choose from the **QD Lever Mount line**, or **SPR split vertical ring models**. Cant available in **0, 10, and 20 MOA** for long range shooters. Respected, battle-tested and configured to fit every requirement, for those who demand the best of the best, LaRue is the solution.

For **Quick Detach**, choose our Locking **LaRue Speed Levers**. Lever Mounts provide outstanding return to zero: optic can be **removed, and replaced, without loss of zero**. Guaranteed.

Why should I select **VFZ™ Mounts** instead of a **QD Lever Mount**? **VFZ™** is a new concept in clamping accessories to MIL-STD-1913 rails. Instead of a horizontal cross-bolt, the **VFZ™** uses a **vertical bolt** that draws up a clamping foot against the lower angle of the rail, seating the mount similarly to a fully-closed LaRue lever. Once installed on the firearm, index marks allow the user to remove the mount, then reattach to the same tension, providing **unprecedented return to zero** for a non-QD-levered mount. The unique vertical alignment of the clamp allows components that are **structurally stronger than traditional cross-bolt designs**.

If you intend to leave an optic or accessory on a rail **long term**, the **VFZ™ option is for you**. The **VFZ™** is intended as a **semi-permanent mounting alternative to our well-known Speed Levers**. While both mounts will allow the user to remove the mount from the weapon, reinstall it in the same position, and return to zero, the **VFZ™** mount is intended for users that will not need to constantly remove and install their mounts (especially in the field).

“LaRue” is synonymous with quick-detachable mounting systems for every weapon-mounted optic, laser and night vision device used by our Nation’s Warfighters.

SPR Mount Comparisons

LT104 The best mount made for attaching high-power riflescopes onto flattop-style AR15's. Period.

The LT104 places the **centerline of the optic 1.5" above the top of the rail** for optimum cheek weld with a variety of AR-platform rifles. The cantilever puts the scope out over the handguard, providing **proper eye relief**. Matches height of most NV/Thermal optics.

Precision-machined out of bar-stock aluminum and anodized. Locking LaRue Speed Levers provide outstanding return to zero: the optic can be **removed, and replaced, without loss of zero**. Guaranteed.

The popularity of the **SPR series of mounts** is partially due to the **innovative backbone** that connects the **split vertical rings**.

This design provides a **more robust platform** for the optics, increases repeatability, and **eliminates the need for time-consuming lapping**.

Rings are precision-machined with the tightest tolerances, and feature **threaded steel inserts**, built to withstand a lifetime of abuse. Available separately in: **1", 30mm, 34mm, and 35mm rings**. Upgrade, or change scopes without replacing the entire mount.

Compatible with:

LT104
LT107
LT135
LT139
LT158
LT745

Ships as 2 matched pairs (4 ring halves) with all mounting hardware and T15 "L" wrench.

LaRue Tactical OBR QD Scope Mount, LT111

Designed specifically for the OBR (Optimized Battle Rifle), and available with 34mm or 30mm rings. Height is 1.535" above the rail, for perfect alignment with weapon-mounted clip-on night vision devices. Generous 2.9" ring spacing accommodates large turret blocks with ease.

Zero cant ensures perfect centerline alignment (the OBR rifle has 20 MOA built-in to the rail).

The LT120 QD Scope Mount is similar in design to the LT111, however it allows the scope to be mounted lower to the bore. It is available in 34mm or 30mm rings. The height is set for 1.285" centerline of the scope above the M1913 Picatinny rail. Will not work with scopes that have an Objective Housing larger than 56mm which is the largest that will fit and still allow the use of lens caps. The mount has a 0 MOA built-in cant.

LT123

The perfect-match for the LT113 on Remington 700 model rifles. Positions the centerline of the optic 1.28" above the top of the rail.

QD mounts for military optics are preferred to bring additional versatility to your weapon platform. The difference with a LaRue Mount is that it **returns to zero** when you put it back on.

A patented locking system pulls your optic back **exactly at the same tension time after time**. We also make mounts to fit a range of civilian scopes, from 1" to 34mm tubes.

The LT807 QD Scope Mount is available in 30 or 34mm rings. The height is set for 1.375" above the rail for proper cheekweld.

LaRue Tactical 20 MOA PSR Scope Mount QD, LT112

The PSR has built in 20 MOA and offers the same great features as our LT111.

The LT112 QD Scope Mount is designed for users that have a monolithic upper and need 20 MOA to save them some elevation.

The height is set for 1.535". The LT112s ring spacing of 2.9" allows the mounting of the US Optics T-PAL scopes.

Comes complete with spare mounting screws with wrench, QD adjustment wrench, and instructions.

Available in 30 or 34mm ring configurations.

Close Quarters Combat, or CQ, Optics enhance your capability when engaging targets from arms-length to mid-range. Advantages are speed, wide field of view, toughness, low-light/NV function, in a compact, low-weight package. Battery life often measured in years. Use as a primary optic, or backup a high power scope.

AIMPOINT MICRO T2 and LaRue Mount COMBO

Since its introduction in 2007, the Aimpoint Micro has become the worldwide standard for compact reflex sights. Retaining its compact size, durability, light weight, and extremely long battery life, the T2 adds: a new sight housing which allows the addition of front and rear protective flip covers and anti-reflective devices, physical protection for the sight's adjustment turrets, increased durability added to the mount threading, and increased ruggedness for the sight's internal electronics.

Short (LT661) QD Mount for Aimpoint Micro Sight for Shotguns, PS90's and AK's.
45 degree offset (LT724) Can be mounted to left or the right, at 45 degrees off of the scope tube.

Used in combination with a magnified scope, the **LT-724** positions the excellent **Aimpoint Micro T or H series** off to the side, so you'll have all the benefits of a red-dot simply by rotating the rifle a few degrees for rapid transition to close-range targets.

LT751
Absolute Co-witness

LT660
1/3 Co-witness

Aimpoint®

Aimpoint Pro Patrol with Mount

Everything you need in a nicely-priced package, for those on a budget.

The **Patrol Rifle Optic** incorporates many never before seen features to maximize this sight's performance. A hard-anodized **30mm tube** encloses a high efficiency circuit that allows the sight to be turned on and left on for **up to three years on a single battery**. **Night vision compatible**. Recessed lenses and flip covers protect lenses. A transparent rear lens cover allows rapid use. **2 MOA red dot** for maximum accuracy at all distances.

Mounts: Lever or VFZ. **1.7" above the rail for 1/3 co-witness**. Built-in watertight storage compartment for an extra battery.

Standard LT150 or Cantilever LT129 for room to mount NV or even an Aimpoint 3X Magnifier.

LT751 By overwhelming demand, we developed this QD-mount for the T-1/T-2 & H-1/H-2 in order to provide users **absolute co-witness with iron sights**. The LT751 is designed specifically for use with standard AR15 flat top receivers, with irons flipped in the "down" position. **"I-beam" design provides a better field of view and is lighter** than our LT660 mount. Like all LaRue mounts, it is precision-machined out of bar-stock aluminum and matte black anodized to provide a durable non-reflective surface finish. The locking LaRue Speed Lever provides outstanding return to zero, the optic can be removed and replaced *without loss of zero*.

COMBO/Aimpoint 3X and 6X Magnifier and LT755-30S QD Mount (SHORT)

Extend the capability of red dot tactical optics with compact 3X or 6X power magnification.

Unit rotates to side when not in use. Deploys in seconds to engage longer range targets.

LT755-30S

LT755-30S SHORT PIVOTING QD MOUNT COMPATIBILITY
Works with any model AIMPOINT (except micro) in the factory mount w/spacer. If your optic is not on this chart, it may not work correctly.

NOTE:
The T-1/H-1 will be slightly lower than the magnifier centerline, but will operate correctly.

LT755-30S (Short) EOTech 511,512, 551,552 mounted directly to the upper

Mini Red Dot

Trijicon MRO QD Mount Combo

The Trijicon MRO™ (Miniature Rifle Optic) is a sealed miniature reflex sight intended for use on rifles, carbines and shotguns to provide fast target acquisition. The large aperture and tapered light path maximizes the viewing area and allows for better situational awareness and fast target engagement – especially from non-standard shooting positions. Combine all this with the ambidextrous brightness controls, sub-flush adjusters, advanced lens coatings and the fully sealed, waterproof, hard anodized forged 7075-T6 housing and you have the ultimate mini reflex sight on the market.

The combo comes with your choice of the following **lower 1/3 co-witness** QD mounts:

LT839 Standard (2.0 oz.)

LT849 Forward Cant (2.1oz.) which provides extra room for magnifiers or NV optics.

LaRue Tactical Pride Fowler IronDot Low Profile LT624

Low profile, 6061 T6 Aluminum, coated laminated parabolic glass; lens 10/16" high by 14/16" wide.

- 5 MOA Pulse LED
- Weighs less than one oz.
- Waterproof and shock resistant
- Three position power switch: On, Off, and Auto

RMR Adapter Ring Half, LT742

Converts your LaRue SPR mount to carry a Trijicon RMR backup sight. **Fits any 30mm vertical ring riflescope mount LaRue makes**. Simply replace one side of a set of rings with this upgrade and attach the RMR. The canted angle makes it easy to locate the dot, as it places the dot relatively close to the primary optic's height over bore as you rotate the rifle. Reversible to work on either left or right side.

Trijicon RMR Type 2, Adjustable LED w/ QD Mount

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR (Ruggedized Miniature Reflex) Type 2 is designed to be as durable as the legendary ACOG. The RM06 is an LED sight powered by a standard CR2032 battery. Housed in rugged forged aluminum, the RMR Type 2 is extremely tough yet lightweight. New easy-to-use adjusters with audible clicks allow for quick windage and elevation adjustments.

With eight available brightness settings, the reticle can be manually adjusted by pressing the plus or minus buttons on either side of the unit. The Trijicon RMR Type 2 is tougher than any alternative and suitable for military, law enforcement and hunting applications.

LT827 Mount

Specifications

- Weight (oz): 1.2 oz w/Battery
- Illumination Source: LED
- Reticle Pattern: 3.25 MOA Dot (RM06); 6.5 MOA Dot (RM07); 1.0 MOA Dot (RM09)
- Reticle Color: Red

Designated Marksman (DM) Optics combine close-range features like highly-visible lighted reticles with magnification and ranging features that extend the effective range from 300 to 800M.

Trijicon ACOG TA31RCO Army Optic 4 X 32 Green Illum w/ LaRue LT681 Mount

Chosen as the rifle combat optic of the U.S. Army, the LaRue 681 ACOG mount **positions the Trijicon ACOG farther to the rear** for improved eye relief with M16A2-length stocks, especially when wearing body armor. Contoured aft-section allows **easy access to charging handle**.

Battle-tested ACOG optic provides **dual illuminated reticle** for quick target acquisition at close combat ranges and increased hit probability out to 800 meters utilizing the **Bullet Drop Compensator**. **Tritium illuminates the aiming point** in total darkness, and fiber optic **self-adjusts reticle brightness** during daylight according to ambient light conditions. This allows the operator to keep both eyes open and maintain maximum situational awareness, while engaging targets.

Broad-band, anti-reflective coated lenses provide superior clarity and light gathering capabilities with generous eye relief and zero distortion. Only the prism housing moves,

so it's **far more rugged than conventional designs**. No-tools windage and elevation adjustment. Tough, military-grade, aluminum-alloy housing is waterproof to 100 feet. Length: 5.80 in/ Weight: 9.90 oz.

Trijicon TA11F ACOG 3.5x35 Scope with Red Chevron BAC Reticle w/ LaRue Tactical LT100 QD Mount

Ranging reticle is calibrated for 5.56mm (.223 cal) flat-top rifles out to 800 meters. Includes Flat Top Adapter (TA51). The chevron reticle is designed to be zeroed using the tip at 100 meters. The width of the chevron at the base is 5.53 MOA which is 19" at 300 meters.

ACOG BULLET DROP COMPENSATOR (BDC) & RANGING CAPABILITY

Trijicon ACOG TA44 1.5x16 Green Ring & Dot Reticle w/ LT105 QD Mount

This **compact 4.9oz package** is perfect for fast-moving tactical teams or for speed-oriented competition. Targets are easier and quicker to acquire through the 1.5x16 models because of the larger field of view (7.4 degrees) and eye-friendly design.

The LT105 mount is an excellent upgrade for Trijicon ACOG models: TA33, TA44 and TA47. With its single locking speed lever, the 105 is the *ultimate lightweight ACOG* combo.

Trijicon 4x32 TA02 ACOG LED Scope, Battery Illuminated Red Crosshair .223 Reticle w/ LT100 QD Mount

With the same rugged precision as the legendary Trijicon ACOG, the Trijicon 4x32 *Battery ACOG* delivers robust engineering and enhanced user control. Powered by a *single AA battery*, the electronics offer an outstanding level of reliability with a *straightforward brightness dial*, allowing the operator to determine how much to illuminate the reticle—even in transitional lighting. The body has been optimized by moving the RMR mount forward to maximize its performance in conjunction with the ACOG. Fully night vision device compatible, the Trijicon 4x32 Battery ACOG is also compatible with most other 4x32 ACOG accessories.

Trijicon ACOG TA11H 3.5x35 Scope, Red Horseshoe .223 Ballistic Reticle w/ LT100 QD Mount

ACOG 3.5x35 scope with Red Horseshoe BAC Reticle and Target Reference System—the ranging reticle is calibrated for 5.56 (.223 cal) flat-top rifles to 1000 meters. Includes Flat Top Adapter. Daytime illumination is provided by **fiber optics**, and **Tritium** illuminates the scopes at night.

Trijicon Accupoint 3-9X40 Scope TR20-2G, Mil-Dot Crosshair and LT104-1 Mount

Advanced fiber-optic/Tritium aiming-point illumination provides the Trijicon Accupoint fast target-acquisition and extends available shooting hours. Automatically adjusts aiming-point brightness to existing light conditions.

1" Tube, Mil-Dot Reticle, .05 Mil green dot, 12.2" long, 12.8oz

Trijicon AccuPower® 1-4x24 Riflescope with LaRue QD Mount

The Trijicon AccuPower 1-4x24 covers you for all your sporting adventures.

- 30mm tube
- Illuminated green reticle in MOA or BDC
- Weight (oz) 16.2oz. (459g.) (without mount)
- Illumination Source 1 CR2032 battery

The Designated Marksman Rifle or DMR is a magazine-fed rifle operated by expert marksmen. The DM's role within a U.S. infantry squad is to lay rapid, accurate fire on enemy targets out to 1,000 meters. Optics for the DMR combine rapid-acquisition and target ranging features.

Bushnell 1-8.5x24 FFP with BTR-2 Reticle and LT Mount

The newest addition to the Short-Mid Range series of Bushnell tactical scopes. This true 1x scope is equipped with the ignition illuminated Bushnell Tactical Reticle (BTR-2) in First Focal Plane. It offers the close range capability of a red dot at low power and the ranging capability of up to 10 Mills of hold over at high power setting. The scope features T-Lok locking windage and elevation turrets and 11 illumination settings for any ambient light condition. The scope features a 34mm tube for ultimate strength.

- 34mm forged aluminum alloy one-piece tube.
- True 1x power for lightning-fast target acquisition; features a second focal plane BTR-2 reticle
- Rain Guard HD patented water-repellent coating prevents moisture for a clear bright image through eyepiece.
- Ultra Wide Anti-Reflective Band Coating is engineered for every lens element in the optical path in order to optimize brightness and color transmission across the entire light spectrum.

Center dot measures .3 mils at highest power setting (6.5x or 8.5x, depending on model)

Burriss XTR II 1-5x24 with Ballistic 5.56 Gen3 RFP Reticle and LT104 Mount

Competitive shooters and tactical operators, prepare for serious state-of-the-art technology. XTR II riflescopes feature 5x zoom system,

25% thicker tube construction, dimensionally-matched precision adjustment knobs, and Zero Click Stop technology. Superb, high-performance optics offer Hi-Lume® multi-coated lenses, optimizing target resolution, contrast, and low-light performance. All hand-fitted internal assemblies are triple-spring tensioned for **absolute shock-proofing, even under severe recoil, and vibration resistant, even on extended vehicular patrols.** True to brand principles, Burriss XTR II scopes deliver far more than the modest-for-category price tags, and are protected forever with the Burriss Unconditional Forever Warranty.

