### BROWNELLS SLIDES FOR FOR GLOCK® 17/19/34

**Foundation for a Superb D.I.Y. Pistol - Ergo Enhancements for Better Control**

Our front cut slide allows you to build a custom Glock®-style pistol from the ground up with a slide already customized with front slide serrations. Our Front Cut Slides feature a unique wraparound slide serration design that aids in weapon manipulation, especially when checking the chamber. Serrations are cut to the same depth as Glock® factory models to ensure lower slide rigidity. Models are also available with top window cutout between the front serrations. Slides start out as 17-4 stainless steel billet and are machined internally to factory specifications. Slides are compatible with any standard Glock® 17 or 19 components. The factory Glock® rear sight dovetail is machined, with a standard Glock® front sight cut at the front. Heat treated and finished with a matte Black Nitride finish. Factory internal dimensions - so excellent compatibility with factory and aftermarket components. Factory Glock® sight cuts. Models for **Gen3** and **Gen4** pistols. **G26** slide accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All models: dedicated tool required to install channel liner, we recommend #777-100-017.

### BROWNELLS COVER PLATE FOR RMR-CUT SLIDES

**Fills the Slot When You Choose To Run Your Pistol Without an RMR Sight**

All Brownells RMR-cut slides are designed to have factory-original or compatible aftermarket "iron" (actually plastic) sights installed for co-witnessing with the optic. But what if you want to run your Glock® without the optic? Trijicon designed the sight to be easy to remove - just take out the two mounting screws - so piece of cake. BUT that leaves an open, somewhat unsightly mounting slot in the top of your slide. No problem: simply install this cover plate. Fits perfectly into the slot, anchors down using the same screws that retained the sight, and the top of your slide now has a smooth, finished look. The plate is so neatly contoured to match our slides that it even has the tops of the cocking serrations machined into its sides. It's machined from high-grade aluminum alloy, then hard-anodized matte black to match the color of the slide. If you lost your screw, we sell spares, separately, below. *NOTE: Includes patented optic cut technology pioneered by ZEV Technologies.*

- #078-000-413** RMR Slide Plate, 8G22L94 . . . \$26.99

### BROWNELLS 19LS EXTENDED SLIDE FOR GLOCK® 19

**Build Your Own Hybrid "Long Slide" Glock®**

RMR Cut, No Window

Brownells offers many innovations for the Glock® pistol, but one of our most novel offerings now gives Glock® fans the ability to mix and match components to create a custom hybrid pistol ideally suited to their personal needs. The Brownells Extended Slide for Glock® 19 enables owners of the popular G19 pistol to put an extended G17-length slide on their guns. The result is a gun with a longer sight radius - for more accurate shooting - with the G19's shorter frame, making it easier to carry concealed with less risk of "printing" through your clothing. Another enhancement on our Extended Slide for Glock® 19: wraparound, front-cut slide serrations that aid in manipulating the slide, especially for a quick check of the chamber. There are standard, factory-style serrations at the rear. You also get standard factory front and rear sight cuts on your Brownells extended slide so you can install any aftermarket sights that fit a Glock® factory slide.

- Fits Gen3 Glock® 19 frame ONLY
- Machined from hardened, corrosion-resistant 17-4 stainless steel billet
- Tough black Nitride finish with excellent wear resistance
- Accepts standard 9mm internal slide components
- Length: 7.21"
- 12 oz. wt.

Window models have a cutout up front on top that reduces weight and enhances air flow to keep your barrel cool during long practice sessions - plus it gives your pistol a unique, futuristic flair. **RMR** models also have a pre-cut slot for neat, secure, integrated installation of a Trijicon® RMR red dot sight (mounting screws for sight are even included). **Blank** slide is unfinished, ready for the skilled gunsmith (or metal worker) to cut slide serrations and other features exactly as needed by you - or your customer. But "custom" work doesn't mean unnecessary work - comes with factory sight cuts. Then it's ready to accept a custom finish; go plain or go wild or something in between. **Note:** Due to changes in barrel-to-frame geometry caused by mating the longer slide with the smaller Glock 19 frame, a standard Glock 17 barrel won't work with this slide. Instead, use the Brownells Extended Barrel for Glock® 19 (sold separately, #078-000-383, plain, or #078-000-384, with threaded muzzle).

### BROWNELLS FRONT-CUT SLIDES FOR GLOCK® 43 & 48

**Maximize the Performance of Your Pocket Glock® With an Upgraded "Top Half"**

With our Front-Cut Slide installed, you'll find your pocket Glock® becomes easier to operate without any change in its reliability or size. The G43's greatest strength is that it lets you carry a pistol with 6 rounds of centerfire punch in an ultra-compact EDC package. The downside is the G43's such a small pistol (barely 6"

OAL), you can have trouble getting a firm grasp on the slide to rack it. And if you're under stress or your hands are wet or a little sweaty... Yeah, even more difficult to jack that first round into the chamber. Our slide gives you up to 60% more grasping surface by adding deep-cut serrations up front that wrap around the top of the slide. (This is also a big help when making a quick press check of the chamber.) The serrations have crisp 90-degree edges that give you excellent purchase, and they're cut to the same depth as the factory grooves - so there's no compromise of the slide's overall strength. These slides are machined from heat-treated hardened 17-4 stainless steel, with hard, wear-resistant matte black Nitride finish. Internal dimensions are identical to factory slides, right down to the factory rear sight dovetail and front sight tenon cut. It will accept both factory "iron" (actually, plastic) sights and any aftermarket sights that fit the factory cuts. This is the bare slide only. You will need to retain your pistol's existing barrel (or an aftermarket upgrade) and recoil guide / spring assembly. You'll also need to install a firing pin. **Window** model has a .863" x .285" window cut in the top of the slide ahead of the ejection port, in place of the top serrations. This aids in barrel cooling, slightly reduces the weight of the slide for faster cycling, and...well, it just looks cool, too. **Shield** model has a cutout for the super-compact RMS/RMSC (Reflex Mini Sight/Reflex Mini Sight Compact) red dot reflex sights from Shield Sights. Accommodates the optic the same way the RMR model above does, including retaining the factory sight dovetail/tenon slot. Has front and rear side cocking serrations ONLY (none on top). Mounting screws for sight included. **Blank** slide comes with no cocking serrations or markings. Edges and corners are chamfered. Comes unfinished with fine bead-blasted surface. Also fits G43X and G48.

### ALPHA SHOOTING SPORTS ALPHA MARKSMAN V4 SLIDE FOR GLOCK® 21

**Enhanced RMR-Ready Slide for Big Bore Custom Pistols**

The Alpha Marksman V4 slide is the perfect upgrade for a Gen3 Glock® 21 or a pistol built on a Polymer80 PF45 frame. It comes with a built-in mounting slot for a Trijicon RMR or Holosun 507 red dot sight (or other brand that uses the RMR mount), plus deep, gnarly front and rear cocking serrations AND window cutouts on the sides and rear for weigh reduction - and let's admit it, a badass look that'll show off your pistol's aftermarket barrel. It is machined from 416 stainless steel for strength and near-impenetrability to corrosion and given a tough Black DLC PVD finish. Includes rear sight dovetail

### BROWNELLS RMR SLIDE FOR GLOCK®

**Stainless Steel Slide With a Bundle of Custom Features**

Our RMR Slides for Glock® pistols feature a distinctive, wraparound serration pattern that aids in manipulating the slide, especially when checking the chamber. (OK, we'll admit it: the serrations look cool, too.)

They also come with a pre-cut slot for easy, secure, low-profile mounting of a Trijicon RMR sight. All Front Cut RMR Slides also have standard Glock factory front and rear sight dovetails for "iron" sights. Since the RMR sits low, it can easily co-witness with iron sights. In addition, you can get your Front Cut RMR Slide with an optional "window" cutout on top between the front serrations that reduces weight and enhances airflow to keep the barrel cooler - ideal for hard-working action competition pistols. Each Front Cut RMR Slide starts life as a billet of 17-4 stainless steel that is machined to Glock® factory specifications inside, so it'll fit factory frames and accept factory or aftermarket barrels and parts. Models available for **Gen3** and **Gen4** pistols. **G26** slide accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All models: dedicated tool required to install channel liner; we recommend #777-100-017.

Available with distinctive top **Window** cutout or traditional solid top. Machined from corrosion-resistant 17-4 stainless steel billet. Heat treated to add surface hardness. Available with three finishes: wear-resistant basic **Black Nitride (BLK)** finish, as well as a thin, extremely tough, good-looking **Bronze** or **Flat Dark Earth (FDE)** physical vapor deposition (PVD) coating. This slide is the ideal upgrade for your factory Glock 17 or 19 pistol - and the perfect top half for a new custom gun built on an 80% frame. *NOTE: RMR slides include patented optic cut technology pioneered by ZEV Technologies.*

## BROWNELLS SLIDE BLANKS for GLOCK® 17/19/26/34

A "Blank Canvas" for  
Your Next Custom  
Pistol Masterpiece

Brownells Blank Slides for Glock® pistols come with the exterior left smooth and featureless so you can customize it exactly the way you want it. Add cocking serrations, an optic mounting slot, and cosmetic flourishes to make it entirely your own. (Yes, you will need to bring some machining skills to the table!) Inside, the dimensions fully machined to factory dimensions, so your Brownells Blank Slide for Glock comes ready to fit a factory-spec frame and accept Gen 3 factory and aftermarket barrels and parts. Models for Gen3 Glock® 17, 19, and 34 pistols. G26 model accepts Gen1-4 parts; use #100-002-719 recoil guide/spring assembly. All are machined from firearm-grade 17-4 stainless steel. Comes "in-the-white" so you can apply the finish of your choice. Includes Glock factory front and rear sight dovetails. Sometimes "off the shelf" works, sometimes you want to do it your way. When you're ready to build your own Glock®-platform Dream Gun™, reach for a Brownells Blank Slide.

## GREY GHOST PRECISION SIG SAUER P320 GGP320 SLIDES

A Top-Half With Ergonomic & Optic-Mounting Enhancements

With the adoption of the SIG P320 by the U.S. military, as well as many law enforcement agencies, the pistol has earned increased attention from custom pistolsmiths. Grey Ghost's GGP320 slide offers enhanced ergonomics with improved grasping surfaces and cocking serrations AND the flexibility to mount a Trijicon RMR, SIG Romeo1, or Leupold Delta Point Pro red dot sight right out of the box without resorting to bulk adapter plates that complicate installation (all screws and shims included) and raise the optic needlessly high above the bore axis. OK, we'll admit it: the GGP320 adds a little aesthetic flair to the P320's sober exterior. These slides are machined from 416 stainless steel to tighter-than-factory-tolerances and come with a tough DLC ("Diamond Like Coating") or Cerakote finish. There's a G10 glass fiber laminate cover plate for the optic slot because factory dovetails for "iron" sights are included - a co-witnessed backup for the optic. Drop-in installation on SIG P320 grip modules. Stripped slide - no barrel or other internal components included.

## CZ USA CZ 75

### KADET II RIMFIRE CONVERSION UNIT

Turns Your CZ Into A Training Or Plinking Pistol

Complete slide assembly enables the firing of .22 LR cartridges in your centerfire CZ 75. The Kadet is the same size as the centerfire slide, but only the lower third moves, reducing the overall mass but still retaining the ability to cock the hammer. Slide stop will hold open and release the slide the same as on original pistol. Conversion kit is constructed of forged steel and comes with an adjustable rear sight, plus two 10-round .22 LR magazines. Minor fitting may be necessary for correct slide-to-frame fit on your specific pistol. Fits full-size CZ 75, plus these compact/sub-compact models: 75 Compact, P-01, P-06, PCR, and RAMI. Magazines will extend beyond the bottom of grip frame on these models. Kadet will not work on the 97, 75 TS, P-07, or P-09 models.

SPECS: Steel, blued, 8.11" (20.6cm) OAL, 4.72" (12cm) barrel length, 1.1 lbs. (499g) wt.

- #100-015-794 CZ 75 Kadet II Rimfire Unit, 7H431P00. . \$ 431.00

## GUNCRAFTER INDUSTRIES 50 GI® CONVERSION SYSTEM for GLOCK®

Steps Up Large-Frame  
Glock Pistol To Powerful  
.50 Caliber Cartridge

Drop-in conversion system replaces the top end of your Glock 20/21 pistol and converts it to fire the hard-hitting, yet controllable, 50 GI cartridge. Developed by Guncrafter, the 50 GI's head is the same diameter as a .45 ACP, so the rest of your pistol remains stock, allowing easy conversion back to the original caliber. 50 GI ammo can be loaded to drive a 185 grain bullet at 1,200fps, with a felt recoil similar to 230 grain .45 ACP ball ammo. Delivers greater knock-down power, while remaining controllable during rapid fire. Conversion unit comes fully assembled with 4 1/2" stainless steel barrel, firing pin, and guide rod with captive recoil spring. Slide and barrel are precision machined from stainless steel forgings to the same exacting tolerances as the original factory components. Non-reflective, matte finish is durable and good-looking. Black polymer fixed sights with easy to acquire white dot on front sight and U-shaped white outline around rear sight notch. The SF-style magazine (included) uses a modified .45 ACP follower and has an extended base pad that allows it to hold 9 rounds; convenient witness holes at the rear. Fits standard mag pouches for .45 caliber Glock mags. Cut for SF-style magazine catch.

SPECS: Slide/Barrel Assembly - Stainless steel, matte finish. Magazine - Stainless steel liner, black polymer shell, base pad, and follower. 9-round capacity. May require some fitting of conversion unit's locking lug and/or pistol's locking block. Fits Glock 20/21 pistols only.

- #100-003-756 50 GI Conversion System for Glock, 9A001XE ..... \$ 757.99

## POLYMER80 POLYMER 80% FRAMES for GLOCK®

Ergonomic Upgrades, Plus Plenty of  
Customization Options for Building Your Glock

These are Polymer80's next generation of 80% frames for Glock® pistols that enables you to create a customized handgun yourself, from the bottom up. They come with a finishing jig, an end mill, and all the necessary drill bits you need to complete the remaining 20% of the work to get a finished, working pistol frame. These frames offer high-strength reinforced polymer construction and improved ergonomics over the original Polymer80 frame that make them superb platforms for reliable and great-shooting pistols. They are compatible with factory and aftermarket Glock® Gen3 internal components (not compatible with Gen4 parts). Inside, there's a stainless steel locking block to keep the fire control parts in place, and a stainless steel rear rail module that keeps the slide on track through many thousands of firing cycles. Hardened front and rear rail pins ensure the slide/rail/frame interface is - and stays - rock solid. A modified grip profile and improved overall balance make this not only an easier frame to operate and control, but also a unique looking one. Up front, there's an under-receiver Picatinny/STANAG rail for mounting any standard light or laser. The PF940v2 is the "full-size" frame that accepts Glock 17/22/31 Gen3 slides and components, while the PF940Cv1 is the "compact" frame that accepts Glock 19/23/32 Gen3 slides and components. PF940SC is the subcompact frame that accepts Glock 26/27 Gen3 slides and components. Available ONLY with Standard texture on sides, front, and back of the grip, as described below. PF9SS is the correct frame for a Glock 43 sized compact single-stack pistol. Has an extended beavertail, double under-cut trigger-guard, a thumb ledge, AND a Picatinny rail for mounting a light or laser. The following texturing configurations are available: Standard with textured grips that aid in recoil control and retention of the pistol under stress. ReadyMod with completely smooth grips, ready for custom stippling to get the exact texture you prefer. The PF940v2-BE/PF940Cv1-BE models are available ONLY at Brownells ("BE" = Brownells Exclusive!) and come with what we're calling "aggressive" texturing on the grips that will give you an exceptionally firm hold to counteract recoil and muzzle rise under any conditions - even when your hands are wet or you're under extreme stress. Colors: Black, Flat Dark Earth (FDE), Olive Drab Green (ODG), Coyote, TacGrey, and Cobalt. Not all models available in all colors. A note on Cobalt - although this color is usually a deep, vibrant blue, the color of these frames appears to be more of a dark gray or graphite color. NOTE: Returns will not be accepted once the receiver is modified in any way. All warranty issues must be directed to the manufacturer.

## POLYMER80 SLIDES for GLOCK® 17/19

Aggressive Look Sets It  
Apart from Ordinary Glock  
Slides - Perfect Top End for  
a Finished 80% Frame

A P80 slide is the perfect top half for a finished Polymer80 frame. Aggressive front and rear serrations coupled with clean, modern lines and a heavy front chamfer allow effective manipulation and holstering of a PS9C-equipped pistol while maintaining a unique but low-key aesthetic profile, right down to the subtle P80 logo engraved forward of the ejection port. Fabricated from domestically-sourced 17-4 PH stainless steel, the slide is heat treated to 42-43 HRC, then given an extremely hard, amorphous nanocomposite coating for the ultimate in durability, lubricity, and resistance to wear. The G17 slide is compatible with Glock® 17 Gen3 9mm components and the G17 slide accepts Gen3 Glock® 17 parts, making them both perfect for completing a Polymer80 pistol build or as an upgrade to an existing OEM pistol. Slide ONLY - no barrel or internal components. Available in Glock Black or Flat Dark Earth (FDE).

**SLIDE KITS for GLOCK®**

**A Handy Package Deal on the Foundation for Your New Custom-Built Pistol**

Our handy kit packages a Polymer80 80% pistol frame with one of our own Brownells slides for Glock®. The slides has front AND rear cocking serrations, the slot for mounting a Trijicon RMR holographic sight, cuts for factory front and rear sights, and a window on top, forward of the ejection port for enhanced barrel cooling. Polymer80 finishing job and drill bits included. Special Brownells-exclusive (BRN) texturing option is more aggressive than standard P80 texturing but not as aggressive as P80's Aggressive Texture! Kits available with G17-size frame/slide and G19-size frame/slide. Slide and frame in both kits are black. **NOTE:** Returns will not be accepted once the frame is modified in any way. All warranty issues must be directed to the manufacturer.

**POLYMER80 SIG SAUER P320**  
**PF320PTX™ GRIP MODULE**

**Enhanced Ergonomics, Control & Upgraded Amidextrous Safety**

We knew this had to happen, right? The makers of the wildly popular 80% frames compatible with Glock® pistols could not resist releasing their own grip module for the increasingly popular SIG P320. The PF320PTX™ Grip Module is designed for compatibility with SIG Sauer factory components for P320™. It offers the comfortable 1911 grip angle favored by so many pistol shooters with P80's signature non-slip PTX™ grip texture. There's a high beavertail undercut to help you get your hand high, close to the bore access, and an enhanced double-undercut triggerguard and support hand contours - all to help the shooter maintain an excellent hold on the pistol. Finally, there's P80's upgraded ambidextrous magazine release. The PF320PTX is compatible with standard and X5 Full-Size and Carry (compact) P320 slides, as well as P320 VTac slides.

**POLYMER80**  
**COMPLETE SERIALIZED FRAMES**  
**for GLOCK®**

**Complete Frame for Building Custom Pistols - No D.I.Y. Work Required**

Polymer80 truly revolutionized the world of custom pistols with their P80 80% frames. The P80 made it possible for the average shooter, with some basic mechanical skills and tools, to build his or her own custom pistol from the frame up, and without the need bring an FFL holder to handle the transfer of said frame. If you ARE an FFL holder, Polymer80 now offers these fully finished, serial-numbered frames for use as the foundation of custom pistols. They give you the ergonomics and advanced features of the original 80% frames, only without the drilling and finishing steps. These frames are ideal for your next competition or duty pistol build. They come stripped and ready for assembly and customization with Glock®-compatible parts. Made of high-strength reinforced polymer, ready for multiple applications. Two size options to choose from: Full-size PFS9 frame accepts Glock® G17/22 slide and barrel. PFC9 Compact frame accepts Glock® G19/23 slide and barrel. Available with ReadyMod® blank grip for custom texturing, Standard grip texture, or P80's Aggressive grip texture - your choice, whatever works best for the type of pistol you're building. The Polymer80 Serialized PFS9/PFC9 frame for Glock® is ready to serve as the solid foundation of your next build, with almost unlimited customization options! FFL required for purchase.

**SLIDE PARTS KIT for GLOCK®**

**All the Small Parts You Need To Do the Job Right**

Contains all the parts you need to complete a stripped aftermarket slide or fully refurbish a factory slide to like-new standards. All the parts in our kit fit Gen1 thru Gen3 pistols and are made to the correct factory dimensions for proper fit, finish, and function in a factory-spec slide. The extractor and firing pin are made from cast 17-4 stainless steel, while the extractor depressor plunger and firing pin safety are machined from barstock. We even include the channel liner tool for proper installation of the channel liner. Kit contains extractor, extractor depressor plunger, extractor depressor plunger spring, spring-loaded bearing, slide cover plate, striker, spacer sleeve, 5.5 lb. striker spring, spring cups, striker safety, striker safety spring, channel liner, channel liner tool, and guide rod/recoil spring assembly.

**GLOCK®**  
**FACTORY INTERNAL PARTS KITS**

**All the Small Bits You Need To Turn a Stripped Upper or Lower Half into a Finished Pistol**

Receiver Kit w/Trigger

G26 Slide Kit

Convenient kits contain all the internal parts you need to turn a bare factory or Polymer80 frame OR slide into a complete, ready-to-shoot assembly. Parts are all 100% Glock® Factory Original components, so these kits are also excellent aids in rebuilding a clapped-out original factory pistol. **Frame Parts Kits** available for Subcompact G26 and Compact G19 size (9mm/.40 S&W/.357 SIG) frames. Includes: magazine catch spring, magazine release, trigger housing with ejector, trigger housing pin, locking block pin, slide lock (♁ spring), slide release lever (♁ spring), 5 lb. connector, trigger with trigger bar (♁ spring), and trigger pin. G19 Compact kit also available WITHOUT trigger assembly, for folks who want to install the aftermarket trigger of their choice. **G26 Gen3/4** slide completion kit contains recoil spring/guide assembly, extractor with loaded chamber indicator (♁ spring), extractor depressor plunger ♁ spring, firing pin, firing pin safety ♁ spring, firing pin channel liner, firing pin spring cups, firing pin spacer sleeve, and slide plate cover. Add the barrel and sights of your choice.

**POLYMER80**  
**SLIDE PARTS KIT for GLOCK®**

**Improves the Reliability, Smoothness - and Looks! - of Your 9mm Slide**

Polymer80's kit contains all the small internal parts you need - just add sights and a barrel of your choice - to turn a stripped P80 or Glock® factory slide into a complete "top half" for a pistol. But this kit is not just a set of generic, workaday parts! These parts are engineered for strength, resistance to wear, and smooth operation. It includes Polymer80's slide PF-Series™ striker, made of 17-4 PH stainless steel so it'll survive the Apocalypse (or a least sending off a very large number of rounds down the barrel). Made of the same hardened stainless steel alloy to ensure smooth operation are the 9mm extractor, extractor depressor, and striker safety. You also get an upgraded cover plate, not of plastic but of durable machined 6061 T6 aluminum alloy. There's a complete suite of PF-Series high-end stainless steel springs, too: 5.5 lb. striker spring, extractor depressor spring, and striker safety spring. Unlike other "complete" kits, P80's kit even includes the channel liner, striker spacer sleeve, striker spring cups (2 of 'em, of course), and the extractor depressor plunger bearing. All critical parts are machined from break- and wear-resistant 17-4PH stainless steel. This kit fits Polymer80 slides and Gen1-4 Glock® 17, 19, 26 and 34 factory slides. To give your pistol an extra touch of visual distinctiveness, this kit sports a two-tone red-and-black color scheme that'll make your pistol look as good as it shoots!

**SPECS:** Complete list of parts: striker, striker spring (5.5 lb.), striker safety (♁ spring), striker spacer sleeve, striker spring cups (2x), extractor, extractor depressor (♁ spring), extractor depressor plunger bearing, rear cover plate, and channel liner.

- #100-032-272** Slide Parts Kit, Black Red, 9D83J59... \$ 87.99

**LONE WOLF**  
**FRAME COMPLETION PARTS KIT**  
**for GLOCK®**

**Everything You Need To Turn a Stripped P80 Frame into the Lower Half of a Complete Pistol**

Lone Wolf's kit gives you convenient one-stop shopping for all the internal parts you need to turn a bare Polymer80 frame into a completed custom pistol lower half. The kits components are modeled after those used on 3-pin Gen3 Glock® pistols. Installation is the same as for any factory Glock frame. Each kit contains: trigger housing (with screw ♁ hex wrench), 2 ejectors (separate 9mm and .40 S&W/.357 SIG models), Gen3 trigger bar ♁ polymer shoe, .35 lb. connector, extended slide release lever (black finish), slide stop ♁ spring, 6 lb. trigger spring, trigger pin, locking block pin, and extended magazine catch ♁ spring. Trigger bar is Lone Wolf's own hybrid design that is patterned on the Glock® Gen4 bar but fits Gen3-type frames and produces a slightly shorter pull than a factory Gen3 bar. Trigger assembly includes LW's adjustable trigger stop. **Full-Size** kit completes any G17-size Poly80 9mm/.357 SIG/.40 S&W frame. **Compact** completes any G19-size P80 frame.

**TSG-22<sup>2</sup> CONVERSION KIT for GLOCK®**

Shoot More, Pay Less With .22 LR Ammo For Practice

The TSG-22<sup>2</sup> .22 LR conversion system is built to the same high quality standards as your original Glock pistol to provide a lower-cost alternative to burning up expensive centerfire ammo during practice. TSG-22<sup>2</sup> It has the same external dimensions as the factory slide and barrel, so the gun feels and moves the same – just with less recoil. Easy-to-install: remove the factory slide, replace with the TSG-22 slide/barrel assembly, and insert the included 10-round rimfire magazine. Includes Glock sights with factory front white dot and rear white outline U-notch. Polymer magazine locks slide open after last round fired. Precision machined steel slide is treated with a friction-reducing black nitride finish for superb wear and corrosion resistance. Comes with one 10-round magazine. Spare magazines sold separately, below. **Note:** Does not fit Gen5 pistols. **USA**

**SPECS:** Slide – 4140 carbon steel, black nitride finish. Barrel – 4130 carbon steel, matte blued. Magazine – Polymer, black. 10-rd capacity. For best results, use .22 LR ammunition with 40 grain round nose bullets. **TSG-22<sup>2</sup> 17/22** fits all generations of Glock® 17, 22, 34, 35, and 37, including Gen4 models. **TSG-22<sup>2</sup> 19/23** fits all generations of Glock® 19, 23, 32, and 38, including Gen4.

