                    

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 84                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 38 54   

  

     

    

           

  

         

   ### VOTE FOR ELECTORS OF PRESIDENT AND VICE-PRESIDENT.

### REPUBLICAN.

A. B. Cummins, Elector at Large	
Charles E. Albrook, 3d Congressional District 219,469	
DEMOCRATIC.	
William W. Witmer, Elector at Large	
Hugh M. Funston, 11th Congressional District 196,083	
PEOPLE'S PARTY.	
J. M. Joseph, Elector at Large	
D. F. Wilson, oth Congressional District	

fowa official register.	203
N. H. Bowman, 9th Congressional District	20,471
K. C. Curtis, 3d Congressional District	20,468
M. C. Randleman, 7th Congressional District	20,468
T. W. Stubbs, 5th Congressional District	20,467
John Idle, 2d Congressional District	20,466
A. R. Starrett, 10th Congressional District	20,457
J. L. Bartholomew, 11th Congressional District	20,457
Milo Reno, 6th Congressional District	20,454
PROHIBITION.	
Isaac T. Gibson, Elector at Large	6,402
Thomas E. Carter, Elector at Large	6,277
Thomas G. Orwig, 7th Congressional District	-6,262
L. W. Tulleys, 9th Congressional District	6,257
J. W. Glasgow, 1st Congressional District	6,252
S. W. Lorimer, 8th Congressional District	6,250
C. H. Selleck, 3d Congressional District	6,249
H. G. Parker, 4th Congressional District	6,248
S. H. Taft, 10th Congressional District	6,248
S. A. Gilley, 2d Congressional District	6,246
Malcom Smith, 5th Congressional District	6,235
P. C. Hogle, 6th Congressional District	6,235
Alexander E. Hartley, 11th Congressional District	6,226
Average vote for Republican Electors	219,503
Average vote for Democratic Electors	196,145
Average vote for People's Party Electors	20,482
Average vote for Prohibition Electors	6,261
Aggregate average vote	442,391

Note.—Clarke county returned 180 Republican, 109 Democratic and 14 People's Party votes more for Electors at Large and Elector for the 8th Congressional District than for the other electoral candidates; caused, doubtless, in the belief of the voters that they had not the right to vote for thirteen electors. Had the vote been general it would have placed Mr. Temple 13th, Mr. Dale 17th and Mr. Wilson 36th in the foregoing list.

### VOTE FOR STATE OFFICERS.

### SECRETARY OF STATE.

W. M. McFarland, Republican       219,461         J. H. McConlogue. Democrat       196,686         E. H. Gillette, People's Party       20,356         S. H. Taft, Prohibitionist       6,097
AUDITOR OF STATE.
C. G. McCarthy, Republican       219,220         S. P. Vandike, Democrat       196,999         A. J. Blakely, People's Party       20,278         F. E. Whitmore, Prohibitionist       6,092
TREASURER OF STATE.
Byron A. Beeson, Republican.       219,160         Charles Ruegnitz, Democrat.       196,996         Justin Wells, People's Party.       20,315         R. M. Dihel, Prohibitionist.       6,081