Kahles K16i 1-6x24 Rifle Scope

The Kahles K16i delivers unmatched optical performance. With the largest field of view, eye box, clearest image edge to edge, true daytime illumination, and a variety of unique and innovative reticles, the K16i is in a class of its own. An **integrated magnification throw lever** allows for instant magnification changes even in the most adverse environmental conditions.

SM1 or S11 Reticle

The K16i, like all Kahles riflescopes, provides mechanical durability, accuracy, and repeatability that are second to none. When failure is not an option and ultimate performance is a must, choose the Kahles K16i, as this is the most advanced low power variable scope ever produced! Don't take our word for it. See why so many Pro-Series 3-Gun competitors choose the Kahles K16i.

ZD 1-4x22 Tactical K 5.56 Meopta and LT104-30

Meopta ZD riflescopes were developed for extremely difficult light and weather conditions.

The collimator function at magnification 1x and illuminated red dot is suitable especially for automatic rifles.

EUROPEAN OPTICS | SINCE 1933

Using the 4x magnification, it transforms to the perfect scope for short range and medium range shooting.

Thanks to these features this riflescope is much sought after by all the professionals who need a universal scope.

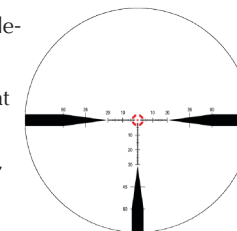

NightForce NX8 1-8x24mm F1 and LaRue Mount

Whether it's securing a perimeter or taking down an angry Cape buffalo at 10 yards, there is no better scope on the market to keep the odds in your favor. The true one power of this low-profile riflescope, combined with our new Power Throw Lever (PTLTM), makes it as quick as open sights and vastly more precise. Night vision compatible illumination makes this riflescope capable across a wide range of scenarios, keeping you up and running at any time of day. The shortest 1-4x riflescope on the market today, it is ideal for hunting dangerous game, CQB environments and 3-gun competitions. It is a riflescope that can literally save your life.

Power Throw Lever, 30 mm tube, 17oz, Illuminated FC-3G reticle

Leupold VX-R Patrol 1.25-4x20mm (30mm) with LaRue QD Mount

What happens when you combine a state of the art illumination system with the exclusive FireDot Reticle? You get the VX-R—only from Leupold, America's Optics Authority.

FireDot Illumination - Once activated, *the dot within the reticle illuminates* with bright, sharp definition, while the rest of the reticle is non-illuminated. This combination leads your eye naturally to the center aiming point and makes target acquisition quick, precise, and simple.

An important feature of select illuminated reticle models is the Leupold-exclusive **Motion Sensor Technology (MST)**. A single touch of the button or twist of the dial activates the illumination, offering several different intensity settings (depending on model)

including a high/low indicator (FireDot reticles only). The reticle will automatically switch to "stand-by mode" after five minutes of inactivity, then reactivate whenever the rifle is moved. This eliminates the need for excess movement reaching for buttons, while extending battery life (powered by a readily available CR-2032 coin cell battery).

LEUPOLD
TACTICAL OPTICS

Leupold Mark 6 3-18x44mm w/ LaRue Tactical Mount

Here's the new scope that everyone is talking about. The Mark 6™ 3-18 riflescope comes in a small, light package well suited to military, law enforcement and competitive shooting applications.

Size does matter. Less than 12 inches long, the scope has a powerful 6x-level zoom range that provides an expansive field of view and rapid target acquisition at lower magnifications, as well as outstanding long-range target engagement at higher powers.

- **Length: 11.9 inches**
- **Weight: 23.6 ounces**
- **Field of view (linear): 36.8 feet (3x) - 6.3 feet (18x) at 100 yards**
- **Locking fast-focus eyepiece**
- **Rugged 34mm maintube creates more than 28 milliradians of total elevation adjustment**
- **Reticles: Horus H-59**

www.LaRue.com

Snipers and hunters demand the utmost from their optics. Both must make time-critical shots at significant distances in a wide range of environments. Our scope mount combos package proven premium optics onto our industry-leading mounts. Combine top optics with LaRue's knowledgeable customer service, and you can be confident you are making the right investment in your shooting glass.

NightForce 4-16x42 ATACR F1 and LaRue QD Mount

Compact yet powerful, the **ATACR 4-16x42 F1** delivers stunning clarity from fully multi-coated ED glass lenses. Adjustments available in .1 Mrad (12 Mils per revolution) or .25 MOA (30 MOA per revolution) increments. Eyepiece features enhanced engraving, and integrated **Power Throw Lever (PTL)** for fast magnification adjustment. All of these features are paired with intelligent, Nightforce F1, *first focal plane reticles*. *Zero Stop technology* allows you to return to absolute zero just by feel.

Specifications:

Focal Plane: First

Objective outer diameter: 50mm

Exit pupil diameter: 4x:10.3mm, 16x:2.7mm

Field of view @100 yards/100 meters: 4x: 26.9ft, 16x: 6.9ft, 4x: 8.1m, 16x: 2.1 m

Eye relief: 85-90mm/3.35-3.54 in
Click value: .250 MOA, .1 Mil-rad
Parallax adjustment: 45 yds
Tube diameter: 34mm
Eyepiece outer diameter: 45 mm

Scope It Out

Bushnell 3.5-21x50 FFP Elite Tactical HDMR II with Horus H59 Reticle and LT Mount

- Model ET36215H
- Horus H-59 Reticle
- ThrowHammer™ lever
- T-Lok™ locking windage turret
- RevLimiter™ zero stop
- Fast focus eyepiece
- 34mm tube diameter

At less than 13" in length the HDMR II offers more performance than any scope in its class. This scope provides long-range precision without sacrificing short-range capability. The ThrowHammer™ Lever makes magnification changes a snap with the flick of a finger. The elevation turret provides 10 mils of adjustment per revolution and is also equipped with the easy-to-set RevLimiter™ zero stop for a positive return to zero. The features on the new HDMR II scopes add up to more time looking through your scope and less time adjusting it. The only thing more fun than drilling a target 1,000 yards away is doing it faster and more efficiently.

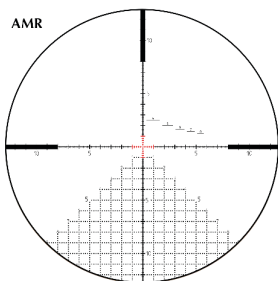

Kahles K624i 6-24x56 Rifle Scope (34mm) with LaRue QD Mount

The K624i is the perfect example of innovation and quality derived from 116 years of experience building the world's finest rifle scopes. Designed for applications where the purest optical clarity can mean the difference between a hit or miss; this optic sets new standards with incredible resolution, contrast, and 95% light transmission.

Kahles Optics, globally known as "The Rifle Scope Pioneer," has achieved a gargantuan feat of **95.2% light transmission along with exceedingly high resolution in a high magnification, variable power production rifle scope.** The updates to the highly popular K624i don't end with the optical prescription, but

continue with some refinements to the internal mechanical construction which enhance smoothness and reliability of the adjustments. To compliment the already successful AMR reticle, the Kahles K624i with MOAK reticle and ¼ MOA click turrets was developed at the specific request of a multitude of competitive shooters along with long range hunters and varminters that prefer that system.

www.LaRue.com

Schmidt & Bender 5-25x56 PMII LT H59 CM CCW MTC and LT104-34 QD Scope Mount

Designed to meet the unique challenges of high precision shooting. Quality and function make it possible to achieve exceptional shooting results as well as to fulfill the critical and demanding needs of official law enforcement and tactical applications. Providing **up to a 2000-meter capability**, the 5-25x56 provides a full 5x and a wider field of view. Parallax adjustment is operated via a separate turret, completely adjustable from 10 meters to infinity.

The **illuminated reticle** has 11 graduated settings offering precise control relative to ambient light. The scope includes Schmidt and Bender's unique More Tactile Clicks Locking Double Turn elevation knob that gives the shooter instant tactile reference to where the elevation is set.

The entire adjustment range can be covered in just two turns of the knob so the user will never become lost within the adjustment range. Horus H59 Reticle.

SCHMIDT & BENDER

U.S. Optics 3 Hole Switchview Lever

This little item makes it easy to adjust your US Optics power setting. The 3 Hole Switch View Lever is specifically designed to fit all US Optics Scopes to allow for easier travel between power settings. It takes only a few minutes to attach.

Also available in a shorter 2-hole design.

Bushnell LRHS 3-12x 44mm and LT Mount

The LRHS- Long Range Hunting Scope is the first member of the brand new Elite Tactical Hunter family of riflescopes offered by Bushnell. Based on proven designs developed in our acclaimed Elite Tactical scope line, the LRHS is not just a Tactical or Target scope dressed up for the field. It is a purpose built optic specially designed with input from the experts to meet the needs of hunters who require optimum performance at extreme ranges.

- 30mm one-piece tube
- Reticle: G2H first focal plane
- RevLimiter™ Zero Stop mechanism
- .1 mil clicks
- Side Parallax Adjustment

Swarovski X5i 3.5-18x50 P 1/4 MOA and QD Mount

The right estimate, a smart decision, and a clean shot. It doesn't matter whether you're shooting over long distances or honing your shooting skills, you always need to have the right equipment by your side.

The X5(i) from Swarovski redefines accuracy. Its new spring retention system and turrets are part of the total package promoting accuracy and offering you across the entire adjustment range an accurate impact point adjustment of 1/4 MOA in terms of both elevation and windage, even in the most extreme situations. To help you hit close targets accurately, you can use the SUBZERO function to go

below the sight-in distance. Thanks to its outstanding optical performance, this rifle scope is the ultimate expert at long-range shooting.

- Length (in / mm) 14.4 / 367
- Weight (oz / g) 28.6 / 810
- Central tube diameter (in / mm) 1.18 / 30

S.T.O.M.P. (Sniper Total Optical Mounting Package) LT-STOMP

Easily attach clip-on Night Vision Devices (CNVD's) and AN/PEQ's to your bolt guns. The LT STOMP (Sniper Total Optical Mounting Package) was designed by request to upgrade conventional bolt guns with an extended MIL-STD-1913 rail for use with issued night-vision accessories in front of their daytime optics. The end result was a lightweight, extremely repeatable QD system that acts as a shock absorber to protect sensitive internal electronics in NV optics.

Available for **either long action or short action M-700's**, the STOMP comes complete with everything needed to quickly and easily mount PVS-22's (OSTI), and PVS -24's (L3 EOS) perfectly-aligned with day optics. Includes the M-700 Picatinny **base** (choose between Long or Short action), 34mm scope **rings** (with 30 mm inserts included), and a **QD night vision over-arm**.

LaRue Tactical QD Mount for PVS-14 LT114

Mount your PVS-14 directly to your flat top.

CNC-machined from lightweight aluminum, this quick detachable mount easily adapts a PVS-14 night vision monocular to work behind the **Comp-Series of Aimpoints**, inline with our **LT150, LT129 and LT659** Mounts.

PVS-14 QD Pivot Mount LT755-14

Lightweight and robust pivoting mount for the PVS-14. The captive mounting screw is easy to mount in the dark, or when wearing gloves. When installed and positioned behind the primary optic, the PVS-14's on/off switch and gain control are located conveniently at the top for easy access.

Designed to mount behind LT-mounted Aimpoints (Comp M2, M3 and M4), our Pivot Mount places a PVS-14 in perfect, 1.725" centerline height-alignment, providing proper cheek-weld.

With durability and simplicity in-mind, this spring-tensioned pivot mount has no buttons and no switches. You simply grasp the PVS-14 one-handed, pull back, move it in-position, release, and you're good-to-go.

IR HUNTER Thermal Scope 2-4x19mm, 160x120 Resolution

Designed and built by a team of shooters that has been delivering great thermal sights for 20 years. No matter the weather, day or night, the IR HUNTER thermal sight puts you on target at a highly competitive price.

Light Mounts

Overwatch

Over the past few years, the **Surefire Scout** series of lights have become very popular, especially in the LE community. Many of these lights are being used on lightweight, low-profile carbines. Keeping this in mind, we designed the **LT752** (shown here) with an offset. When positioned forward on the left, the mount does not interfere with operation of front sights.

LaRue LT752 Tactical Surefire Scout Offset Mount

positions a Scout light as close to the weapon as possible, while at the same time putting the light in optimum position for thumb activation while holding the rifle "at the ready."

	1.040	.914	.830	.760

SureFire M1	X			
Mini Maglite				X

LT270 Adds LaRue QD capability to your SureFire Weaponlight. Replaces SureFire M900, M951 and M961 with adjustable speed lever.

LT707 Flashlight Mount Simply loosen the ring screws, insert your flashlight, and tighten the screws... clamping the flashlight's body securely in place. Available in four ring sizes. If your light is not on the chart above, get the next larger ring size. Comes with mount and 2 rings.

LT271 QD for Atlas Bipods (No Clamp models) and DBAL series lasers.

LT272 Replaces OEM SureFire Scout Light mount in minutes.

XT07 switch provides reliable, remote activation for X series Surefire.

All come with hardware, QD adjustment wrench, vial of blue Loctite and Instructions.

LaRue Tactical SPOTR - Complete Kit

a lightweight platform that facilitates the combination of a spotting scope with military-issue clip-on night-vision, thermal, and IR illumination accessories. Forward "Z" Rail aligns Leupold Mk4 12-40x60mm Tactical Spotting Scope with devices such as CNVD-T's, PVS-22's, PVS-24's.

Quality range accessories go hand-in-hand with our rifles and top optics. We have meticulously taken the guesswork out of what items are critical accessories needed at the range.

Leupold Mark 4 12-40x60mm Tactical Spotting Scope

An integral part of many sniper teams worldwide, the Leupold Mark-4 Tactical Spotting-Scope features a Leupold Mil Dot round dot (or optional HORUS) reticle for both range estimation and tactical cooperation with the shooter. This military spotting scope is ideal for Law Enforcement, SWAT, and Military Sniper teams, but it is also perfect for hunting.

*Shown factory-mounted in the SPOTR "Roll Cage"

The Bushnell Elite LMSS 8-40x60

The Bushnell Elite LMSS 8-40x60 Fogproof Spotting Scope has a 5x magnification ratio in a lightweight, tough as nails package with ED prime glass for vivid details, and fully multi-coated optics for the brightest images and extraordinary close-up views from extreme ranges.

Bushnell Elite Binoculars 10x 42mm

A 60+ year masterpiece of ruggedness, clarity and light transmission, the Elite® gets a significant performance upgrade this year with the addition of ED Prime glass. Delivers 99.7% light transmission per lens. Unmatched edge-to-edge clarity, contrast and color-true imagery. RainGuard HD coating. 100% waterproof,* fogproof. Tough, lightweight magnesium chassis for reliability in the most extreme conditions.

Long Range Gear

LaRue SPOTR LT666x06-ADP Tripod Adapter Mount QD

Allows precision shooting while standing or on uneven terrain.

The quick-disconnect LT666 Adapter is the interface used in the LT666 SPOTR observation telescope system. It is also ideal for use with picatinny-rail equipped rifles. CNC-machined from bar-stock aluminum, it features a single adjustable QD lever.

NOTE: The LT666 Adapter only works with the Manfrotto 322RC2 Ball Head.

SPOTR Manfrotto Tripod (055CXPRO3)

The ultra light tripod specifically designed for extreme outdoor assignments.

The legs and the column are made of 100% carbon fiber combined with magnesium die-casting quick action lever locking collars. Each leg can be independently set at **four different angle positions**.

This professional tripod provides great rigidity and lightness, combined with the best professional features such as the center column system which allows the center column to rotate over to 90 degrees (parallel to the ground). The top plate integrates a leveling bubble.