**RUGER® MARK I/II/III/IV & 22/45 PAC-LITE BARREL/RECEIVER**

Provides Competition-Ready Accuracy & Improved Balance For Better Handling

Lightweight, easy to install, replacement barrel/receiver turns your Ruger Mark III, Mar IV, or 22/45 pistol into a well-balanced, competition-ready firearm in seconds. A button-rifled steel liner works with the integrated, adjustable rear sight and ramped front sight to deliver impressive accuracy. Durable, milled stainless steel ejector is built for reliability and long-lasting performance. 1/2"-28 tpi muzzle threads enable attachment of the Pac-Lite compensator (sold below) and are pre-drilled and tapped for the Pac-Lite scope base (also sold separately). **Fluted model** provides further weight reduction. **Pac-Lite IV** fits Ruger® Mark IV™ frame. **USA**

**SPECS:** 6061 T6 aluminum, hardcoat anodized, matte black or O.D. Green (Pac-Lite IV only). 4140 steel-lined barrel. .900" (2.3cm) O.D. 1-16" twist. **Pac-Lite** fits Ruger Mark III and 22/45; also fits older model Mark II. 22/45 installation may require minor fitting. **Pac-Lite IV** fits Ruger Mark IV. **FFL required for purchase.**

**VOLQUARTSEN RUGER® MARK IV™ LLV COMPETITION UPPER**

Optic-Ready Top-Half Turns Your Ruger .22 Into a Competition Target Pistol

Volquartsen developed the LLV Competition Upper to turn the already excellent Ruger® Mark IV™ pistol into an outstanding .22 target pistol. To keep weight to a minimum and maintain perfect receiver-barrel alignment, the receiver and barrel shroud are precision machined from a single piece of aluminum alloy, with a rugged Type III hardcoat anodized matte black finish. The Volquartsen Ruger® Mark IV™ LLV Competition Upper is fitted with a match-grade, stainless steel barrel that has a honed and lapped bore for superb accuracy potential and easy cleaning. The contours and weight distribution are optimized for impeccable balance in the hand. A stainless steel breech face withstands many thousands of firing cycles. Threaded muzzle is standard, thread protector included. The LLV fits on a standard Ruger® Mark IV™ grip frame ("lower" receiver). It comes with a Picatinny rail machined into the top of the barrel for installation of an optical sight. Available with a 4.5" or 6" barrel. Both are also available with adjustable "iron" Target Sights installed that can be used alone or co-witnessed with a non-magnifying red dot sight. **FFL required for purchase.** **USA**

**SLIDE COMPLETION KIT for GLOCK®**

All the "Guts" To Complete a Stripped Slide (Except Barrel)

The complement to Lone Wolf's Spectre receiver completion kits, this kit contains all the necessary parts to complete the inside of a stripped Glock® slide, minus the barrel. This is a must-have item for any custom build involving an aftermarket slide, including an all-new custom pistol built on one of the popular 80% frames. Includes channel liner, spacer sleeve, marine spring cups, mid-weight striker spring, striker, LCI extractor, spring-loaded bearing, depressor plunger and spring, firing pin safety and spring, and slide cover plate. Kit does not include recoil spring, barrel or sights. **USA**

**NEW! RIVAL ARMS SLIDE COMPLETION KIT for GLOCK® 17 & 19**

ALL the Small Parts To Complete a 9mm Slide

The devil is in the details! A great slide is critical to any great custom pistol, so it is important to finish that slide with high-quality components. Instead of sourcing every part individually, Rival's slide completion kit contains ALL of the parts – including the back plate – needed to assemble the internal workings of a slide for your Gen3 or Gen4 9mm Glock®, minus only the barrel and guide rod/recoil spring assembly. These parts are manufactured to factory tolerances or tighter. High-stress parts are machined from billet stainless steel, and parts with friction points have a PVD coating. Fits Gen3 and Gen4 G17, G19, G26 and G34 only. **USA**

- #100-038-503 Slide Completion Parts Kit for Glock® 17/19, 2K101K99 ..... **\$ 119.99**

**PAC-LITE COMPENSATOR** - 360-degree venting holes and a large internal expansion chamber disperse gasses evenly to help tame recoil and muzzle rise, so that you can stay on target and make quicker follow-up shots. Sleek-looking compensator has same O.D. as Pac-Lite barrel; quickly screws onto 1/2"-28 tpi threads. **SPECS:** 6061-T6 aluminum, hardcoat anodized, matte black (MB). 2" (5.1cm) OAL. .900" (2.3cm) O.D. 1/2"-28 tpi threads.

- #100-011-117 Pac-Lite Compensator, MB, 8K31E50 ..... **\$ 35.00**

**PAC-LITE PERFORMANCE COMPENSATOR** - Delivers the same performance as the standard Pac-Lite compensator above... but with more aggressive looks due to the spiral ridge/groove pattern. Matte black anodized finish. Fits 1/2"-28 tpi muzzle threads. 1" O.D. .22 LR only. Perfect for Pac-Lite receiver/barrel unit, but will work on any .22 rifle or pistol barrel with the same thread pattern.

- #100-033-500 Pac-Lite Performance Compensator, 8K44Q10 ..... **\$ 49.00**

**PAC-LITE STANDARD SCOPE BASE** - Machined aluminum base attaches to a pre-drilled and tapped Pac-Lite barrel to allow the mounting of optics or other accessories. Compatible with Picatinny or Weaver-style scope rings.

- SPECS:** 6061-T6 aluminum, hardcoat anodized, matte black. 3.4" (8.6cm) OAL. Fits Pac-Lite barrel/receiver.
- #100-011-118 Pac-Lite Standard Scope Base, 8K00QMQ ..... **\$ 28.00**

**VOLQUARTSEN RUGER® MARK II/III/22-45 VC TARGET FRAME**

Precision-Machined Frame With Match Grade Internal Parts Promotes Outstanding Accuracy

Complete frame machined from aluminum alloy weighs only 7 oz. and comes with a whole list of popular accurizing features to help you shoot super-precise groups with your Mark III. Each VC frame comes with all of the following items installed: extended bolt release, precision target trigger, wire-EDM cut target hammer and sear, Titanium disconnect, spring-loaded magazine ejector, and an extended safety button. Each VC Frame ships from the factory with a clean, crisp 2 1/4 lb. trigger pull. The magazine disconnect has also been eliminated from this frame. Has the standard factory grip frame configuration, so it accepts any grips designed for Mark III steel frame. **USA**

**SPECS:** Machined aluminum, matte black finish. Accepts only Mark III magazines. Installation instructions included. **FFL not required for purchase.**

- #930-000-131 VC Target Frame, 3Z00HES ..... **\$ 476.99**

**VOLQUARTSEN RUGER® MARK II/III & 22/45 LLV COMPETITION PISTOL UPPER**

Lightweight, Machined Billet Receiver With Stainless Steel Barrel

Weighing just under 16 oz., this complete barreled receiver is precision machined from a single piece of aluminum alloy. An integral Picatinny rail is machined into the top of the receiver for optic and accessory mounting options. Upper receiver features a contoured, stainless steel barrel that has been machine-honed and lapped. Stainless steel breech face will withstand years of use. Receiver comes with 1/2" x 28 muzzle threads and screw on thread protector. **USA**

**SPECS:** Aluminum, Type III hardcoat anodized finish, matte black. Fits Ruger Mark II, Mark III and 22/45. 6" - 15 oz. (425g) wt. 4.5" - 14 oz. (396g) wt. **FFL required for purchase.**

- #930-000-140 6" LLV Comp Upper Rec'r, 3Z425F69... **\$ 472.99**
- #930-000-141 4" LLV Comp Upper Rec'r, 3Z429H24... **504.99**

**JENTRA**

**STAINLESS STEEL PIN KIT for GLOCK®**

Pins Give Long Service Life & Enhance Appearance

Stainless steel pins fit into Glock pistols to give long service life and high resistance to corrosion and wear. Pins also add striking contrast color against the frame for enhanced appearance. **JBP-1** kit fits into Gen 1, 2, and 3 Glocks and includes trigger pin, locking block pin and trigger housing or pin, short trigger housing pin for use without a backstrap, and long trigger housing pin for use with a backstrap. **USA**

- #463-000-010 JBP-1 SS Pin Kit, 3F18D74 ..... **\$ 24.99**
- #463-000-011 JBP-2 SS Pin Kit, 3F21E59 ..... **26.99**

**JENTRA GRIP PLUGS for GLOCK®**

Keeps Dirt Out Of Grip Frame

Snaps into the opening at the rear of the Glock grip frame for a cleaner appearance, plus keeps dust, dirt, snow and water out of the gun. Creates a perfect

location for adding extra weight to competition guns or to counter recoil on light, carry guns. Easily removed, does not alter gun. **USA**

**SPECS:** Synthetic polymer, black. **JP-1** fits models 17, 19, 20, 21, 22, 23, 24, 25, 31, 32, 34, 35. **JP-2** fits compact models 26, 27 and 33. Does not fit G29 or G30. **JP-3** fits G30 only. **JP-6** fits Gen4 17, 19, 20, 21, 22, 23, 24, 25, 31, 32, 34, 35 without backstrap insert. **JP-9** fits Gen4 models 17, 18, 19, 22, 23, 24, 25, 31, 32, 34, 35 with interchangeable backstrap inserts.

- #463-100-017 JP-1 Grip Plug for Glock, 3F7E49 ..... **\$ 9.99**
- #463-000-001 JP-2 Grip Plug for Mini Glock, 3F6G74... **8.99**
- #463-000-002 JP-3 Grip Plug for G30, 3F8N24... **10.99**
- #463-000-012 JP-6 Grip Plug for Gen4 Glock w/o Backstrap, 3F7C49... **9.99**
- #463-000-015 JP-9 Grip Plug for Gen4 w/Backstrap, 3F8P24... **10.99**
- #100-023-024 Grip Plug for G42/43, 3F7P49... **9.99**

**GUARANTEED. FOREVER.® SINCE 1939**

## GRIP FORCE GRIP ADAPTER for GLOCK®

Helps Improve Hold & Sight Acquisition For Fast Follow Up Shots

Easy to install adapter helps improve grip and shooting control. Modifies the backstrap angle to create a subtle change in grip and wrist positioning that helps enhance pointability for improved sight acquisition and faster follow up shots. Extended tang increases leverage for better control during rapid fire and helps the user form the proper shooting grip, especially when drawing from a holster. Also prevents the slide from making contact with the skin between thumb and forefinger. Comes with a Gen 123SC adapter that features a smooth tang and a shorter backstrap. Easy to install with the included trigger housing pin. No permanent modifications to the gun; won't damage the pistol or mar the frame.

**SPECS:** Textured plastic, black. Gen 123SC adapter fits Gen 4 pistols in the short frame configuration or with the Medium grip panel installed. Gen 123 adapter fits Glock Gen 1, 2, 3 pistols and the Gen 4 pistol with the Medium grip panel installed. May not fit pistols with letter L serial number prefix (i.e., LXX123). Increases trigger reach by .077" (1.96mm) and tang area thickness by .084" (2.13mm). Gen 4 adapter fits Glock Gen 4 pistols in the "SF" (short frame) configuration to give the pistol a more upright backstrap/grip angles, will not fit over the Medium or Large grip panels. Increases trigger reach by .091" (2.31mm) and tang area thickness by .085" (2.16mm).

**#100-011-617** Gen 123 Grip Adptr for Glock, 9C19M99... \$ 24.99

## GHOST

### GRIP PLUG KIT for GEN4 GLOCK®

Helps Keep Out Dirt & Enhances Magazine Insertion & Removal

Polymer insert fits into gap at bottom of Glock grip to help keep out dirt and gives a beveled edge to help ease magazine removal and insertion. Includes two plugs - one for use with back strap, one for use without back strap. Simply choose appropriate plug and insert it into the gap.

**SPECS:** Polymer, matte black. Fits Gen4 models 19, 17, 22, 23, 31, 32, 34, 35, 37 & 38. Fits only Gen4 pistols. Will not fit SF models.

**#100-013-385** Gen4 Grip Plug Kit, 7K7C64... \$ 8.99

## PEARCE GRIP

### GRIP FRAME INSERT for GLOCK®

Fills The Opening In Glock Frames For Smoother Reloading

Plastic plug installs in the bottom rear cavity of the frame to fill the opening found in Glock pistols. Front "lip" forms a tight, flush bond with the mag well to help make sure the mag goes where it should, smoothly. Keeps dirt and debris from finding its way inside the pistol and gives a clean, smooth look. Uses the lanyard hole for retention to snap firmly into place. Does not add extra rounds.

**SPECS:** Impact-resistant plastic, black. One per pack. Does not add extra rounds. Glock Plus Zero fits models 17 through 25, 31, 32, 34, 35, 37, and 38. Gen 4 Mid/Full Size fits Gen 4 models 17, 18, 19, 22, 23, 24, 31, 32, 34, 35, 37, and 38 only. Gen 4 Subcompact fits Gen 4 models 26, 27, 33, and 39 only. Other models fits the pre-Gen 4 Glock models indicated in the price lines below.

**#092-000-009** Glock Plus Zero Grip Frame Insert, 2K4B49... \$ 5.99  
**#092-000-011** G26/27/33/39 Grip Frame Insert, 2K4M49... 5.99

## LIGHTNING STRIKE COVER PLATE for GLOCK®

Durable Replacement To Factory Part Easy, Drop-On Installation

Cover plate personalizes the look of your Glock and replaces the plastic, factory part for added strength. Installs and removes more easily than the factory cover plate for maintenance access.

**SPECS:** Machined aluminum, hardcoat anodized, matte black finish. Universal fit for Glock pistols.

**#642-000-016** Cover Plate for Glock, 2D15N74... \$ 20.99

## TANGODOWN

### VICKERS TACTICAL GRIP PLUG/ TOOL for GLOCK®

Fills Void in Grip Behind Magwell - Always Have a Takedown Tool With You

Ever since the Glock 17 first came out, aftermarket parts makers have supplied a "grip plug" to seal off the void in the back of the molded polymer grip frame behind the magazine well. They give your Glock a finished look down there, but... what if that space could be used for something really useful?

Vickers's Grip Plug/Takedown Tool is a handy pin-punch tool for field stripping your Glock that conveniently stows in the grip cavity until you need it. As a bonus, it also serves as a mini magwell ramp and index point to aid in smooth, rapid magazine insertion. Exterior is fully radiused - won't snag on holster or clothing. Of course, when inserted into the grip, the tool seals off the grip cavity to prevent dirt, sand, and mud from entering the trigger control components and possibly disabling the weapon. Fits G17/19/22/23/31/32/34/35, with separate models for Gen3 and Gen4 pistols. Gen4 comes with one base insert and 2 tools, one for pistols with backstrap inserts, one for pistols without them. Available in factory polymer frame colors: Black (BLK), Tan, Gray and O.D. Green (ODG).

**#100-019-808** Grip Plug Tool for Gen3 Glock, BLK, 9B11A89... \$ 13.99

## ZEV TECHNOLOGIES ALUMINUM SLIDE BACK PLATE for GLOCK®

Stronger Than Factory Part - Golfball Pattern Gives Your Pistol a Unique Look

A standard-sized Glock® slide backplate with a unique dimpled pattern - kinda like golfball dimples - that gives your Glock a subtly different look. Made of hardcoat anodized aluminum, so it's substantially sturdier than the plastic backplate that came with your pistol from the factory.

**#100-019-677** Aluminum Slide Back Plate, 8B18G05... \$ 19.00

## MAJESTIC ARMS RUGER® MARK I/II/III SPEED STRIP KIT

Replaces Factory Parts For Fast Field Stripping & Cleaning

Makes field stripping your Ruger .22 pistol faster and easier by enabling rapid disassembly with a single Allen wrench for routine cleaning and maintenance. Replaces the factory hammer and sticky bolt stop pin that make bolt removal a real chore. Replacement parts are precision machined from high-grade stainless steel to tolerances that meet or exceed the factory parts. Requires no permanent modification to your pistol; gunsmith installation recommended. Speed Strip 3.2 fits any generation Mark series pistol

and features hammer pivot bushing that helps reduce trigger pre-travel significantly and allows safe omission of magazine disconnect in Mark III pistols.

**SPECS:** Stainless steel, natural silver finish. Kit includes replacement hammer and bolt stop pin, plus Allen wrench and illustrated installation instructions. Mark I/II fits Ruger Mark I, II, and 22/45 pistols. Mark III fits Ruger Mark III pistol only. 3.2 Kit includes hammer pivot bushing and fits all Ruger Mark I, II, III, and 22/45 pistols.

**#941-000-003** Mark I/II Speed Strip Kit, 1D41M93... \$ 48.99

**#941-000-006** 3.2 Speed Strip Kit, 1D57K91... 78.99

## APEX TACTICAL FAILURE-RESISTANT EXTRACTORS for GLOCK® & M&P M2.0

Built To Do Its Job EVERY Time - No Failures!

Apex's upgraded extractor has a beefed-up claw and improved engagement surface geometry to produce more positive, reliable extraction. Less risk of extractor breakage, too. Machined from a solid billet of hardened stainless steel, with a hard matte black finish. Drop-in replacement parts for factory slides. Glock Gen3/Gen5 fits Glock Gen3 Glock 17, 18, 19 and 34 AND Gen5 G17 and G19. Glock Gen4 fits Gen4 Glock 17, 18, 19 and 34. M&P 2.0 fits Smith & Wesson M&P M2.0 with OR without thumb safety and magazine disconnect. Does not function in original M&P or M&P Shield. All models - extractor spring included. **NOTE:** Due to variations in manufacturing, this extractor is not recommended for use with aftermarket slides and barrels. Not for use on any Gen Glock Model 26. Not tested for use with any caliber except 9mm Luger (9x19mm).

## TACTICAL SOLUTIONS RUGER® MARK I/II/III™ & 22/45™ HEAVY DUTY EXTRACTOR

Hardened Tool Steel With Improved Hook For Reliable Extraction

Improved hook design helps ensure consistent extraction each and every time. Machined from tool steel then hardened to resist breakage and reduce wear for a lifetime of reliable operation. Includes extra-power spring for added reliability. Also fits Ruger® 10/22® rifle.

**SPECS:** Tool steel extractor, high-performance spring. Fits Ruger Mark I/II/III & 22/45 pistols and 10/22 rifles in .22 LR and .22 Magnum.

**#100-006-000** Heavy Duty Extractor, 8K10A49... \$ 13.99

## TANDEMKROSS BROWNING BUCK MARK EAGLE'S TALON EXTRACTOR

Boosts Your Pistol's Reliability By Ensuring Positive, Consistent Case Ejection

The "Eagle's Talon" is an upgrade part that replaces your Buck Mark's factory extractor to give more reliable, positive extraction of spent cases. The Buck Mark is an excellent rimfire pistol, but one of its weak spots is its extractor. Tandemkross's part eliminates this weakness through enhanced hook geometry that grabs the rim of each round securely - like an eagle snatching its prey - and won't let go until it's time for it to be ejected. The sharp hook holds the case rim securely through the entire firing cycle. Machined from hardened tool steel for reliable long-term service, and won't chip like the factory part is prone to do. Really boosts your pistol's reliability by preventing ejection failures that can be a disaster in competition or put a damper on the fun during a day of plinking.

**#100-023-854** Eagle's Talon Extractor, 1G9M49... \$ 9.99

## TANDEMKROSS RUGER® MARK II/III/IV™ "HALO" CHARGING RING

Gives You Extra "Purchase" To Rack the Bolt

The "Halo" is an easy-to-grip pulling that clamps quickly and easily to your Ruger rimfire's bolt "ears" to make charging the pistol easier. With its simple, robust design, the Halo ensures fingers of any size can get the proper purchase on the bolt to cycle it smartly without slipping. Ambidextrous, so left- and right-handed shooters get the same benefit. Makes your pistol look just a bit different from the other Ruger .22s at the range, too. Made of lightweight yet strong aluminum, so it doesn't mess up the gun's balance. Easily mounts to the bolt with no permanent alterations to the gun. Great for youths, competition shooters, and slightly less young shooters with weak or arthritic hands - anybody who doesn't want to take multiple swipes to charge a round or clear a jam. Separate models for Mark II™/Mark III™ and older Mark II™. Both also fit associated 22/45™ variants.

**#100-023-848** Halo Ring, Mark III/IV, Blk, 1G47F49... \$ 49.99

### TANDEMKROSS RUGER® MARK III 22/45™ HIGH PERFORMANCE KIT

Multiple Upgrades That Improve Reliability, Comfort & Aesthetics

Tandemkross has put together a kit of upgrades that will transform your 22/45 from a good .22 to a Dream Gun™. These parts fit any ANY Ruger Mark III 22/45. Stainless steel (308 alloy) **Hammer Bushing** lets the hammer move smoothly at the correct speed

for reliable hits on the cartridge rim. Allows you to safely remove the magazine disconnect, too, so ejected mags drop freely. Gun will also fire with a round in the chamber but no magazine - useful backup function for competition and self-defense. **"Kanewolf"** upgrade enables "slingshot" loading action rather than depressing the bolt release to close the bolt, which causes unnecessary wear on the bolt catch and bolt face. Kanewolf lets you charge the chamber just like on any modern semi-auto: by pulling back on the "slide". Does not affect last round hold open function. **"Firestarter"** Titanium firing pin is 40% lighter than the factory steel pin for shorter locktime and less risk of moving the pistol between squeezing the trigger and the pin hitting the case rim. Titanium resists "mushrooming" that sometimes happens with steel firing pins, so it ensures positive primer strikes - and causes less deformation of case rim for positive extraction. **"Eagle Talon"** extractor machined from hardened tool steel with a unique hook design that grabs casings securely - like an eagle snagging its prey - and yanks 'em out, helping to reduce the incidence of failures-to-eject and "stove-pipe" malfunctions. **Extended magazine release** is longer and has a wider face than the factory part, so it's easier to locate and drop the mag on the first try. Also ensures full access to the release when you have thick target grips installed. **Loaded chamber indicator** replacement insert helps prevent some misfeeding and ejection problems, improves the appearance of your pistol, and simplifies cleaning. It does disable loaded chamber indicator feature, so check local laws. **NEW!**

**#100-020-906** Mark III 22/45 High Performance Kit, 1G00EEM. . . . . **\$ 99.99**

### VOLQUARTSEN WALTHER P22 EXACT EDGE EXTRACTOR

Tuned & Hardened For Lasting Performance

Steel extractor is machined using advanced EDM technology to ensure precise tolerances, then hardened to Rc 58-60 to help prevent premature wear. Extra long extractor hook is .005" closer to case rim for a positive, non-slip grip on the case head. Made from A2 tool steel. **SPECS:** A-2 tool steel, in-the-white. Hardened to Rc 58-60. Includes replacement spring. Fits Walther P22.

**#930-000-053** Exact Edge Extractor, 3Z17E84. . . . . **\$ 20.99**

### BARREL FITTING

All custom aftermarket barrels will need some fitting. The amount required will depend on the tolerances allowed by both the barrel and slide makers, as well as the frame of the pistol. Some barrels may need the chamber cut to full depth after the barrel has been fitted. We carry a wide variety of files and stones to help with the fitting, and chambering reamers from Clymer and Manson Precision.

### NEW! Items AGENCY ARMS MATCH-GRADE BARRELS for GLOCK® PISTOLS

Syndicate 19 Non-Threaded SS

Mid-Line Non-Threaded w/TiNi Finish

A Drop-In Upgrade - The Quickest Way To Improve the Accuracy Potential of Your Pistol

If you can break down your pistol for cleaning, then you can install one of these drop-in ready, match grade barrels. Machined from 416R stainless steel, with pulled broach rifling and a 1-10" rifling twist. **Mid-Line Barrels** have a fluted exterior

for enhanced cooling during those long range sessions. Separate models for **Gen1-4** (where applicable) and **Gen5** pistols. **Syndicate 19** barrels fit Glock® 19 Gen1-4 slides. These are the same barrels as used in Agency's Syndicate pistol kits. **Non-Threaded (NT)** barrels sit flush with slide and feature a deep beveled crown to protect the rifling. **Threaded (Th)** models come with 1/2"-28 threads and protector. Barrels are finished in natural Stainless Steel (SS), **Black DLC** (Diamond-Like Carbon), or Gold Titanium Nitride (TiNi). **NEW!**

Flash Suppressor

Compensator

### LONE WOLF FLASH SUPPRESSORS & COMPENSATORS

Dynamic Recoil & Flash Control Options

Easy-to-install, specialized muzzle accessories give Glock shooters a choice of flash suppression or recoil control. **Compensator's** side ports direct gasses 30 degrees rearward and out of the top ports, resulting in reduced felt recoil and muzzle jump. As a result, the shooter can remain centered on the target, allowing for quicker, more reliable follow-up shots. Integrated Allen screw indexes compensator for correct positioning. **Flash Suppressor** has longitudinal 6-port design that reduces muzzle flash, affording the shooter concealment and vision preservation in night-adapted environments. **NEW!**

**SPECS:** CNC-machined steel. **Flash Suppressor** - Black oxide finish. 1.6" (4cm) OAL. .750" (1.9cm) O.D. 1.1 oz (31.2g) wt. Fits pistols chambered in 9mm. 1/2" x 28 threads. **Compensator** - Parkerized, matte gray. 1.2" (34cm) OAL. 1" (2.5cm) wide, 3/4" (1.9cm) high. 1.6 oz (45.4g). Available in 9mm with 1/2" x 28 threads and .40 S&W with 7/16" x 24 threads. Allen wrench and instructions included.

### PRIMARY MACHINE STEALTH COMP for GLOCK®

Effective Control of Muzzle Rise, Plus a Clean, Futuristic Look

The "Stealth" comp hides in plain sight: with its blocky, squared-off profile, it easily blends in with your Glock's squared-off slide. In fact, the Stealth mirrors the Glock factory slide contour so well, that when it's installed on a G19 or G23 (with a 9mm conversion barrel), the pistol easily fits in a holster designed for the G34/35. Two narrow ports running horizontally across the top, plus two smaller side ports, supplemented by two small side ports, vent combustion gasses upward to counteract muzzle rise and reduce felt recoil. The Stealth is machined from high-grade 7075 T6 aluminum billet and given a durable, matte black hardcoat anodized finish. And it's designed to fit 9mm barrels with 1/2"-28 tpi threads (NOT for .40 S&W). The Stealth's attachment setscrews are hidden, so when it's installed, it offers an exceptionally clean, uncluttered appearance. Instructions and all necessary parts for the installation are included. **NEW!**

**SPECS:** 1.150" long x 1" wide x .785" tall.  
**#100-024-393** Stealth Comp for Glock, 7F00NDQ. . . . . **\$ 87.99**

### APEX TACTICAL SMITH & WESSON M&P DROP-IN STAINLESS STEEL 9MM BARRELS

Boosts Accuracy Of Your M&P - 1.5" Groups 75 Yards

Swap your 9mm M&P's factory barrel for one of these folks at Apex Tactical have engineered a barrel capable of shooting groups as small as a 1 1/2" at 25 yards. These 9mm barrels have a 1-10" twist and are available in either 4.25" or 5" lengths. We're calling these "Semi Drop-In" replacements for the factory barrels because they MAY require some minor fitting. **Threaded** models maintain the same features and also have an extended muzzle with 1/2"-28 tpi threads to accept a compensator or sound suppressor. Screw-on thread protector included. **M2.0.4"** fits ONLY an M&P M2.0 Compact model that came with a 4" factory barrel. Black Melonite anti-wear/corrosion finish. Should be a true "drop-in" requiring no fitting. **NEW!**

### AMERICAN TACTICAL

### THREADED BARREL FOR GLOCK® 43

Comp/Suppressor-Ready, Plus Match-Grade Accuracy & Lead-Bullet Friendly

If you're looking for a threaded barrel with match-grade accuracy for your G43, then ATI's drop-in, stainless steel barrel is right up your alley! 1-10" broach-cut rifling gives superb accuracy with both jacketed and, and a bonus to help you keep down the cost of practice ammo, lead bullets. And it's fully chambered and throated to match-grade standards. Comes with a threaded cap to protect the muzzle when no device is attached. Shooting a small pistol does not have to mean big groups! **NEW!**

**SPECS:** 416R stainless steel, natural polished finish. 1/2"-28" muzzle threads.  
**#100-018-092** Threaded Barrel for Glock 43, 3E134J29. . . . . **\$ 157.99**

### BAR-STO GLOCK SEMI-FIT BARRELS

Broach Cut Rifling For Improved Accuracy

Machined from 416 stainless steel bar stock, stock length replacement barrels for your Glock® have fully supported chambers and broach cut rifling with a 1-16" twist. Barrels have a heat treated hardness of 39 to 43 RC and a tensile strength of 180,000 psi. Due to the close tolerances and variances in handguns, these "semi fit" barrels may require some fitting. **NEW!**

**MATCH-GRADE BARRELS for GLOCK®**

A Premium Barrel for Custom Builds or Upgrading a Factory Pistol

One of our match-grade barrels is an excellent replacement for a shot-out factory barrel or for completing a custom pistol based on the Glock® platform. They are the ideal tube for a custom gun built on a Polymer80 frame with an RMR on top! Our barrels are machined from hardened 416R stainless steel to precise dimensions for a tight lockup and long service life. Drop-in fit on most guns. The extra-hard Black Nitride finish resists surface wear and stays in its tracks whatever corrosion might try to challenge the stainless steel. All barrels come with standard, 1-10" right-hand, 6-groove rifling that is compatible with "practice" ammo with non-jacketed bullets. Available with either a plain muzzle crown or **Threaded** to enable installation of a compensator or sound suppressor. Each is laser engraved with the chambering and the Glock model it fits. We also offer **9mm Conversion** barrels for the G22 and G23; switch your pistol from .40 S&W to 9mm Luger simply by swapping the barrel and magazine.

**BROWNELLS**  
**19LS EXTENDED BARREL for GLOCK® 19**

Correct Barrel for Your Custom G19 With Extended Slide

The Brownells Extended Barrel for Glock® 19 is designed to work hand-in-glove with our extended slides for the popular compact 9mm pistol. Due to changes in the slide-to-frame geometry caused by mating the long slide on the compact Glock 19 frame, a factory Glock 17 slide will not work with our slide. This extended barrel is correctly configured to ensure that your new "long slide" G19 functions perfectly. This extended barrel and the slide work together to give you a longer sight radius for more accurate shooting and better recoil control - and a pistol that's more comfortable to shoot all around. Our Extended Barrel for Glock 19 is available with a Plain muzzle or Threaded (1/2"-28 tpi) to accept a compensator or silencer. Easy drop-in installation. Corrosion-resistant 416R stainless steel with durable black Nitride finish for excellent resistance to surface wear. 1-10" right-hand 6-groove rifling. **Threaded** model has 1/2"-28 muzzle threads. These barrels are precision machined to ensure an exact fit to drop right into your pistol's extended slide and preserve the superior reliability and performance you expect from your Glock® 19.