Works perfectly with the Manfrotto 322RC2 Heavy Duty Grip Ball Head to hold SPOTR scope system, or as a base for your rifle platform when combined with LT666 mount.

LaRue SPOTR Manfrotto Ball Head w/ LT666ADP

The 322RC2 is designed to interface perfectly with the Manfrotto Tripod 055CXPRO3 Tripod.

Combined with the LT666-ADP, the 322RC2 allows you to **rotate and lock your rifle in any shooting position**, and even let it stand free. The quick-disconnect LT666 Adapter is the interface used in the LT666 SPOTR observation telescope system. CNC-machined from bar-stock aluminum, it features a single adjustable QD lever.

NOTE: The LT666 Adapter only works with the Manfrotto 322RC2 Ball Head.

Kestrel

Kestrel Elite Weather Meter with Applied Ballistics & LiNK

The new Kestrel 5700 Elite Weather Meter with Applied Ballistics updates the Kestrel 4500 with:

- Bluetooth LINK works with PC/Mac via Dongle.
- Bluetooth LINK to Smartphones / Mobile / Android / IOS.
- Takes 1 AA battery (instead of 2 AAA).
- Battery door is in the back, sealed away from the motherboard, should your battery leak.
- Improved high resolution screen.
- Intuitive screen navigation.
- Scratch and break-resistant window.
- Options of Red (NV - Night Vision) & White backlights.

- Slightly bigger, but fits the same cases.
- Roughly 10,000 data points.
- Employs the Applied Ballistics bullet library, custom drag models, an exact measurement of your bullet's drag profile plus corrections for Aerodynamic Jump, Spin Drift, Coriolis, and Drop Scale Factoring to achieve accurate extended long-range shots.
- Customizable Range Card, expanded Ballistics Data Table, stores up to 16 gun and bullet profiles.
- Select either G1 or G7 ballistic coefficients.
- Get ballistic coefficient data for more than 225 long range bullets.
- Measure up to 15 environmental parameters at your fingertips.
- "Train" the software to match your specific rifle based on observed impacts at long range.

OD Green or Tan

The POD

Convert your Magpul CTR into a precision-rifle stock

Originally designed for the OBR, the LaRue POD (Prone Optimization Device) adds a 1.75" section of rail to the bottom of a **Magpul CTR**.

This creates the perfect platform for adding our **FUG**, which levels the rifle when shooting prone. The section of rail to the bottom also gives additional traction into bench rest bags, when not using an extension.

**Designed to work on the Magpul CTR and MOE Stocks only - will not work with RAT Stock.*

Harris Bipods

Harris bipods are quick detachable, and clamp to the sling swivel stud found in most rifles. We have adapters for those without studs.

Series "M": Legs eject by spring action. Height settings in 1" increments.

Series "S": Adds side to side tilt for instant leveling on uneven ground. Hinged base has tension adjustment and buffer springs for a rock-solid base. Available for ALL models except the "H."

Harris Combo Size Comparison

The **LT706 combo** combines the excellent Harris **LM-S 9"-13"** bipod with an integral, low-profile LaRue QD lever mount. We replaced the Harris OEM stud attachment base with a more secure custom chassis with a roughly .25" lower profile. The large swivel tension adjustment knob on the rear provides easy access and leverage. Bipod has 9-13" Legs with notches for a more positive lockup.

Adjustable base attaches to any MIL-1913 picatinny rail. Complete with necessary hardware, tools and Instructions.

Standard height Precision Rail Monopod with Quick Knob.

Press the spring loaded button to quickly slide the knob up or down to the desired sight picture. When the button is released, threads re-engage and fine adjustments can be made by rotating the knob. Elevation Range 3.75 - 4.65" Weight 7.4 oz.

The **BRM-S combo** has **Swivel, 6-9" Legs** (with leg notch) and LaRue Tactical LT130 QD Mount. The notched legs provide a more positive lockup, keeping legs from collapsing unintentionally.

Complete with necessary hardware, tools, vial of blue Loctite® and Instructions.

LT130: Switching between weapons has never been easier: move a Harris bipod to a railed handguard at a moment's notice.

Atlas Bipods

PSR Atlas Bipod BT46-NC and LT271 QD Mount Combo

The latest generation of the popular Atlas Bipod provides rock solid support while weighing **less than 11 ounces**.

- Stainless steel springs & fasteners
- 15 degrees +/- of preloaded PAN
- 15 degrees +/- of preloaded CANT
- Estimated range of elevation is 5-9" standard
- 5 Leg positions 45 degree position forwards or backwards
- Novel 45 degree Leg position
- Heat Treated Stainless Steel Leg components

The **LT271** provides QD functionality to Atlas Bipods (No Clamp models) and the DBAL series of lasers. It replaces the original mount in minutes.

MagnetoSpeed V3 Chronograph

The **MagnetoSpeed** is a barrel-mounted, ballistic chronograph that has brought modern convenience to the often tiresome task of measuring bullet velocities. The MagnetoSpeed chronographs use **ground breaking electromagnetic sensors**, instead of problematic optical sensors, to eliminate common chronograph problems. MagnetoSpeed chronographs are swift to set up, accurate, **impervious to light conditions, do not blow over in high winds and easily fit in a range bag**. The display unit stores up to 99 shots per string, calculates useful velocity statistics and saves the data in spreadsheet format to a micro SD card.

- Improved display
- A three-button menu system
- Battery options are; (1) 9-Volt or (2) CR123s
- Easy no-tools access battery compartment
- Improved shooting modes, with the ability to now operate with air guns
- Downloadable firmware updates
- Advanced data logging and troubleshooting capabilities
- More compact and rugged display housing
- Rapid-fire mode with rate-of-fire
- Bayonet strap ruggedized with metal buckle and triad thumb nut
- Added dual/redundant data connection points

Lancer Mags

From Lancer, comes the **L5 Advanced Warfighter Magazine**, 30 Round, in Opaque or Translucent. The L5AWM features a one piece hardened steel feed lip, impact resistant translucent polymer body, non-tilt follower, aggressive surface texture, stainless steel spring and slide on bottom. Compatible with: M4 / M16 / AR, HK416, ARX160, SCAR 16, SIG556, ARC, SA80 chambered in 5.56mmX45 / .223rem. Weight 4.4oz

The L5AWM is the only HYBRID AR magazine available today, featuring **the best characteristics of Polymer and Steel** magazine designs. It's NOT a Polymer Magazine. One-piece wrap-around, hardened steel feed lips won't bend or break; steel reinforces the back of the polymer body.

Lancer 5.56 in 10, 20 and 30-round capacity in Translucent and Opaque.

Magpul

Magpul PMAG® 20-Round AR/M4 GEN M3, 5.56x45 Magazine

The next-generation **PMAG 20 GEN M3** is a 20-round 5.56x45 NATO (.223 Remington) polymer magazine for AR15/M4 compatible weapons.

Modified internal and external geometry also permits operation with a wide range of non Colt®-spec platform-forms.

Magpul 30-Round CLEAR WINDOW PMAG® GEN M2 MOE 30-round 5.56x45 NATO (.223 Remington) for AR15/M4

- Impact resistant polymer,
- Flared floorplate,
- Stainless steel spring
- Self-lubricating follower
- Dual-side transparent windows

Magpul Ranger Floor Plate 5.56 NATO (3 Pack)

These low-profile floor plates allow unsurpassed speed in mag changes.

The Magpul Ranger is a floor plate replacement for current issue USGI 30 round magazines that incorporates an integral loop, floor plate lock, and mag identifier. When installed on the base of a magazine, the Magpul Ranger provides speed and controllability during high-stress, tactical magazine changes. Loop made of pliable Santoprene overmolded onto a stainless steel plate.

Available in Black, OD Green, Foliage and Flat Dark Earth. Comes in sets of three, complete with installation instructions.

www.LaRue.com

Hexmag HX30-AR-15 Magazine

Hexmags have a unique hexagon surface pattern (patent pending) that provides the user an excellent **texture to grip**. The anti tilt follower was designed to help stop residue particles from entering back into the user's rifle. The **high-visibility orange follower** allows for safer clearing of your rifle's chamber. **Requires no tools** or bullet tips to disassemble and clean the inside. A heat treated 17-7 PH Stainless Steel spring allows for long term magazine storage while fully loaded. Stainless Steel **resists corrosion** unlike music wire or silicon steel springs. Hexmag HX30's Reinforced Polymer Construction is lighter than other leading AR-15 magazines.

5.56 x 45 / .223 Remington, 300ACC Blackout approved, 458 SOCOM tested working by an independent manufacturer. National Tactical Officers Association tested and approved.

MagStorage Solutions AR-10 / 7.62 / AK47 Magazine Storage

MagStorage Solutions provides a universal storage solution for 20 and 30 round AR-10 and AK47 magazines. We've even been able to store 10 round mags in it. It holds six magazines at a time and can be mounted inside your gun safe, weapons room, or any area where you store and organize your magazines.

Magazines snap easily in/out and remain firmly in place.

Made in the USA and is compatible with most .223 and 5.56 caliber mags.

Stop searching your drawers, cabinets and range bags for your mags!

E-LANDER

E-Lander magazines feature a **6.5 Grendel specific design**, heat-treated steel body, durable body coating, reinforced floor plate tags, steel floor plate with integral locking plate, fully-deburred feed lips, and state-of-the-art, anti-tilt follower. Precision manufacturing produces consistency from one magazine to the next. **Available in capacities of 25, 17, or 10 rounds.**

www.LaRue.com

By Katie Godfrey

Many would agree, the most hard-earned skill for a long-range shooter is the ability to accurately read the wind. It can be extremely frustrating when you send a shot – perhaps your longest attempt ever – and hear your spotter tell you “Miss”. Then follow up with the dreaded, “Your elevation hold was perfect, just missed off the left edge, not enough wind hold.” You reengage, now holding the right edge of your target, confident that your correction will result in a hit. Send it. “Miss... just off the right edge.” Try again, might as well hold center. Send it. Uggg – “Miss...left, readjust to the right.”

There I was, at FTW Ranch in Texas with my PredatOBR .260. I was shooting a Berger 140 gr. I knew my wind. It was a CLEAR left to right crosswind – 15 mph and constant. My hat blew off. I felt it on my cheek. I was good to go. 1264 yards and my wind hold was 3.9 mils right. Confidence was high. I held and sent it. No impact. I could not even see the miss. The guide snickered and pointed out the vegetation down range. The grass was basically flat. Bent at 90 degrees. Instead of pushing over left to right, the grass down there was lying flat right to left. I forgot to look at that. I adjusted my hold to a left hold of 4 mils. Crazy. But the guide called out an impact – just on the right edge. Impact is an impact. A follow up shot holding 4.2 mils landed in the center. The sound of a steel impact is the best.

There are many things to think about when it comes to wind. Critical questions you will need to ask – When does wind matter? How can you learn to judge the wind? Once you know the wind speeds, how can you apply it for better accuracy?

When does wind matter?

There is a lot of debate on this and everyone has an opinion. Some people feel that it matters downrange at the target; the bullet has less velocity and is impacted more. Some feel it is at the muzzle – a small fractional impact will add an angle to the flight path. The fact of the matter is that wind matters throughout the entire flight of the bullet. Your ability as a shooter or a spotter to recognize the wind throughout the predicted flight and then apply it to your shot is what counts.

How can you learn to read the wind?

First, you can't learn it all on the range. Get a Kestrel meter (I am Katie from Kestrel, you know I had to encourage a Kestrel somewhere in this WIND article), take the Kestrel on dog walks with you.

If you don't have a dog, I also highly recommend getting one of those. I digress; use your Kestrel to learn how the wind feels at varying speeds. I know it sounds strange but figure out what wind speed makes your hat start to move. Ever have your hat blown off your head? Mine does it at 15 mph. Which is 3 wind dots on my LaRue PredatOBR .260 TreMR 3 reticle. Learn to identify the difference of 5 mph and 10 mph wind.

Next, learn how to identify the wind direction. The direction of wind as it relates to the direction of fire can make very big impacts on both your elevation hold and your wind hold. There are two tricks with the Kestrel that can help you quickly identify the direction of the wind. Let the lanyard dangle in the wind and observe the direction that it blows. Point the back of the Kestrel in that direction and take your wind reading. The other trick is to turn the Kestrel 90 degrees to the direction of the wind and watch the impeller. When the impeller stops, you have found the wind direction. Rotate the Kestrel back 90 degrees and take your wind reading.

Now, you need to apply it throughout the bullet path. Look at vegetation close to you and observe how it moves in the winds. Does the scrub brush bend at a 45 degree angle in 15 mph wind? Observe downrange and locate similar vegetation. What is it doing? If the scrub brush is bent at the same angle you are in luck – the wind is similar throughout the path. If it is bent in the same direction but not as severe, you can apply a half wind value and average the reading on the Kestrel. If it is bent at the same angle but in the opposite direction, the winds have crossed and your hold will change from the displayed hold on the Kestrel.

How do you apply your newfound wind knowledge?

To be honest, one of the best ways to apply your knowledge of wind is behind glass, but not from pulling a trigger. Jump on a spotting scope and start acting as a spotter for fellow shooters. Trust that they will hold what you tell them and apply your knowledge. Learn from their misses and communicate on the best corrections. Apply the corrections and observe. You can learn a lot at a range without ever sending one round. But seriously, what is the fun in that? Next, ask that same shooter to learn with you and jump behind the gun. Send it and remember – anytime at the range is a good time. Enjoy the process.

TEXAS JUST GOT QUIETER.

We received word that our warfighters need a suppressor with less back pressure ... the thinking is our Special Forces, the tips of our spear, are eating too much gun smoke over the course of their careers. The TranQuilo is our solution to this issue. Buy with confidence.

-Mark LaRue

FAQs

Do you have my FFL on file for my gun order?

If your order status is in GTG then we have all that we need to proceed with production. We appreciate your patience during this time.

Can I buy just the OBR or PredatAR upper/lower?

We only offer the OBR and PredatAR as a complete rifle; we do not sell the uppers or lowers individually.

Is it possible to get an OBR with a PredatAR handguard?

The handguards are specifically designed for each rifle and are not compatible; the OBR has MOA cant built in and the PST gas block requiring a different design than the PredatARs longer handguard without MOA cant.

What scope mount do I need?

Scope mount choices depend on a couple of things. First, what diameter is your scope? Many are 1". High end scopes tend to be 30mm, and some very high-end optics are 34 or 35mm.

Secondly, what is the eye relief of the scope you are buying? Many scopes run in the 3-4" range, in which the standard **LT104** SPR/M4 mount will be ideal. If your scope has very long eye relief, such as 5-6", the **LT139** SPR-E mount will be perfect.

Operators using the Schmidt and Bender Short Dot scope and the PEQ-2 will need to use the **LT-135**, which will raise the optic over the top of the illuminator.

.308 AR-platform users should use the **LT-158**, which will place the optic the same height over the bore, as it compensates for the slightly higher top rail. This mount also has a built in 10 MOA base.

Which mount should I buy for my Aimpoint?

For the **Comp M4** (the newest version of the US Army's M68 CCO Close-Combat Optic), the **LT659** is the QD solution. It is available in three sizes, **Tall LT659**, **Medium LT659NV** & **Short LT659HK**.

Aimpoint Micro T-1, T-2, H-1, H-2, utilize our popular **LT660**, **LT751**, **LT660HK**, and **LT661** mounts. The **LT724** positions the optic offset to the side. See page 15 for details.

For the **ACO, PRO, Comp M2 and M3**, our **LT150**, **LT129** mounts provide a repeatable zero and a lower 1/3rd co-witness. The **LT129** Cantilever mount is perfect for those who like to get their CCO out further for more eye relief, or are planning on running a magnifier behind it. Both of these mounts have a built-in watertight storage compartment for a spare battery. The **LT152** was designed for the **RASII**, but is equally at home wherever a short mount is desired. It positions the centerline of the optic 1.20" above the top of the rail, and has no storage compartment.