**GEMTECH BERETTA 92 THREADED BARREL**

Mounting a Suppressor Just Got Easier

Gemtech's threaded barrels set you up for proper and straight-forward mounting of a sound suppressor on your pistol. These premium extended/threaded barrels are designed for drop-in fit to your pistol's slide and feature a matte black oxide finish that is corrosion resistant for lasting durability and a compatible look. Bores have been gauged to ensure perfect alignment of the mounted suppressor with the land-and-grooves. Fits 92SB, 92F, 92FS, 92A1, 90-Two, Vertec, Brigadier, and Elite.

- #100-023-055 Beretta 92 Threaded Barrel, 1/2"-28, 1Z00PZ1 ..... \$ 214.99

**NEW!** **GLOCK® FACTORY THREADED BARREL FOR G44**

The Barrel You Need To Mount a Suppressor on Your Rimfire Glock®

Convert your .22 LR G44 to mount a sound suppressor with this factory original, drop-in threaded barrel. The muzzle has European M9 x .75 RH threads, but a 1/2"-28 tpi adapter is included to enable the installation of a wide array of American-spec muzzle devices that accept suppressors. There's also a thread protector for times when you want to shoot your G44 unsuppressed. Note: this barrel will fit ONLY the Glock 44.

- #100-039-733 G44 Barrel, 1/2"-28 Threaded, 1D177G14 ..... \$ 194.99

**FAXON FIREARMS**  
**MATCH-GRADE 9MM PISTOL BARRELS**

Tight, Stop-Free Fit for Superior Accuracy Potential

A great starting point for your next custom build, or just a refresh of a gun with a shot-out barrel, these drop-in barrels are carefully engineered, meticulously machined, and exhaustively tested to provide top-notch performance. Machined from triple stress-relieved, GBQ 4150 carbon steel for a tighter-than-OEM fit, these barrels deliver a more precise lockup with a greater accuracy potential. Barrels have an 11° target crowned muzzle to ensure the bullet stays on a true trajectory and are available with either a standard muzzle or with 1/2"-28 tpi muzzle threads. The SAAMI-spec chamber and 1-10" twist conventional rifling readily handles any type of projectile - jacketed, heavy subsonics, even cast-lead practice bullets. Choose from a **Plain** barrel for a traditional look or a **Flame Fluted** barrel that not only dissipates heat quicker, but it adds an ultra-radical look to your gun. These show-stopping barrels have a hard, black Nitride finish for superb resistance to corrosion and surface wear. Barrels for Glock® fit Gen1 through Gen4 pistols. Models also for SIG Sauer P320 and Smith & Wesson M&P M2.0 compact and full-size pistols.

**NEW!** **GREY GHOST PRECISION SIG SAUER P320 GGP320 MATCH-GRADE BARRELS**

Upgrade Barrel Helps Make Your 320 As Accurate As It Is Versatile

The SIG Sauer P320 is an excellent pistol, but like all factory guns, it can be improved with aftermarket upgrades. Grey Ghost's drop-in match-grade barrels help extract the last bit of accuracy potential from these fine pistols. They're machined from 416R ordnance-quality stainless steel with final dimensions kept to tolerances of +/- .003" for maximum consistency. SAAMI-spec 9mm match chambers and 1-10" twist rifling to ensure stable flight of just about any available 9mm bullet. Tough Black Nitride finish resists surface wear.

**NEW!** **GRIFFIN ARMAMENT ATM BARRELS WITH MICRO-CARRY COMP**

Superbly Precise Match-Grade Barrel With Compensator.... for Your Daily Carry Gun

Griffin's ATM (Advanced Threaded Match) Barrels are billet machined from pre-hardened 416R stainless steel to exacting tolerances for the ultimate combination of match-grade performance and drop-in installation. Five-axis machining is done in a single work holding positions all critical dimensions on the breech ensuring the theoretically perfect geometrical relationship of barrel, slide and locking lug. Chambers are honed and polished to ensure an extremely smooth surface finish and optimal reliability with a wide range of ammunition from training to duty ammo. The result is the best possible accuracy without sacrificing factory reliability. Designed with concealed-carry users in mind, these barrels provide uncompromising reliability. They also come with Griffin's Armament's Micro Carry Comp (MC<sup>2</sup>) installed. The MC<sup>2</sup> combines a substantial reduction in felt recoil in the most compact of packages. It resists printing through clothing while carrying concealed and fits holsters without modification. The MC<sup>2</sup>'s miniature and lightweight package has near zero effect on the handling and storage of the firearm. All barrels are stress-relieved and have a honed and polished SAAMI-spec chamber, broach-cut rifling, target crowned muzzle, 1/2"-28 tpi muzzle threads, and a durable matte Black Nitride finish.

Drop-In Accuracy Upgrade With No Gunsmithing Required

Built to the same specifications as your original factory barrel, our replacement barrels enable you to restore the accuracy of pistols with shot out barrels, without going to a gunsmith. These barrels, including the models for Glock® pistols have conventional rifling with a 1-10" twist to handle cast lead or jacketed bullets with accuracy. Machined from 416-R stainless steel, these barrels are nitride treated inside AND out for corrosion resistance and longevity. An 11° target crown protects the end of the rifling from accuracy-compromising damage. Threaded muzzle models available with 1/2"-28 tpi threads. These barrels are ready-to-install in your pistol, with no additional fitting required.

BARRELS

**LONE WOLF**

**ALPHAWOLF BARRELS for GLOCK®**

Upgrade Your Glock To Shoot Lead Bullets; Threaded Muzzle & Caliber Conversion Models, Too!

Match-grade 416 stainless barrels are manufactured for a tighter fit than the factory barrel for improved lockup and greater potential accuracy from your standard-frame Glock. Conventional, broach-cut rifling allows you to shoot cast lead or jacketed bullets in these barrels without the lead fouling problem associated with the originals.

All barrels have an improved feed ramp design and the fully supported chamber helps prevent case failures. Both the feed ramp and chamber have been polished for reliable feeding and extraction. May require minor fitting. **Threaded** muzzle models give you a place to hang your favorite sound suppressor or recoil compensator. Thread protector included. **Conversion** barrels let you shoot a different cartridge in your Glock without having to buy a whole new gun. To complete the conversion, you will need to use magazines designated for the cartridge you are converting to. So a .40 S&W to 9mm conversion will require you to use Glock 9mm mags in the modified gun (but who doesn't have a bunch of those sitting around? - if not, we have plenty elsewhere in this catalog).

**SPECS:** 416 stainless steel, salt bath nitride coated, matte black. Heat treated to RC 40-42. 3 stage honed bore, button rifling.

**WILSON COMBAT**

**MATCH-GRADE BARREL for GLOCK®**

Pre-Fit Dimensions For Tighter Lockup To Improve Accuracy; Conventional Rifling Accepts Lead Bullets

Precision machined from 416 stainless steel and slightly oversize in the lockup area to tighten slide-to-barrel fit. Conventional rifling gives reliable performance with both lead and jacketed bullets.

**LSP HIGH STANDARD MATCH BARREL**

Replace Worn Or Shot-Out Barrels With Accurate, Match-Quality Models

Precision-machined from Douglas Premium blanks and cut with a special match chamber. Two models: **Match Bull Barrel** is full-contour for greater forward weight, adds the "muzzle-heavy" feel. **Match Alumina-Lite Barrel** features a turned down forward section that's sleeved with aluminum to help compensate for the weight of red-dot optics or a scope. Both feature a recessed target crown and are pre-drilled to accept the **LSP Scope Mount** listed elsewhere. Fits push-button, take-down models of High Standard.

**SPECS:** Steel, polished blue or matte silver finish. Chambered .22 long rifle. 5 1/2" (14cm) long, .90" (22.8mm) diameter. **Bull:** 14.6 oz. (414 g), **Alumina-Lite:** 9.7 oz. (274 g) wt.

**RUGER® SR22®**

**THREADED BARREL KIT**

Converts Your Plain-Barrel SR22 To Take a Compensator or Sound Suppressor

Drop-in barrel with 1/2"-28 tpi threaded muzzle lets you quickly convert your plain-barrel SR22 to accept a sound suppressor or compensator for quiet, comfortable range time fun. This is a genuine Ruger® factory part, so you know it's going to fit and function correctly in your SR22® without fiddling and mods. Installation is easy: field strip the gun, remove the old barrel, and insert this one. Threaded muzzle accepts any 1/2"-28 muzzle device, including the Ruger® Silent-SR™.

**SPECS:** Machined stainless steel. Fits SR22 pistols with serial numbers 361-7XXXX and higher. Thread cap, adapter, and wrench included.

#100-020-868 SR22® Threaded Barrel Kit, 8G112E19... **\$ 131.99**

**SIG SAUER**

**FACTORY THREADED BARRELS**

Genuine Sig Sauer Barrels

Factory replacement barrels are drop in ready and feature a threaded muzzle for attaching a suppressor or other device. Barrels come with a knurled thread cap to protect the end when no device is attached. These genuine Sig Sauer barrels are precision hammer forged and heat-treated for accuracy and durability.

**SPECS:** Steel, blued. Thread pitch: 9mm - 13.5 x 1mm LH, .45 ACP - .578" x 28 tpi.

**SILENCERCO THREADED PISTOL BARRELS**

Equip Your Pistol To Accept Your Sound Suppressor of Choice

The only thing better than a normal pistol barrel is a threaded pistol barrel with a silencer on the end. These SilencerCo barrels replace your pistol's factory pipe to set it up for suppressor use. Each barrel is threaded with the thread pattern most commonly found on suppressor for that particular gun's caliber. Barrels are precision machined from ordnance-grade 416R stainless steel to ensure a long service life and a proper, drop-in fit to their corresponding pistols. A tough matte black nitride finish protects the barrel surface from wear; some models also available with the steel's natural silver finish. All in all, SilencerCo's barrels are tough enough to hold up to the harshest operating conditions - and plenty of rounds down range. **Glock** barrels will fit both Gen3 and Gen4 pistols. **Glock 43** barrel includes piston.

**TACTICAL KINETICS BARRELS for GLOCK® 17/19**

Give Your Perfect Pistol Some Nice Threads AND a Significant Accuracy Boost

Tactical Kinetics threaded replacement barrels for Glock® pistols set you up to put a sound suppressor or compensator on your pistol and IMPROVE its accuracy. TK submitted these barrels to independent testing that confirmed a consistent 12% improvement in accuracy over factory barrels. And these results held up across a variety of bullet weights in ammo from many manufacturers. Each barrel is precision machined from pre-hardened 416R stainless steel, then button rifled with a 6-groove, 1-10" twist. Unlike the "polygonal" rifling of factory Glock® barrels, button rifling enables you to safely shoot unjacketed cast lead bullets in your G17 or G19 - opening up an array of inexpensive practice ammo that Glock® owners normally have to forego. Exterior fluting helps dissipate heat to prevent point-of-impact drift due to heat warpage. A polished feed ramp promotes smooth chambering and extraction. Up front each Tactical Kinetics threaded Glock® barrel has standard 1/2"-28 tpi muzzle threads and a recessed 11-degree target crown to protect the critical rifling near the exit hole from damage. **G17** barrel fits Gen1-4 pistols; **G19** fits Gen1-5. Both are available with the choice of a bead-blasted natural silver stainless steel finish (SS) or an extra-hard Black Nitride (BLK) finish.

**TACTICAL SOLUTIONS BROWNING**

**BUCK MARK TRAIL-LITE BARRELS**

Gives The Benefits Of A Bull Barrel Without The Extra Weight

Offering improved balance and superior accuracy, the light-weight Trail-Lite barrel replaces the factory barrel on your Browning Buckmark with no gunsmithing required. Button rifled aluminum barrel has a chrome-moly steel liner to enhance accuracy. Comes with target front sight installed, and pre-threaded muzzle to accept the Tactical Solutions compensator listed below or another 1/2"-28 tpi threaded muzzle accessory. Includes muzzle thread protector for clean, finished look if compensator isn't installed.

**SPECS:** 6061 T6 aluminum, hardcoat anodized, black or O.D. green, matte finish. Chrome-moly steel liner with 1-16" twist rifling. .9" (2.3cm) O.D. Installation instructions included. 4" - 4.7 oz. (133g) wt. 5 1/2" - 5.6 oz. (158g) wt.

## ZEV TECHNOLOGIES PRO MATCH-GRADE BARRELS for GLOCK® 19

A Drop-In Accuracy Boost for Your G19

Zev's drop-in Pro Match barrels give an instant upgrade to the accuracy potential of any Gen1 thru Gen5 G19 pistol. They are machined from pre-hardened 416R chromium stainless steel that was originally developed for use in match-grade rifle barrels. This material provides high tensile strength and toughness to withstand typical chamber pressures while still being highly corrosion resistant. Every barrel is double honed (rough and finish) until a minimum surface finish of 16 RA is reached. During this process the barrels are held to a final dimension of +/- 0.003" for consistency and accuracy. The barrels are cut rifled (1-10" twist) and 100% inspected for groove dimensions and broach finish. SAAMI-spec match chambers. Zev's streamlined hood design helps ensure tight lockup and smooth barrel movement as the slide cycles.

- #100-036-392 PRO Match G19 Barrell, Black, 8B160C64..... \$ 188.99

## SAMSON MANUFACTURING SMITH & WESSON M&P SHIELD/SHIELD M2.0 POCKET COMP

Tames the Shield's Recoil for More Pleasant Shooting & Faster Follow-Up Shots

Samson's extremely compact compensator installs in a few minutes and really improves your ability to control your M&P Shield. This diminutive compensator redirects combusive gas away from the muzzle to tame felt recoil and eliminate muzzle flip - a welcome enhancement to a small, compact gun. Less recoil/muzzle whip means you can line up the next shot faster. Made to easily screw onto 1/2"-28 tpi threaded muzzles with a proprietary nut; includes insertion points for the hex head screws that actually secure the comp in place. Don't worry: this system is designed so it will not mar the threads! Easily removes for un-comped shooting, and when the Pocket Comp is off the gun, its barrel nut can serve as a thread protector. Machined from lightweight but unbreakable 6061 T6 aluminum, with a hardcoat anodized finish in **Black** or **Natural Silver-Gray**. The Pocket Comp fits all 9mm M&P Shield & M&P Shield M2.0 pistols, and plays nicely with factory guide rod and recoil spring. It works reliably with a wide range of bullet weights and velocities, though 124 grain or heavier bullets seem to work best. If you're shooting 115 grain ammo, you'll want a load with velocity on the higher side. It adds an extra 1.15" to the barrel length, but it is purposely contoured to blend into the slide, so it'll appear like a natural extension of the pistol. Your Shield becomes a little longer but it's a whole lot easier to shoot. And if you're using a holster with an open bottom, you may not even need to shell out for new gun leather.

- #100-027-272 M&P Shield 9mm Pocket Comp, Black, 1B52D69..... \$ 61.99
- #100-027-273 M&P Shield 9mm Pocket Comp, Natural, 1B54D39..... 63.99

## CGS SUPPRESSORS QUBE COMPENSATOR for GLOCK®

Recoil? What Recoil?

The way the compact Qube™ Compensator blends neatly with the blocky Glock slide is frosting on the cake. What really takes the cake is how easy the Qube is to install and "time" correctly! The Qube™ provides effective mitigation of felt recoil and counteracts muzzle rise, making your pistol both easier to control and faster to get back on the target after each shot in a string. The Qube™ actually comes in two pieces, the comp itself and a mount that attaches to the barrel simply, via a lock nut. The Qube™ body slides over the mount and shoulders against a taper. The lock nut threads onto the compensator mount and pinches the body against a second taper and locks it down which prevents rotation. The Qube is also ultra-compact, making it ideal for an EDC/every day carry pistol: 1.25" x 1" wide x .825" high. Machined from 17-4H900 stainless steel, with a durable Black Nitride finish. Fits Glock® pistols with 9mm barrels only.

- #100-034-507 Qube Comp 9mm, Black, 1F119E69.... \$ 132.99
- #100-034-508 Qube Comp 9mm, Black & Gold, 1F119K69..... 132.99

## GRIFFIN ARMAMENT MICRO CARRY COMPENSATOR

Powerful Felt Recoil & Muzzle Rise Mitigation in an Ultra-Compact Package

The Micro Carry Comp (MC<sup>2</sup>) was developed to provide concealed carry gun users with excellent recoil mitigation and muzzle control for faster follow-up shots without adding unnecessary weight and bulk to the gun. Adding only a few tenths of an inch in length beyond a typical thread protector, the MC<sup>2</sup> provides brute strength and gas direction with its close-dimensioned 17-4 stainless steel ported baffle face. Its minimal size and weight ensure the MC<sup>2</sup> will not print through clothing or burden the user with unnecessary weight. Wrench flats provide easy gripping surface to torque the device into place. Fits most holsters without modification. Fits any 9mm barrel with 1/2"-28 tpi threads. Black Nitride finish resists surface wear, corrosion, and heat scorching.

- #100-036-501 MC Pistol Comp, 1/2"-28, 4G00LIJ..... \$ 59.99
- #100-036-502 MC Comp for Glock® 42/43, 1/2"-28, 4G00KRP..... 59.99

## TANDEMKROSS SMITH & WESSON SW22® VICTORY™ REPLACEMENT MAGAZINE DISCONNECT

Fire the Pistol Without a Magazine Inserted, Maintains Strong Mag Ejection

It may not look like much on its own, but Tandemkross's part is a simple, drop-in replacement for the factory magazine disconnect bar that defeats the magazine safety, allowing you to fire your SW22® Victory™ without a magazine inserted. The pistol will actually fire without the disconnect, but with Tandemkross's part installed, you will also preserve strong magazine ejection, a capability valued by competition shooters who need to make fast mag changes. Drop-in, one-for-one replacement for the factory part. Machined from strong, durable stainless steel for long service life. A simple upgrade that improves your pistol's versatility without sacrificing reliability or convenience.

- #100-023-853 SW22 Victory Magazine Disconnect, 1G00IPC..... \$ 12.99

## CYLINDER & SLIDE BROWNING HI-POWER EXTENDED/AMBIDEXTROUS SAFETY

Wide, Can't-Miss Thumb Pad For Faster Release, Faster Shooting

Easy-to-install, extended safety lever effectively doubles the thumb contact area and makes it easier to hit in all shooting situations. Both ambidextrous and single side extended styles. Serrated, extra wide thumb contact areas with rounded edges to help prevent snagging on holsters or clothing. Gunsmith fitting required.

**SPECS:** Steel matte blue or hard-chrome silver finish. Contact area: Single - .726" (18mm) x .17" (4.3mm), Ambidextrous - 1" (2.5cm) x .21" (5.4mm). Includes detent spring, plunger and instructions.

- #206-035-010 Extended Safety, 6K50B14..... \$ 58.99
- #206-035-011 Amb. Extended Safety, 6K82H44..... 96.99

## SAF-T-BLOK SAF-T-BLOK for GLOCK®

Prevents Unintentional Discharges; Discourages Unauthorized Use

Drop-in, trigger-block safety fits behind the trigger to frustrate and delay unauthorized personnel that might try to fire the weapon. Snaps easily into place; ejects instantly for use.

**SPECS:** Molded polymer, black. For right-handed shooters only. Fits all Glock's manufactured after January 1998.

- #100-000-841 Right-Handed Saf-T-Blok, 8K13A59.... \$ 15.99

## WILSON COMBAT BERETTA 92/96 SINGLE-LEVER SAFETY/DECOCKER for BERETTA

Left-Side-Only Design For No-Snag Carry

Machined steel safety/decocker drops into Beretta 92/96 and replaces standard ambidextrous safety. Features left-side-only design to help prevent snagging while carrying concealed or in duty or tactical holster. Tough finish resists corrosion and wear. **Standard Lever** dimensions match factory original. **Lo-Profile** features smaller lever than factory original.

- SPECS:** 4140 steel, black Armor-Tuff finish.
- #965-000-195 Standard Single-Lever Safety/Decocker, 5F39M89..... \$ 41.95
  - #965-000-194 Lo-Profile Single-Lever Safety/Decocker, 5F39N89..... 41.95

## TANDEMKROSS RUGER® MARK III™ & 22/45™ LCI INSERT

Upgraded Steel Part Replaces Plastic Factory Loaded Chamber Indicator

Steel part drops into Ruger Mark III and 22/45 pistols to replace the plastic factory original loaded chamber indicator. Fills in factory gap, helps make it easy to clean the chamber, and eliminates tab inside the receiver that can cause jams. Also enhances appearance of the pistol.

**SPECS:** Machined stainless steel, matte black finish. Comes with installation hardware. **NOTE:** This part **disables** the Loaded Chamber Indicator feature. Before ordering, please check to see if your state requires this feature by law.

- #100-016-516 LCI Insert, Black, 1G18B99..... \$ 19.99

## ZEV TECHNOLOGIES GUIDE ROD REDUCING RING for GLOCK® GEN4

Lets You Use Gen3 Guide Rods & Springs In Your Gen4

Aluminum ring fits into the end of a Gen4 slide to enable use of narrower-diameter Gen3 guide rods and springs. Increases your choice of aftermarket guide rod/recoil spring combinations for capturing the performance of your Gen4 pistol. Compatible with both captured and uncaptured springs.

**SPECS:** Aluminum, hardcoat anodized, black. .447" front dia., .550" back dia., .300" (mm) inside dia., .188" (mm) thick. Fits slides of Glock Gen4 pistols only.

- #100-006-593 Gen4 Reducing Ring, 8B15M99..... \$ 19.99

## CYLINDER & SLIDE BERETTA 92/96 STAINLESS STEEL GUIDE ROD

Drop-In Replacement For Factory Plastic Part

No gunsmithing required to gain improved function and reliability with your Beretta Model 92 or 96. One-piece, stainless steel guide rod replaces the two-piece plastic Beretta factory guide rod; works with your factory recoil spring.

**SPECS:** Stainless steel, matte finish, silver. 3.5" long (9.1 cm) long, .28" (7.2mm) diameter. Fits Beretta models 92 and 96 only

- #206-000-021 S/S Beretta Guide Rod, 6K24C64..... \$ 28.99

## ISMI CAPTURED GUIDE ROD SYSTEM for GLOCK®

Hardened & Cryo Treated, Improves Performance

Cryogenically processed, stress relieved and hardened steel rod offers no-flex cycling that reduces spring bind, helps ensure reliable feeding and ejection. Fits the small I.D., flat wire, factory and aftermarket springs.

**SPECS:** 4140 steel, black, matte finish. Hardened to Rc 32-24. Glock 17, 17L, 22, 24, 31, 34, 35.

- #445-000-008 Glock 17 Guide Rod, 5D23L99..... \$ 29.99

## LONE WOLF GUIDE ROD ASSEMBLY for GLOCK®

Stainless Steel Prevents Rod Flex & Spring Bind For More Reliable Cycling

Hardened stainless steel guide rod won't break or flex and bind the spring like the factory plastic rod. Helps prevent cycling problems, improves reliability and overall performance. Features a captured, ISMI chrome silicon flat spring that's heat-treated, shot peened, and calibrated to the factory-spec 17 lb. weight. Steel Allen head screw and washer secure the spring to the rod, yet enable easy disassembly for spring replacement.

**SPECS:** 416 stainless steel guide rod, natural finish; chrome silicon spring. **Standard (Std.)** fits G17/L17L/22/24/31/34/35/37. Does not fit Gen 4 guns. **Large** fits G20/21/21SF. **Compact** fits G19/22/23/38.

- #100-006-202 Guide Rod Assembly, Std., 2K21N24.... \$ 24.99
- #100-006-203 Guide Rod Assembly, Large, 2K20C39..... 23.99
- #100-011-493 Guide Rod Assembly, Compact, 2K21B24..... 24.99

**NEW!** **RIVAL ARMS STEEL GUIDE ROD ASSEMBLY for GLOCK®**

Failure-Proof Steel for High-Volume Shooters

Glock® revolutionized firearm technology by perfecting the polymer pistol frame, but polymer isn't always optimal for some parts... like the guide rod. Experienced shooters know plastic guide rods can break, resulting in feeding or ejection failures, not to mention flexing that can contribute to accuracy problems. Rival Arms™ solves both problems with their replacement guide rod made of stainless steel with a black finish. Comes with an IMSI factory weight 17 lb. flat wire recoil spring, properly captured in a single drop-in assembly. **USA**

- #100-038-495 G17 Gen3 Guide Rod Assy, 2K25K49... \$29.99

**CALIF. COMP WORKS LIGHTWEIGHT MAG WELL for GLOCK®**

Lightweight Delrin Matches Grip Frame Perfectly

Enlarges the mag well opening for faster mag changes; funnels the magazine right into the chute. Machined from lightweight Delrin that perfectly matches the Glock grip frame.

Thin profile doesn't add much bulk or weight; great on carry pistols. Securely held in place with a single screw; requires drilling only one hole in the rear of the grip frame for installation. **USA**

**SPECS:** Delrin, black, 2 7/8" (6.6cm) long, 1 1/8" (2.5cm) wide. 6 oz. (18 g) wt. Small fits Mod. 17, 17L, 19, 22, 23, 24. Large fits 20, 21.

- #151-150-017 Small Lightweight Mag Well, 1E42P29... \$46.99
- #151-150-020 Large Lightweight Mag Well, 1E42H49... 49.99

**LONE WOLF GUIDE ROD ASSEMBLY for GEN4 GLOCK®**

Ditch Your Gen4's Plastic Factory Rod & Enjoy an Instant Reliability Upgrade

These rods extend the benefits of Lone Wolf's upgraded guide rods for Gen1-3 Glocks (sold separately, if you have an older pistol) to the new Gen4 series. Calibrated to factory weight, these stainless steel guide rods eliminate the feeding and ejection problems caused by polymer rods chipping, cracking, or breaking. Complete assembly, including captured spring, produces noticeably smoother operation of the action, while cutting down on the grating noise caused by the recoil spring compressing and expanding. Accepts an Allen wrench tip for easy removal for cleaning and spring changes. Fits Gen4 pistols only. **USA**

- SPECS:** 17-7 stainless steel, silver.
- #100-803-026 SS Guide Rod for Gen4 G17/17L/34, 2K28G49... \$29.95
  - #100-803-030 SS Guide Rod for Gen4 G20/21/40/41, 2K28G49... 29.95

**SPRINGER PRECISION SPRINGFIELD XD/XDM RECOIL GUIDE ROD**

Smooth, Polished Surface Improves Reliability

Solid stainless steel one-piece guide rod is polished smooth to help prevent spring bind, reduce slide drag, and improve reliability with less chance of slide stoppage caused by grit or dirt. Mild heat-treating improves rod wear without increasing slide wear. Added weight up front helps counter recoil; shoulder at flange is sized to help retain recoil spring for easy assembly and disassembly. For use with factory recoil springs only. Gunsmith installation recommended. **USA**

- SPECS:** Stainless steel with DiamondBlack IonBond black finish. Fits XDM pistols chambered in 9mm/.40 S&W with 4.5" barrel.
- #100-005-260 9mm/.40 XDM Guide Rod 4.5", 1B36I89... \$40.99

**WILSON COMBAT BERETTA PISTOL FLUTED STEEL GUIDE ROD**

Holds Lube & Traps Fouling

Full-length, steel guide rod drops into Beretta pistols to replace polymer factory guide rod. Features spiral flutes that hold lube, and trap fouling to help keep recoil spring travel smooth and easy. Fits all full-sized Beretta Series 90 pistols, including 92A1/96A1. Will not fit Compact, Centurion or Compact Type M pistols. **USA**

- #965-000-192 Full-Length Steel Fluted Guide Rod, 5F20M89... \$21.95

**WOLFF COLT MUSTANG/PONY GUIDE ROD & SPRINGS**

Improves Performance; Prevents Spring Bind

Machined, full-length, stainless steel, guide rod replaces the factory, plastic part for smooth, dependable cycling. Use with the included, 11 lb., standard-weight, recoil spring, or the factory-original, dual, recoil springs. Included, firing pin return spring provides 20 - 25% extra power to quickly and positively return the firing pin to battery after ignition. **USA**

**SPECS:** Guide Rod - Stainless steel, black, or natural polished finish. Kits include guide rod, 11 lb. recoil spring and extra power firing pin spring. Fits Colt Mustang and Pony .380 ACP.