What height Aimpoint 3x mount do I need?

The **HIGH** 3x mount works behind our **LT150** aimpoint mount, as well as the **LT-129** mount.

The **LOW** 3x mount works behind the Eotech when mounted on the small rail section on the back of the Eotech mount.

How well do the LaRue mounts repeat zero...is it OK to remove my optics from the rifle?

Mounted correctly, you'll have no problems. Repeatability is the heart of our mounting systems. We have run **600 round "on and off" torture tests** here at our on-site range... with the last 3-shot group being only 3/8" away from the first three rounds.

See more on our website (FAQs link is at the bottom of every page).

www.LaRue.com

OBR 7.62 or 5.56

LaRue accuracy is known world-wide. **No rifle leaves our facility unless it obtains accuracy of less-than 1 MOA (1.047") at 100 Yards,** and proves it in our 100-yard tunnel. Each rifle ships with a copy of its own 3-round group.

Wide range of barrel lengths, muzzle brakes and handguard accessories fit the OBR to your needs.

Low profile gas block with **Port Selector Technology** for optimum function when suppressed.

Free floating handguard isolates barrel, and barrel nut from interference, for accuracy and to prevent heat transfer.

Bolt and Bolt Carrier are hand-polished hard-chrome, with staked, zero-leak carrier key.

A-PEG™ grip for the ultimate in control.

BUIS drop slot provides clearance for optics.

The 7.62 comes with A2 Stock, in black, (shown).

*16" OBR shown with optional accessories.

The rifle that started it all. The flagship. The legend. Tested in battle, proven in competition, now in your hands. Own the range. Own a LaRue.

LaRue's **OBR (Optimized Battle Rifle)** was built from the ground up, using a newly designed upper-receiver platform CNC-machined from billet, for optimum fit and consistency, and strengthened and stiffened in critical areas, translating into **maximum accuracy.**

Target-grade free floating barrel and barrel nut do not contact handguard at any point.

Generous, **one-piece top rail** with detachable 3" MIL-STD-1913 side rails.

Port Selector Technology (PST) two-point adjustable gas selector. Go between suppressed, and unsuppressed at the flip of a switch.

XTRAXN™ facilitates reliable extraction through a wide range of temperature / chamber pressure extremes.

7.62 features built-in 20 MOA rise to increase range of optics. Heavy contour, 1:10 twist barrels in 16.1", 18" & 20" threaded in 5/8 x 24.

5.56 provides 10 MOA rise, and is offered in 12", 16.1", 18" & 20" barrels, with a 1:8 twist rate. Threaded in 1/2 x 28.

Base Model comes with A2 stock and LaRue medium A-PEG™ grip, A2 flash hider, plus two LaRue-made 20-round magazines (other muzzle devices available at additional cost). **RAT™ Stock standard on 12", 16", and 18" 5.56 models.**

"The Free World needs a 7.62 gas gun that is accurate and reliable." -Mark LaRue

PredatAR 5.56 or 7.62

The PredatAR is designed for those searching for a **lightweight**, ultra-reliable and accurate **7.62 or 5.56 mm NATO rifle** for home-defense, competition-shooting or hunting. The PredatAR takes the highly accurate OBR 5.56 "Lite" design, and **lightens it in every possible way with the least possible impact to the accuracy** that the standard OBR is known for. By contouring the barrel, skeletonizing the handguard, lowering and simplifying the upper rail, and utilizing a low-profile gas block, we were able to **reduce roughly 1 pound from the standard OBR 5.56 and OBR 7.62 rifles.**

Lightweight 16" or 18" Barrel.

Extended rail for versatile mounting of lights, optics, bipods and accessories.

XTRAXN™ is a proprietary chamber feature added to facilitate reliable extraction through a wide range of temperature and chamber pressures.

Patented handguard mount isolates barrel from pressure, keeps heat away from hand.

Hard-chromed, hand-polished bolt carrier.

A-PEG™ Grip improves control.

RAT™ Stock 6 position adjustability and storage for cleaning rod.

*Iron Sights not included.

Barrels are **16" or 18" lightweight-profiled** with 1:8 rifling for 5.56mm and 1/2 x 28 muzzle threading. The 7.62 gets 1:10 rifling and 5/8 x 24 threads. Both ship with A2 flash hider.

Handguards on the PredatAR extend to **14.75"**, to suit a larger range of shooting styles. The **zero-MOA upper rail** provides ample room for weapon-mounted NV, day/night combinations. Both upper and lower are CNC-machined from billet aluminum for the optimum fit and consistency. Each rifle ships with one, 3" long, MIL-STD-1913 detachable rail section.

Both models come with 6-position **LaRue RAT™ Stock** and LaRue medium **A-PEG™Grip**. Bolt carriers are hand-polished hard-chrome with staked carrier keys, and Texas-Spec bolt assemblies. Includes 1 Aluminum Magazine, 1 Rail Strip, and A2 Flash Hider.

The most remarkable feature of the PredatOBR is its ability to be completely "broken down" and stored compactly.

Open the locking, stainless steel levers on each side of the handguard, and the **handguard slides off of the upper assembly in seconds**. The Target Contour barrel can then easily be removed, retaining the gas tube, gas block and muzzle device. Reassembled correctly, the **point of impact (POI) will be within 0.0 to 0.5 MOA** of the original.

Includes a Port Selector Technology™ (PST) gas block for optimum function when using a sound suppressor.

Zero-MOA upper rail provides plenty of room for night-vision day/night combinations.

Handguard bolts directly to the proprietary upper receiver, creating a **true "free-float" barrel**.

MBT-2S (Meticulously Built Trigger), a 2-stage innovation that gives you target precision with battle-tough engagement.

RAT™ Stock - 6 position adjustability with storage for a cleaning rod. Height is optimized for a perfect cheek weld.

The PredatOBR gives you the accuracy-enhancing features of the OBR on a lightened receiver with the capability of **compact, covert storage and travel**.

Rail sections provide a robust, lightweight mounting space for aiming lasers, illumination and bipods. Three included 3-inch MIL-STD-1913 rail sections can be positioned anywhere along the handguard, using the supplied (Torx® T-15 wrench). Reinforced, threaded **stainless-steel hard-points are placed along the entire length** of the handguard at the 3, 6, and 9 o'clock positions.

Wrapped in the optional Rollup Bag this target-grade battle rifle fits easily into our 20" L x 8.9" W x 9.7" D Toolbox.

LaRue TranQuilo™ Sound Suppressor M308

The **LaRue TranQuilo** was designed and engineered for the LaRue 7.62x51 family of rifles, but it's right at-home on any precision .308 with a 5/8-24 threaded muzzle (1/2-28 threaded adapters also available). The TranQuilo is **100% CNC machined from stainless steels**. Its design reduces sound to hearing-safe levels and flash signature to almost zero. CNC machining of all components results in **near zero point-of-impact shift** when comparing on/off repeatability.

The TranQuilo's **reduced-blowback** is what sets it apart. The design approach implements what LaRue calls "SOT" (Safer Operator Technology). With mitigation of gas blow-back in mind, LEPE (Lower Ejection Port Emissions) **reduces dangerous materials and contaminants** that typically encounter the user's face. LEPE is an internal design that allows a percentage of pressure to bypass the main flow-path, resulting in extremely **low gas blow-back and soft recoil** with the benefit of **optimum noise and flash reduction**.

All components are manufactured from a combination of **17-4 PH Stainless Steel and Incoloy A-286**, 17-4 PH (Precipitation Hardening) and are precisely engineered to fit together solidly and perfectly, with **no welds** to fail, or dimensionally migrate as heat builds up.

To ensure the suppressor remains locked when attached, a **captive locking-ring** securely grips the suppressor to the adapter. Knurled bands provide structural robustness and add grip for installation and removal. The open, angled, four-prong tip reduces the small residual muzzle flash.

The Muzzle-Brake Adapter is also precision-machined from 17-4 PH Stainless Steel. Even though the TranQuilo was designed as a .308 suppressor, it also works well on .223 rifles. Adapters are available in **both 5/8-24 and 1/2-28 threads**. The Adapter's patented **dual-shouldered design** seats the suppressor in **perfect alignment to the bore**, and eliminates gas from escaping to the rear of the suppressor, keeping attachment threads clean and free of carbon. The TranQuilo Adapter comes with a theta shim kit.

- Weight: 23 oz.
- Length: 8"
- Diameter: 1.50-1.75"
- Finish: 17-4 PH Stainless Steel
- Adapter: LaRue Muzzle Brake, SS 17-4 PH, 5/8-24 thread and 1/2-28 threads.

Case Solved

LaRue Covert Rifle Case, MkII

We've taken the low signature, versatile Covert Case to a whole new level.

Based on feedback from our customers, we decided to upgrade the MKII Covert Case with a variety of enhancements. We've made it an inch and a half wider, and an inch deeper. These dimensions may sound small, but they *provide the needed room to easily add longer barrel-length uppers* (like 18") and also position uppers vertically (to save room). We replaced the mesh pockets with a 10" x 7" Velcro loop panel and a 9" x 7" pocket. The loop panel provides a base for a variety of hook-backed accessories. The pocket has a YKK zipper and 5 rows of MOLLE Web. The *movable barriers now have hinge-points for easy positioning and customization*. Velcro on the hinge-points allows users to branch off additional smaller barriers in order to make compartments. Made in Texas, USA.

Overall construction is of abrasion-resistant Cordura nylon, the case has *rigid, densely, padded walls* which protect your valuable contents without taking up space. Generous use of hook and loop surfaces allow as many configurations as you can imagine. Exterior 27.5" x 11" x 4.5" (the old version was 26" x 12" x 3.5")

In: Black, Blue, Charcoal, Coyote Brown, Foliage, Navy, Ranger Green, Red.

Versatile, Covert, Convertible

www.LaRue.com

LaRue Rifle Bag

The perfect ruggedized case for your Tactical Rifle. Designed to **hold up to 20" barreled AR's with collapsible stocks**. Overbuilt for a lifetime of hard use, this padded case is ideal for your favorite rifles or even beat-up trunk guns.

Exterior:

42" x 12" x 3.5" (excluding mag pouches). Heavy Cordura shell with a pair of 2" wide web carrying handles.

A 21" x 7" pocket keeps paperwork within reach. **5 magazine pouches** on the front are designed for either 5.56 or 7.62 mags. Each measures 6" x 3" x 1.5". Each mag pouch flap is adjustable with a strap/QD buckle, to accommodate contents up to 8" long (USGI Mags with Ranger Plates fit perfectly).

On the back are **two padded adjustable shoulder straps**. Each strap adjusts from 16" to 33". A 5.5" x 4.5" **YKK-zippered clear pocket** is great for ID, range cards, etc. A D-Ring is also added at the end of the bag, as an additional hard-point.

Interior:

Opening the heavy YKK zipper reveals a padded inner wall that acts as a fly to keep contents from rubbing against zipper teeth, and also provides protection from the elements. Contents are protected by **1" thick foam walls**, sandwiched between Cordura.

The **interior dimensions are 41" x 11" x 1.5"**, easily accommodating most rifles. Two 14" x 2" hook and loop straps help keep contents secure. A 14-point 2" lash-down web panel allows the user to position the straps where they're needed most. A **removable 14" x 11" padded panel** provides added protection.

Made in USA Colors: OD Green, Black, Tan

Accuracy First Shooting Rest Bag

Stability and proper position is very important in the world of precision shooting. This little "bean bag" is the perfect size for the precision shooter. It can be formed into a variety of shapes and heights to accommodate the proper shooting position on a variety of surfaces, especially uneven ground. Measures 8" x 5" x 2" and is patterned in MultiCam, embroidered with the "Accuracy 1st" logo.

Armageddon Gear X-Wing Enhanced Rear Bag

Built with rugged Cordura Nylon with QD swivel mount.

Strap with Velcro can attach to rifle stock, forend, or wherever needed. The X-shaped bag provides a secure resting place for your riflestock, regardless of orientation. Proudly made in the USA, with lifetime warranty!

Colors: Coyote Brown or Black

Storm iM3100 Gun Case iM3100

Hardigg Storm Cases provide the safest transportation for sensitive, expensive or vital equipment. Every Storm case is **Airtight, Watertight and Virtually Unbreakable**. All Storm Cases are Guaranteed for Life - Nothing Stands up to the Power of STORM.

- Six Press & Pull Latches
- Two Double-layered, Soft-grip Handles
- Two Padlockable Hasps
- In-line Wheels
- Vortex® Valve
- Powerful Hinges
- Lightweight Strong HPX® Resin
- Watertight
- Guaranteed For Life
- Interior Dimensions:
- 44.00" x 14.00" x 6.00" (111.7 x 35.5 x 15.2 cm)
- Available in Black, or OD Green.

Storm iM3300 Gun Case

Same rugged features, but 6" longer than 3100 (above).

Interior Dimensions:

50.50" x 14.00" x 6.00" (128.2 x 35.5 x 15.2 cm)

Long enough to hold your new .260 PredatOBR 22" with suppressor attached.

Available in black, or OD green.

iM2306 Pelican Case

One of the best ways to protect your expensive scopes and fragile items when traveling. Easy to remove "pluck foam" allows the user to configure the internal structure into whatever custom shape they want.

Features:

- Two Press & Pull Latches
- Double-layered, Soft-grip Handle
- Two Padlockable Hasps
- Vortex® Valve
- Flush Powerful Hinges
- Meets Carry-on Regulations
- Lightweight Strong HPX® Resin
- Watertight
- Dustproof
- Guaranteed For Life

Specifications:

Interior (L x W x D)
17" x 6.3" x 6.2" (43.2 x 16 x 15.7 cm)

Exterior (L x W x D)
18.2" x 8.4" x 6.7" (46.2 x 21.3 x 17 cm)

Combo / Pelican 1750 Hard Case and M.O.A.B Soft Case

Pelican 1750 Hard Case:

Pelican cases provide the safest transportable environment for sensitive, expensive or vital equipment. Every case is Airtight, Watertight and Virtually Unbreakable.

M.O.A.B Soft Case:

- Velcro straps that allow the freedom to convert the MOAB into a shooting mat.
- 5 Magazine pouches that will hold (2) 5.56 30 round magazines or (1) 7.62 20 round magazine.
- 1 extra large pouch for convenient storage of your Harris Bi-pod.
- MOLLE strips for added accessories such as your new Kestrel Weather Meter, Ballistic Calculator, or detachable Suppressor.
- Internal pocket for storage.
- Adjustable Velcro/ MOLLE strips to secure your rifle.
- Fully adjustable shoulder straps for easy carry.
- The MOAB is completely padded with closed cell foam to ensure that your valuable firearms and accessories are well protected.
- Designed specifically to fit inside the 1750 case.

WaterShed Weapons Bag, Short

When your adventures take you across extended open water, salt spray, or immersion, trust WaterShed dry bags to keep your gear dry and protected.

"WaterShed created and patented a waterproof closure system without equal. Think of a freezer bag closure amped-up to giant proportions. Easy to use, yet airtight, our closure is an elegantly simple alternative to cumbersome roll-down bags that fail when submerged or left in standing water." Fits firearms 24" - 34".

Closure Type: ZipDry

Storm iM3100 Hard Case and LaRue Soft Case Combo

All the advantages of a hard and soft case at a great discounted price. Our Improved Discreet Case is lighter, easier to carry, and compact to store when empty.

The Storm iM3100 hard case offers shock and crush protection, plus the ability to secure with locks when needed.

LaRue Improved Discreet Case fits perfectly into the Storm iM3100.

Use the hard case to transport your gear via personal or public transportation, leave the hard case in your hotel and take the soft case with you to your destination.

Interior:
36.50" x 14.00" x 6.00" (92.7 x 35.5 x 15.2 cm)

FAST:

Free-standing Agile Steel Target TG-FAST

The LaRue FAST is a lightweight and portable reactionary target that can be setup in minutes. The FAST uses 4" x 4" posts, available at most lumber dealers. Precisely manufactured from high quality materials and designed to survive the toughest environments and roughest treatment.

Free-Standing Non Powered Easy to setup and position, needs no batteries or power.

Man Portable 39 lbs total weight. Minor assembly required.

Battle Tough 3/8" thick 500 Brinell target. Suitable for .223s and .308s. Excellent for shotgun and handgun training too! Targets are weather-proof, leave it out year round.

FAST Assembly

Free-standing Agile Steel Target. Includes Target, Base Plate, Spall Plate, and retaining Pins. (Does not include the 4" x 4" post, Post Guard or Post base).

Post Guard

This optional armor plate slides into the base assembly, hanging down in front of the 4" x 4", offering protection from impacts below the target.

Post Base

This optional part holds a 4" x 4" post vertically, anywhere you want to put a FAST Target.

LaRue Tactical Sniper Target TG1

LaRue Targets are made of the highest quality materials and are produced on computer numerically controlled (CNC) machinery that gives consistent high quality.

The overall dimensions are 28 inches high, 32 inches wide and is made of 3/8 inch steel plate that is hardened to 500 Brinell. Silhouette plates are rated to accommodate 7.62mm NATO, but have been shot them with .300 Winchester Magnum at ranges as close as 200 meters without ill effect.

LaRue targets are battery powered and will cycle through approximately 1,800 down and up cycles before requiring a recharge. After being hit, the target returns to the upright position and automatically shuts off until the silhouette is again hit and knocked down. This is the primary reason for the systems long battery life. It also precludes having to turn the targets off and on, although there is a master on/off switch.

The targets are weatherproof and can be left out without damage. Users have reported leaving LaRue targets exposed to the weather over a year's time without affecting their operation. LaRue Tactical stands behind the quality of its targets and will repair or replace any target that is found to be defective.

LaRue Rifle Owner Armorer's Class

This isn't a typical armorer's class. The LaRue Rifle Owner Armorer's Class is based on the same highly-detailed and thorough class we've given to the government for years. In this two-day detail intensive class, you will learn everything you need to know from essential tools, to function-checking. You will leave with the knowledge and skill to keep your LaRue rifle running at its best.

An in-depth take home manual and tool kit for each student will be provided for the class, so all you need to do is bring your LaRue rifle (of any type) and be on time. You will be disassembling your rifle down to the smallest components, so prepare to learn more about your LaRue firearm than you ever have.

Each class will be limited to 12 students, so that instruction can be most effective. We are expecting the schedule to fill up quickly so get on the list as soon as you can.

Some of the topics covered will be:
Nomenclature and Function of all Major Components

Armorer's Tools & Equipment
Disassembly of Major Components
Assembly, Testing and Headspacing
Cycle of Operation
Malfunctions (Diagnosis and Repair)

INSTRUCTOR:

We are extremely proud to have **Robert Gee** as our Instructor.

Rob has over 35 years of experience in the field of gunsmithing and Armorer training. After graduating from the Pennsylvania Gunsmith School he owned a successful gunsmithing business for 8 years.

He then spent the next 19 years as the Armory Operations Program Manager at the Department of Energy National Training Center, where he was responsible for the training, certification and recertification of all DOE site Armorer's.

Utilizing this vast experience, he has instructed and/or written the Armorer Programs for companies such as Bushmaster, DPMS, LaRue Tactical, Long Mountain Outfitters and Sig Sauer after leaving the NTC. Several firearms manufacturers have consulted with him on various manufacturing issues as well as product evaluation.

Show Some Pride!

"There's a story behind this cap. While at **Gunsite** for a closed-range test, I happened-in to their wonderful Pro Shop. Caps galore. I looked over every cap they had, and they have a lot, and I decided on this one. Bought one, brought it home, Googled up the exact model, now it's our one and only cap...and do go visit Gunsite, it's a cool place." – ML.

We've improved our popular ball cap. We had the *button taken off the top* and the brass grommets replaced with *sewn-in reinforcements*. Now, they are much more comfortable when wearing hearing wrap-over protection.

Each hat features a *recessed opening at the right base of the brim* that allows users to insert flashlights with reverse retention clips (like the SureFire Backup). This allows the user to keep the light on the top of the brim. Two *sewn-in utility loops help to keep eyewear from sliding off the brim* and also out from under earpro. The Velcro backstrap adjusts to almost any size head.

Colors: Olive Drab, Khaki, Black, UDE

LaRue Tactical Cap Blaze

When you're required to wear blaze orange, you might as well let 'em know where you stand.

www.LaRue.com

LaRue Tactical Cap with Velcro Patch Front

Our same popular ball cap, but now with *velcro*. We had the button taken off the top and the brass grommets replaced with *sewn-in reinforcements*. Now, they are *much more comfortable when wearing hearing protection wrap-over*. Order WITH, or WITHOUT our Morale Patches.

Available in Black, Tan, OD Green and UDE. UDE has "UDE" embroidered on the side

LaRue-Embroidered Outdoor Research Wind Pro Hat

The "LaRue" Wind Pro is custom embroidered with the world-famous LaRue 'Dillo. This warm, close-fitting hat is an excellent choice for that cold day at the range...or for anyone heading out in cold conditions. It's made of a hard-faced fleece that is wind-resistant, water-repellent, and is highly breathable.

You are gonna LOVE this hat.

Color: Black, Size: L/XL

LaRue Tactical "Taking Notes" Cap

Hat has "I'm Taking Notes..." embroidered on front, and "www.LaRue.com" on the back.

Color: Tan

LaRue Tactical Shirts

Made from comfortable Gildan Activewear 100% Cotton, with the LaRue Tactical Texas Logo on the left chest and "God Bless Our Troops...Especially Our Snipers!" on the back. And yes, we do have those in long-sleeved.

LaRue Tactical LONG-SLEEVE T-Shirts

LaRue Tactical Fine Jersey T-Shirt

We've added these for folks that desire a more comfortable shirt. The American Apparel 2001 is the softest, smoothest, best-looking short sleeve tee shirt available anywhere...and made in the USA!

LaRue Tactical Texas Logo on the left chest and "God Bless Our Troops...Especially Our Snipers!" on the back.

- Fine Jersey (100% Cotton) construction
 - Durable rib neckband
- Colors: Olive, Slate, Black

NOTE: American Apparel shirts tend to run on the small size. We recommend ordering a size larger than normal.

Dillo Grenade Shirts

100% Cotton, preshrunk shirts with the popular "Dillo Grenade" design.

Red Shirt / Black print

Chestnut Shirt / Khaki print

Charcoal Shirt / Gray print

Sizes available: SM, M, L, XL, 2XL

LaRue Dillo Dust Shirt

Show off your LaRue pride - in a very cool way.

The famous Dillo Dust label is boldly silk-screened across the back for everyone at the next BBQ to see.

Applied Ballistics Combo

Package includes:

Applied Ballistics for Long Range Shooting 3rd Edition by **Bryan Litz** - This book offers an original contribution to the long range shooting sports: *experimentally measured Ballistic Coefficient (BC) data for over 175 long range bullets of all popular brands.* With truly accurate BC's, shooters can make very precise trajectory calculations.

Putting Rounds on Target with Bryan Litz, 4-Disk DVD Set.

Accuracy and Precision For Long Range Shooting
A Practical Guide for Riflemen

Applied Ballistics Accuracy and Precision for Long Range Shooting - written in the same easy to understand language that made Applied Ballistics for Long Range Shooting such an enjoyable and effective book. Long range shooting can be very technical. However, author Bryan Litz, communicates these complex ideas in layman's terms, so most average shooters can master the subject with little difficulty.

Kestrel Elite Weather Meter with Applied Ballistics & LiNK

Bryan Litz earned his Aerospace Engineering degree from Pennsylvania State University in 2002. For the next 6 years, he worked for the US Air Force on air-to-air missile design, modeling and simulation. In 2008, Bryan became the Chief Ballistician for Berger bullets. Bryan is also a very active and successful competitive shooter.

Combative Fundamentals, An Unconventional Approach

"The secret to winning is simple. Master the fundamentals and then execute them faster than your opponent.."

-Jeff Gonzales.

The most comprehensive source of information for the pistol and carbine available today.

Written by a U.S. Navy SEAL. Complete pistol and carbine information. Centered around adult learning. Utilizes lessons learned from combat and training.

Full-sized 8.5 x 11, packed with 325 pages of information with nearly 50 pictures.

M16/M4, Handbook - a quick reference training guide for all owners of M16/M4/AR15 rifles, by Mike Pannone.

Applies the author's more-than 20 years of shooting experience using the M16/M4 series weapons for sport, training and combat. This handbook compresses operation and employment of the M16/M4 weapon system.

Covers: ballistics, malfunctions, maintenance, and sight/optics adjustment.

Coil bound to lay flat, its 4" x 6" compact size, fits easily in cargo pockets.

96 pages, with Color Photos / Diagrams

STAY IN THE FIGHT!!

This book is intended to enhance your shooting skills and refine the tactical employment of your Combat Pistol. Military, Law Enforcement and Civilians alike will find a wealth of information and numerous tools for their Tactical Toolbox. We also discuss the Training Mentality and

Mindset that will help you not only survive your next gunfight but thrive.

"My mission is to teach you aggressive techniques that will keep you operating on the offense; we will push you beyond your current capabilities. If you are willing to keep an open mind you will take away valuable Warrior skills that may be used the next time you step into the street."

-SGM Kyle E. Lamb

TAPS: Tactical Application of Practical Shooting: Recognize the void in your tactical training

This book will increase the confidence and efficiency of your shooting by providing training tips and courses of fire to help you significantly improve your marksmanship. Utilize his tips and techniques and reap the benefits as you shoot.

-Author Patrick McNamara

spent twenty-two years in the United States Army in a myriad of special operations units.

Applied Ballistics For Long Range Shooting 3rd Edition

Exterior ballistics is a very mature science. Unfortunately, most shooters have not been able to take full advantage of this field of knowledge because it has always been described in a highly technical language.

In this book, author, champion shooter and Ballistician **Bryan Litz** breaks down the complex science of accuracy into layman's terms that are easy to understand and apply. The objective of each subject matter is to present information to the reader which they can use to hit targets at long range.

New for this Third Edition

The traditional role of exterior ballistics has been to account for the variables related to bullet flight so that accurate fire solutions can be computed. Author Bryan Litz believes that ballistics has more to offer.

Weapon Employment Zone (WEZ) analysis is the calculation of hit percentages. The subject of WEZ analysis is explored and some enlightening topics are presented regarding the effects of environmental uncertainties on your hit percentage, as well as how the ballistic performance of your rifle and bullet affects hit percentage. This edition also includes the latest version of the Applied Ballistics Point Mass Solver on CD. Combined with experimentally measured BC's, this program is capable of modeling extremely accurate trajectories as verified in Chapter 8.

Accuracy 1st - Long Range Made Easy

Volume 1

Disc 1

Join renowned precision shooting instructor **Todd Hodnett** and learn: How to best select the proper rifle platform, scope and bullet. How to zero. Guest **Bryan Litz** discusses ballistics.

Disc 2

Optimal shooting positioning. Proper recoil management. How to set up the rifle. Todd's Speed Wind formula.

Volume 2

Disc 1

Hit the range with Todd to learn: Using the Applied Ballistics Kestrel, Bullet Diameter, Truing Ballistic Algorithms, Drag Scale Factoring (DFS), WEZ Finish with Hit Probability.

Disc 2

Todd shares the tricks of the trade: Wind Course, Whiz Wheel with Alice, Reticle Types. Concludes with a demonstration of the infamous One Mile Shot.

Putting Rounds on Target -with Bryan Litz

Applied Ballistics Instructional 4-DVD Set

Champion shooter and Ballistician, **Bryan Litz** explains and demonstrates the science of external ballistics in long range shooting.

Disc 1:

Accuracy & Precision
Tall Target Test
Chronographs & Statistics
Ballistic Coefficient
Trajectory Terms

Disc 2:

Primary Elevation Influences
Wind
Secondary Effects
Using Ballistics Solvers
Short & Long Range Equipment

Disc 3:

308 Winchester
284 Winchester
338 Lapua Magnum
Extended Range Shooting
Equipment for Extended Range Shooting
One Mile Shooting

Bonus Disc:

"Long Range Competition: It's Worth it." Documentary of long range bulls-eye shooting.

Paul Howe Advanced Tac Pistol/Rifle Operator

Paul Howe is a high-risk training instructor who served 20 years in the US Army, ten of those in Special Operations. He served as a Tactical Team Leader and Senior Instructor while assigned to Army Special Operations. During his tour in special operations, he was involved in several combat actions. One of the most notable was the battle of Mogadishu that was later portrayed in the motion picture *Black Hawk Down*.

In this installment, Paul takes you to the next level of your one-on-one training. You will review working with barricades, using vehicles as cover, dealing with full and partially exposed targets, the hallway pie, masking targets, and more. You'll also review the 100-7 Drill, the Line Drill, and the 25-Yard Diagnostics.

TReMoR 2 The Refined MIL Reticle

Accuracy 1st Development Group, Inc. puts to rest some of the common misconceptions about what it takes to be an accurate long range hunter or marksman with this instructional DVD.

Backed by the expertise of **Todd Hodnett**, and **Bryan Litz**, this DVD simplifies complex ballistics formulas into a fast and easy "second grade math" process that allows the operator to see the image in the glass, and engage it very quickly. A shooter who doesn't have countless hours of range time, and unlimited ammo can become proficient with their weapon system of choice, even without a dope book, or rangefinder.

Training Tools

TACOST Card Sets, by TRICON

If you're tired of just putting holes in paper, step up to the TACOST Card challenge!

These card sets were developed by **Jeff Gonzalez**. When it comes down to training, Jeff is as serious as it gets. A flip of each card provides you with an individual and unique challenge. These drills are categorized into 4 different groups (Marksmanship, Speed, Baseline and DryFire).

Each group has 13 exercises. Make your way through the entire deck and you will certainly sharpen your skills. The basic design is based on a standard 52-card playing deck. In fact, once training is done for the day, you can play whatever card game you choose. The deck includes a legend, basic instructions, and safety rules. Everything else is pretty much self-explanatory.

Available in either Pistol or Rifle.

Brad Thor "Act of War: A Thriller"

#1 New York Times bestselling author **Brad Thor** delivers his most frightening and pulse-pounding thriller ever! After a CIA agent mysteriously dies overseas, his top asset surfaces with a startling and terrifying claim. There's just one problem—no one knows if she can be trusted. But when six exchange students go missing, two airplane passengers trade places, and one political-asylum seeker is arrested, a deadly chain of events is set in motion.

JL Bourne "Day by Day Armageddon"

Once on the fringes of horror, the "zombie apocalypse," has become one of the most buzzworthy genres in popular culture. Now, in *Day by Day Armageddon*, J.L. Bourne delivers an intelligent, gripping thriller that will leave both new and die-hard zombie fans breathless.

Sporadic news reports indicate chaos and violence spreading through U.S. cities. An unknown evil is sweeping the planet. The dead are rising to claim the Earth as the new dominant species in the food chain. This is the handwritten journal depicting one man's struggle for survival. Trapped in the midst of global disaster, he must make decisions; choices that ultimately mean life, or the eternal curse to walk as one of them. Enter if you will into his world. The world of the undead.

JL Bourne "Shattered Hourglass"

In a desperate bid to take back the continental United States—where hordes of undead now dominate the ravaged human population—a Navy commander leads a global mission to the heart of the pandemic. Task Force Hourglass is humanity's final hope, and his team's agonizing decisions could mean living one day more—or surrendering to the eternal hell that exists between life and death.