- #969-000-127 Black Guide Rod Kit, 9F23119... \$28.99
- #969-000-128 Polished Guide Rod Kit, 9F20B79... 25.99

**WOLFF BERETTA 92/96 RECOIL GUIDE ROD**

Superior Support & Smooth Cycling

Full-length, hardened steel guide rod helps prevent spring bind and improves cycling. Replaces the soft, factory, plastic part for smooth, reliable function without galling or binding. Machined from solid steel, polished, then hardened. **USA**

- SPECS:** A2 tool steel, black, matte finish or bright polish, silver. Hardened to Rc-55. Fits 92/96 full size.
- #969-000-077 Black Guide Rod, 9F20E79... \$25.99
  - #969-000-078 Silver Guide Rod, 9F23N19... 28.99

**AGENCY ARMS MINIMALIST MAGWELL FOR GLOCK®**

Speeds & Eases Reloads Under Pressure; Minimal Bulk So Ideal for Every Day Carry

Minimalist magwell aids the user in seating the magazine quickly during a reload, and is also perfectly designed for EDC and CCW carry, inside the waist band or outside. Machined from a strong aluminum alloy and finished with a hard anodized coating, with a bevel along the sides that aids in shelving the hand up and into the pistol after the draw. Compatible with many magazine base pads (OEM, 10-8 Performance, Vickers, Taran Tactical, Arredondo, and Henning). Comes with a grip plug, setscrews, and hex wrench for a quick installation. Models for Gen3 and Gen4 standard frame Glocks. Gen4 fits pistols that do not have the interchangeable back strap insert. **USA**

**NEW!** **AGENCY ARMS SYNDICATE MAGWELL FOR POLYMER80 PISTOLS**

A Quick Upgrade for Your Compact 9mm/.40 P80 Pistol

This snap-on magwell serves as a handy scoop, funnel, or guide (choose your favorite term) to aid you in seating a fresh magazine FAST. Its low-profile "minimalist" design is ideal for a daily carry/EDC/CCW pistol built on a Polymer80 PF940C™ compact frame. The Syndicate 'well is molded from reinforced hard polymer - just like the P80 frame itself. It simply slips over the front lip of the grip frame and then snaps into the lanyard hole at the bottom rear of the grip frame. Yup, that easy! Fits Polymer80 compact frames for 9mm and .40 S&W pistols. Extends about .085" from the front of the grip frame and has an overall height of .485". Compatible with most aftermarket magazine base pads, though reduced-capacity magazines may require some modification to fit. **Black. USA**

- #100-035-815 Syndicate Magwell for P80 Compact, 1A00CAK... \$22.99

**MAGPUL GL ENHANCED MAGAZINE WELL for GLOCK®**

Helps You Get the Mag in Place Fast When You're Under Pressure

The Magpul designed their GL Enhanced Magwell has been designed help you get a fresh mag inserted fast, when you're operating in a stressful environment - competition or a self-defense situation. This lets you drop the empty mag and replace it with a fresh one pronto - an important edge when seconds count. It's optimized for use with standard capacity Glock factory magazines, Magpul GL magazines, and a variety of aftermarket floorplates and extensions that are available for both. Recent generations of reduced capacity (10 rd) factory Glock magazines have several dimensional differences which may interfere with any magazine well, including the Magpul GL Enhanced Magazine Well. Some large aftermarket floorplates may also interfere. Fits Gen3 versions of G17, G17L, G22, G24, G31, G34, G35 and G37. Compatible with factory and most aftermarket magazine floorplates, including Magpul GL mags. **USA**

**SAMSON MANUFACTURING SMITH & WESSON M&P SHIELD COMPACT MAGWELL**

Improves Handling, Control & Reloading Speed of Your Compact Shield

Samson's one-piece Compact Magwell helps you maintain a full grasp on your Smith & Wesson 9mm M&P® Shield, giving you better control and the ability to make faster follow-up shots. The Shield is an excellent compact pistol, but the compactness that makes it popular for CCW means that, in its stock form, you also can't quite get a secure grasp on the grip with your entire hand. The Compact Magwell handily solves that problem. This all-aluminum magwell extension is super easy to install, no gunsmithing or permanent mods to the gun required. It won't pinch the mags, so they still drop freely without having to readjust your grip. The beveled base ensures reloads are quicker and fumble-free. Super-fast mag changes are good for competition and self-defense emergencies. Fits both original 9mm-chambered M&P Shield and M&P Shield M2.0. Works with factory 8-round mags, including those fitted with Samson's +1 extension (sold separately). Available in two colors: **Black or Natural silver-gray**. With its comfortable, extended finger ledge, this simple add-on makes shooting and reloading your Shield so much easier and more comfortable. What more could you ask for? **USA**

- #100-027-268 M&P Shield Magwell, Black, 1B40K79... \$47.99
- #100-027-269 M&P Shield Magwell, Natural, 1B40F79... 47.99

**GUARANTEED. FOREVER.® SINCE 1939**

## PREZINE GRIP ADAPTER & MAG WELL for GLOCK®

Increases Mag Well Opening For Smoother Insertion; Helps Support your Shooting Hand

Drop-in, plastic grip adapter and mag well helps funnel magazine into the grip for faster reloads. Adds a flare at the bottom of the grip that increases stability. Extended mag well also protects magazine if weapon is dropped, helping to minimize jams. Requires no modification to the gun. Fits Glock models 17, 22, 24, 31, 34, and 35. **SPECS:** High impact plastic, black. Fits Glock models 17, 22, 24, 31, 34, & 35.

**#727-000-001** Grip Adapter & Mag Well, 7B23D99 ..... \$ 29.99

## SMART LOCK TECHNOLOGY SPRINGFIELD XD MAGLOC EASYFIT MAGWELL

For Quick, No-Miss Reloads Under Pressure

Bolt-on magwell funnels magazine directly into the pistol for quick reloads without fumbling or distraction. Lightweight molded polymer won't mar, scrape, or dent, plus it protects the magwell opening from damage. Just insert into the bottom of the grip and tighten the included steel retention screw for a snug, form-fitting, grip. Separate models available for 9mm/.40 S&W and .45 ACP XDs.

**SPECS:** Molded glass-fill nylon polymer, matte black. 2 1/8" (5.8cm) long. 9mm/.40 S&W - 1.47" (37.5mm) wide. .45 ACP - 1.53" (39mm) wide. .34 oz. (9.6g) wt. Fits full-size Springfield XD and older HS2000 with 4" and 5" barrels. Does not fit compact or sub-compact. May require minor trimming to fit 9mm/.40 S&W models made after March 2005.

**#100-006-212** XD EasyFit Mag Well, 9mm/.40 S&W, 2A22K09 ..... \$ 25.99

**#100-006-213** XD EasyFit Mag Well, .45 ACP, 2A22J94 ..... 26.99

## ZEV TECHNOLOGIES PRO MAGWELL for GLOCK®

Gives the Benefits of a Racegun's Flared Magwell Opening Without the Bulk

This magwell is designed for the professional shooter who wants the competitive edge of a flared magwell opening without the bulk of the typical add-on racegun part. The Pro is slightly flared at the base to be wider than the stock opening, aiding in quickly inserting the magazine during reloads and helping you build proper muscle memory for improved consistency and reload time. Solid one-piece construction, black-anodized aluminum for strength and a good blend with the rest of the pistol. Fits Gen1 through Gen4 Glocks, though some Gen4 backstraps may need to have the bottom internal tabs trimmed for proper fit. Mounting screw and wrench included. **G17** model also fits G17L/22/24/31/34/35/37. **G19** model also fits G23/32/38. **Gen5** model fits G17/G34. **NOTE:** 10-round magazines WILL NOT work with this magwell. **SPECS:** Nylon polymer, black. Small fits Gen 1-3 pistols chambered in 9mm, .40 S&W, .357 SIG, and 45 GAP. Large fits Gen 1-3 pistols in .45 ACP and 10mm.

## TAYLOR FREELANCE SEATTLE SLUG MAG GUIDE for GLOCK®

Adds Weight, Speeds Mag Changes

Brass plug fills recess at the rear of grip and provides additional weight to reduce recoil and improve balance. Helps prevent "limp-wrist" malfunctions, especially in weak-hand shooting. Mag chute aids fast, sure reloads. **SPECS:** Brass, matte black finish. 2.4" (64mm) long. 3.5 oz. (.99g) weight. 17 fits 17/20/21/22/34/35/37, 19 fits 19. May require minor fitting, but no modifications to gun.

**#100-000-013** 17 Seattle Slug, 1K40B79 ..... \$ 47.99

**#100-000-014** 19 Seattle Slug, 1K40L79 ..... 47.99

## APEX TACTICAL CZ P10C TACTICAL & COMPETITION MAGAZINE RELEASES

Simple Redesign for Fast, Smooth, Easy Mag Release; All-Steel Construction

Apex's upgraded mag releases for the CZ P10c make it easier for you to drop the mag, even if it's fully loaded. The cam angle has been redesigned so it concentrates and maximizes the pressure you apply to the button to kick that mag out pronto. Machined from STEEL barstock, heat-treated for added hardness and wear-resistance, and given a tough Black Melonite finish. Crisp 30 lpi checking on the button face ensures that once your finger find the button, it's not going to slip off. They are direct, drop-in replacements for the factory release button, so "no gunsmithing required." Swap the factory button back in any time. **Tactical** model stands +.080" higher from the grip frame than the factory button. **Competition** button stands +.120" higher, so no fumbled mag drops when the stopwatch is ticking! Both models available for **Right-Hand** or **Left-Hand** shooters (order the button that corresponds to the hand in which you hold the pistol). **SPECS:** Reinforced, molded polymer, matte black. Fits Glocks chambered in 9mm, .40 S&W, .357 SIG, and 45 GAP Glocks. Same length as the factory catch on the G20, 21, 29, and 30, so it can be used as a direct replacement for the original part.

**#100-032-860** CZ P10c Competition Mag Release for LH Shooters, 7F43H19 ..... 47.99

## GHOST GEN3 EXTENDED MAGAZINE RELEASE for GLOCK®

Easier To Hit Under Stress, Won't Snag

Drop-in replacement for factory button on Gen 1-3 pistols has beveled edges that resist snagging during the draw. Larger button allows you to more aggressively operate the release during stressful conditions. Easily installs in place of the factory magazine release. Molded from a reinforced hard polymer similar to the Glock pistol's frame. **SPECS:** Nylon polymer, black. Small fits Gen 1-3 pistols chambered in 9mm, .40 S&W, .357 SIG, and 45 GAP. Large fits Gen 1-3 pistols in .45 ACP and 10mm.

**#100-015-466** Gen 3 Ext. Mag. Release, Small, 7K10Q19 ..... \$ 11.99

**#100-015-467** Gen 3 Ext. Mag. Release, Large, 7K10Q19 ..... 11.99

## GHOST X-MAG RELEASE for GLOCK®

Easy Reach For Faster Mag Changes

Two-piece, teardrop shaped magazine release helps speed mag changes. Mag release button is ergonomically shaped and much faster to depress; no need to shift your firing grip or modify your frame. Installs easily, in place of the factory magazine release. Made from a polymer similar to the GLOCK frame. **SPECS:** Nylon plastic, black, matte finish. Fits Glock small frame models only.

**#100-002-951** X-Mag Release for Glock, 7K14P39 ..... \$ 17.99

## GHOST EXTENDED MAGAZINE RELEASE for GLOCK® GEN4

Depress Mag Release Without Changing Your Grip

Polymer extended magazine release drops into Gen4 Glock to give extra length for fast magazine changes. Lets you reach the magazine release without shifting your grip. Textured surface gives no-slip function. Installs quickly and requires no modification to your pistol. **SPECS:** Polymer, matte black. 1.3" (3.3cm) long, .47" (1.1cm) wide. Fits models 17, 19, 22, 23, 26, 27, 31, 32, 33, 34, 35, 37, 38 & 39, Gen4 only.

**#100-013-386** Gen4 Glock Ext. Mag. Release, 7K12F74 ..... \$ 14.99

## LONE WOLF EXTENDED MAGAZINE RELEASE for GLOCK®

Aids In Fast, Positive Mag Changes

Drop-in replacement for factory magazine release has a deeply serrated button that protrudes farther from the frame to ensure positive, fast mag release on the first try. Gives a small but critical performance edge to the practical pistol competition shooter. Fits all 9mm, .40 S&W, .357 SIG, and 45 GAP Glocks. Same length as the factory catch on the G20, 21, 29, and 30, so it can be used as a direct replacement for the original part. **SPECS:** Reinforced, molded polymer, matte black. Fits Glocks chambered in 9mm, .40 S&W, .357 SIG, and 45 GAP as an extended catch; factory-length replacement for G20, 21, 29 and 30. Does not fit G36, 42, 43, or any Gen4 model.

**#100-006-205** Extended Mag Release, 2K2169 ..... \$ 2.99

## SHIELD ARMS ENHANCED MAGAZINE RELEASE for GLOCK® 43X/48

Sturdy Steel Upgrade Designed for Use With Shield S15 Mags

Shield's mag release gives you the ergonomics of a slightly oversized competition button with deep, crisp, non-slip "checkerboard" texturing. Once your finger contacts this button, it ain't slipping off! Nor is this release going to fail and leave you in the lurch at the wrong moment because it's made of machined STEEL. Shield recommends using it with their extra-capacity S15 magazines - you know, the mag that boosts the capacity of your G48 to 15 rounds in a package that's the same size as the factory 10-round mag? It is compatible with Glock® factory plastic G43X/48 magazines, but steel on plastic can lead to extra wear on the mags. Edges are chamfered, so the button will not wear your finger! Matte black finish. **SPECS:** Reinforced, molded polymer, matte black. Fits Glocks chambered in 9mm, .40 S&W, .357 SIG, and 45 GAP. Large fits Gen 1-3 pistols in .45 ACP and 10mm.

**#100-040-637** G43X/G48 Enhanced Mag Release, 9A00GDE ..... \$ 24.99

## SMART LOCK TECHNOLOGY SPRINGFIELD XD EXTENDED MAGAZINE RELEASE

Oversized Button For Easy Release & Quick Mag Changes

Replacement mag release extends 1/8" farther from the frame than the factory part, making it easier to find the button and drop the mag under the stress of competition. Fits full-size and compact 45 ACP XD pistols. Oversized, 3/8" diameter contact pad has almost twice the surface area of the factory button, with machined concentric rings for secure, non-slip thumb contact. Button can be installed on the left or right side of the frame for operation by either hand. **SPECS:** Steel, blued, matte finish. 1.33" (3.4cm) long, .375" (9.5mm) dia. contact button. Fits full-size and compact Springfield XD pistols chambered in .45 ACP. Does not fit XDM.

**#100-006-211** XD Extended Mag Release, 45 ACP, 2A28K79 ..... \$ 35.99

## TANGODOWN VICKERS TACTICAL EXTENDED MAG RELEASE for GLOCK®

Easy To Reach For Quick Mag Changes

Extended magazine release is easy to find and operate allowing fast, smooth mag changes that save you precious seconds. Serrated release button is 1/8" longer than original, allowing easy thumb access without repositioning your hand. Replaces factory original without alteration. Available in a variety of colors. Glock Green is a couple shades lighter than O.D. Green. **SPECS:** High-strength polymer composite, black or tan. Standard Frame includes models 17, 19, 22, 23, 24, 26, 27, 31, 32, 33, 34, and 35. Large Frame includes models 20, 21, 29, 30, 30S, and 41. Gen4/Gen5 Standard Frame fits all Gen4 models for the frame size, plus 17, 19, 19X, 26, 34 and 45.

MAGAZINE RELEASE BUTTONS**

Easy For Shooters Of All Hand Sizes To Use

Drop-in release buttons allow shooters, regardless of hand size, to easily manipulate the magazine release with little or no grip change. Machined from 4140 heat treated steel, release buttons are easy to use, even when under stress. Release buttons require re-use of your original spring and bushings. Both the **Oversize** models are rectangular and designed for right hand shooters only. The round **Extended Checkered** model is ambidextrous and can be installed on either the right or left side of pistol.

**SPECS:** 4140 steel, Black Armor Tuff® finish. Does not include bushings and spring.

**#965-000-211 Oversize Steel Mag Release, 5F39Q89 . . . \$41.95**

**#965-000-196 Oversize Checkered Steel Magazine Release, 5F39Q89 . . . 41.95**

**#965-000-197 Extended Checkered Steel Mag Release, 5F39I89 . . . 41.95**

**RANCH PRODUCTS RUGER® MARK II  
EXTENDED MAGAZINE RELEASE**

Increased Length For Easier Mag Changes

Provides increased length and better purchase for faster, easier magazine changes; even with oversized or target-style grips. Easy to install, simply replaces the factory mag release with no permanent alterations to your pistol required.

**SPECS:** Steel, blued or stainless steel (SS), matte finish. Fits Ruger Mk II .22 rimfire pistols.

**#746-102-001 Extended Mag Release, Blue, 6D11B19 . . . \$13.99**

**#746-102-101 Extended Mag Release, SS, 6D12E79 . . . 15.99**

**TANDEMKROSS RUGER MARK III & 22/45  
MAGAZINE DISCONNECT BUSHING**

Eases Takedown, Lets MKIII Pistols Fire Without Magazine Inserted

Stainless steel bushing replaces factory bushing on MKIII and 22/45 Ruger pistols to enable pistol to fire with magazine removed. Also eases takedown and lets magazine fall from the gun. High-quality steel construction resists heat, corrosion and rust. Will not effect trigger function or feel. Fits MKIII and 22/45 only.

**#100-014-444 Magazine Disconnect Bushing, 1G9D49. . . \$ 9.99**

**LONE WOLF DIST.**

**EXTENDED SLIDE LOCK LEVER for  
GLOCK®**

Easier Slide Removal For Quicker Field Stripping

If you've ever tried to field strip your Glock with even slightly oily or sweaty fingers, you'll appreciate the benefit of this extended slide lock lever. Drop-in replacement is 3mm longer than the factory original part to provide a firmer grasp, so you can remove the slide quickly without fumbling with the lever. No gunsmithing required; easy to install, no permanent alterations to the gun. Gun will still fit all standard holsters.

**SPECS:** Steel, black oxide finish. 1 1/8" (29.9mm) long. Fits all Glock pistols except M36.

**#100-002-412 Extended Slide Lock Lever for Glock, 2K10F39. . . . . \$29.99**

**ARO-TEK™  
EXTENDED SLIDE RELEASE for GLOCK®**

Increases Leverage For Easier Operation

Extends rearward for increased leverage and easier, faster chambering after magazine changes. Rounded shape extends slightly away from the slide so it's easier to engage but won't catch on clothing or holster during a draw.

**SPECS:** Steel, blue or silver finish, includes spring. 1003 & 1004 fit all 2-pin models except Model 36. 36B fits Model 36 only.

STOCK #	MODEL	FINISH	PRICE
#066-100-300	1003	Blue	6F31E44 \$ 36.99
#066-100-400	1004	Silver	6F31F44 \$ 36.99
#066-100-001	36B	Blue	6F31L44 \$ 36.99

**GHOST BULLET SLIDE RELEASE  
for GLOCK®**

Larger Contact Pad for Better Control & Faster Operation

Ghost's Bullet Slide Release (BSR) has an enhanced control that helps you engage in fast, positive slide release under stress. The biggest benefit of the BSR is its oversized finger pad because a larger surface is easy to locate and gives you more leverage, making release of the slide possible even when your finger doesn't come down square on the button. The control pad is contoured and streamlined so it does not present an extra risk for snagging on clothing or other gear during a draw from holster. It's left-handed friendly – very to operate with the index finger when firing left-handed. AND it's ruggedly built from stainless steel to stand up to hard use. Matte black finish blends perfectly with slide and frame. All versions of the Bullet Slide Release are easy to install and drop right into your pistol, replacing the factory release with no other permanent modifications to the gun. **Forward** model is for shooters using the modern "thumbs forward" shooting technique. As the name indicates, the control pad is moved forward, getting it out of the way so your thumbs do not accidentally push the release UP while shooting and lock the slide open on you before the mag is empty. If your thumb stance is a little different, it will also help keep you from accidentally pulling the release DOWN and preventing the slide from locking open on the last round.

**SPECS:** Standard & Forward BSR fit these Glock® Gen1 thru Gen4 models: 17 (three-pin only), 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40 & 41. DOES NOT work on Gen5 models. Separate G42/43 BSR model for Glock® 42/43. This model available in standard black or matte silver finish.

**#100-009-416 Std Bullet Slide Release, 7K15N19. . . . . \$18.99**

**#100-027-278 G42/43 Bullet Slide Release, Sil, 7K19Q99. . . 24.99**

**LONE WOLF 3-PIN EXTENDED SLIDE STOP  
for GLOCK®**

Aids In Smooth Reloads & Fast Return-To-Battery

Drop-in replacement for factory part has a larger, easier-to-locate thumb pad that helps you release the slide and return to battery faster after an empty-gun mag change. Fits all "3-pin" (trigger pin, locking block pin, and trigger housing pin) Glocks, except G36.

**SPECS:** Steel, electro-coated, matte black finish. Fits all 3-pin Glock pistols, except G36; will not fit early 2-pin 17, 17L and 34.

**#100-006-699 3-Pin Extended Slide Stop, 2K10I19. . . . . \$11.99**

**CYLINDER & SLIDE BROWNING HI POWER  
EXTENDED SLIDE RELEASE**

Operate With Shooting Hand Thumb Without Shifting Your Grip

Replacement for the nubby factory slide release enables you to use the thumb of your shooting hand to release the slide without having to shift your grip on the pistol. Ergonomically angled for natural, positive thumb contact, with enlarged thumb pad that's .110" wide to give you a firm purchase even under stress. Gunsmith installation recommended.

**SPECS:** Carbon steel, blued or hard chromed. Fits Browning Hi Powers chambered in 9mm and .40 S&W.

**#206-000-066 Hi-Power Slide Stop, Blued, 6K45Q59. . . \$56.99**

**#206-000-067 Hi-Power Slide Stop, Chromed, 6K67B99. . . 84.99**

**EXTENDED SLIDE RELEASE  
LEVER for GLOCK®**

Easy To Hit For Positive Slide Release On The First Try

Drop-in replacement for factory slide release lever has a much larger finger pad and a trapezoid-shaped bump that help ensure you release the slide fast, on the first try, after a reload. Saves precious seconds that can be lost making multiple swipes to release the slide and chamber the next round. Low profile and smooth contours will not affect holster fit or snag on clothing. Rugged, all-steel construction; matte black finish matches Glock factory finish. Separate models to fit current-production 3-Pin and early 2-Pin pistols, plus G37/38/39 pistols chambered in .45 GAP. **Release + PMAG Paks** contain the extended slide release plus a Magpul PMAG 17 GL9 17-round magazine.

**SPECS:** Steel, matte black finish. 3-Pin fits all guns with separate trigger, locking block, and trigger housing pins, including early 2-Pin G19. Does not fit early G17, 17L, and 34 2-Pin guns. 2-Pin fits G17, 17L, and 34 that do not have a locking block pin, manufactured from 1986 to mid-2002. 37/38/39 fits all G37, 38, and 39 pistols.

**#100-002-748 3-Pin Ext. Slide Stop Lever, 1D10B39. . . \$21.99**

**#080-001-264 3-Pin Release + PMAG Pak, 8K49D59. . . 61.99**

**#100-002-698 37/38/39 Ext. Slide Stop Lever, 1D10D19. . . 11.99**

**SMART LOCK TECHNOLOGY SPRINGFIELD XD  
MAGLOC® EXTENDED SLIDE RELEASE**

Large, Easy-To-Locate Contact Pad For Fast, Positive Slide Release

Replacement slide release lever has more than twice the contact surface of the XD9/40's tiny factory part to make hitting the release or manually locking back the slide easy, painless, and fast. Helps you reload faster—simply hit the Magloc button with the thumb of the shooting hand to close the slide on a fresh mag, rather than manually racking with the off hand. The larger button surface spreads the pressure you apply over a larger area of the thumb, so it feels like you're using less pressure to operate it. Machined, hardened steel construction, with three large horizontal grooves to give secure, non-slip purchase; low profile won't interfere with any holster designed for the stock XD.

**SPECS:** Steel, blued, matte finish. Contact Pad - 1 1/8" (2.8cm) long x 3/16" (7.9mm) high. Fits Springfield XD standard and compact models in 9mm or .40 S&W only. Does not fit pistols with thumb safety or any of the XDM series.

**#100-005-900 Extended Slide Release, 2A44D79. . . . . \$55.99**

**NEW! TANGODOWN  
VICKERS TACTICAL TACTICAL  
SLIDE STOP for GLOCK®**

Optimum Shape To Ensure Positive Thumb Contact

Redesigned thumb pad places the pad slightly forward of the pistol to battery faster. Pad is shaped to aid in positive contact to help prevent accidental slide stop engagement, even when you're wearing gloves. Stamped and formed from durable 4130 steel, then treated with a special hardcoat finish that resists rust and wear.

**SPECS:** 4130 chrome-moly steel, black, matte finish/ includes spring. Gunsmith installation recommended. VTSS-001 fits Glock 17, 17L, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 31 thru 35, and 41. VTSS-002 fits Glock 42 and 43 only. VTSS-003 fits Glock Gen5 models 17, 19, 19X, 26 and 34. VTSS-004 fits Glock 43X and 48.

**#100-007-477 VTSS-001 Slide Stop, 9B17H84. . . . . \$20.99**

**VOLQUARTSEN RUGER® MARK II/III™  
EXTENDED BOLT RELEASE**

Oversized Thumb Pad For Fast, Positive Operation

Drop-in replacement bolt release has a large, easy-to-find, contact pad with a serrated face ensures fast, positive closing of the action, especially during high-stress competition. Gives the shooter a secure, non-slip grip with or without gloves on. Replaces the factory bolt release on both Mark II and Mark III pistols in minutes. No permanent modifications required.

**SPECS:** Stainless steel, natural silver finish. Pad is 3/16" (1.4mm) long x 7/16" (1.1mm) wide. .2 oz. (5.6g) weight.

**#930-000-067 Ext. Bolt Release, Silver, 3Z11H04. . . . . \$12.99**

**TACTICAL SOLUTIONS  
RUGER® MARK I/II/III™ & 22/45™  
HEAVY DUTY EJECTOR**

Hardened, Machined Stainless Steel To Resist Wear & Breakage

Replacement for factory ejector is precision machined from hardened 416 stainless steel billet for extra strength and wear resistance. Helps ensure positive, consistent ejection, with reduced risk of reliability problems caused by a worn or broken ejector. Includes 416 stainless steel mounting screw.

**SPECS:** 416 stainless steel, natural finish. Fits Ruger Mark I, Mark II, Mark III, and 22/45 pistols.

**#100-005-999 Ruger .22 Pistol Ejector, 8K21J59. . . . . \$26.99**

## BERETTA MODEL 92 FACTORY HIGH CAPACITY MAGAZINES

Dependable, Factory Magazines  
For Superior Performance

Factory, double stack 9mm magazines are ultra-reliable in combat or competition. High-tech manufacturing techniques allow seamless construction for snag-free follower movement and smooth insertion into the mag well. Self-lubricating follower is injection molded from high-strength polymer for durability. Numbered witness holes on the backside allow easy viewing of remaining ammunition. Built from high carbon, heat-treated steel for maximum strength; includes a high tensile strength music wire spring that resists memory and won't weaken over time. Removable base pad allows easy cleaning. **Sand-Resistant 15-Rd** model features a synthetic base pad, a full-length "sand slot" to allow debris to fall out, and a special dark gray, high-lubricity coating for improved reliability in desert environments. Adopted for use by the USMC. **17-Rd, 20-Rd, and 30-Rd** magazines come with a synthetic base pad and an attractive, high-gloss blued finish. **20-/30-Rd** feature a polymer shroud that protects the lower half of the magazine and acts like a grip extension for added control.

**SPECS:** Body - Carbon steel, heat treated. Spring - Music wire. Follower/Pad - Polymer, black. Fits all 9mm Beretta 92s, except Type-M and old Model 92/92S that use a single stack magazine. **15-Rd SR** - Dark gray, high-lubricity coating, polymer base pad. **17-Rd/30-Rd** - Blued, gloss finish, polymer base pad.