- ADVANCED OPTICAL PERFORMANCE
- FRONT AND REAR FLIP-COVERS
- HIGH STRENGTH REINFORCED HOUSING
- 5 YEAR CONSTANT-ON BATTERY LIFE
- 2 MOA DOT

Aimpoint®

**If you are serious about
your mission, the Aimpoint®
Micro T-2 is the serious choice.**

LaRue TranQuilo 7.62 Muzzle Brake/Adapter

The Muzzle-Brake Adapter is precision-machined from 17-4 PH Stainless Steel. Provides outstanding recoil reduction. Precisely located and sized ports reduce muzzle climb.

Available in both 5/8-24 and 1/2-28 threads. The Adapter's patented dual-shouldered design seats the suppressor in perfect alignment to the bore, and eliminates gas from escaping to the rear of the suppressor, keeping attachment threads clean and free of carbon. The TranQuilo Adapter comes with a theta shim kit.

www.LaRue.com

SJC Titan Compensator, .223/.308 Black Oxide, or Stainless

This brake keeps muzzle rise at an absolute minimum, and eliminates substantial muzzle blast associated with other brakes.

Designed and developed with USPSA Grand Master Eric Lund to provide a competitive advantage in 3-gun competition. It is legal for Limited, Tactical and Open Division rifles.

This compensator will reduce your muzzle rise, giving you better control of your rifle. Gas vectoring technology maximizes

recoil reduction and minimizes torque and shot to shot recovery time. The design traps expanding gasses in the baffles and increases dwell time for maximum efficiency possible, allowing faster follow up shots and transitions between targets.

For .308, 5/8 x 24 threaded barrel.

For .223, 1/2 x 28 threaded barrel. - Blends smoothly into any .750" barrel.

- Comes with instructions and crush washer.

SureFire WARCOMP 556-1/2-28 or 762-5/8-24

The revolutionary SureFire WARCOMP is the world's most shootable flash hider. Its patent-pending design provides three valuable functions:

It provides over 99% reduction in muzzle flash compared to a plain muzzle, which helps to conceal the shooter's location and preserve his dark-adapted vision.

It virtually eliminates muzzle rise, which enhances monitoring of target reaction and staying on target for faster follow-up shots.

It serves as a rock-solid mounting adapter for all SureFire SOCOM Series 5.56mm Fast-Attach® suppressors, including our SOCOM556-RC model, which placed first in the most extensive and rigorous suppressor testing ever conducted by US Special Operations Command.

Precision machined from US Mill-certified heat-treated stainless steel bar stock — including high-precision single-point cut threads for optimum thread interface — the WARCOMP-556-1/2-28 features an Ionbond DLC coating to provide maximum protection under harsh environmental conditions and to facilitate cleaning even after extreme use.

When used in conjunction with a SureFire SOCOM Series Fast-Attach suppressor, the WARCOMP provides multiple bearing surfaces to ensure superior suppressor alignment and prevent any ringing of tines inside the suppressor. A rear labyrinth seal mitigates gas leaking from the back of a suppressor, minimizes potential carbon buildup in the indexing system, and facilitates suppressor removal after extended firing. Every SureFire WarComp is individually inspected for concentricity and alignment.

Smith Enterprises G6-A2 Vortex Flash Eliminator 5.56

Based on the combat-proven Vortex® 5.56mm G6A1 system, the definitive-development of the patented Vortex® design now features a 40% increase in structural rigidity. The aligning of exiting gases helps to improve overall accuracy. The

highest degree of flash suppression is

gained using

M-193, SS-109 (M855), and MK 262 service ammunition.

PWS MOD 2 FSC SERIES 5.56 Flash Suppressing Compensator

The unique port design of the FSC Series yields muzzle control that meets or exceeds the performance of the best muzzle brakes on the market without the teeth-rattling overpressure indicative of other brakes and compensators.

www.LaRue.com

LaRue Tactical RISR™ / CTR Combo

Perfect for those who don't already own a CTR.

It's a fact that some AR's need a cheek riser to get proper cheek weld for raised scopes or rifles with raised rails. It's another fact that standard AR charging handles require a lot of travel, making it impossible to charge a rifle without moving a collapsible stock all the way to the rear. The LaRue RISR solves these problems.

Made in Texas, USA, out of glass-reinforced polymer, the RISR is spring-loaded, and travels to the rear as the charging handle is moved to the rear. When the charging handle is released, the RISR snaps forward. Designed to fit the excellent Magpul CTR butt stock without modification, the RISR only takes a few minutes to install with a phillips-head screwdriver.

This combo comes with a Mil-Spec Magpul CTR in your choice of Black, FDE, OD or Foliage

LaRue Tactical RAT Stock

With simplicity in mind, the LaRue RAT™ Stock was designed to be the ideal complement to the LaRue Tactical AR15 family of rifles. The unique 2-stage trigger mechanism allows shooters to adjust the pull length of the stock while in a variety of shooting positions. The

CNC-machined internals allow for smooth operation as trigger mechanism

is pulled to the rear and released. The internals provide positive lockup on Mil-Spec receiver extension positions. The internal cavity is designed for a snug fit without the need for an additional locking mechanism.

Ambidextrous
1/4" swivel
sockets, and 1"

slots provide ideal anchor
points for two-point slings. A locking rear butt-plate slides open to expose compartments that hold cleaning kit components.

Colors: Black, FDE, OD, FOL, UDE, Pink, Blaze
extension tube not included

LMT DMR556 Stock

DMR buttstock assembly for 5.56 rifle fits on mil spec carbine (extension tube NOT included) - SOPMOD cheek rest for comfort and a better shooting position - Adjustable by 45 positions in cheek well height and length of pull and two positions on the extension tube - SOPMOD rubber butt plate reduces felt recoil - Concealed rail for mono-pod attachment - 2 QD sling swivel sockets - Collapsed length 9.20"

LMT SOPMOD Stock

The preferred stock of the US Special Ops Command. The LMT SOPMOD Stock features an excellent cheek weld for optimum shooting position. Included in the stock's frame, are two watertight storage compartments that hold batteries or other small items, like earplugs, etc.. The padded buttplate provides no-slip surface against chest rigs and body armor. Easily drops on to any Mil-Spec M-4 receiver extension tube (This stock will not fit on a commercial tube).

Magpul PRS GEN3 Precision-Adjustable Stock

The PRS GEN3 is a field precision stock for AR15/M16 and AR10/SR25 platforms, featuring tool-less length of pull and cheek piece height adjustment.

With solid adjustments for length of pull and cheek piece height via aluminum detent knobs, the PRS GEN3 (Precision Rifle/Sniper) stock provides a stable interface and is intended for semi-automatic sniper or varmint type rifles. Offering a nearly universal fit, it is optimized for rifle-length receiver extensions but will also mount to many mil-spec carbine and A5-length tubes*. Includes a cant/height-adjustable rubber butt-pad and rotation-limiting QD sling swivel cups as well as M-LOK® slots on the bottom for rear monopod mounting.

The Southern Grind "Jackal"

features PVD coated 8670M High Carbon Steel blade with a full tang and conventional Flat Grind. Each knife has a solid G10 3D milled handle that creates a fitted, sturdy grip. Each comes complete with a formed Kydex sheath with vertical and horizontal belt clip carry option. *Handle: 3D Milled Solid G10 Grind: Conventional Flat Grind Blade Steel: 8670M High Carbon Steel Blade Finish: PVD Coat Hardness: RC 58-59 Overall Length: 9.25" Weight: 9.5 oz Handle Length: 4.50" Blade Length: 4.75" Blade Thickness: .21"*

Phrike - Spartan Blades Self-Defense / Utility

Phrike - is the goddess of horror / fear in Greek mythology. Her name literally means "tremor, shivering." This small lightweight blade was specifically designed to be carried as a self defense tool. Its short 4.25 inch blade and minimal inset handles make it very comfortable and slim. This useful blade can be used on a daily basis to manage common tasks or in unexpected situations / emergencies.

Blade Length: 4.25"
Overall Length: 8.50"
Blade Thickness: 3/16"
Blade Steel: S35vn
Blade Hardness: 59-60 HRC
Blade Style: Fixed, Swedged Drop Point
Handle Material: G10 (Green, and Tan)
Sheath: Lined Nylon MOLLE sheath (Tan & Multi-Cam)
Weight: 0.244 LBS

Spartan Enyo Neck Knife

Enyo (i-nye-oh) - a fitting name for this neck knife, Enyo, was an ancient goddess of war, acting as a counterpart and companion to the war god Ares. This companion knife can be worn around the neck or in a pocket / inside the waist band (IWB). The Enyo's design makes it a comfortable everyday carry fixed blade with great ergonomics. Enyo is perfectly suited for daily cutting tasks, and is always ready to assist the user. The form fitted Kydex sheath comes with a stainless steel neck chain, IWB loop and para-cord (2') for convenient carry options. Enyo lanyard includes a plated pewter Spartan helmet bead. Colors: Black, Tan

Horkos Combat Utility Knife

Horkos (or-kos) - is a sacred oath and the demon protector of honor / oaths in Greek language and myth. This knife was commissioned by the Combat Weapons Team of the United States Military Academy (West Point, NY), with custom etching to honor the graduating class. As all academy graduates are defenders of our freedom and take a sacred oath to the US Constitution, we think the name fits! This blade is designed to be a great all around combat / utility knife.

Blade: FDE, Handle: Green, Sheath: Tan

Bad Monkey Folding Modified Tanto

Blade Finish: Tumbled satin, serrated
Overall Length: 9.125" (Tanto)
Blade Length: 3.875" (Tanto)
Handle Length: 5.25"
Weight: 4.97 oz.

Bad Monkey Folding Drop Point

Blade Finish: Cerakote armor black
Overall Length: 9.25"
Blade Length: 4"
Handle Length: 5.25"
Weight: 4.97 oz.

Bad Monkey Features:

Twill-weave carbon-fiber handle with textured matte finish for a solid, all-conditions grip.
6AL4V Titanium lock and liner creates a light, secure storage base for blade.
Emerson Wave feature allows the blade to unfold automatically when drawn.
Blade Steel: 14C-28N
Conventional Flat Grind is thicker at the sharpened edge of the blade for general and heavy use.
Hardness: RC 59-61
Blade Thickness: .130"

Emerson Knives CQC-7B

The Emerson **CQC-7B** is by far the most sought after folding knife of all time. It is the razor sharp chisel ground knife that has become the standard by which all hard-use folding knives are now judged.

The **CQC-7B** is the knife that revolutionized the entire cutlery industry. Every knife company has their version of this **CQC-7B** knife but they fall far short when compared to the "real deal." Now the **CQC-7B** is the available from Originator, Emerson Knives.

This **CQC-7B** knife is also available in a new smaller pocket sized version with a blade length under 3 inches, called the "Mini **CQC-7**." Handles: Black G-10 epoxy / glass laminate

Lock: Aerospace grade Titanium

Blade: 154 CM

Finish: Black

Grind: 'B' Blade - Chisel Ground Tanto Style

Overall Length 8.0 in.

Blade Length 3.3 in.

Handle Length 4.65 in.

Blade Thickness .125 in.

Hardness 57-59 RC

Weight 4.0 oz

Emerson Knives Super Commander

The **Super Commander** features our Patented "wave shaped opening feature" or Remote Pocket Opener. In an emergency or injury situation the knife can be opened with one hand as it is drawn from the pocket.

Troy Front and Rear Folding Battle Sight with Tritium Inserts Combo

The perfect backup rear sight for low-light conditions, Troy mounts are durable, heavy-duty, and designed to survive the toughest environments. Easily installed, the rear sight aperture installs at the exact same height as the factory sights. With no levers or springs to fumble with, deployment of the sight under-stress is easy. The robust

stainless-steel cross locking system ensures your sights will remain up and zeroed in the most extreme combat conditions. To fold, simply press the release-button located on the left side of the sight, and push down. All Troy Sights feature a zero-canting attachment system for use on all military and aftermarket receivers.

Troy Offset Sight Set, Front and Round Rear

Durability and dead-on accuracy have made Troy Industries' Folding BattleSights the choice of Special Ops and tactical users worldwide. The TROY 45 Degree Folding BattleSights fold compactly to both sides of the rifle.

With an **ambidextrous sight base**, TROY 45 Degree BattleSights work seamlessly with magnified optics. Easy to install and deploy, these sights position apertures at factory height. A stainless-steel cross-locking system ensures the sight remains upright and zeroed under extreme combat conditions.

All Troy Sights Have LaRue Logo Engraved.

**Note: Sight is designed to work on same plane rail systems only. Will not work with a railed gas block that is higher or lower than the receiver.*

Troy Di-Optic Aperture

Front & Rear Sight Combo

The **Troy DOA**, in a combo package.

The optically engineered apertures center your eyes instantly and effortlessly, providing a clearer target picture than with round apertures.

The Rear Sight:

These sights provide lightning fast target acquisition and are manufactured to exceed military specs. The rear sight features two settings, one for up to 300 meters and a second for up to 500 meters.

The Front Sight:

Exactly the same height as factory, with no levers or springs to fumble with, it deploys easily under-stress. The robust stainless-steel cross locking system ensures your sights will remain up and zeroed. To fold, press the release-button located on the left side of the sight, and push down. All Troy Sights feature a zero-canting attachment system for use on all military and aftermarket receivers. Made in USA. *Note: Sight is designed to work on same plane rail systems only.*

Dueck Defense Rapid Transition Sights (RTS)

provide shooters with the quickest possible transition between longer- and closer-range target acquisition, greatly increasing efficiency and effectiveness in battle and competition. Designed by Barry Dueck—Director of SureFire's Suppressor Division and a top 3-Gun shooter—these sights mount directly to a weapon's Picatinny rail, offset from center by approximately 45°. Allows smooth, quick transitions that could mean the difference between winning and losing a competition, or more importantly—a gunfight.

7075 aluminum, Mil-Spec hard anodized,
Standard-issue height, Ambidextrous,
Low-profile, ½ MOA adjustments
Rear – 3 ounces (85g) / Front – 1.5 ounces (44g)

Slings & Carry

OBR Sling Adapter

Designed to work with the threaded inserts on both 7.62 and 5.56 OBR handguards (including PredatOBR and PredatAR), this **lightweight, low-profile** accessory can be

attached anywhere on the handguard where a threaded insert exists. A steel insert provides durability and has inside-radius stops that **prevent the sling from rotating and twisting.**

LaRue Tactical 1.25 Inch Swivel

Allows a robust push-button QD connection to any 1.25" swivel socket.

The same swivel as on our legendary sling... Hand-tested at LaRue, and made in the USA.

Rugged, durable construction - Simple intuitive design - Easy push-pull quick adjustment - Built in stretch at the load bearing points greatly reduces the felt weight of the weapon, ensuring comfort for extended use - Tubular design for maximum comfort; no strap edges to dig in - Can be worn snug to the body for hands free tasks and brought to bear on target without adjustment - Quick release for emergency ditching of the weapon - Lifetime warranty: *If this sling EVER fails due to manufacturing or material defects Armageddon Gear will replace it, free of charge.*

Fortis - Rail Attachment Point (RAP)

Compact & robust, the RAP™ is perfect in size and function. Accepts Heavy Duty quick detachable sling swivels with limited rotation. Made of 6061 aluminum and hard coat anodized to a deep black finish. Attach your sling with minimal footprint on your rail.

Quick Detach Swivel Sold Separately

The Armageddon Gear Carbine Sling

The Armageddon Gear Carbine Sling gives the operator or shooter the ultimate utility in allowing the rifle to be ready for action without sling adjustment while being securely held against the body for hands-free tasks and freedom of movement. This sling **provides the ultimate in weapon stability** by pulling the rifle back into the shoulder-creating a very stable shooting position. This is the absolute best sling available for your AR style rifle.

Colors: Coyote Brown or Black

GrovTec Padded Backpack Sling with QD Swivels

Easily carry your rifle comfortably all day, like a backpack.

The padded, tapered design emphasizes width at the load-carrying position to spread weight over a greater area. Stretch Web at the base of each pad *absorbs shock without the annoying rebound.* Integrated thumb loops allow for easy shift of weight. Non-skid, durable, long-wearing material holds just enough to keep the firearm in place without inhibiting your ability to quickly remove/shoulder your firearm. Includes premium sewn-in QD swivels.