## BERETTA PX4 STORM FACTORY MAGAZINES

Genuine Factory Magazines For  
Perfect Fit & Performance

Full-capacity OEM magazines are the exact ones that Beretta ships with new Px4 pistols, so you know you have a replacement mag made to fit your gun. None of the compromises you make with cheap aftermarket mags. Heat-treated steel tube, "memory resistant" music wire spring that resists taking a set, self-lubricating polymer follower, and a removable polymer base pad for easy cleaning. **SPECS:** High-carbon, heat-treated steel, blued, or natural-finish stainless steel.

### MAGAZINES THAT WON'T HOLD ADVERTISED NUMBER OF ROUNDS

New magazines, and/or magazines with new springs, may not let you load them with the maximum number of rounds they should hold. Here's the solution: load them up with the maximum number of rounds you can and let them set for a few days. The new spring will take its normal "set" and allow the rest of the rounds to be loaded.

## ELITE TACTICAL SYSTEMS TRANSLUCENT PISTOL MAGAZINES

Lets You Make Quick Load Checks

ETS's translucent magazines make it easy for shooters to answer the age-old question that's dogged anybody who shoots a semi-auto: "How many rounds are left in the mag?" The entire mag body is made of a tough, reinforced, see-through polymer that lets you know at a glance the exact load status of the magazine in your hand. Got a bunch of mags on the shooting bench? Which ones are full, which ones have partial load? The answer is right before your eyes. And the ETS mag is just as functional as the factory mag that came with your gun. It will reliably lock the slide back on empty and drop freely when released, plus it won't become brittle or "creep" over time. Base plate has a specially designed grip rib to make getting ahold of it easier. These mags will handle ambient temperatures from -60 to 180+ deg. F, and withstand extended UV exposure over months without becoming brittle. They're also resistant to chemicals - cleaners, fuels, and Deet. **SPECS:** Polymer, Translucent Smoke.

### HIGH-CAPACITY MAGAZINES

While the Federal Ban on magazines with capacity above 10 rounds has been lifted, some states and cities have their own bans in place. In those areas it is still illegal to use rebuild components to assemble a new, high-capacity magazine. Please be sure to comply with all state and local ordinances when rebuilding magazines.

### NEW! Items **FACTORY PISTOL MAGAZINES for GLOCK®**

Choose Genuine Factory Magazines For Top Performance & Reliability

Be confident your Glock pistol will perform to factory standards each and every time with genuine Glock factory magazines. Manufactured to Glock specifications in Austria by Glock. Available in all factory round counts, including high-capacity models. All models include round count indicator on rear face of magazine body and standard factory baseplate. Listed below by Glock model designation and caliber. Available in colors to match Glock factory slide and frame colors: Black (BLK), Flat Dark Earth (FDE), Coyote (COYO), and O.D. Green (ODG). Gen5 magazines are contoured at the base to match the flared magwell of Gen5 pistols, but are ALSO compatible with earlier Glock pistols - a quick performance upgrade for your Gen1 to Gen4 guns! ■  
SPECS: Polyethylene body over steel liner.

### MAGAZINES for GLOCK®

Convenient, Money-Saving 3-Paks Of Factory Mags For Popular Models

Genuine Glock factory magazines ensure smooth, reliable feeding and help you stay confident your pistol will perform reliably. Manufactured to Glock specifications in Austria by Glock. Features a round count indicator on rear face of mag body and the standard factory baseplate. Also available bundled with a rugged Uncle Mike's molded-Kydex two-mag belt pouch. Tension screw system lets you adjust the amount of retention for competition or carry. Combos available for Glock 17/34 (9mm) and 22/35 (40 S&W) pistols. ■  
SPECS: Magazines - Polyethylene body over steel liner. Pouch - Kydex, black. Accepts belts up to 1 7/8" (4.4cm).

- #100-006-989 Three 17-Rd Mags for Glock 17/34, 1D72J00 ..... \$ 79.99

### MAGPUL PMAG GL9 MAGAZINES for GLOCK®

Brings Magpul Reliability & Durability To Your 9mm Glock® Handgun

Constructed of a proprietary polymer, these durable magazines fit 9mm Glock handguns, including Gen4 models. Reinforced feed lips, a stainless steel spring and a high visibility anti-tilt follower ensure reliable feeding. Pushbutton release on the floorplate allows the magazine to be easily disassembled without tools. Floorplate also has a pen dot matrix on the bottom for marking and identifying magazines. The GL9 consistently drops clear and free when released; loaded or empty. 17 GL9 fits flush at the base of the Glock 17 grip, with minor protrusion on compact and subcompact models. 15 GL9 fits flush on Glock 19, with some protrusion on subcompact pistols. 21 & 27 GL9 fit all full-size, compact, and subcompact double-stack Glock 9mm variants with some protrusion below the grip. 21 GL9 meets the 140mm overall length restriction for competition magazines. 26 GL9 fits flush on Glock 26; adds a finger ledge to give you a better grasp on the gun, plus holds two more rounds than factory mag, for 12-round capacity. 27 GL9 meets the overall length requirements for 170mm competition magazine. PMAG 10 GL9 models hold 10 rounds and are available for the G17 and the G19. ■

### MAJESTIC ARMS RUGER® MARK II/III COMPETITION MAGAZINE WITH EXTENDED BASE PAD

Reliable-Feeding Competition Mags For Your Ruger .22 Pistol

Durable, blued steel 10-round magazine offers positive feed and ejection for the competition shooter. Magazine comes with attached machined aluminum extended base pad that helps magazine insertion and removal and allows the shooter to determine magazine orientation by touch. Designed to not get stuck inside the pistol if magazine is accidentally inserted backwards. Fits both Mark II and III pistols. Does not fit Ruger Mark I pistols. ■  
SPECS: Magazine - Steel, blued finish. Polymer follower. Base Pad: Machined aluminum, natural finish. 10-round capacity.

- #941-000-007 Mark II/III Magazine w/Ext. Base Pad, 1D27I89 ..... \$ 30.99

### MEC-GAR BERETTA M9/M92 OPTIMUM MAGAZINES

High Capacity With Anti-Friction Coating; The Mags That Really Work

You'll gain reliable, additional round capacity with these high quality replacement magazines that really fit and function like proven factory magazines. Tempered steel body with hardened feed lips is treated with a phosphated anti-friction coating inside and out to ensure drop-free operation and no-jam feeding. Hardened, high tensile music wire spring and supported, self-lubricated nylon follower eliminates follower tilt so every round feeds flawlessly. Flush-fitting, 18-Round magazine features a tough synthetic base pad that removes easily for magazine cleaning. 20-Round model includes a removable, synthetic "Plus 2" base pad. Witness holes in the rear side on both models provide fast, remaining round count.

SPECS: Body - Hardened carbon steel, black phosphated anti-friction coating. Spring - High tensile music wire. Follower - Nylon, black. Fits Beretta M9 and M92, 9mm caliber.

- #625-000-033 20-Rd M9/M92 Magazine, 5B33G99 ..... 39.99

### NEW! PRO MAG 50-RD DRUM MAGAZINE for GLOCK® 17 & 19

A Bit of Extra Capacity To Cut Down on the Frequency of Mag Changes

When you have a good string going at the range, who wants to stop to reload? OK, yes, you can use this ultra-super-incredibly high capacity magazine in your double-stack Glock® pistol, but we're thinking it's meant primarily for the increasingly popular "AR-9" carbines that use Glock® mags. Either way, Pro Mag keeps the weight down as much as possible with a proprietary DuPont® Zytel™ based polymer mag body and an injection molded follower. The considerable spring power

needed to motivate the huge round stack inside comes from a tempered chrome silicon steel mag spring. There's a reinforcing steel liner in the section on top that fits inside the mag well. Fits G17, G19, and all Gens of Glock® pistols that accept a double-stack 9mm mag (NOT the G43). ■

- #100-053-649 50-Rd Drum Mag for 9mm Glock®, 7H67199 ..... \$ 79.99

### NEW! Items **MEC-GAR SEMI-AUTO MAGAZINES**

Expert Craftsmanship, Reliable Function

Made from certified, carbon steel; TIG welded and finished without seams, then heat treated for durability. These are the same magazines that are supplied by many European handgun makers as original equipment. BL = blued, BN = bright nickel finish, MBP = matte black phosphate. ■  
SPECS: Steel, blued.

**PRO-MAG FN FIVE-SEVEN 30-ROUND MAGAZINE**

Increases Capacity By 10 Rounds Over Factory Magazine

Rugged, lightweight polymer magazine increases the capacity of your 5.7 x 28mm FN Five-seveN pistol by an additional 10 rounds over the factory mag. Extension is contoured for a smooth, seamless fit to the bottom of the mag well, with exterior texturing that matches the pistol grip's texturing.

**SPECS:** Reinforced, injection-molded polymer, black, 30-round capacity. Fits FN Five-seveN pistol chambered in 5.7 x 28mm.

#687-000-038 30-Rd Five-seveN Mag, 7H36A54. . . . . \$ 42.99

**RUGER® LCP®/LC380®/LC9® FACTORY MAGAZINES**

Rugged & Dependable Factory Original; Comes With Two Floorplates

Original Ruger factory magazines give exact fit and excellent performance in LC-series compact pistols. Tempered steel body with hardened feed lips, steel spring, and nylon follower all built to original specifications. Comes with a standard, low-pro-

Extended Floorplate Installed

file floorplate and an extended plate with a convenient finger ledge for an improved grip and better recoil control for fast follow-up shots. **LC9 Extended** comes only with an extended floorplate.

**SPECS:** Steel, blued finish.

**NEW! SHIELD ARMS S15 MAGAZINE for GLOCK® 43X & 48**

50% MORE Capacity Than Factory Magazine, SAME Size!

The Shield Arms S15 Magazine boosts the capacity of your Glock® 43X or 48 an additional FIVE rounds, from 10 to 15, without extending any farther out the magwell than the factory magazine. The result is a super-compact, easy-to-carry 9mm pistol with the same mag capacity as the much larger Glock® 19! The S15 gives you this firepower boost without sacrificing the reliability of your pistol. The Shield crew designed an all-steel mag body that frees up more interior space than found in the factory's thicker polymer-and-steel walled mags. The redesigned interior geometry introduces some "stagger" in the round stack - enough to squeeze in an extra 5 rounds. At the same time, when the S15 magazine is seated, the base plate still fits flush across the bottom of the grip. The S15's no-flex body of hardened steel has a durable, satin-black, self-lubricating, synthetic finish. Fits Glock® G43X and G48 ONLY. The bottom line: The Shield Arms has produced a rugged, reliable magazine with 50% more capacity with NO need for any extended base pad that sticks out below the grip and makes your EDC pistol less easy to conceal!

#100-039-071 S15 Mag for G48/43X, 15-Rd, 9A00AHC. . . \$ 39.99

**+5 RD EXTENDED BASE PAD** - If squeezing an extra 5 rounds into your G43X or G48 is good, how about doubling its capacity to 20 ROUNDS? We're thinking "twice as good," especially when you're practicing with your pistol at the range, or... maybe even using your G43X/G48 in competition? Shield's +5 round extended base pad quickly and easily replaces the base plate of the S15 magazine. It's made of sturdy, lightweight 6061 T6 aluminum with a matte black Type 2 anodized finish to match the rest of the S15 mag. Deep grooves cut into the exterior give you an excellent grasping surface when you're yanking a mag out of a mag pouch. Comes with an extended mag spring. **NOTE: fits Shield Arms S15 magazine ONLY.** Will not work in factory magazines.

#100-040-638 +5 Rd Ext. Base Pad for S15, 9A00FEL. . . \$ 39.99

**RUGER® RIMFIRE PISTOL MAGAZINES**

Excellent Factory Magazines For All Ruger Pistols

**NEW! SIG SAUER FACTORY MAGAZINES**

Factory Mags for Perfect Fit & Reliable Function

Original factory magazines fit perfectly in your SIG Sauer pistol. These are the same magazines shipped from the factory with your gun and are listed in the factory parts section of our Big Catalog. Stainless steel tube is polished to a slick finish that resists attracting dust and dirt, and easily slides in and out of the magwell. Dimpled steel follower helps hold the last round in place; aids in controlled feeding. Full-power factory spring feeds round after round reliably. Witness holes on each side instantly let you know how many rounds are in the magazine. Extended-capacity mags have a contoured extension that matches the pistol grip and gives added grip surface for improved control and handling.

### SPRINGFIELD ARMORY XD-S™ MAGAZINES

Factory Magazines For  
9mm & .45 Compacts

Same as the mags that came with your pistol, these single-stack stainless steel magazines resist wear and corrosion for extra-long service life. Molded polymer follower with integrated steel plate reliably raises the slide lock into position after the last round is fired. Base plate removes for cleaning. 7-round .45 mag and 9-round 9mm model come with polymer sleeves that match both backstraps that came with your pistol.

**SPECS:** Stainless steel mag body, polished natural finish. Fits single-stack, .45 ACP Springfield XD-S pistols.

### SPRINGFIELD ARMORY XD/XDM FACTORY HIGH-CAPACITY MAGAZINES

Made The "Factory Way" For  
Smooth, Reliable Feeding

Long-lasting, stainless steel, high-capacity magazines are made to precise, factory tolerances to ensure maximum firepower and reliability from your Springfield XD pistol. Steel spring and molded polymer follower feed rounds smoothly and reliably to the chamber, every time. Highly polished body won't drag or hang-up during high-speed, tactical reloads. High-impact, polymer, base pad removes easily for cleaning. Numbered witness holes provide quick round count. Magazines fit 4" Service and 5" Tactical model pistols.

**SPECS:** Body - Highly polished stainless steel. Base Pad & Follower - Polymer, black. Capacity: 9mm - 10-, 13- and 16-rounds; .40 S&W - 11- and 12-rounds; .45 ACP - 9-, 10- and 13-round capacities available. Fits Springfield XD Service and Tactical model pistols with 4" or 5" barrel. .45 ACP 13-round magazine also fits XDM.

### KCI USA MAGAZINES for GLOCK®

Wallet-Friendly Full- & Extra-Capacity  
Replacement Mags Built to Correct  
Factory Dimensions

KCI's mags for Glock® pistols are built to shrug off hard use and maintain reliable feeding, round after round. These mags have the same sturdy polymer-and-steel construction as factory magazines, with a tempered chrome silicon spring and a smooth polymer follower that keeps the round stack moving. The baseplate removes easily for cleaning, but will not work loose under recoil. And you even get witness holes - a feature you expect on factory or high-end aftermarket magazines - so you can check ammo status at a glance.

KCI's factory-capacity magazines are with any magazine accessories that fit the original Glock® factory mag, so they're perfect for rough use, tactical drills, and any other training or real-world application that puts aggressive wear on magazines and equipment. **Extended Capacity** models enable you to send plenty of practice rounds downrange without having to reload. They're also the ideal tubes for 9mm AR-15 carbines/pistols/SBRs that use Glock® mags. Built to good-as-factory specs, KCI magazines will keep the rounds cycling smoothly and reliably through your Glock pistol or "AR-9" carbine, pistol, or SBR. And the price? THAT will make you smile almost as much as the fun of shooting sessions with fewer reloads. **Brownells Gun Tech™ Note:** Like many extended-capacity magazines, a KCI extra-capacity mag needs to be loaded/unloaded several times before it will accept its full stated capacity. Try loading it to half capacity and leaving overnight to help set up the spring and make it easier to insert a full load later.

**50-RD DRUM MAGAZINES** - The ultimate high-capacity magazine for your 9mm Glock is KCI's 50-round drum mag. It certainly cuts down the number of times you have to stop for a mag change during range practice. It's also an excellent way to increase the capacity of a 9mm Luger chambered AR-15 that uses Glock® pistol magazines. It's compatible with any 9mm Glock® pistol that uses a double-stack magazine (sorry - won't work in your G43!), KCI's drum is constructed of lightweight reinforced polymer with steel reinforcements and a chrome silicon spring with plenty of energy to ensure smooth, reliable feeding. Drum mags are usually a bear to load, but KCI's quick-loading lever makes loading up the full 50 rounds a breeze. A locking mechanism also lets you store this mag fully loaded without damaging the feed lips. Fits any Gen3 or later 9mm Glock pistol that takes double-stack mags, as well as 9mm carbines that use Glock magazines, including the Kel-Tec's Sub 2000, Lone Wolf AR-15 carbine, and others. C'mon - grab your Glock, hit the range, and bang the drum!

- #100-027-930 Glock 17/19/26/34 9mm Drum Mag, 50-Rd, 5D55B79. . . . \$ 61.99
- #100-027-931 Glock 22/23 .40 S&W Drum Mag, 50-Rd, 5D59C49. . . . 69.99

### KRUNCH PRODUCTS MAG SLICK

Keeps Magazines Clean & Working

Aerosol, dry lubricant, improves magazine function and feeding. Protects against corrosion, repels dirt. Dries in seconds, safe for all metal and plastic mags. **SPECS:** Aerosol, 6 oz. (170 g) wt.

- #474-000-001 Mag Slick, 4G7D17. . . . \$ 8.99

### MAGPUL SPEEDPLATE for GLOCK®

Fast Mag Changes, Easy Retention  
After Tactical Reloads

Rubber-coated floorplate with finger loop replaces the factory floorplate of your 9mm/.357/.40 Glock pistol magazine to give you the added tactical or competitive edge of faster mag changes. The easy-to-grasp loop aids in quick, positive extraction from tight mag pouches and helps you hang onto a partially expended magazine with just a finger after a tactical reload. Also gives the lower fingers a convenient rest for a more solid grip on subcompact models like the Glock 26/27/33. Made of polymer resin and no-slip Santoprene® rubber to cushion the magazine from impact when dropped on concrete or other hard surfaces. Available in 3-Paks. **SPECS:** Santoprene synthetic rubber over hard polymer, black. Fits Glock 9mm/.357/.40 magazines. 3-pak.

- #100-003-077 Magpul Speedplate for Glock, 3-pak, 9Z12Q74. . . . \$ 14.99

### VOLQUARTSEN RUGER® 22/45® SPRING-LOADED MAGAZINE EJECTOR

Drop-In Magazine Upgrade  
Gives Faster, Easier Reloads

Easy-to-install, machined aluminum floorplate helps you perform the fastest possible reloads with your 22/45. The built-in, spring-loaded plunger forcefully ejects the magazine clear of the gun, while the extended base rides well below the mag well to ensure positive insertion every time. Installs in place of the factory base plate; no gunsmithing required. **SPECS:** Aluminum, matte black hard anodized finish. 2" (5 cm) length, 1" (2.5 cm) width, 1/4" (1.9 cm) height. Fits Ruger 22/45 magazines only.

- #930-000-138 Spring-Loaded Spring Ejector, 3Z28L89. . . . \$ 33.99

### LYMAN SEMI-AUTO GRIP EXTENDER

Use Full Size Mags In Compact Guns;  
Increases Shooting Comfort

Slip-on collar, fills the space between a compact frame and bottom of a full-sized magazine to make a comfortable, hand-filling grip. Contoured to match the frame for improved trigger and recoil control. Ideal when using full-size magazines as backup. **SPECS:** High impact polymer, black.

## ARREDONDO SMITH & WESSON M&P EXTENDED MAGAZINE BASE PAD

Increases Mag Capacity; Easy To Install

Replaces factory pad to increase magazine capacity without compromising reliability. A great way to increase firepower without having to buy all-new mags! Checkered bottom panel assists in fast, positive, non-slip, mag changes. Retains the factory spring. Two attachment options: For low-stress applications where mag will not be ejected onto hard surfaces, use the spring plate to lock the extender and add **6 rounds**. Use the L-shaped locking insert for extra-secure attachment and add **5 rounds**.  
**SPECS:** Fiberglass-reinforced nylon, black.  
**#069-000-032 S&W M&P Ext. Base Pad, 9F16J99 . . . . \$ 19.99**

## ARREDONDO EXTENDED BASE PAD for GLOCK®

Provides Extra Capacity For High-Capacity Magazines

Two-piece, synthetic base pad increases the cartridge capacity of pre-ban, Glock magazines without compromising reliability. Impact-resistant pad locks securely to the magazine body; removes quickly and easily with the supplied compression tool. Wolff 10% extra-power spring ensures reliable feeding. Checkered, bottom panel allows positive, non-slip, mag changes. **G17, G19/G23 and G20/G21** models extend pre-ban magazines to 140mm. They add +6 rounds to 9mm, +5 to .40 S&W/10mm Auto, and +4 to .45 ACP mags. USPSA Limited legal. **9mm/.40** model fits all double-stack 9mm and .40 S&W chambered Glock. Meets the PPSC "Box Rule." Adds +4 rounds to 9mm and +3 rounds to .40 S&W magazines.  
**SPECS:** Pad - High-impact, fiberglass-filled nylon, black, blue, or red. 1 1/2" (3.8cm) long, 1 1/8" (2.9cm) wide, 1 1/2" high for 9mm/.40 S&W, 10mm/.45 ACP is larger. Spring - Tempered music wire, 10% extra power.

## DAWSON PRECISION EXTENDED BASEPAD & SPRING for GLOCK®

Add Additional Rounds Without Special Tools

High-strength, aircraft aluminum base pad slides open to accept magazine body and locks into place. Removes in seconds for easy cleaning. Base pad increases capacity of 15 round, 40S&W magazines by three rounds and 9mm magazines by 4 rounds. Maintains 140mm USPSA rule. Comes with extra-power, steel spring and installation instructions. **USA**

- SPECS:** Aluminum, black. Steel mag spring. Fits small frame Glock 9mm & .40 S&W pistols.
- #100-002-221 Basepad w/ Mag Spring for Glock, 9A35G19 . . . . . \$ 43.99**

## LIGHTNING STRIKE EXTENDED MAGAZINE PAD for GLOCK®

Additional Weight Helps Mags Drop Free

Replacement for factory mag pad adds length to help ensure the magazine can be seated fully in flared mag wells. **+2** increases mag capacity by two rounds; others do not increase capacity.  
**SPECS:** Aluminum, black, matte finish. **Small** fits Models 17, 17L, 18, 19, 22, 23, 24, 25, 26, 27, 28, 31, 32, 33, 34, 35. **Small+2** fits Models 17, 17L, 18, 19, 22, 23, 24, 34, 35. **Large** fits Models 20, 21, 29, 30.

## PEARCE GRIP SEMI AUTO GRIP EXTENSION

Adds Recoil Control For Better Accuracy

Lets you use your entire hand to grip the gun for better recoil control and more consistent shot placement. **Grip Extension** does not increase magazine capacity or weight. Extended "shelf" for the little finger attaches in place of the factory magazine base. Makes shooting these little "handfuls" a lot more comfortable. **Plus One** and **Plus Two** extensions increase magazine capacity by number indicated in chart. **Glock Plus Two\*** adds two rounds to 9mm magazines, one round to .40 S&W and .357 SIG magazines. **Glock Sub-Compact Plus Extension XL\*\*** adds one round for Model 39, two round for Model 27/33, and three rounds for Model 26. **Glock Plus XL Magazine Extension\*\*\*** adds one round in .45 GAP magazines, two rounds in .40 S&W and .357 SIG magazines, and 3 rounds for 9mm magazines. **Springfield XD** fits 9mm, .40 S&W, .357 Sig, and .45 GAP only. **Springfield XD .45 ACP** fits .45 ACP caliber only. **Springfield XDM** fits 9mm/.40 S&W Compact only. **USA**

## PEARCE GRIP GRIP ENHANCER for GLOCK®

Provides Extra Gripping Surface

Replaces factory floorplate to fill the opening at the bottom of the Glock® frame to provide a more comfortable and secure gripping surface. Does not increase overall length of grip. **USA**  
**SPECS:** Nylon plastic, matte black. Fits new-style metal lined magazines for Glock models 17, 18, 19, 22, 23, 24, 25.  
**#092-100-201 FML Grip Enhancer, 2K8F24 . . . . . \$ 10.99**

## SAMSON MFG. S&W M&P SHIELD +1 MAGAZINE EXTENSION

Adds +1 Round To Capacity & Provides a Finger Ledge for the Support Hand

Not only does Samson's magazine extension let you carry more ammo on board, it also helps you yank a stuck mag out of your Smith & Wesson M&P Shield. It provides these benefits on both 7- and 8-round factory magazines, and it still allows the mag to drop freely from the magwell without catching on the shooter's hand. The extension's leading edge acts as roost for your little finger, enhancing the stability of your hold on the pistol. Exterior relief cuts aid in yanking the mag to clear Type III (double-feed) malfunctions and in one-handed malfunction clearing. Made of tough, unbreakable, machined 6061 T6 aluminum, with a choice of a **Black** or **Natural** silver-gray anodized finish. Fits 9mm M&P Shield & M&P Shield M2.0 pistols. Uses pistol's factory magazine spring. **USA**

- #100-027-270 M&P Shield +1 Mag Extension, Black, 1B22F94 . . . . . \$ 26.99**
- #100-027-271 M&P Shield +1 Mag Extension, Natural, 1B22H94 . . . . . 26.99**

## NEW! STRIKE INDUSTRIES GLOCK® 42/43 ENHANCED MAGAZINE PLATE

Increases Capacity By +2, Improves Control, Smooths Mag Changes

Enhanced Magazine Plate (EMP) magazine extension adds extra rounds to your Glock's magazine capacity and gives you an extended gripping surface. Increases your firepower, while it gives you better control - and so better potential accuracy - when firing the pistol. Extended surface aids in smooth, fast, positive mag changes, too. Made of strong, impact-resistance molded hard polymer, with an aggressively "knobby" texture further enhances your hold on the pistol. Retains factory magazine spring.

- #100-017-975 EMP for Glock 42, +2 Rds, 2H11C89 . . . \$ 13.99**
- #100-018-240 EMP for Glock 43, +2 Rds, 2H13J59 . . . . 16.99**
- NEW #100-037-007 EMP for Glock 9mm (+6 Rds) & .40 (+5 Rds), 2H15B29 . . . . . 17.99**

## TANGODOWN VICKERS TACTICAL FLOORPLATES

Oversized For Reliable Mag Extraction Under All Conditions

The Vickers Tactical floorplate gives the shooter an enhanced gripping surface for ripping a stuck magazine from the gun if it refuses to fall free during a crucial reload. The larger plate works well with gloves and can even be hooked on a belt or holster in a tight situation. Plates are made of glass-filled nylon for high strength and impact resistance and have eight concave dots molded into the bottom for numbering or marking your magazines. **Standard Frame Glock** fits magazines for pistols in 9mm, .40 S&W, .357 SIG, and .45 GAP. Also fits Gen5 G17 and G19. Sold in a 5-Pak. **G42** fits Glock model 42 only. Sold in 2-Pak. **M&P** fits Smith & Wesson M&P full-size magazines for pistols chambered 9mm, .357 SIG, and .40 S&W; will not fit M&P Compact mags. **USA**  
**SPECS:** Nylon, matte black (BLK), Flat Dark Earth (FDE), O.D. Green (ODG), Glock Factory Green (GFG), and other listed below. 1.560" (3.97cm) long, 1.435" (3.64cm) wide, .250" (6.4mm) thick.