Spec-Ops Master Blaster

The advantage of the bungee on a two-point adjustable sling is huge. This adjustable sling has a full 6 inches of built-in bungee. When you have the rifle mounted and the sling tightened for stability, you don't have to readjust the sling to remount the rifle like other slings without a bungee, you simply slip it into place. The stretch also allows a better range in movement without having to adjust the sling when performing various tasks or manipulations with the rifle.

Features:

Integral shoulder pad design provides body-hugging profile for all day carrying comfort.

Adjusts from 36" to 51".

QD buckle for fast and safe removal of weapon from around body. Low profile thumb/hand loop provides extra comfort and security when negotiating difficult terrain.

1.25" swivel built-in to both ends.

Color: Black Made in USA

Q.D. 360 Push Button Swivel Mount

Put your QD sling exactly where you need it.

This low profile rock-solid attachment locks quickly anywhere onto any MIL-STD 1913 rail system.

Includes black-ened stainless steel push button QD swivel. Internal lugs prevent swivel from over-traveling and twisting the sling.

- Weight: 1.33 oz.
- Length: .5"
- Width: 1.25"
- Accepts SSQD Swivel
- Sling size: up to 1 1/4"
- Mounting platform: Picatinny
- Material: 6061 T6 Aluminum
- Coating type: MIL-A-8625 Type III Class 2 Hard Coat Anodized w/ Teflon

IWC QD End Plate

This low-profile end-plate replaces the standard flat end-plate with one that features a quarter inch QD socket that has **rotation limited geometry built into it.** This a great single-point sling hard point. Made of **billet steel**, avoiding the rough edges found on laser cut or stamped plates. Black Melonite coating prevents rust, corrosion and wear.

NOTE: This plate will only fit "Mil-Spec" Extension Tubes.

Made in USA. Sling swivel not included.

cont'd from p.9

usually dial all the elevation and shoot crosshair and hold wind in mils.

By using a 3 o'clock 4 mph for every caliber, I turn spin drift off so wind is not applied to every 4mph of the actual wind call. Example: 1200m = 1.5 mils for a 4mph wind. When the kestrel shows 1.5 at 1200m for wind and there is a 12mph cross wind, I take 12 and divide it by 4 and that gives me 3. Then 3 x 1.5 is 4.5 mils and then I apply spin. This gives you the capability of a perfect density altitude corrected wind call.

change, and you need to think about the tailwind component for each shot. The easiest way to do this is to just plug in the actual clock and

wind speed and let the ballistic engine do this for you. Applied Ballistics in the Kestrel does a great job of this. I don't plug in the actual wind and clock into the Kestrel except for when I am shooting into subsonic. I don't like being that slow. But when shooting at real long ranges I will plug in everything and turn spin back on.

ALWAYS be able and willing to FLEX your wind call on a moment's notice. Things will change.

It's like I tell my guys, "Follow the steps and making a wind call, even in high winds is not that hard." You will be shocked at how good you will get if you follow the steps.

-Todd Hodnett, Accuracy1st

5 One point to make here is when you are shooting in supersonic speeds, out to transonic, you don't have to worry about a tailwind. Even a 30mph wind is only .2 mils of elevation at transonic. But once you get into subsonic, things

IWC 45 Offset Rail QD Sling Mount

45 Degree Offset design recesses the Quick Detach Socket as close to the centerline of the weapon as possible for maximum clearance.

Directly attaches to all Picatinny MIL-Spec 1913 & STANG Rails. Compatible with all Push Button QD Sling Swivels.

IWC KeyMod QD Sling Mount

Direct attach design attaches to Forends with KeyMod Modular Direct Attachment System.

Mount-N-Slot QD Sling Direct Attach Mount

Allows you to mount a QD sling to your MOE Stock.

as well as standard AR15/M4 collapsible butt stock and the CTR and SOPMOD stocks.

Survival

The Survivor Fire-starter:

Start a fire in any weather. Safe, simple, durable, and waterproof, perfect for backpack, survival/emergency kit, or tackle box. Made in Texas! Includes compass and thermometer. Orange or Black

CAMMENGA MODEL 3H TRITIUM LENSATIC COMPASS

Depended on by fighting forces, government agencies, and adventurous outdoor enthusiasts around the world. Shock, water, sand proof, from -50F to +150F. Seven Tritium Micro Lights allow navigation in total darkness. Remains luminous for over 12 years. Aluminum frame and waterproof housing.

Wildo - Camp-a-box

From Sweden- compact, practical design fits perfectly in a backpack pocket.

- Plate with lid
- Fold-a-cup® Small
- Fold-a-cup® Large
- Cutting-board
- Spork

Size: 19 x 13 x 8 cm / 7.48 x 5.12 x 3.14 in

Weight: 192 g / 6.77 oz

BPA Free - Dish-washer Safe - Micro-wavable

SureFire Maximus Rechargeable Variable-Output LED Headlamp

Rechargeable Li-Ion with variable-output LED up to 500 lumens.

Knurled control dial. Chargers for wall AC outlet and 12-volt DC included.

Tough, lightweight magnesium body rotates up and down 90 degrees. Comfortable to wear, thanks to its no-chafe fine-weave headband and moisture-wicking Breathe-O-Prene forehead pad.

Built-in SOS beacon can run for days.

First Aid Kit With Pouch

- Re-Sealable Poly Bag
- Celox (15g, stops bleeding fast)
- CavArms Tourniquet
- Emergency Bandage (Israeli Bandage) 4"
- 4.5" x 4.1 yards Kerlix Gauze
- Nitrile Gloves
- 2 Alcohol Preps
- 1" x 10 yds Hypoallergenic Tape

Second Chance Truck Can, Thick

The Trunk Can Emergency Medical Vehicle Kit (Trunk Can Thick) is designed to keep you ready and prepared wherever you go. From basic first aid to high impact trauma, your Trunk Can Medical Kit will prepare you.

- RATs
- Tourniquet
- Trauma Dressing
- Trauma Sheers
- Chem Light
- 6" ace wrap x2
- Compressed Gauze
- Chest seal
- Coban Adhesive Wrap
- Black Talon Glove Kit
- Bandaid Kit

Room to spare for your own personal additions

The Trunk Can Med Kit was born in an austere environment in that people stuck on deployment needed to find ways to occupy down times. Nearby a base in Afghanistan, the teams would spend off time climbing a mountain with an extreme vertical ascent that caused many injuries, from severe scrapes to falling trauma, so we needed some additional kit on these excursions. We brought back this idea and made an updated version for civilian use.

Second Chance Truck Can, Thin

A more compact version of the above, but with 4" ace wrap.

Tactical Medical Solutions

R-AID Bag Stocked to provide life-saving treatment for multiple casualties, the R-AID bag is ideally suited to work as an **assault aid-bag, vehicle bag, or combat lifesaver bag**. All critical intervention items are loaded in the top flap of the bag for immediate access. The second main compartment contains items required for additional treatments and casualty packaging. The rear sleeve contains triage and casualty marking materials. The bag provides one of the most compact, comprehensive treatment kits available.

The contents of the kit provide a trained individual with the following capabilities:

- Hemorrhage control
- Basic and advanced airway management
- Packaging of burns
- Treatment of penetrating chest trauma
- Splinting
- Treatment of eye injuries
- Triage and casualty marking

- 1ea - Med Patch

The G.T.F.O. (Get To Friendly Outpost) Rifle Bag

When you need to get outta dodge, *time now!*

When the going gets tough, the tough get to a friendly outpost! Our GTFO rifle bag not only has **three rifle mag pouches** but it has plenty of **room for extra goodies and ammo**. With MOLLE webbing covering the front (inside and out) and sides, options are endless for adding pouches, first aid kits, etc. The GTFO rifle bag features an adjustable shoulder strap with removable shoulder pad and two belt loop attachments.

Magazine pouches inside of bag, eliminate need for flap. Dual zipper design for quick and generous access to internal main compartment. **Hidden compartment** large enough to store a pistol. Small pocket on strap for small flashlight or folding pocket knife.

12"x5"x8.5" (510 cubic inches)

Mesh backing for comfort and breathability.

Ruger 10/22 Deluxe Arrow Conversion Kit

Just add your 10/22 and scope!

Converts Ruger 10/22 rifle into an archery rifle that can put five arrows into a one-inch group at 50 yards. Remove the stock 10/22 barrel and replace it with the Arrow assembly. Slide an arrow inside the shroud, put a blank in the chamber...and fire. Arrows fly at 425 fps.

Classified as a firearm, check local laws before ordering. Legal in many states for hunting during rifle season. Cannot fire live ammunition.

Tactical Medical Solutions Downed Operator Kit

The DOK is a compact kit that contains the items essential for treatment of serious injuries encountered by law enforcement and military personnel. The DOK is compact enough to fit in a cargo pocket or glove box.

SOF® Tactical Tourniquet-NH

Olaes® modular bandage: 3 meters of sterile 4-ply gauze.

Plastic occlusive sheet

Face shield

Nitrile gloves

2" Tape

5.5" Trauma shears

The Glock Aimpoint Micro Mount

Allows you to wield the same world class reflex sight used by Law Enforcement Professionals and Open Class Shooters worldwide, in the palm of your hand. Simply remove your existing rear sight and **install the Glock Aimpoint Micro Mount into the factory dovetail** and the "Shooter is ready....Standby....BEEP!!"

Weighing in at a feathery 84 grams, the Aimpoint Micro is one of the lightest, fastest, and most durable and dependable red dot sights on the market. The Micro allows you to fire with both eyes open, without worrying if you're focused on the target or focused on the dot. Make your selection of the T1, T2, H1 or H2.

Armageddon Gear Pistol Pocket

A versatile solution to your security needs. *Sticks to any flat surface* with the included adhesive-backed Velcro square, or to any opposing Velcro field in a gun case, pack or other carrier. Your imagination is the only limit. *Accepts any service/duty sized handgun* such as the Glock 17 or Sig P229 or similar. Removable retainer strap keeps pistol in place while you're doing J-turns, PITs, or other crazy/ninja moves in your mom's G-Ride.

Chrome Silicon springs from **Tactical Springs** offer exceptional quality and are as long lasting as they are durable.

In an ideal range of popular weights for the 1911 Moly plated and cryogenically processed for extended duty cycle performance

Color coded for easy field ID of weight by operator
Packaged in hard plastic tubes

www.LaRue.com

Comp-Tac International Slide Holster

Combines belt holster, belt drop offset holster, paddle holster and paddle drop offset holster into one. Modular mounting system combines the versatility of different mounting options with the superior Kydex holster that Comp-Tac is known for.

Configured to the customer's specification at time of order and the additional mounting components are shipped with the order.

Available with three different cant options, the speed draw (straight drop), the FBI cant (grip angle forward), and the reverse/cross draw (grip angle rearward).

Comp-Tac Flatline

Allows the user to carry *inside the waistband or outside the waistband*. All Kydex Construction gives this holster the **smoothest, fastest draw** available on the market. The two ridged pieces hold their shape for **easy, simple, and safe re-holstering** while carrying inside the waistband. The Flatline Clips are the most innovative on the market. The plastic material is flexible enough to withstand any bending and twisting without breaking and will be gentle on your belt, clothing and car seats. Flatline is shipped with 6 clips: Two Flatline Clips, Two Offset-Flatline Clips and Two Standard Clips in 1 1/2" belt width.

Comp-Tac Twin Mag Pouches

One unique feature of our Twin Mag Pouch is that each pouch is **independently adjustable**, eliminating the problem of one side being too loose and the other being too tight. Another feature is that your magazines will be the same space apart from each other every time you go to reload. Some shooters may find that this will help them become more consistent in their reloads. Built for a 1.5" belt.

IDPA compliant. for Glock-9/40/357 Slide, S&W-M&P 9/40/357, Springfield-XD 40 Service/Comp 4", 1911-1911 Slide

Comp-Tac Minotaur MTAC Holster

Glock-9/40/357 Slide, S&W-M&P 9/40/357, Springfield-XD Slide, 1911-1911 Slide

- Behind-the-hip
- For 1.5" belt
- Tuckable
- Adjustable Cant
- Slim Profile
- Adjustable Ride Depth
- Interchangeable Spare Bodies

The ultimate level of deep concealment. This "hybrid" holster combines the comfort of cowhide leather backing with a Kydex half-shell.

Lula Magazine Loader for 9mm-45ACP

Fast, durable, military quality universal pistol magazine loader. Loads virtually all 9mm, .357 SIG, .40 S&W, 10mm and .45 single- and double-stack magazines. Easy loading; rounds drop in with no fingers pushing or pressing them.

Load hundreds of rounds painlessly!

Fast! Fill mags in 1/3 the time of thumb loading.

Fits in pocket, weighs only 66 grams (2.3 Ounce).

Does **NOT** load the following:

Mags with less than 8.0mm between their lips.-Glock G36 -6rd .45 SS (Single Stack) (Beak will not come out of mag.)-S&W 7rd 9mm SS (Does not enter between lips). May not load the last round in a few types of mags.

Aegis Enhanced Belt (black buckle)- Ares Gear

Customers wanted a belt with the same performance as our Ranger belt, but a simpler "look". The same proprietary scuba webbing, with an added layer of 1.5" thin webbing on the outside. The Aegis buckle is beadblasted stainless steel.

All components are made here in the USA.

Purchase based on overall length (S=41", M=43", L=45", XL=47", 2XL=49")

Measure the distance from the hole that you most often use on your current belt to the farthest point on the buckle. That will give you the size of your belt, then add however much tail you want.

www.LaRue.com

ARMAGEDDON™ GEAR

Armageddon Gear Lightweight AR Chest Rig

The perfect light-weight chest rig. The Armageddon Gear Lightweight AR Chest Rig is designed with the same principles as the carbine itself: simplicity, durability, and combat-focused performance. The Lightweight AR Chest Rig is a **modern interpretation of the classic Ranger RACK chest rig worn around the world.** Users can add modular accessory pouches onto the rig's dual webbing panels, left and right. Magazines are held securely by field-replaceable shock cord in a double-layered pouch body. Multiple mesh pockets on the back of the rig offer storage for maps, gloves, or other often-needed items. Armageddon Gear uses only high-quality US-made materials and every piece is designed to withstand hard use. Like everything Armageddon Gear makes, the Lightweight AR Chest Rig is proudly made in the USA. In Coyote Brown and Black.

**Pictured magazines, pouches and accessories not included.*

Armageddon Gear 7.62 SASS Single Mag Pouch

The ultimate low-profile military-grade 7.62x51mm magazine pouch! Fits metal or polymer 7.62 20-round Semi-Auto Sniper System (SASS) mags including;

Knight's Armament, DPMS, and Magpul. Mil-spec 1000 Denier solution-dyed Cordura nylon handles hard use with ease, while remaining lightweight by superior design. In Coyote Brown and Black.

Armageddon Gear Top-Zip Utility Pouch

A great all-around small utility bag. Built like a tank, it is the perfect shave kit pouch for the traveling warrior who wants to maintain a dapper, yet tactical appearance at all times. Holds toothbrush, toothpaste, tactical beard grooming kit (AKA Copenhagen), hair clippers, Gold Bond, med tape, or any other combination of man-cream and hygiene items you can tote. We were able to get nine fully-loaded LaRue 7.62 magazines inside. Your imagination is the only limit here.

Armageddon Gear Lightweight Headband Wrap

Lightweight Wrap provides layers of comfort and protection to significantly reduce temperature and heat transfer to your sensitive noggin. Trim and add little thickness to your muffs to ensure ease of use and comfort when worn under a modern combat helmet. Made in the USA!

In Coyote Brown and Black.

Armageddon Gear Armorer's Tool Kit Pouch

Designed and submitted as part of the SOCOM PSR Program, the Armageddon Gear Precision Rifle Tool Kit Pouch is now in military service as a field-maintenance Armorer's tool kit pouch.

Holds everything you need to keep your rifle performing during extended missions. Holds ball-peen hammer or mallet, Snap-On (or similar) torque wrench, three T-handle drivers, and numerous small tools, spare fasteners, or other items in internal flap-closed pouch. Double-layer Cordura shell provides durability and protection while oversized zipper offers easy access to contents. **Tools not included. Pouch with PSR-based tool kit is available for unit or multiple purchase with minimum order size.*

Peltor Tactical Sport Ear Muffs

Electronics respond at lightning speed, protecting the user's hearing from loud impulse noises with NRR 20 dB. Amplifies ambient sound so you actually hear much better.

- Audio jack
- Auto shut-off
- 500 hour battery life
- Classic Peltor comfort - ear cups ergonomically designed for comfort and positive seal.

Armageddon Gear GP Utility Pouch

Fits perfectly in any location where a double-M4 mag pouch would (two columns of PALS webbing). Store mags, signals, NODs (where padding is not required), or a 16oz can of PBR. Features a 650-cord tie-down point and internal compartments to keep small items like batteries and Bump Cards.

- Holds three 30rd M4 mags or three 20rd 7.62x51 M110 mags
- 7.5" Tall x 4" Wide x 3.5" Deep
- Coyote Brown or Black

LaRue Scope Bag, Large

It's no secret that we provide our customers with some of the best optics available. Quick-disconnect mounts allow shooters the ability to take one rifle to the range with several optics. Most of the time, those additional optics are thrown in a range bag, a sock, or an ammo can. Everyone knows that precision equipment and physics do not mix well, so we set-out to design **the best, padded bags on the market today**, to help our customers protect their expensive hardware.

Each bag is over-padded with a generous 3/4" layer of dense open cell foam on all sides. The Heavy duty YKK zipper makes opening and closing a snap, and will last a lifetime. The adjustable shoulder strap makes carrying your valuables easy, and keeps the contents in easy reach. MOLLE straps allow the user to attach these bags to chest rigs and soft cases with MOLLE Web.

In Black or Tan. Made in USA.

LaRue Drag Bag

The ultimate drag bag / shooting mat.

Designed at LaRue, with input from the shooting community.

Tired of lying in briars waiting for a target? Tired of going prone in less than sanitary conditions? Have you spent your last night sleeping with your head in the mud? Then the newly designed LaRue Drag Bag is for you!

The LaRue Drag Bag features MOLLE compatibility, fits into iM3200 Storm Case, has sewn on para-cord for camouflage/burlap, a bipod catch, internal Velcro and MOLLE for pouch and accessory versatility. Bag converts to shooting mat.

OTIS Tactical Cleaning System:

What started in a shoe polish tin called "The Whole Kit & Caboodle," Otis has engineered into the **most popular firearm cleaning system on the market today**. The Tactical Cleaning System is equipped to clean all rifles, pistols, shotguns, and in-line muzzleloaders. It has the essential tools to clean rifles .17 to .50 caliber, handguns .17 to .50 caliber, shotguns 410 to 12/10 gauge, and all in-line muzzleloaders. The system includes three Memory-Flex® cleaning rods with over 750lb tensile strength, three forged slotted brass tips, two obstruction removers to knock out obstructions such as

mud, snow, or even a stuck bullet or case, T-handle for added comfort, .5oz. tube of Otis O85® Ultra Bore® cleaner, lubricant and preservative, all-caliber cotton cleaning patches for .223 caliber and larger, small caliber patches for .17 to .223 caliber, shotgun brush adapter and rubber patch savers® to get 360

degree coverage in your shotgun barrels, six high quality bore brushes, and a bore reflector/flag safety. Protect your investments; use Otis. Caliber/Gauge: .17 - .50 Caliber Rifles; .17 - .50 Caliber Pistols; 410 - 12/10 Gauge Shotguns; In-Line Muzzleloaders.

Weight: 0.62 lbs.
Dimensions: 4" x 4" x 2.5

TW25B, 12cc Syringe

Lube/Mil-Comm Extreme Performance Synthetic Grease, Lubricant Protectant

The top-trusted favorite of U.S. Military fighters, leading law enforcement agencies, precision firearms manufacturers and sport shooters everywhere.

Proprietary PTFE nano-particle technology outlasts and outperforms other weapons lubricants. **Battlefield tested** in the heat and sand of desert war zones, and in the corrosive, saltwater environments of naval warfare, where weapons reliability is a life-and-death matter.

Machine Gunners Lube

- Sets a new standard in small arms lubricants!

Functional from -100 to 1000 degrees.

Lube protects weapon in extreme environments subject to high heat, humidity, evaporative, and mechanical wear.

Does not evaporate at normal ambient temperatures - Ready when you need it.

Colloidal suspension of re-micronized molybdenum particles - No need for shaking, you are always good to go.

Long lasting moly particles still remain slick, and ooze out of the metal pores - Greatly reduces carbon build-up on bolt carriers.

Use GENEROUSLY, don't mix with other oils. Easy cleanup, leaves no residue. Great for pistols and carbines.

1 FL. OZ. (US) (28.5 ML)

LaRue Chamber Flags

Do NOT show up at a match without these: These are the chamber flags that ship with our rifles. They are made of durable day-glo orange plastic. This is an easy way to make sure your chamber is empty.

Otis all-caliber cleaning patches in an economical 30 pack.

Calbico Channel Cleaning Tool, Model F1

A must-have for every range bag and cleaning kit. This is one of those widgets that appears simple,

but will quickly become one of your cleaning essentials. The Calbico Channel Cleaning Tool makes the hard work of removing crud from tight spaces a breeze. It can be used as a mild scraper, or by wrapping a solvent-soaked patch on either end, you can easily clean grooves, channels and tight spaces. The tool is made of a **non-marring, reinforced high performance plastic**. Two tip sizes are optimized for reaching into channels and cuts found in all types of firearms. Ribs on the handle provide a comfortable grip.

Otis Grip Kit® Cleaning System

With the demand for the .223 with a collapsible stock, Otis has developed the Otis Grip Kit® Cleaning System. Reclaim the lost space in the standard handgrip of all AR15/M4/M-16's. This is the civilian bright brass version of the military issue cleaning system. The essential Memory-Flex® cleaning rod, obstruction remover, slotted tip, T-handle, bore brush, and small caliber patches are neatly packed into the Otis Grip Kit®, making it the most portable cleaning system on the market today. This kit also includes an anchor for the

Otis Grip Kit® clip, a button head hex screw, and a hex wrench. Developed for lightweight special operations firearms, **bore cleaning and cleaning can be accomplished in seconds**. The set complements, and is fully compatible with, the extensive #223 AR15/M4/M16 cleaning system. This kit is also available in 6.8MM and 7.62MM. If your .223 Caliber/5.56MM has a collapsible stock, the Otis Grip Kit® is the cleaning system for you.

Iosso Cleaning Kit

The Iosso Cleaning Kit contains 6 precision fit brushes. The brushes clean the Upper Receiver, Chamber, Bolt Carrier, Bore, Bolt Carrier Key Tube, and the Gas Tube. The Gas tube brush **cleans the entire length of the gas tube without disassembly of the upper receiver**. The kit also includes the Eliminator Cleaning Tool & Rod. This cleaning tool is handy for tight cleaning jobs where a regular rod is too long and cumbersome to use.

CAT - Combat Applications Tool 5.56/7.62

This tool allows the operator to clean the weapon and **restore the bolt and carrier group to "tactical tolerance"** in a matter of minutes, in the field, with gloved hands, and in low light conditions if necessary. The CAT-762/556 features a Bolt Cleaner/Scraper, Firing Pin Cleaner, 1/4" Hex Head, Carrier Cleaner/Scraper with a Patch Hole.

While the CAT 762/556 fits many bolts (like the LaRue OBR) perfectly, due to very slight differences in bolts, the tool will fit some bolts better than others. All bolts so far encountered have been restored to "tactical tolerance" quickly. Inspection cleanliness can be quickly achieved by the addition of solvent and a patch or two.

- 100% US-made
- Approximately 3.5 inches long
- Weighs roughly 1.5 oz
- Investment-cast from 300-series stainless steel
- Bolt cleaning chamber CNC machined to precisely fit a mil-spec bolt

Trailer Hitch Cover

Now you can display your favorite bumper sticker...no matter how controversial, yet remove it when you're "behind enemy lines." Our handy trailer hitch cover has a large flat panel, specially designed to accept any standard bumper sticker up to 13 1/2 inches wide. It also has **two built-in bottle openers** that always come in handy. The gloss black powder-coated finish fights corrosion and looks good too!

Fits into any standard trailer 2" x 2" hitch socket.

Shucks fellers (ladies too), now you can become a dad-gum social chameleon.

Here's what happened ...

I tried to give away a bunch of nice bumper stickers, just give 'em away I tell ya. Some of ya (a very few actually) went "Meh, thanks, but I don't stick stuff to my ride." Sooo, I studied the situation and came up with this here solution. And for you redneck's, I built-in a bilingu, er, uh, a left and right hand bottle opener. One could say it's a Tail-gater's companion piece. :^)
Anyhow, for them of ya that absolutely refuse to slip a nice patriotic bumper sticker onto your vehicle, worry no more.

Finally, here's my three step inventing process - 1.) You think of it ... 2.) You make some ... 3.) You commence selling 'em. ;-)

All fun aside, enjoy.

-M. LaRue

The LaRue Tactical 3x5 Dillo Flag is constructed with outdoor nylon material and sewn fields. The flag is finished with four rows of reinforced lock stitching on the fly hem and a canvas header with two brass grommets.

Annoy a Liberal Today!

Printed on heavy "crack-n-peel" label stock with UV-resistant inks. Each measures 10" x 3", with an extra 3" x 1.5" LaRue Logo decal.

An American Flag for Patriots...made here in Texas USA.

Believe it or not some folks are having Ol' Glory *made in China*.

Like you, we know this just ain't right and want to give Americans a **Flag made right here in San Antonio, Texas.**

At 3'x5' this weatherproof Flag is ideal for outdoor display.

Nyl-Glo ColorFast U.S. Flags will never change color. In fact, they are guaranteed to remain color fast for at least one year. Nyl-Glo U.S. Flags are made of SolarMax 200 Denier Nylon, the longest lasting Nylon flag material available anywhere. They have large, full size "dense-filled-embroidered" stars, double needle seams sewn with lock stitching for extra durability.

Battle Mixer:

First child on the way, and the nursery needed painting. That meant dripping, messy, wasteful mixing and pouring. There had to be a better way....

Invention time!

Purpose of Battle Mixer: *Mixes paint thoroughly without mess. It also allows the user to pour, seal and store without drips. The lid prevents paint-drip into the lid channel, so you can replace the original lid without splatters. The Battle Mixer washes up easily for the next project.*

Compatibility: Works on any standard 1-Gallon, 6 1/2" metal paint can

Includes: Lid, Stir Sticks, Spout Cap

Are you a Member?

This pack includes **8 morale patches** (Including the popular "LARUEMINATI"). Each patch comes complete with male-side Velcro backers, ready to apply.

Made in USA.

Tactical Beverage Entry Tool

The famous "Dillo" is known world-wide.

Opening your favorite beverage just isn't the same without one.

Our Tactical Beverage Entry Tool, or "Dillo", is a handy bottle opener that can be used to twist or pry open bottle caps, or used to open can tabs. Proudly made by LaRue Tactical in Texas, USA!

The bottle that put Nalgene on the map.

And after all these years it is still Nalgene's best seller. It's design appears simple, but there are over fifty years of manufacturing experience that go into creating a **super durable, leak proof bottle**. Graduations help you keep track of your fluid intake, or serve as a useful guideline when mixing up a beverage in your Nalgene. Most backpacks have a pocket on the side to hold a bottle and those pockets were designed to accommodate a Nalgene bottle, because hikers have trusted Nalgene for over twenty years.

LaRue Vinyl Decals

By popular demand, we've converted our LaRue "morale patch" designs into cut-vinyl decals.

Ideal for vehicle windows, gun cases, toolboxes, etc.

Easy to apply, just pull off the protective backer, burnish in place, then remove the front protective sheet. Works on any smooth surface.

Dillo size: 6" x 2.75"

Flag size: 5" x 3.4"

Circle size: 3.25" dia

Select color (Black or White)

Precision cut from vinyl in the USA

"Partner, you just broke into the wrong gaul-derned rec room."

By popular demand, we're making our **banner** available to the public. They **look great on shop walls**, reloading rooms, or even outside. Each banner arrives fully-hemmed, grommets and ready to hang.

Specifications:

6' x 3'

Weatherproof full-color image on 13 oz. heavyweight vinyl.

LaRue Decals

for Truck Windows, Rifle Cases, Bumpers and even Laptops!

By popular demand we've decided to offer these decals **with our distinctive logo**, made right here, dead-center of Texas. The LT decal is precision-cut out of white vinyl, and applies in seconds to almost any smooth surface.

Roughly 6" x 3"

LaRue CoastARs (4 Pack)

A special treat for any LaRue enthusiast. Each CoastAR is **hand-crafted by expert saddle makers in the USA** using robust full-grain leather treated to a rich medium brown. No two CoastARs are identical, given the natural markings and grain characteristics of the leather.

Each set **includes four CoastARs** in a four-inch diameter reusable tin.

Pull the pin...

on the **Dillo Grenade decal**. It is precision-cut out of white or black vinyl, and applies in seconds... allowing you to personalize windows, bumpers, gun cases, laptops, or almost anything with an oil-free smooth surface.

Roughly 3.5" x 6" in black or white vinyl.

Easy to apply, just pull off the protective backer, burnish in place, then remove the front protective sheet. Precision cut in the USA.

Clunk-AR

So you bought you a Clunk-AR during the gun rush ... some 2 million of you did.

But it has a gritty, crunchy, grindy, nasty trigger on it ...

For \$99.00 and 60 seconds, you can drop in the smoothest, nicest trigger in the industry yourself.

Each MBT-2S comes with a heavier spare spring that adds a pound for those that need it.

Go to www.MBTtrigger.com to read the MBT reviews pouring in and see why we sold nearly 9,000 LaRue MBT triggers in the first year after release.

-Safely practice trigger manipulation without a rifle. *grip not included.

LaRue MBT™ Meticulously Built Trigger

"I want my..., I want my..., I want my M - B - T"

The "I can't wait, gotta have it now" price - **\$174**

We have a small bin we're gonna keep somewhat full for those few shooters that simply cannot wait. Picking this option doesn't necessarily mean you'll get it by the weekend, but we'll give it a good college try.

The "I got plenty of time" price - **\$99**

They say "patience is a virtue," and "good things come to those who wait," so this \$75-off price is for folks who want the best but don't mind waiting for it. It allows us to schedule, plan, reassign equipment, etc. without everybody having to work Sundays. While we won't be able to nail down how long it'll be, we won't be rushing perfection.

LaRue Tactical MBT-2S Trigger

In a world of instantly M.I.M.'d rifle and pistol components, we threw on the brakes, slowed to a walk, and built 2-stage triggers out of solid S7 tool steel plates. Meticulous triggers built by our staff toolmakers ... without a stopwatch in sight.

No question, we're particular about accuracy. Everyone knows that one of the smartest improvements an AR-owner can make to their rifle is a precision trigger upgrade. Everyone also knows that LaRue Tactical has a track-record of doing things right. The LaRue MBT-2S was purposefully designed and manufactured to render the greatest benefits from our legendary line of accurate rifles. The MBT-2S can also replace the stock trigger on any mil-spec AR lower receiver.

Sparing no expense, all major components are precision-machined from S7 Tool Steel. The result of this extra effort is a glass-smooth, hyper-consistent trigger that will satisfy even the most scrupulous competition shooter, but also be overly rugged for the battlefield. The MBT-2S breaks crisply at 4.5 lbs (2.5 lb first stage, 2 lb second stage) and has a smooth and positive reset. Made in-house, in Texas, in the USA.

NOTE: This trigger only works with Small Pin Lower Receivers.