## TANGODOWN VICKERS TACTICAL +2 BASE PAD for GLOCK® 43

Boosts the Mag Cap of Your Glock Pocket Rocket By 2 Rounds

This Vickers mag extender serves two valuable functions on your G43: (1) For shooters with medium- to large-size hands, it extends the pistol's grip just enough to provide room for your bottom two fingers. You can now have a complete, secure hold on the pistol with your whole hand - particularly helpful on such a small gun firing full 9x19mm ammo. (2) It adds two rounds to the magazine capacity, boosting it from 6 to a more reassuring 8 rounds. A little more firepower is always good, right? Made of reinforced injection molded polymer - the same material the magazine body itself is made of. Includes a longer heat-treated stainless steel spring to provide enough oomph to keep the ammo moving AND ensure last-round slide lock back. Simply pop off the factory mag's floorplate and replace with this one. Fits Glock® G43 only. **USA**

- #100-019-803 +2 Base Pad for G43, Black, 9B11P99 . . . \$ 14.99**

**TARAN TACTICAL FIREPOWER BASE PAD**

Increases Mag Capacity & Helps Mag Drop Free

Machined aluminum magazine baseplate easily slips onto semi-auto pistol mags to increase capacity. With the Firepower installed, the mag's overall length stays within the USPSA 140mm limit. Increases capacity of a 17-rd 9mm mag to 23 rounds (+6), and a 15-rd .40 S&W mag to 20 rounds (+5). Still allows a fully loaded magazine to easily load into the gun, and the extra weight at the base helps the mag to drop free for easy reloads. Requires no tools to install. Includes replacement magazine spring. **USA**

- SPECS:** Machined aluminum, hardcoat anodized, matte black. **Glock** - 1 1/2" (3.8cm) tall, 1 3/4" (4.3cm) long, 1" (2.5cm) wide, 1.7 (47g) oz. wt. **S&W M&P** - 1 1/4" (3cm) tall, 1 1/4" (3cm) long, 1" (2.5cm) wide, 1.3 (37g) oz. wt.
- #100-012-644 Firepower Base Pad w/Spring, Glock, 7Z42L39..... \$29.99**
  - #100-012-645 Firepower Base Pad w/Spring, M&P, 7Z44J79..... 55.99**

**TAYLOR FREELANCE EXTENDED MAG PAD**

Increases Capacity, Maintains USPSA Mag Length Limits

Extended base pads of machined aluminum or Delrin® clamp securely to the magazine with an aluminum retainer plate, eliminating unexpected "speed unloads" when a plastic snap-on extender fails. Designed to keep magazine overall length within the 140mm and 170mm USPSA and IPSC limits. Some models come with an extended magazine spring; others use factory spring. Either way, there's nothing more for you to buy! **Glock** models fit "drop-free" magazines (will not fit original, non-drop magazines). **USA**

**SPECS:** Machined aluminum, hardcoat anodized, or Delrin (Glock only), black. Aluminum clamp, natural silver.

**APEX TACTICAL SMITH & WESSON SD/SD-VE SERIES SPRING KIT**

Lightens & Smooths Pull, Delivers a Snappy Reset

Simple, easy-to-install set of three springs produces a smoother trigger pull and improved reset - and is safe for reliable duty/carry use. Install as a stand-alone upgrade or in conjunction with Apex's SD Polymer Action Enhancement Trigger. Alone, this kit will reduce trigger pull weight by approximately 2 lbs. from the factory weight, while it smooths the pull and gives a quick, positive reset. Kit contains trigger return spring, striker spring, and striker block spring, plus an Apex SD slave pin to assist in installation of the trigger return spring. **Note:** NOT for use in the Sigma series pistols. **USA**

- #100-019-864 S&W SDVE Spring Kit, 7F17199..... \$ 19.99**

**GHOST COMPLETE SPRING SET for GLOCK®**

Fire Control Springs For Sport Or Defense

High-quality replacement springs to upgrade your Glock and enhance reliability. Set includes 4 lb. firing pin spring for competition and a heavier 6 lb. spring for self-defense, plus a reduced-power safety plunger spring and a 6 lb. trigger spring. **USA**

- #100-009-557 Glock Complete Spring Kit, 7K8E79..... \$ 10.99**

**CYLINDER & SLIDE BROWNING HI-POWER TRIGGER PULL SPRING KIT**

Reduces Pull Weight For A Light, Crisp Trigger Pull

Competition trigger pull spring kits reduce the pull weight of heavy factory triggers by approximately 2 1/2 lbs. for a much improved trigger pull and better accuracy. **#25A** fits all pre-'91 Browning Hi-Power pistols, and includes (1) 22 lb. hammer spring, (1) reduced power trigger return spring, and (1) reduced power firing pin spring. **#25B** fits 1991 and later Hi-Power pistols, and includes (1) 22 lb. hammer spring and (1) reduced power firing pin spring. **USA**

- SPECS:** Spring steel. **#25A** includes (3) springs. **#25B** include (2) springs.

  - #206-025-002 #25B Spring Kit, 6K16C14..... 18.99**

**BROWNELLS CHROME SILICON MAGAZINE SPRINGS for GLOCK®**

Consistent Delivery Of Every Round

Chrome silicon springs deliver consistent pressure and reliable feeding of every round in high-capacity magazines. Many springs continue to set and weaken over time, eventually failing to feed all the rounds in the mag and require replacement. Quality springs, like our chrome silicon springs, take an initial set (all springs do) then stabilize for long service life. Models for Glock 17/17L (7 & 19 rds) and Glock 19 (15 & 17 rds). **USA**

- SPECS:** Chrome silicon. 7" (17.7cm) long. Models for Glock 17/17L - 17 & 19 rds, Glock 19 - 15 & 17 rds. Available in 3-paks
- #080-000-305 Mag Spring, CS, Glock 17/17L, 3-pak, 8K13F49..... \$ 17.99**
  - #080-000-307 Mag Spring, CS, Glock 19, 3-pak, 8K13E49..... 17.99**

**BROWNELLS/ISMI S&W M&P HIGH-CAPACITY EXTRA-POWER MAGAZINE SPRING**

Applies More Pressure To Follower For Smooth Feeding From Extended Magazines

Extra-length magazine spring replaces factory-supplied spring for use with aftermarket magazine extenders and extended base pads that increase round capacity. Gives follower up to 10% more power for smooth, reliable feeding of rounds. Made of certified aerospace-spec chrome silicon wire, then heat-treated and stress-relieved to ISO 9000 standards. **USA**

- SPECS:** Chrome silicon steel wire. Fits S&W M&P pistols chambered in 9mm, .40 S&W, and .357 SIG.
- #078-000-168 S&W M&P Mag Spring, 8G5F99..... \$ 7.99**

**COMPLETE SPRING KIT & RECOIL SPRING ASSEMBLY for GLOCK®**

Restores Function & Reliability

Handy factory parts kits contain the most commonly needed springs to bring your Glock® back to original working condition. Kit includes: recoil spring assembly, firing pin spring, extractor depressor plunger spring, trigger spring, plus firing pin safety and spring assembly. Kits are available for all models of Glock® handguns.

**BROWNELLS WOLFF PRO-SPRINGS™ FOR ACTION-TUNING**

Brownells Pro-Spring™ Kits are made from the very finest high-tensile spring wire - wire that is formulated and drawn especially for the finest quality springs. The tension is actually built into the wire as it is being drawn - not added afterwards by heat treating. Consequently, Brownells Pro-Springs will continue to function correctly and continually, long after many of the other springs have taken on so much "set" that they have lost their ability to return to the required length and tension you need. It's simply not worth taking a chance when the best quality springs are only a small part of the repair or custom project. Find out for yourself the satisfaction of using a really good gun spring - designed and made expressly for us by Wolff, the Dean of quality gun springs for the professional firearms industry. **USA**

**SPECS:** RP = Reduced Power, XP = Extra Power, FSW = Factory Standard Weight.

- BHP-501 FOR BROWNING HI-POWER** - Contains 1 each FSW 17 lb., variable power recoil spring and 32 lb. hammer spring plus, (1) 28 lb., RP hammer spring and XP firing pin spring. **#080-665-501 Kit BHP-501, 8K11G99..... \$ 15.99**

- BSBF-600 FOR BERETTA 92/96 F/SB** - Contains 1 each FSW 13 lb., recoil spring and 20 lb. hammer spring plus, (1) 18 lb., RP hammer spring, (1) XP firing pin spring. **#080-665-600 Kit BSBF-600, 8K12H74..... \$ 16.99**

- GM-455 FOR COLT GOVERNMENT .380** - Includes (1) 12 lb., XP recoil spring and (1) XP firing pin spring to improve functioning, plus (1) RP 20 lb. mainspring (hammer spring) to lighten trigger pull, and (1) FSW 23 lb. hammer spring. **#080-665-355 Kit GM-455, 8K12D74..... \$ 16.99**

- CM-456 FOR COLT MUSTANG .380** - Includes (1) 12 lb. XP recoil spring and (1) XP firing pin spring to improve functioning, plus (1) RP 20 lb. mainspring (hammer spring) to lighten trigger pull, and (1) FSW 23 lb. hammer spring. **#080-665-356 Kit CM-456, 8K12L74..... \$ 16.99**

- RMK II FOR RUGER® MARK II PISTOL** - Kit contains (1) XP recoil spring, (1) XP firing pin spring, (1) RP hammer spring and (1) RP trigger spring. **#080-665-002 Kit RMK II, 8K12P74..... \$ 16.99**

- RPN-105 FOR RUGER P85 & P90®** - Kit contains 1 each FSW 11 lb., recoil spring and 23 lb., hammer spring, plus (1) 20 lb., RP hammer spring and (1) XP firing pin spring. **#080-665-105 Kit RPN-105, 8K12P74..... \$ 16.99**

- 95427 FOR SIG P220** - Does not fit current production guns with plastic mainspring housing and stirrup. S.N. 219166 and above use heavier recoil springs than earlier models. Contains (1) 20 lb., FSW recoil spring, plus (1) 24 lb., FSW hammer spring, (1) 18 lb., RP hammer spring and (1) XP firing pin spring. **#080-665-110 Kit 95427, 8K12F74..... \$ 16.99**

- SSP-701 FOR SIG P226** - Contains 1 each FSW 15 lb., variable recoil spring and 20 lb. hammer spring plus (1) 18 lb., RP hammer spring and (1) XP firing pin spring. **#080-665-701 Kit SSP-701, 8K12F74..... \$ 16.99**

- 95308 FOR SIG P225, P228, P229** - Contains (1) FSW 16 lb., Recoil spring, (1) EP firing pin spring, plus 1 each FSW 24 lb. Hammer spring and RP 19 lb. Hammer spring. **#080-665-109 Kit 95308, 8K11N19..... \$ 13.99**

- SWODA-205 FOR S&W 39, 439, 539, 639, 59, 459, 559, 659, 3904, 3906, 5903, 5904, & 5906** - Contains 1 each FSW 14 lb., recoil spring and 20 lb. hammer spring plus, (1) 18 lb., RP hammer spring and (1) XP firing pin spring. **#080-665-205 Kit SWODA-205, 8K9B59..... \$ 11.99**

- TSA-800 FOR TAURUS PT-99/92** - Fits all variations. Kit contains (1) 11 lb., RP recoil spring, (1) 18 lb., FSW hammer spring and (1) 16 lb., RP hammer spring. **#080-665-800 Kit TSA-800, 8K12B74..... \$ 16.99**

**NEW! XTECH TACTICAL MTX +5 MAGAZINE EXTENSION**

"Supercharges" Your Mags With Extra Capacity; NO Compromises in Reliability

This mag extension adds an additional 4 to 5 rounds to the capacity of your H&K or M&P, so you can really make the "pew berries" fly at the range! Installation is simple and only takes a couple of minutes, no tools required. Just remove your mag's original floorplate, replace the factory spring with MTX's extended stainless steel spring, install the MTX extender, and you're ready for action. Don't worry about those aggravating hang-ups that can occur with magazine extenders. XTech has carefully engineered the leading edge of the extender's inner housing to produce a smooth, consistent wall between the main mag body and

the extender. The result flawless feeding. MTX's extended follower spring has enough persistence to ensure unmatched reliability and last-round lock-back of the slide. Constructed of sturdy reinforced molded polymer in black, and fits both 9mm and .40 S&W magazines. Why settle for ordinary factory magazines when an MTX extender makes mag dumps less frequent and range time a whole lot more fun? **H&K** fits Heckler & Koch P30, VP9 and VP40 pistols. **M&P** fits both original M&P and M&P M2.0 full-size 9mm and .40 S&W magazines; adds +5 rounds to 9mm, +4 to .40. **M&P Shield** fits 9mm pistols; adds +2 rounds. **USA**

**GUARANTEED. FOREVER.® SINCE 1939**

**ZEV TECHNOLOGIES**  
**COMPETITION SPRINGS for GLOCK®**

For A Smoother, Crisper, More Refined Trigger Pull;  
Drop-In Installation

Precisely calibrated spring weights deliver consistent force through the entire compression/release cycle to give you a light, refined trigger without sacrificing the reliability of your pistol's Safe Action system. High-stress, aerospace-grade stainless steel spring wire is heat- and cryo-treated for 99.9% consistent energy output, so trigger pull feels the same every time. For maximum improvement over factory pull, use with V2 Race Connector, below. **Trigger Spring** has nearly 30% more power than factory spring, yet actually reduces pull by as much as 1 lb. for improved control. Also produces faster trigger reset for quicker follow-up shots. Reduced power **Safety Spring** reduces friction caused by the firing pin safety, further smoothing the pull. **Striker Spring** is designed for improved consistency and durability over factory spring. Available in standard factory weight for a 3 to 3 1/2 lb. pull or light model that reduces pull by at least 1 lb. to a consistent 2 to 2 1/2 lb., while preserving reliable primer ignition. **Competition Spring Kit** contains the trigger spring, firing pin safety spring, and standard power striker spring. **SPECS:** Spring stainless steel wire. Fits all Glock pistols.

- #100-004-108 Competition Spring Kit, 8B11J04 ..... \$ 12.99
- #100-005-562 Trigger Spring, Only, 8B3J39 ..... 3.99
- #100-005-561 Firing Pin Safety Spring, Only, 8B3F39 ... 3.99

- #100-005-564 Light Striker Spring, 8B00PHP ..... 2.99

**ISMI HIGH CAPACITY**  
**PREMIUM MAGAZINE SPRINGS**

Chrome Silicon Wire For Superior Performance & Durability

Wound with high tensile, chrome silicon wire that's shot peened, heat treated, then stress-relieved for the longest service life possible, without cracking or failure. **SPECS:** Chrome silicon steel wire.

- BERETTA** - Fits Beretta 92 and 96 high capacity magazine; holds 15 rounds of 9mm, 13 rounds of .40 S&W.
- #445-000-020 Beretta Magazine Sprg, 5D9P59 ..... \$ 11.99
- GLOCK** - Fits 9mm and .40 S&W high capacity magazines, and those with +1 and +2 base pads.
- #445-002-100 Glock Spring, 5D9N59 ..... \$ 11.99
- GLOCK** - Fits Glock 19, 21, 23 and 32, Law Enforcement, high capacity magazines. 10% Extra power.
- #445-000-003 Mini-Glock Spring, 5D9J59 ..... \$ 11.99
- GLOCK 140mm** - Fits 9mm and .40 S&W high capacity magazines with +2 and +4 base pads.
- #445-006-140 140mm Glock Spring, 5D11Q99 ..... \$ 15.99

**A NOTE ON SPRING "SET"** - "Set" is normal in all springs, and is the "held-compression" all springs take after being put under compression for a length of time. What is critical about "set" is that all springs do not take it equally, or stabilize at a predetermined amount of "set". In measured tests, Brownells Pro-Springs™ took 4 to 10 times less set after equal time under compression than did other springs tested. And once stabilized, took no more set. The other springs continued to take "set" until we stopped testing them. Prove it to yourself . . . measure the springs you want to test; lock them in a vise overnight, and when you take them out, measure how much length has been lost. (Do the test on the same springs a second - or third - time. Consider the effect this "shortening" will have an action job that was based on the spring's original length. Trigger pull, action smoothness and even the safe functioning of the gun can be ruined by an inferior spring.

**ISMI SEMIAUTO CERTIFIED SPRING**

Designed For Maximum Consistency & Reliability

CAD designed and manufactured to aerospace specifications from chrome silicon or chrome vanadium for maximum durability, consistency and reliable performance. Built to aerospace specifications; heat treated, shot peened and fully stress relieved to minimize spring set. **SPECS:** Chrome vanadium flat wire. Chrome silicon round wire or flat wire.

- GLOCK RECOIL SPRINGS** - Flat wire, chrome vanadium alloy, wound to fit factory diameter guide rod of .250" or less. **Glock 17** fits large frame 17, 17L, 20, 21, 22, 24, 31, 35. Factory weight is 17 lb. **Glock 19** fits 19, 23, 25, 32. Factory is 18 lb. **SPECS:** Chrome vanadium flat wire.
- #445-000-012 13 lb. Glock 17 Spring, 5D8E79 ..... \$ 10.99
- #445-000-005 15 lb. Glock 17 Spring, 5D8J79 ..... 10.99

- #100-002-624 11 lb. Glock 17 Spring, 5D8H79 ..... 10.99
- #100-002-623 18 lb. Glock 19 Spring, 5D8M79 ..... 10.99

- BERETTA RECOIL SPRING** - Chrome silicon (CS) springs wound for 14 and 16 lb. Beretta Models 92 & 96. **SPECS:** Chrome silicon round wire.
- #100-002-626 14 lb. CS Beretta Spring, 5D8L99 ..... \$ 11.99
- #100-002-625 16 lb. CS Beretta Spring, 5D8P99 ..... 11.99
- S&W M&P** - Chrome silicon (CS) flat spring in reduced power 13 lb. weight. Factory weight is 16 lb. **SPECS:** Chrome silicon flat wire.
- #445-000-027 13 lb. CS S&W M&P Spring, 5D9H74 ... \$ 12.99

**TACTICAL SPRINGS BERETTA 92/M9**  
**RECOIL SPRING**

Consistent Performance For High-Stress, High-Volume Shooting

Factory weight 13-lb. recoil spring helps ensure consistent, dependable operation for tens of thousands of compression cycles. Perfect for the high-volume shooter who needs a finely tuned spring that delivers its rated power as reliably on the 50,000th shot as it did on the first. Made from chromium-silicon steel alloy selected specifically for its hardness, heat resistance, and ability to withstand high stresses—the same alloy used for valve springs on automobile engines. Cryogenically treated to relieve internal stress, and surface impregnated with Sprinco's proprietary Plate+ molybdenum disulfide lubricating coating. **SPECS:** Cryo-treated chrome silicon alloy. Fits full-size Beretta 92/M9.
- #943-000-016 Beretta 92/M9 Recoil Spring, 3D10M49 ..... \$ 13.99

**NEW!** Item **WOLFF RECOIL SPRINGS**

High-Quality Replacements/Upgrades Get Your Pistol Running Smoothly Again

For optimum reliability with hardball and hot handloads. Improves overall function by matching the spring to the specific loads being fired. **SPECS:** Steel, black.

- BROWNING HI-POWER RECOIL CALIBRATION PAK** - A wide range of recoil springs to match your loads and shooting conditions. Factory recoil spring is 17 lb. Fits 9mm and .40 S&W pistols. (1) 17 lb., (1) 18.5 lb., (1) 20 lb. and (1) 22 lb. recoil springs, plus (3) extra power firing pin springs. 18.5 lb. extra power recoil spring also available separately.
- #969-131-370 Recoil Pak, 9F19B49 ..... \$ 25.99
- #969-407-180 18 1/2 lb. Recoil Spring, only, 9F7J49 ..... 9.99

- RUGER® LCP® RECOIL SPRINGS** - Factory weight is 9 lb. Heavier-weight 13 lb. spring improves cycling reliability, especially with hot loads. Recoil "spring" consists of an outer and inner spring; comes with an extra-power firing pin spring to further promote reliable ignition. **Recoil Calibration Pak** contains one each 11, 12, and 13 lb. recoil springs, plus three extra-power firing pin springs.
- #969-000-226 LCP Recoil Calibration Pak, 9F15K99... \$ 19.99
- #969-000-237 LCP 13 lb. Recoil Spring, 9F8J24 ..... 10.99

- SMITH & WESSON M&P RECOIL SPRINGS** - Factory weight (16 lb.) spring for full-size 9mm, .40 S&W and .357 SIG pistols. NOTE: These springs require a full-length, non-captive guide rod. Each recoil spring, including those in calibration kits, comes with a factory weight striker spring. Calibration Paks let you try out different weights to see which works best in your pistol. **Extra Power (XP) Recoil Calibration Pak** contains one each 17, 19, 20, 22, and 24 lb. recoil spring, plus five replacement, factory-weight striker springs. **Reduced Power (RP) Recoil Calibration Pak** contains one each 12, 14, and 15 lb. reduced-power recoil spring, plus three factory weight striker springs.
- #969-000-233 M&P XP Recoil Calibration Pak, 9F25E49 ..... \$ 33.99
- #969-000-232 M&P RP Recoil Calibration Pak, 9F15H74 ..... 20.99
- #969-000-240 M&P 16 lb. Factory Weight Spring, 9F7A49 ..... 9.99

- SIG SAUER RECOIL CALIBRATION PAK** - Each spring pack is provided with three extra power firing pin springs. **P-225/228/229 Spring Pak** contains (1) 17 lb., (1) 19 lb. and (1) 21 lb. extra power recoil springs. Factory is 16 lb. **P-220 and P-226 Spring Paks** include (1) 15 lb., (1) 16 lb., (1) 18 lb., and (1) 20 lb. recoil spring. Factory P220 is 20 lb. factory P226 9mm is 15 lb., factory .357 Sig and .40 S&W are both 20 lb.
- #969-131-940 P-225/228/229 Spring Pak, 9F15M74 ... \$ 20.99
- #969-131-770 P-220 Spring Pak, 9F20Q99 ..... 27.99
- #969-000-205 P-266 Spring Pak, 9F20M24 ..... 26.99

- WALTHER PPK/PPKS RECOIL CALIBRATION PAK** - A variety of reduced power recoil springs to match your handloads and provide optimal slide function. Includes (1) 14 lb., (1) 15 lb., (1) 16 lb. and (1) 17 lb. reduced power recoil springs; and (3) extra power firing pin springs. Fits 9mm (.380) pistols. Factory standard recoil spring is 20 lb.
- #969-000-194 Recoil Calibration Pak, 9F19L49 ..... \$ 25.99

- BERETTA 92/96 RECOIL SPRINGS** - 13lb., factory standard weight, recoil spring only. **Recoil Calibration Pak:** - 1 each 15 lb., 16 lb., 18 lb., and 20 lb. extra power recoil springs, plus (3) extra power firing pin springs. **Performance Pak:** - 1 each 10 lb. reduced power, and (1) 15 lb. extra power recoil spring, plus (1) extra power, firing pin spring and (1) 18 lb. reduced power hammer spring.
- #969-000-141 13 lb. Recoil Spring, 9F7I49 ..... \$ 9.99
- #969-131-900 Calibration Pak, 9F20K99 ..... 27.99
- #969-140-300 Performance Pak, 9F11Q99 ..... 15.99

**GLOCK RECOIL SPRING** - Replaces the factory spring with (1) non-captive, recoil spring and (1) striker spring to tailor recoil function. Factory weight, Glock 17 (**G17**) is 17 lb. and also fits Glock 17L, 20, 21, and 22. Glock 19 (**G19**) is 18 lb. factory weight and also fits 23. Springs are for current-production models.

**VOLQUARTSEN RUGER MARK II/III**  
**COMPLETE MAINSPRING ASSEMBLY**

Precision Made Replacement Mainspring Assembly

Designed for the Ruger rimfire semi-auto, this complete mainspring assembly is wire EDM-cut and CNC-machined for the best fit and performance. Drop-in replacement mainspring assembly does not have the lock feature found on Ruger factory MKIII mainsprings. **SPECS:** Steel, black.

- #930-000-135 Ruger MKII/III Mainspring, Black, 3Z00QH ..... \$ 73.99

**WILSON COMBAT BERETTA 92F**  
**#322 "CUSTOM TUNE" SPRING KIT**

Add Reliability, Improve Function

High-quality springs drop in to improve handgun performance. High tensile strength wire delivers reliable function. **#322 Kit** for Beretta 92F/G includes firing pin spring, 18 lb. reduced-power hammer spring, 10 lb. reduced-power recoil spring, 15 lb. extra-power recoil spring. **#758CK Competition Kit** for Beretta 92/90 Series contains an 11.5 lb. recoil spring, RP 12 lb. hammer spring, RP 13 lb. hammer spring, firing pin return spring, extractor spring, and trigger return spring. Use this kit for standard velocity loads; the reduced-power hammer springs (factory standard is 20 lb.) are suitable for competition use only. These hammer springs will reliably ignite most domestically produced primers. **#752FS14 Bullet Proof™ Flat Wire Shok-Buff Kit** for Beretta 92/96 contains a fluted steel guide rod fitted with a Shok-Buff to reduce frame battering and sized for the specially engineered flat wire 14 lb. recoil spring. The result will be gentler felt recoil, less muzzle flip, AND virtual elimination of frame or locking block damage in high-round-count guns. Will retrofit to 92A1/96A1 and the 90-Two in both 9mm and .40 S&W. **SPECS:** Kit contains one each of the springs listed below. **RP** = Reduced Power, **XP** = Extra Power.

- #965-322-000 Wilson Kit #322, 5F14D24 ..... \$ 14.95

**WOLFF PISTOL SERVICE PAK**

All essential factory weight coil springs for a particular semi-auto pistol. No fitting required. Magazine spring not included. **SPECS:** Steel, black.

## WOLFF SEMI-AUTO EXTRA POWER MAGAZINE SPRING

Better Feeding For  
Your Semi-Auto

Increased pressure stabilizes the follower and improves feeding, especially on high-capacity magazines. **Beretta** fits Full Size, Compact and Centurion. **Browning HP** fits Hi-Power 9mm and .40 S&W. **Caspian** has 14 coils, can be used for repairing Browning, S&W, SIG, Beretta and similar high-capacity magazines. **CZ/EA-9** fits CZ-75 and Tanfoglio EA-9/P9/TZ-75/AT-84 9mm, 16 shot and .40 S&W, 12 shot. **Glock - Hi-Cap 17** fits 17L, 20 (15-rd), 22, 31 (15-rd), 34 (17- and 19-rd), and 35 (15-rd). **Hi-Cap 19** fits 19 (15- and 17-rd), 21 (10- and 13-rd), 23 (10- and 13-rd), 26, 27, 29, 30, 33 (10-rd). **Big Stick** fits high capacity, 31- and 33-round magazines. **HK USP - #10** fits 10-rd magazines for 9mm, .40 S&W, and .45 ACP. **SIG P220** provides 10% more power in your older .45 ACP Sig P220 and is the factory standard spring in newer P220s with a green recoil spring. Also fits the Browning BDA .45 ACP. Separate models available for magazines with a metal floorplate (MF) or a plastic floorplate (PF). Will not fit 8-round magazines made by Mec-Gar. **SIG P226** fits 15-round mags, **P228** fits 13-round mags, and **P229** fits 12-round mags. ■

## WOLFF TRIGGER GROUP COMPETITION PAK for GLOCK®

Easily Improve & Lighten  
Trigger Pull Without  
Permanent Modifications

Contains the correctly calibrated springs you need to lower pull weight and improve trigger pull quality of your Glock pistol without complicated gunsmithing or permanent alterations. Installing this kit will not disable or diminish the effectiveness of the well-proven Glock Safety System. Designed specifically to meet the needs of competitive shooters; this alteration is not recommended for duty pistols. ■  
SPECS: Steel. Includes one (1) each of the following springs: 4lb. reduced power striker spring, reduced power safety block spring, and extra power trigger spring. Fits all models and calibers of Glock pistols.

#969-000-177 Trigger Group Competition Pak for Glock, 9F8N99 ..... \$ 11.99

## WOLFF HIGH STANDARD SPRING KITS

Improves Performance, Restores Reliability

**Service Pack** includes 1 each of the factory standard springs: recoil spring, firing pin spring, extractor spring, slide lock spring, trigger bar spring, hammer spring, sear spring, magazine catch spring, and takedown spring. **Extra Power Recoil Spring** - 6 lb. recoil spring (factory weight is 5.5 lb.) gives more positive cycling and comes with an extra power firing pin spring. ■

SPECS: Spring steel. Fits all push-button, takedown models.

#969-691-910 High Std Service Pack, 9F14H99 ..... \$ 19.99

#969-447-060 6 lb. Hi-Std Recoil Sprg, 9F7N49 ..... 9.99

**HD MILITARY RECOIL SPRINGS** - For all early internal and external hammer models, Dura-Matics and lever takedown models. Extra coils allow fitting to individual gun. ■

#969-160-420 2-pak Recoil Springs, 9F9N74 ..... \$ 12.99

## WOLFF SEMI-AUTO SPRINGS

**GLOCK REDUCED POWER STRIKER SPRING** - Replaces the factory striker (firing pin) spring to lighten and improve the trigger pull for competition. 4 lb. rating. Factory weight is 5.5 lb. ■

#969-161-620 Glock Striker Sprg, 3-Pak, 9F7D49 ..... \$ 9.99

**BROWNING HI-POWER EXTRA POWER MAG CATCH SPRING** - Provides security against accidental release. ■

#969-000-035 3-Pak XP Mag Catch Spring, 9F8J24 ..... \$ 10.99

## WOLFF EXTRA POWER STRIKER SPRING for GLOCK®

Improves Ignition Reliability  
On Glock Pistols

Drop-in 6 lb. extra-power striker spring replaces the Glock 5.5 lb. factory spring to improve ignition reliability. Ideal for use with heavy primers or to tune trigger pull, the spring is also recommended by Ghost when installing their Rocket 3.5 connector (not included) on 45 ACP or 10mm models. Not for use with reduced-power recoil springs. Sold in 3-paks. ■  
SPECS: Chrome-silicon steel. 6 lb. rated. Fits all Glock pistols. Do not use with reduced-power recoil springs.

#969-000-245 Extra-Power Striker Spring, 3-Pak, 9F7D49 ..... \$ 9.99

## WOLFF SIG MAINSPRING KIT

Reduces Trigger Pull,  
Improves Accuracy

Three, reduced power springs for tuning and smoothing felt trigger pull. Fits P220, P225, P226, P228, and P229 that use a short mainspring with a plastic hammer spring base insert. Kit contains 1 each of 17, 18, and 19 lb. reduced-power mainsprings. P220 factory spring is 22 lb. P226 and P229 factory spring is 24 lb. **P230 Reduced-Power Hammer Spring** is 18 lbs. Factory weight is 20 lbs. Fits pistols with serial numbers BELOW #S165076 (blue) and #S053921 (stainless). ■

#969-000-021 SIG Mainspring Kit, 9F7A49 ..... \$ 9.99

#969-000-259 P230 RP 18 lb. Hammer Spring, 9F3K19 ..... 3.99

## AGENCY ARMS FLAT-FACED TRIGGER for GLOCK®

Smooth, Consistent Pull & Short, Crisp Reset -  
RED Models Available ONLY from Brownells

Installing this trigger is the quickest, easiest way to make a major upgrade to the performance of your Glock. This is a drop-in upgrade - meaning you can do it yourself in a few minutes - that gives your Glock a noticeably smoother trigger pull with minimal pre-travel and a short, snappy, positive reset that gives you a distinct tactile & audible signal when trigger is reset and ready for the next shot. A high-polish trigger bar and a Glock factory "minus" trigger connector work together to produce a consistent, even, 3.5 lb. pull that's light enough to promote better accuracy yet safe enough for use on duty/carry pistols. The function of the critical factory safety lever in trigger face is fully maintained. Many precision shooters prefer the flat-faced trigger shoe because it reduces the contact area between the finger and trigger. This gives you better control throughout the pull and lets you control perceived pull weight by positioning your finger higher or lower on the shoe for the precise amount of leverage. A "toe" at the bottom of the shoe serves as an indexing point so you won't put your finger TOO far down. Model for **Standard (STD)** frame pistols fits Gen3 or Gen4 G17, 19, 22, 23, 26, 27, 31, 32, 33, 34 and 35 pistols. **Large** frame fits any generation .45 ACP and 10mm pistols. There's a separate model just for the **G43**, which is fitted with a Ghost, Inc., connector, and a **Gen5** model available only in red that fits only the Gen5 model 17, 19, 19X, 26 and 34 pistols. **Red** models are available exclusively from Brownells and have an eye-catching red anodized finish on the trigger shoe that will contrast nicely with your pistol's frame and slide. ■

SPECS: 6061 T6 aluminum, hardcoat anodized, black, gray, or red. Polished stainless steel connector, trigger bar & pin.

## NEW! Item APEX TACTICAL FN 509 & FNS 9C ACTION ENHANCEMENT TRIGGER KIT

Love Your FN Pistol But  
Wish for a Better Trigger?  
Here's the Solution!

Apex's upgrade kit will give your 509 a lighter, smoother trigger pull with less pre-travel, shorter overall pull length, AND a shorter (therefore faster) reset. Like Apex's Action Enhancement Kits for the S&W M&P and SIG pistols, it's an easy-to-install replacement for your 509's factory trigger, trigger bar, and sear - basically a drop-in DIY trigger job! When installed, the Apex FN 509 Action Enhancement Kit will reduce the trigger pull weight to approximately 5.5 lbs.; actual weight will vary slightly from one FN 509 to another. Rather than the OK-but-not-great feel of the plastic factory trigger, Apex's trigger is made of machined aluminum with their trademark "Flat Face." Many shooters prefer the flat face for its more comfortable feel and precise control akin to a 1911 target trigger. The polished stainless steel sear and trigger bar help keep the pull SMOOTH. At the same time this "AEK" will not alter the function or reliability of your 509's factory trigger safety, firing pin safety, drop safety, or out-of-battery safety. Want the improved trigger pull but you're a traditionalist when it comes to the shape of your trigger? No problem, a **Curved Shoe** model is available! ■

## APEX TACTICAL SIG P320 ADVANCED TRIGGER

Flat Face Trigger

Curved Trigger

Redesigned Trigger Geometry Gives Better Control & Reduces Pull Weight

A drop-in replacement for the factory trigger that improves the feel and pull of your P320's trigger. Redesigned geometry reduces the pull weight by about 20%, or 2 lbs., from the factory weight. NO tools are required for installation, and these triggers will not interfere with the pistol's drop-test safety. They work in ALL P320 models but DO NOT work in the SIG P250. Choose a traditional **Curved Face** or a **Flat Face** that places the finger lower, closer to its natural resting position, so you get better leverage during the pull for more precise control and better shooting. Either way, you get a better, lighter pull! With the Curved trigger you get a 6.25 lb. pull and with the Flat Face trigger, the pull drops to about 5.75 lbs. You can get either trigger alone or with the **Forward Set Trigger Bar**, which is a drop-in replacement for the factory part. The trigger combined with the FS Trigger Bar gives you an immediate 30% reduction in pull weight, 30% reduction in length of pull, and 20% shortening in reset. The benefits are two-fold: the shorter pull promotes more accurate shooting, shorter reset helps you make follow-up shots faster - and who doesn't prefer a lighter pull? Factory drop safety values are preserved. Kit does not reduce pull weight on X-Series models, but DOES reduce the length of pull by 30%. ■

**NEW!** Items **APEX TACTICAL ACTION ENHANCEMENT TRIGGER**

**for GLOCK®**

Gives Your Glock® A Smoother Pull, Crisper Break & Faster Reset

Apex's all-aluminum, drop-in replacement for the plastic factory trigger gives your Glock® a smoother pull, crisper break, reduced over-travel, and a faster reset. Shoe has a pivoting safety tab that maintains the factory tolerances and function. Works in current-production Glock® model pistols including Gen4 and the G43. (NOT designed to function in the narrower frame of the G42.) If your pistol is a Gen3 model, purchase the trigger alone and re-use the gun's original factory trigger bar. If your gun is a Gen4, purchase the **Trigger + Gen3 Trigger Bar** kit. The Gen3 trigger bar works fine in Gen4 guns. Pair up this trigger with Apex's Ultimate Safety Plunger for an even smoother takeup. Available in basic **Black**, or make your Glock stand out from the pack with a **Red, Blue or Purple** anodized finish. **Gen5** - Trigger also available with trigger bar for the new Gen5 G17 and G19 models. NOT for use in Gen3-4 pistols.

**SPECS:** Anodized aluminum trigger with steel trigger bar, natural silver finish. Fits the following Glock pistols, including Gen4 versions: 17, 17L, 19, 22-24, 26, 27, 31-35, 37-39. **NOTE:** If your gun is a Gen4, you must purchase the Trigger + Gen3 Trigger Bar kit and replace both components.

**APEX TACTICAL S&W M&P POLYMER TRIGGER KIT**

Reduces Travel & Improves Felt Trigger Pull

Enhancement kit features a polymer trigger with improved geometry and redesigned safety lever that is more comfortable and controllable than the original. AEK Kit reduces pre-travel by 20 percent; Forward Set Kit reduces pre-travel and over-travel and comes with Forward Set Sear, and Striker Block Kit, as well as two return springs that allow the shooter to choose between a 4 pound and a 5.5 pound pull weight.

**SPECS:** Polymer AEK Trigger Kit includes Apex Polymer Action Enhancement Trigger, Heavy Duty Sear Spring, Apex Trigger Return Spring Slave Pin. Forward Set Polymer Trigger Kit includes Apex Polymer Forward Set Trigger, Forward Set Sear, Ultimate Striker Block Kit, Polymer Forward Set Spring Set. Fits all S&W M&P Semi Auto Pistols in 9mm, 40 S&W, 357 Sig, and 45 ACP. Does not fit the M&P Shield.

#100-012-512	Polymer AEK Trigger Kit, 7F00LTL	\$ 39.99
#100-012-513	Forward Set Polymer Trigger Kit, 7F11D59	123.99

**APEX TACTICAL S&W M&P FORWARD SET SEAR & TRIGGER KIT**

Drop-In Upgrade Gives Smoother Pull, Faster Follow-Up Shots

Drop-in kit gives your M&P a much smoother, shorter trigger pull with a cleaner break than the factory trigger - similar to that of a classic 1911 pistol. Reduces take up and overtravel, and moves the sear break point farther forward to cut down on the length of the pull. A shorter pull means better accuracy and faster follow-up shots. Comes with two interchangeable trigger return springs, one for a 4 lb. pull, the other for a 5.5 lb. pull, so you can further customize the trigger to your needs. Trigger shoe retains the pivoting safety bar to prevent unintended operation.

**SPECS:** Trigger - aluminum, matte black anodized. Sear - hardened steel. Fits all Smith & Wesson M&P pistols, except Shield. Note: older, early-production guns with 1/8" dia. sear plunger and spring require upgrade to new-style sear housing block with 1/8" dia. sear plunger and spring. Kit includes trigger, sear, striker block & spring, sear spring, RAM spring, trigger slave pin, 2 trigger return springs, installation tool, and instructions.

#100-008-892	M&P Forward Set Sear & Trigger Kit, 7F00BZB	\$ 156.99
--------------	---	-----------

**NEW!** Item **APEX TACTICAL SMITH & WESSON M&P FLAT-FACED FORWARD SET TRIGGER KIT**

Gives A Light, Consistent Pull With A 1911-Like Feel

Drop-in replacement for factory trigger has less pre-travel and over-travel to give your M&P total trigger travel distance similar to most factory 1911-type pistols. Lets you put your finger lower on trigger face for increased leverage so you can take advantage of lower trigger pull weights for competition, such as USPSA Open and Limited Division. Trigger face replicates the feel of a flat 1911 trigger, while retaining the pivoting safety to preserve factory

safety values. Smooths uptake and reset, while reducing pull weight to between 4 and 5 lbs. (can be set as low as 3 lbs. with lightweight springs - not recommended for duty/carry use), all giving you better control for consistent shot placement. Fits all S&W M&P center-fire pistols manufactured after June 2011, except Shield. Installation may require minor gunsmithing. Available with trigger shoe in matte **Black**, or if you want to stand out from the crowd, **Flat Dark Earth (FDE)**, **Red**, **Blue** or **Purple** anodized finish. Separate model for M&P M2.0, and for you traditionalists, you can get this kit with a **Curved** trigger shoe.

**SPECS:** Kit includes trigger, sear, striker block and spring, 2 trigger returns spring, sear spring, RAM spring, and polymer slave pin.

**APEX TACTICAL WALTHER PPO FLAT-FACED FORWARD SET TRIGGER & TUNED TRIGGER BAR**

Smoother, Shorter Pull, Snappy Break & Faster Reset

Developed at the request of Walther USA, this trigger unit brings the benefits of Apex's FFFS trigger for the M&P to the PPO. It's a direct drop-in replacement for the plastic factory trigger and trigger bar that gives the PPO a smooth, crisp "1911-esque" trigger pull with about 40% less overall travel than the factory trigger. So you get a significantly smoother (did we mention that?) pull with shorter takeup, less overtravel, and a much shorter reset, all of which helps you shoot more accurately. Apex's upgrade is designed for the competition shooter, but any PPO fan will enjoy its benefits, especially since it fully maintains the factory trigger's center-mounted pivoting safety's values. It's difficult to improve on one of the best out-of-the-box factory semi-auto triggers currently produced, but that's exactly what Apex has done here.

**SPECS:** For use in PPO M1 and M2 models in 9mm, .40 S&W and .45 ACP, including the Q5 Match model.

#100-018-832	Walther PPO Flat-Faced Fwd Set Trigger, 7F11L59	\$ 123.99
--------------	---	-----------

**APEX TACTICAL S&W M&P ACTION ENHANCEMENT TRIGGER + DUTY/CARRY KIT**

Drop-In Upgrade Kits Take Your M&P's Trigger from Factory to Fantastic!

Apex's Action Enhancement Trigger Duty/Carry Kit is engineered to give your M&P a smoother, more consistent, lighter (5 to 5 1/2 lb.) trigger pull with a shorter reset than the factory trigger. Pre-travel and over-travel are reduced by ap-

proximately 20%, while the rounded face gives the shooter's finger a comfortable surface when firing. Pull weight is still safe for duty/carry applications, and the center-mounted pivoting safety maintains the original factory safety values. Even better, you can get this kit with an economical yet ergonomically pleasing **Polymer** trigger shoe (with matching or contrasting color on passive safety lever) a machined **Aluminum** shoe that provides a pleasantly solid, reassuringly secure contact point for the finger. These components are engineered for drop in installation and normally should not require further gunsmithing. However, armorer or gunsmith installation is recommended. Separate kits for M&Ps chambered in 9mm/.40 S&W and .45 ACP. Will NOT work in M&P M2.0 or .22 LR models. See separate listing for M&P Shield kits. **Kit contents:** trigger, heavy-duty sear spring, fully machined sear, duty/carry spring set, Ultimate Striker Block Kit, and slave pin for installing trigger return spring.

**NEW!** Items **APEX TACTICAL S&W M&P AEK TRIGGER**

High-Performance Replacement for Factory Trigger in Economical Polymer or Extra-Strong Aluminum

Direct replacement for the factory trigger reduces take-up and over-travel by 20% in the S&W M&P pistol. Also upgrades the factory's hinged trigger with a solid body trigger and a center mounted pivoting safety. The pivoting safety keeps the trigger from moving until it is depressed by the shooter's trigger finger to prevent unintended operation. The flat, target-style trigger face helps shooters position their finger on the centerline and helps them to press the trigger directly to the rear for better control. Works in all centerfire (9mm, .357 SIG, .40 S&W and .45 ACP) versions of the M&P with factory parts or with Apex Tactical Internals, except the Forward Set Sear and Trigger Kit. Does NOT function in Shield models. Available with machined **Aluminum** or molded **Polymer** trigger shoe. Installation video is available on the manufacturer's website.

**SPECS:** Aluminum, matte black anodized, or reinforced molded hard polymer. Fits all M&P pistols in any centerfire caliber currently available. Not for use with Apex Tactical Forward Set Sear and Trigger Kit.

**NEW!** Items **APEX TACTICAL ACTION ENHANCEMENT KIT for GLOCK®**

Some Shooters Complain About the Glock Factory Trigger - Here's The Solution

Like Apex's other trigger upgrade products, this is a direct, drop-in replacement for the plastic factory trigger that reduces pre-travel, overall trigger travel, and reset. Gives you a smooth take-up and reset surrounding a nice, crisp trigger break. The machined aluminum trigger shoe and safety lever are ergonomically contoured for the finger to nestle comfortably on them - and feel much solid than the plastic trigger. Apex's Ultimate Safety Plunger significantly smooths out the trigger take-up compared to the factory component, while maintaining the factory's critical safety values. You also get a polished stainless steel Gen3 trigger bar that works fine on Gen4 guns, plus Apex's Performance Connector that reduces the factory trigger pull weight by approximately 1 lb. Couple that with the shorter travel and smoother pull, and we expect Glock critics will be converted to fans!

**SPECS:** Gen3-4 Kit for use in the following Glock standard-frame pistols, both Gen3 and Gen4 versions: G17, 17L, 19, 22, 23, 24, 26, 27, 31, 32, 33, 34 & 35. Gen5 for use in all Gen5 pistols.

**APEX TACTICAL S&W M&P SHIELD ACTION ENHANCEMENT TRIGGER KITS**

**Gives An Already Great Carry Pistol A Superb Trigger - Smoother Pull, Shorter Travel**

Replacement for the factory trigger gives your Shield a smooth, oil-on-glass pull and helps reduce pre-travel and over-travel by approximately 20%. Smooth trigger face is shaped to encourage the shooter to place the finger in the center of the trigger, directly in line with the bore axis to resist unwanted movement that can compromise accuracy. Trigger return spring sets the trigger pull weight at approximately 5 lbs. and increases uptake pressure. Center mounted pivoting safety bar maintains factory safety standards and will not disengage unless the trigger finger is placed directly on the trigger face. All these triggers have a traditional curved face Drop-in Duty/Carry Action Enhancement Trigger Kit contains anodized aluminum trigger, fully machined sear, Ultimate Striker Block/spring, shield spring set, sear spring (1/8"), trigger slave pin, 4 lb. rated trigger return spring and Talon Tactical tool. **Trigger Only** works with Apex Shield Carry Kit or as a stand-alone with the factory sear and other components. **M2.0** is only for use on Shield M2.0 pistols; NOT for use on first-generation Shields. ■

**SPECS:** Aluminum trigger shoe, gloss black or red hardcoat anodized. Separate models for M&P Shield chambered in 9mm/.40 S&W (9/40) and .45 ACP. **Trigger** comes with trigger return spring installation slave pin. **Kit** also includes machined sear, Ultimate Striker Block, striker block spring, carry spring set, sear spring, 4 lb. trigger return spring, installation tool, and instructions.

**CYLINDER & SLIDE BROWNING HI-POWER WIDE COMBAT TRIGGER**

**Smooth, Combat-Style, Lightens "Felt" Trigger Pull**

Drop-in replacement trigger gives increased leverage for lighter "felt" trigger pull. Wide, smooth face provides faster trigger access for better combat shooting. Installation deactivates magazine disconnect so actual trigger pull may measure lighter. ■ **SPECS:** Steel, Blue (Bl), matte finish or Silver (Sil), hard chrome, finish. Trigger face .35" (8.9mm) wide, .65" (16.6mm) long. Wt. .4 oz. (11 g). Includes instructions.

- #206-035-130 Sil Hi-Power Trigger, 6K65J44 ..... 76.99

**NEW! APEX TACTICAL MORE ACTION ENHANCEMENT KITS**

**Smoother, Lighter, More Precise Triggers for Other Popular Pistols**

Apex has extended their re-engineering magic to more popular pistol platforms. As with their earlier Action Enhancement Kits, the benefits are smooth, lighter, shorter trigger pull without annoying creep, cleaner break, and shorter overtravel for faster reset. Basically, a darned better trigger that does not come near to rivaling the cost of the gun. Kits are easy to install following the instructions and/or videos on Apex's website. ■

**CZ PISTOLS** - These kits reduce the difference between the feel of that first double-action pull on your CZ's trigger and the pull on the subsequent single-action shots. How much of a difference? Typically about 2 lbs. Each kit comes with "Carry" and "Competition" mainsprings. Install the Carry spring and you get a DA pull of about 7 lbs., followed by a single-action pull of 5 lbs. The Competition spring will drop the DA pull to 6 lbs. and the SA to 4.5 lbs. (Pull weights are approximate and will vary from one gun to another.) Each kit also contains direct replacements for the factory hammer and sear, two hammer pins, and a reduced-power firing pin return spring. Sear and hammer are precision-machined to provide a clean single-action trigger break and a smooth, stack-free double-action pull that's consistent all the way. Engagement surfaces are matched, so no stoning is required for a precise fit. Separate models for **Thumb Safety CZ 75B** (not for use on Omega models either) and **Decocker CZ 75B**, including the SP-01 Phantom and the SP-01 Tactical. **Shadow 2** kit gives 6 lb. DA / 4 lb. SA Carry pull weights and 5.5 lb. DA / 3.5 lb. SA Competition pull weights.

- NEW 100-036-151 CZ 75B AE Kit, 7F131G09 ..... \$ 137.99
- NEW 100-039-405 CZ 75B Decocker AE Kit, 7F131F09 ..... 137.99
- NEW 100-036-152 CZ Shadow2 AE Kit, 7F131H09 ..... 137.99

**RUGER® MARK IV™ STANDARD & 22/45™** - Replaces the factory trigger and hammer and reduces the trigger pull weight by approximately 40% to around 3.5 lbs. (30% and 4.5 lbs. for 22/45). Over-travel is cut by 50% and overall trigger travel reduced by 15%. Kit includes a safety plate to maintain factory safety values - even if the gun is dropped from 6 feet - and an optional magazine safety delete (red anodized part), which enables the pistol to fire without the magazine inserted (recommended for competition use only). Separate kits for standard Mark IV and Mark IV 22/45. Both available with **Black** or **Red** trigger shoe. **NOTE:** For installation only on Mark IV pistols that have been retrofitted with the updated safety mechanism OR on guns with a serial number beginning with the number "5". Will not work in Mark I, II or III pistols.

- #100-031-278 AEK for Ruger Mark IV, Blk, 7F76Q49. . . . \$ 89.99
- #100-031-279 AEK for Ruger Mark IV, Red, 7F76L49 . . . 89.99

- #100-031-281 AEK for Ruger Mark IV 22/45, Red, 7F76N49 . . . . . 89.99

**SMITH & WESSON SD SERIES** - Kit reduces trigger pull weight by approximately 2 lbs. from the factory weight, while reducing pre-travel by 20% and over-travel by 10%. Fits SD9, SD40, SD9VE and SD40VE (not for use in Sigma pistols). Kit includes Action Enhancement Trigger, plus 4 critical springs for trigger return, striker, striker block and sear. For those who want to choose their own aftermarket springs, **Trigger** also sold separately.

**NEW! CMC TRIGGERS DROP-IN TRIGGER FOR GLOCK®**

**Oil-on-Glass Smooth Pull, Ultra-Crisp Break**

OK, not everybody loves the two-stage Glock® factory trigger. For shooters who don't, CMC's drop-in trigger assembly replaces the mushy factory trigger with a clean smooth pull, dependable break, and snappy positive reset - all while reducing the pull weight by approximately 2 lbs. As an added benefit, each trigger assembly is tweaked at the factory to minimize take-up and over-travel. Made from 8620 alloy steel and S7 tool steel, this complete assembly comes with all OEM internals - trigger bar, springs, and housing for a precise fit and function in your Glock®. Flat-faced trigger shoe, with hooked bottom, makes it easier to quickly and consistently get your finger into the correct firing position for improved accuracy. Replacement trigger doesn't compromise the pistol's renowned reliability or safety. ■

**CYLINDER & SLIDE COLT .380 ALUMINUM TRIGGER**

**Replaces The Plastic Factory Part For Better Wear, Improved "Feel"**

Long-wearing, CNC-machined, aluminum trigger easily replaces the Colt factory nylon/plastic trigger for increased durability and a more solid feeling trigger pull. Use as a standalone enhancement or part of a complete trigger job. Installation may require slight modification; completely eliminates premature trigger wear breakage at the trigger pivot pin hole. ■ **SPECS:** Aluminum, matte silver. Fits Colt .380 Government and Mustang models.

- #206-000-020 Alum. Colt .380 Trigger, 6K29L74 ..... \$ 34.99

**GARTHWAITE BROWNING HI-POWER COMPETITION TRIGGER**

**Enables Better Finger Placement For Better Control & More Comfortable, Precise Shooting**

Master pistolsmith Jim Garthwaite's trigger offers a redesigned trigger face that allows lower finger placement for better contact, feel, and control - hence, the potential to shoot your P35, or "GP" or "Grande Puissance" more accurately. The unique contour also allows the finger to come in contact with the trigger more quickly, especially when wearing gloves or if you have small hands. Extra thick, .060" oversized forward extension is provided for fine-tuning the over-travel. Close-tolerance drilled and reamed 2mm-3mm holes, 90 degrees to the trigger sides enable easy initial fitting. Installation by a gunsmith familiar with the Hi-Power is highly recommended. ■ **SPECS:** Machined steel, matte blued finish. Note: NOT configured to operate a magazine safety.

- #100-007-007 Hi-Power Competition Trigger, 6C90Q09 ..... \$ 105.99

**NEW! LANGDON TACTICAL BERETTA 92/96/M9 TRIGGER JOB IN A BAG**

**All the Parts Needed To Give Your Beretta a Sweet, Smooth, Consistent Trigger Pull**

Despite the clever name, Langdon's kits are much more than just a sack o' spare parts! They contain premium upgrade components that will give your Beretta a lighter, delightfully smooth, consistent trigger pull with a clean let-off and distinct reset. Naysayers will question the validity of these upgrades: "My gun already has these parts, so why do I need to replace them?" Langdon's answer is, in effect, "Yes, you do need to replace them because the parts currently in your gun have not been worked on. The polishing and hand-stoning we do on the individual parts in the kit amounts to about 80% of what we do when you send the entire pistol to us for a trigger job." Each TJB contains a Wilson Combat Ultimate Trigger Bar, a Wilson Combat hammer (your choice of **Deluxe** or **Elite II**), sear, spring, trigger spring, hammer strut, and a Wilson Combat reduced-power hammer spring. Depending on whether you chose a 12 lb. or 13 lb. hammer spring, the double-action pull will be about 5.6 to 6.4 lbs (12 lb. spring) or 6.3 to 7 lbs. (13 lb. spring). The single-action pull will be 3.5 to 4 lbs. with ANY one of these kits installed. (Exact pull weights will vary from one gun to another.) NP3 kit has a Teflon®-enriched, self-lubricating NP3 coating that's about 10 times as corrosion-resistant as a nickel-boron finish. Since little-to-no dirt-trapping oil is needed on NP3 coated parts, your pistol's reliability will be further enhanced. ■

**POWDER RIVER PRECISION SPRINGFIELD XD/XDM DROP-IN TRIGGER KITS**

**For A Lighter, Smoother Trigger Pull; Easy-to-install**

Replace your factory, long-traveling trigger group with this easy-to-install, drop-in kit for a shorter, crisper trigger pull. With the provided striker safety lever, reduced power trigger spring, sear spring, striker safety spring, and striker spring, your XD/XDM will fire smoothly with a comfortable 3.5 to 4.5 lbs of pressure. XDM kits also lighten the sear and striker safety lever. Lightweight, polymer construction and integrated over travel stop speeds trigger reset. *The XDM model has received the American Pistolsmith Guild Seal of Approval.* ■ **SPECS:** Striker safety lever - S-7 tool steel. Trigger - Molded polymer, black. Includes reduced power trigger, sear, striker, and striker spring. XD .45 ACP kit will not fit pistols with thumb safety.

### LIGHTING STRIKE ALUMINUM TRIGGER for GLOCK®

Improves Trigger "Feel", Gives Consistent Letoff

Machined aluminum trigger helps eliminate the mushy feel of the factory plastic part. Closely held tolerances remove trigger slop and free movement for smooth, consistent trigger letoff. Trigger face incorporates a wider trigger safety and contoured edges that are easier on the finger than the factory shoe. Drop-in installation requires no modification to gun. Does not alter factory pull weight. **SPECS:** 2024 aluminum, black, anodized. Fits all 9mm, .357 SIG and .40 S&W. **#642-103-001 Trigger for 9mm/.357 SIG/.40 S&W Glock, 2D79B99** ..... \$ 89.99

### LONE WOLF ULTIMATE ADJUSTABLE TRIGGER for GLOCK®

Better Feel & Control Than Factory Trigger - Adjust While It's in the Gun

A trigger that can be adjusted without removing it from the gun? What more can you say but WOW! Lone Wolf's drop-in, all-aluminum trigger comes with a hex wrench that lets you perform fine adjustments to pre-travel and over-travel while it's still in the gun. The smooth, symmetrical shoe has gently radiused edges for a comfortable finger/trigger interface, and the safety lever also sits flush with the surface of the shoe when depressed. Helps you control the pull better and keeps your finger from getting raw during long shooting sessions. Comes with trigger bar already attached for easy installation in your Glock®, but the two-piece design enables easy removal of the bar to swap in a different bar. Manufactured to tighter-than-factory tolerances to get minimal wobble between the shoe and trigger bar for a tighter, cleaner, more precise trigger pull. **9mm/.40 S&W/.357 SIG** model is intended for Gen3 and Gen4 pistols; does not fit G43. Separate model for .45 ACP/10mm pistols. **APG APPROVED**

### TJ'S CUSTOM SIG P226/228/229 CUSTOM TRIGGER

Ergonomic Design For A Smoother-Feeling, Double-Action Pull

All stainless steel trigger is narrower and shorter than the factory trigger for a smoother, double-action stroke that won't pinch your finger. Lets you "roll" the trigger. Does not alter the factory pull weight or length of pull. Drop-in specs, no fitting required. **SPECS:** Stainless steel, matte black hard finish, .275" (7mm) wide trigger face. **#876-020-226 Sig P226/228/229 Trigger, 6G69K69** ... \$ 81.99

### OVERWATCH PRECISION TACTICAL TRIGGERS for GLOCK®

Huge Upgrade in Quality of Trigger Pull - Drop-In Installation

The folks at Overwatch like to call their drop-in replacement trigger system "a tank, a sexy tank." It is built very robustly, and it is good-looking too. More importantly, trigger reach is shortened by .24", making these triggers an excellent option for shooters with short fingers. All shooters, regardless of the length of their digits, will appreciate the faster, more positive, clearly-defined pull, and faster reset. The broad, flat face permits a straight, uniquely self-correcting rearward press. Pre-travel has been reduced as much as possible without risking safety, so you revel in a clean, crisp break and almost non-existent overtravel. Trigger shoe and safety tab are machined from solid 7075 T6 aluminum alloy, Type III hardcoat anodized to MIL-A-8625 specs, and linked to an NP3 plated Gen3 OEM trigger bar by coiled spring pins of pure 316 stainless steel. NP3 plating ensures superb corrosion resistance and smooth, grit-free operation. The trigger shoe has a small lip on the bottom that helps the shooter position the tip of his/her finger low on the trigger to get maximum leverage for a smooth, controlled, lighter-feeling pull. The low-key, traditional matte black anodized finish on the shoe blends nicely with the rest of your pistol. **Red Gen5** model (#100-034-436) has a bright RED safety lever because... why should your Glock look just like everybody else's? **NOTE:** Unless otherwise marked as "Gen5", these trigger fit both Gen3 and Gen4 pistols. The Gen3 trigger bar is completely compatible and safe for installation in Gen4 pistols with these triggers. **SPECS:** 9mm/.40 S&W/.357 SIG models fit G17/19/22/23/26/27/31/32/33/34 but not G43. .45 ACP/10mm Auto models fit G20/20SF/21/21SF/29/30/41.

### OVERWATCH PRECISION FALX TRIGGER for GLOCK®

Flat-Faced Performance For Curved Trigger Fans

Overwatch designed this trigger for shooters who want the additional leverage and shorter reset of a flat-faced trigger...but who prefer the feel of a curved trigger shoe, or who shoot with their finger deep inside the "guard." The Falx offers shorter pre-travel with a snappy, tactile reset, and since it's already pinned to a Gen3 trigger bar, it drops into your pistol in about 5 minutes. Plus, it keeps all factory safety values intact. The shoe is machined out of solid 7075 T6 aluminum billet (tough, black hard-anodized finish) for a solid, confidence-building feel, and the trigger bar is NP3 plated for lubricity and corrosion resistance. **NOTE:** Gen3 trigger bars are completely compatible and safe for installation in Gen4 pistols with this trigger. Gunsmith installation recommended. **SPECS:** 7075 T6 billet aluminum, hardcoat anodized, matte black trigger, NP3 plated trigger bar. Fits Glock® pistols chambered in 9mm/.40S&W/.357 SIG. Not for G43. **#100-023-248 Falx Trigger for Gen3 Glock® 9/40, BLK, 6A127F50** ..... \$ 150.00 **new 100-034-437 Falx Trigger for Gen5 Glock® 9/40, BLK, 6A128P24** ..... 134.99 **new 100-034-438 Falx Trigger for Gen5 Glock® 9/40, BLK/RED, 6A128L24** ..... 134.99 **new 100-034-439 Falx Trigger for Gen5 Glock® 9/40, Gray/BLK, 6A128A24** ..... 134.99

### OVERWATCH PRECISION POLYMER DAT TRIGGER for GLOCK®

"Big Bang for the Buck" Drop-In Trigger Upgrade

Here's your dilemma: you want to upgrade the trigger in your Glock® to an Overwatch Precision DAT aluminum trigger, but you're on a tight budget. And frankly, you have no problem with the feel of a plastic trigger shoe. The folks at Overwatch have come up with the solution: install their Polymer DAT Trigger. You enjoy many of the key benefits of their aluminum Defensive Applications Trigger (DAT), with a lower sticker price. As with the aluminum original, the polymer trigger shortens the pull distance by as much as 20% (depending on frame tolerances), making it an excellent option for shooters with shorter fingers. ALL shooters, regardless of the length of their digits, will appreciate the faster, more positive, clearly-defined pull, followed by a short, positive reset. The broad, flat trigger face permits a straight, uniquely self-correcting rearward press. Pre-travel has been reduced as much as possible without risking safety, so you revel in a clean, crisp break and almost non-existent overtravel. Most importantly, all of these benefits DO NOT come at the expense of compromising reliable operation of the factory safeties. Solid-body, molded hard-polymer trigger shoe and safety lever. Polished stainless steel OEM Glock trigger bar installed. Drop-in ready for Gen1 thru Gen4 Glock® pistols. WILL NOT fit Gen5 or G19X pistols. Models for **Standard** (9mm, .40 S&W & .357 SIG) and **Large Frame** (.45 ACP & 10mm Auto) pistols, plus separate models for the **G36, G42 and G43**. Now, you can go ahead and get a quantum leap in the quality of your Glock's trigger pull - without putting a dent in the debit card balance that gets you in the doghouse with your Significant Other! **#100-031-283 Standard Poly DAT Trigger, 6A55K79** ... \$ 61.99 **#100-031-284 Large-Frame Poly DAT Trigger, 6A53G99** ..... 59.99 **#100-031-285 G36 Poly DAT Trigger, 6A53B99** ..... 59.99 **#100-031-286 G42 Poly DAT Trigger, 6A53L99** ..... 59.99 **#100-031-288 G43 Poly DAT Trigger, 6A53B99** ..... 59.99

### POWDER RIVER PRECISION SPRINGFIELD XD ULTIMATE MATCH TARGET TRIGGER KIT

Gives A Lighter, Faster, Shorter Pull Than Standard Factory Trigger

Convenient kit contains all the replacement parts to give an XD a short, crisp 3.5-4 lb. trigger pull with a fast reset and a substantial 1/2" reduction in pull length. Eliminates the long pre-travel, via PRP's striker safety lever, while reduced-power trigger and sear springs lower the pull weight. PRP's replacement sear is shaped to help lighten the pull and, more importantly, deliver a smooth, crisp, distinct break. Lightweight polymer trigger shoe speeds reset, while an integral over-travel stop on the back reduces stress on the trigger bar. Requires minor gunsmith fitting; installation instructions included. This trigger is a Springfield Armory OEM upgrade available on new factory XD and XDM pistols. **SPECS:** Fits all XD models EXCEPT the new XD MOD 2 pistols in 9mm and .40 S&W, and the XD 45 thumb safety model. **#100-009-890 XD 9/40 Ultimate Trigger Kit, 5C143D09** ..... \$ 158.99 **#100-009-892 XD 9/40 Subcompact Ultimate Trigger Kit, 5C143B09** ..... 158.99 **#100-009-891 XD 45 Ultimate Trigger Kit, 5C143D09** ..... 158.99

### POWDER RIVER PRECISION SPRINGFIELD ARMORY XDM ULTIMATE MATCH TRIGGER

Super-Light, Match-Grade Trigger For Your XDM

Trigger kit drops into XDM pistol to give a short, light trigger pull, minimal over travel and fast reset. Includes striker safety lever, reduced-power trigger spring, sear springs, polymer trigger and instructions. Reduces trigger pull down to 3.5 - 4.5 lbs. Requires minor fitting and gunsmith installation is recommended. Fits XDM pistols only. **#100-013-394 XDM 9/40 Ultimate Match Trigger, 5C153E89** ..... \$ 170.99 **#100-013-395 XDM 45 Ultimate Match Trigger, 5C145M34** ..... 170.99

### TANDEMKROSS RUGER® MARK IV™ VICTORY TRIGGER

Easy-To-Install Upgrade For A Straight, Precise, Lighter-Feeling Trigger Pull

The Victory Trigger is a lightweight, skeletonized trigger that enables the shooter to pull straight back and instantly know if he's pulling too far to the left or right. With its flat-faced design, the Victory gives an excellent "feel" and better control. It encourages the shooter to place the finger lower on the trigger, increasing leverage to give the perception of a lower pull weight without compromising reliability and safety. Pronounced cross-hatch texturing on trigger face gives a no-slip hold that further enhances control. Pre- and over-travel adjustment screws let each shooter customize the trigger pull to his taste. Machined aluminum trigger shoe with durable hard-anodized finish in black or silver. Gives the shooter a great advantage in speed shooting and other competitive shooting sports! **SPECS:** Does not fit Ruger Mark IV™ 22/45™, 22/45™ LITE™ or older Ruger® Mark III™ (and related 22/45™ version). **#100-023-851 Mark IV Victory Trigger, Blk, 1G00LNF**... \$ 44.99 **#100-023-852 Mark IV Victory Trigger, Sil, 1G00ADM** .. 44.99

### VOLQUARTSEN RUGER® MARK I/II/III™ TARGET TRIGGER

Drop-In Trigger Job For Ruger .22 Pistols

Precision machined from billet for precise fit to cut down trigger weight and eliminate the heavy pressure required to move the factory part. Helps produce a more consistent pull for improved accuracy. Stop screw is adjustable for overtravel and pretravel with the gun fully assembled, so you get a no-creep pull. Ultra-smooth shoe offers more contact with the trigger finger. Available in **Black** anodized aluminum or polished stainless steel (SS). Includes trigger spring and trigger spring plunger. **SPECS:** Aluminum, anodized, black, or stainless steel, natural silver finish. .354" (9mm) wide trigger shoe face. Fits Ruger Mark I, Mark II, Mark III™, and 22/45™ pistols. **#930-012-002 Ruger Target Trigger, Black, 3Z31Q49** ..... \$ 34.99 **#930-000-123 Ruger Target Trigger, SS, 3Z41L64** ..... 48.99

**VOLQUARTSEN RUGER® MARK II DROP-IN ACCURIZER KIT**

**Instant Target Grade Accuracy**

Complete kit eliminates the factory weak spots for a smoother trigger pull and faster bolt cycling. Redesigned, hand matched, hammer and hard-plated sear with fully ground and polished engaging surfaces combine for a shorter, faster trigger pull. Correct angles; no stoning required. Smooth trigger with 1/2" wide

face and built-in overtravel screw lightens perceived pull. Trigger rebound spring matched to the redesigned parts to further reduce trigger pull and give smoother cycling. Available with a **Black** anodized aluminum or natural finish **Stainless** steel trigger to match the finish of your pistol. ■

**SPECS:** Trigger – 6061 T6 aluminum, hardcoat anodized, black, or stainless steel, natural finish. Stainless steel hammer, sear, and slide stop. Steel springs. Includes complete instructions. Fits Ruger Mark II and Mark II 22/45 pistols only. May require minor fitting.

**#930-012-100 Ruger Accurizer Kit, Blk Trgr, 3Z112A19. . \$ 131.99**

**#930-000-124 Ruger Accurizer Kit, SS Trgr, 3Z114G29. . 126.99**

**VOLQUARTSEN RUGER MK II TARGET HAMMER** - Hardened, precision-ground, drop-in hammer lightens trigger pull by 35% on Mark II pistols. Electro-polished to remove even minor imperfections for an ultra smooth sear surface and a clean breaking, target-quality, trigger pull. Includes strut and pin. ■

**SPECS:** Machined steel, 1.05" (2.6cm) long, .56" (14mm) wide, .5 oz. (14 g) wt. Fits Ruger Mark II and Mark II 22/45 pistols only.

**#930-012-003 Target Hammer, 3Z43119 . . . \$ 47.99**

**WILSON COMBAT BERETTA 92/96 SHORT REACH STEEL TRIGGER**

**Reduces Trigger Reach**

Machined from 4140 heat treated steel, this replacement trigger decreases the trigger reach on Beretta 92/96s. Drop-in trigger is slightly slimmer than the factory originals for improved ergonomics. Trigger also fits: 92 and 96 A1, 90-TWO, 92/96 Centurions, Compact L's, and Compact Type M's. ■

**SPECS:** 4140 steel, Black Armor-Tuff® finish, black.

**#965-000-193 Beretta 92/96 Short Reach Steel Trigger, 5F27H54 . . . \$ 28.95**

**BROWNELLS TRIGGER STOP SCREWS**

**Non-Marring Rubber Tips**

Controls trigger overtravel for clean let-off. Rubber tips cushion frame "touch" and won't mark trigger loop. Use on handguns, rifles, shotguns. ■

**SPECS:** 8-32 tpi. 6 Pak contains 6 screws and instructions.

**#084-010-006 Trigger Stop Screws, 6-pak, 4H18E73. . . . . \$ 22.99**

**APEX TACTICAL S&W M&P RESET ASSIST MECHANISM**

**Improves The Trigger Reset On Your M&P**

Reset Assist Mechanism (RAM) improves the felt reset on the trigger of your S&W M&P for a crisper

**ZEV TECHNOLOGIES PRO TRIGGERS for GLOCK®**

Forget About the "Mush!" - A Smooth, Precise, Superbly Responsive Trigger in a Drop-In Kit

Built from the ground up to perform better than your pistol's original factory trigger, the Zev Technologies Pro Trigger reduces travel while providing a crisp, clean pull with a glass-like break. At the core of the Pro Trigger is the improved geometry of Zev's proprietary trigger bar and connector that eliminate the mushy feel associated with factory triggers. Plus, it gives a consistent, positive reset and a reduction in trigger pull weight, without sacrificing the reliability or safety. The wide trigger pad and safety give you better control with less fatigue, especially during those long training sessions. Most importantly, this enhanced feel and performance does not compromise the reliability of the factory safety system. Trigger shoe is made of machined aluminum alloy with a tough, matte black (BLK) hardcoat anodized finish. Available with a contrasting **Red** safety lever because... it looks cool. Other parts are hardened stainless steel for durability, with engagement surfaces polished to a mirror-like finish to reduce friction.

Basic **Pro Trigger** includes trigger shoe, trigger bar, and connector. Fits standard frame Gen1 thru Gen4 Glock pistols in 9mm, .40 S&W and .357 SIG (models 17, 19, 22, 23, 24, 27, 26, 31 thru 35, 37, 38 and 39. Separate model for **Gen5** pistols: 17, 19, 19X, 26 and 34. **Kit** delivers even greater refinement to the trigger pull and comes with a reduced-power striker spring to produce a lighter-feeling pull for competition; a factory-weight striker spring is included for duty and daily carry. Contains trigger, trigger bar, trigger block, ejector, connector, trigger spring, and a lightweight stainless steel firing pin safety plunger (8 spring), plus the two (2) striker springs. Fits model 17, 17L, 19, 26 and 34 9mm-chambered pistols. Separate versions of kit available for **Gen1** thru **Gen3** and **Gen4** guns.

**Ultimate Kit** ups the performance of the standard kit with a skel-tonized stainless steel striker. Its reduced mass and highly polished surface speed up lock time and deliver an even lighter, smoother perceived trigger pull, plus ultra-fast reset so you're ready for follow-up shots. The other parts in the kit and the the guns it fits are the same as the standard kit. ■

and more positive action. Installs into the sear block of any M&P 9mm, .40, and .357 SIG pistol that does not have a thumb safety, magazine disconnect, or internal locking system. ■

**#100-006-609 S&W M&P RAM, 7F20J69 . . . . . \$ 22.99**

**APEX TACTICAL S&W M&P ACTION ENHANCEMENT COMPONENTS**

**Drop-In Upgrade Parts Improve Trigger Pull For Competition Or Carry**

Drop-in replacements for factory components enhance reliability and optimize the performance of your M&P for different applications. Parts sold separately or in handy kits. ■

**ACTION ENHANCEMENT KITS** - Installing the **Competition Kit** yields a smooth, consistent, trigger pull of slightly less than 3 lbs., with shorter over-travel and faster reset than a factory-stock M&P. Retain the factory sear spring to get a slightly heavier 3 1/2 lb. pull. Designed for IDPA, USPSA, Steel Challenge, 3-gun, and similar types of action shooting competition. Not for duty, carry, or self-defense applications. **Duty/Carry Kit** delivers a smooth, consistent 5 1/2 lb. trigger pull with less over-travel and shorter reset. Improves performance of your pistol while maintaining its safety features for daily carry. Retain the factory sear spring to get a slightly lighter 5 lb. pull. Both kits engineered for a drop-in fit, though gunsmith installation is recommended.

**SPECS:** Separate kits for **M&P** and **M&P Shield** and **M&P Shield M2.0**. Kits include hard sear, Ultimate Striker Block (see below), two sear springs (different sizes), and trigger return spring. **Duty/Carry Kit** also includes competition striker spring and aluminum slave pin for installing trigger return spring. **9/40/357** kits fit pistols chambered in 9mm/.40 S&W/.357 SIG.

- #100-006-035 M&P 9/40/357 Competition Kit, 7F84C59 . . . . . \$ 93.99**
- #100-006-036 M&P .45 ACP Competition Kit, 7F84N59 . . . . . 93.99**
- #100-006-039 M&P 9/40/357 Duty/Carry Kit, 7F80B09 . . . . . 88.99**
- #100-006-040 M&P .45 ACP Duty/Carry Kit, 7F80M09 . . . . . 88.99**
- #100-010-772 M&P Shield 9/40/357 Duty/Carry Kit, 7F80E09 . . . . . 88.99**
- #100-023-594 M&P Shield .45 ACP Duty/Carry Kit, 7F72F19 . . . . . 75.99**
- #100-026-578 M&P Shield M2.0 9mm/.40 S&W Duty/Carry Kit, 7F80I09 . . . . . 88.99**

**ULTIMATE STRIKER BLOCK KIT** - Hardened stainless steel striker safety plunger has different geometry and dimensions from the factory part to help deliver an exceptionally smooth takeup before the trigger bar engages the sear cam. Minimizes drag on the trigger bar as it transitions to the rest point, and gives a more clearly detectable reset. Mirror polished surface for minimal drag. Includes a reduced-power plunger spring to maintain safety integrity while reducing drag. Also includes a tool to aid in fast, easy installation.

**SPECS:** Heat-treated 17-4 stainless steel, mirror-polished surface. Fits all M&P pistols.

**#100-006-044 Striker Block Kit, 7F31D49 . . . . . \$ 34.99**

**FULLY MACHINED SEAR** - Replacement sear machined from hardened A2 tool steel has a different geometry from the factory part that dramatically reduces trigger pull weight to less than 5 lbs., while it also shortens overtravel and improves reset speed. The end result is overall much better trigger "feel." Use as a stand-alone upgrade or in conjunction with an Apex spring kit (below) and Ultimate Striker Block (above). **1-Dot** fits all current-production M&P pistols in 9mm, .357 SIG and .40 S&W. Does not fit M&P45 or Shield models. **2-Dot** fits current-production M&P pistols in .45 ACP, M&P M2.0 in 9mm and .40 S&W, and ALL M&P Shields (9mm/.40 S&W/.45 ACP).

- #100-006-041 1-Dot S&W M&P Machined Sear, 7F35G99 . . . . . \$ 39.99**
- #100-006-042 2-Dot S&W M&P Machined Sear, 7F35M99 . . . . . 39.99**

**FAILURE RESISTANT EXTRACTOR** - Although no gun part can be absolutely failure "proof," this upgraded extractor helps prevent

**CYLINDER & SLIDE BROWNING HI-POWER MATCH-GRADE TRIGGER LEVER**

**Smooths & Lightens Trigger Pull**

Wire EDM machined from A2 tool steel to precise tolerances to provide a more consistent trigger pull that's 1 1/2"-2 lbs. lighter. Heat-treated to Rc 40 for longer service life than cast factory part. Retains factory safety features. Fits Mk III series; can be altered to fit earlier models. ■

**SPECS:** A2 tool steel, heat treated, blued. Installation requires drilling of slide with included drill bit. Gunsmith installation required.

**#206-000-053 Match Trigger Lever, 6K46D39 . . . . . \$ 57.99**

**GHOST ROCKET 3.5 TRIGGER KIT for GLOCK®**

**Provides Short Pre-travel & Fast Reset**

Drop-in kit with newly designed self-cleaning trigger connector helps eliminate bothersome pre-travel and allows fast reset for improved accuracy and quick shot recovery. Trigger connector features a self-cleaning debris channel that reduces accumulation of grit and residue for less friction, longer service life, and improved reliability; connector may require minor fitting. Installation requires no permanent alteration to pistol. Not for use for self defense with 4 lb. firing pin spring or 2 lb. firing pin safety spring. For self defense use with 10mm/.45 caliber Glock, a Wolff 6 lb. firing pin spring and factory Glock firing pin safety spring are recommended. ■

**SPECS:** Trigger Connector- Stainless steel, polished finish. Springs- Tempered steel. Includes 2 lb. firing pin safety spring, 4 lb. firing pin spring, 6 lb. trigger spring, armorer's orange slide cover plate, and armorer's tool. Fits all Glock models.

**#100-003-306 Rocket 3.5 Trigger Kit for Glock, 7K34D84 . . . . . \$ 40.99**

one of the M&P's few weaknesses: occasional extraction failures. The FRE is designed to ensure consistent, reliable extraction under highly adverse conditions. Engagement surfaces are wire electrical discharge machined (EDM) to precise tolerances for a drop-in fit (usually—in individual guns may require minor fitting) and exceptional reliability and function. With the FRE installed, M&P shooters have reported as many as 2,500 rounds through their pistols without a single extraction failure.

**SPECS:** Fits all Smith & Wesson M&P pistols. .45 ACP pistols may require minor fitting.

**#100-006-043 Failure Resistant Extractor, 7F39B59. . . \$ 43.99**

**M&P SPRING KITS** - Same springs found in the Action Enhancement Kits can be used as high-quality replacements for worn or tired factory springs. **Duty/Carry Spring Kit** includes a trigger return spring, a slave pin to aid in installing the return spring, and two sear springs. Select the sear spring that works best in your pistol. **Competition Spring Kit** adds a competition striker spring and gives a 3 lb. trigger pull when used with the Hard Sear and Ultimate Striker Kit. **SPECS:** Fits all M&P pistols, recent and older manufacture. Will not fit pistols adapted for sale in Massachusetts.

- #100-006-037 Competition Spring Kit, 7F22Q49 . . . . . \$ 24.99**
- #100-006-038 Duty/Carry Spring Kit, 7F17M99 . . . . . 19.99**

**GUARANTEED. FOREVER.® SINCE 1939**

## ZEV TECHNOLOGIES V4 CONNECTOR for GLOCK®

Smooth, 3 lb. Pull & Crisp Reset

Gives a clean, lighter-than-factory pull for positive control and "single-action"-like accuracy, while maintaining reliable trigger reset. Precision laser cut from a proprietary steel alloy then heat treated for improved spring tension. Extra-long "slot" prevents debris build-up and keeps trigger parts clean for smooth, consistent pulls. Produces a trigger pull as low as 3 lbs. in most pistols when used with the Glockwork Competition Spring Kit (available separately). **SPECS:** Stainless steel alloy, polished. Fits all Glock models.  
#100-012-422 V4 Connector, 8B13B59 . . . . . \$ 15.99

## GHOST PRO 3.3 TRIGGER CONNECTOR + SPRING KIT for GLOCK®

Fine Tunes & Improves  
Glock® Trigger Pull

The Ghost Pro 3.3 trigger connector makes a great gun even better! It eliminates that annoying pre-travel "bump" when the trigger hits the connector, forcing you to squeeze the trigger harder and pull the gun off target. The Pro 3.3 also gives your Glock® a smooth, crisp, light 3.3 lb. trigger pull that helps promote consistent accuracy. It will also help correct trigger over-travel, which can further rob accuracy. Complete spring kit included with lightweight competition striker spring (4 lb.), extra-power self-defense striker spring (6 lb.), reduced-power safety block plunger spring, and trigger spring with nearly 30% more power than factory spring. To improve particular aspects of the trigger pull, specific springs can be changed or do a complete upgrade. Fits all Gen1 through Gen5 pistols (yes, even Gen5!), except G42/G43. NOT drop-in; minor fitting IS required. **SPECS:** Titanium, natural silver finish. Fits all Glock® Gen4 pistols, EXCEPT Models 36, 42 and 43.  
#100-006-596 Gen 4 Titanium Pin Set, 8B35C14 . . . . . \$ 36.99

#100-024-357 3.3 Pro Connector & Sprg Kit, 7K40K49 . . \$ 44.99

## GHOST RUGER® SR9®/SR9C™/SR40™ TRIGGER CONNECTOR

Improves Accuracy by Reducing  
Trigger Pull & Over-Travel

Redesigned connector reduces the factory trigger pull down to 3½ to 5 lbs., while it drastically shortens or completely eliminates accuracy-robbing over-travel. A debris channel lets dust, dirt, grit, and other foreign matter exit the trigger system, helping to ensure reliable function. Three models available to meet a variety of needs, including concealed carry, competition, and law enforcement use. **Ultimate** model offers drop-in, no-gunsmithing installation for a 3½ lb. trigger pull; comes pre-set for minimum over-travel. The **Rocket** also features a 3½ lb. pull, with a Trigger Control Tab that lets you completely eliminate over-travel for maximum accuracy. Some fitting required. **SPECS:** Steel, polished, natural finish. All models fit Ruger SR9, SR9c, and SR40 pistols.  
#100-005-898 Ultimate 3.5 Trigger Connector, 7K16J99 . . . . . \$ 19.99

## GHOST EDGE & PRO TRIGGER CONNECTORS for GLOCK® 42/43

Smooths, Lightens &  
Improves Trigger Feel

Just because you carry a compact pistol doesn't mean you have to accept a stiff, rough trigger pull. These replacements for your Glock 42/43's factory trigger connector improve the entire trigger pull by shortening the overall pull, eliminating over-travel, and providing a faster reset. Reduces pull weight by approximately 3 lbs., giving a smoother, lighter pull. Also removes the notorious "Glock bump" caused by the trigger bar hitting the connector, which makes the shooter apply extra force to get over the bump, typically moving the pistol off target. **Edge** is a drop-in replacement for factory part. **Pro** requires minor fitting (instructions included) to get the cleanest, smoothest release possible. **SPECS:** Steel, polished, natural finish. Fits all Glock 42/43 pistols.  
#100-017-381 G42/43 Edge Trigger Connector, 7K19G54 . . . . . \$ 22.99  
#100-017-680 G42/43 Pro Trigger Connector, 7K30H59 . . . . . 35.99

#100-017-680 G42/43 Pro Trigger Connector, 7K30H59 . . . . . 35.99

## ZEV TECHNOLOGIES GLOCK® GEN4 TITANIUM PIN SET

Lightweight, Hard Titanium  
Replacements For Factory Pins

Replacements for factory pins in lightweight, wear-resistant Titanium will outlast your gun's frame. Machined to precise dimensions for snug fit so they resist creeping out of the frame. Kit includes trigger pin, locking block pin, standard-length ejector housing pin, and extended ejector pin. **SPECS:** Titanium, natural silver finish. Fits all Glock® Gen4 pistols, EXCEPT Models 36, 42 and 43.  
#100-006-596 Gen 4 Titanium Pin Set, 8B35C14 . . . . . \$ 36.99

## APEX TACTICAL ULTIMATE SAFETY PLUNGER for GLOCK®

Gives Smoother, More Consistent Trigger Pull

Drop-in replacement for factory safety plunger gives a smoother, more precise trigger pull without compromising reliability. Operates in the same manner as the original, blocking the striker channel to prevent the firing pin from moving forward unless the trigger is manually pulled to the rear. Maintains timing with aftermarket trigger systems. Hardened stainless steel, for extended service life, too. **SPECS:** Machined 440C stainless steel, hardened to Rc 48-54. Fits Glock 17, 19, 22, 23, 26, 27, 31, 32, 33, 34, 35.  
#100-014-903 Ultimate Safety Plunger, 7F15A29 . . . . . \$ 17.99

#100-014-903 Ultimate Safety Plunger, 7F15A29 . . . . . \$ 17.99

## LIGHTING STRIKE TITANIUM SAFETY PLUNGER for GLOCK®

Helps You Get A Smoother, Lighter Trigger Pull

Extremely lightweight titanium safety plunger reduces mass for a lighter felt trigger pull. Titanium nitride coating reduces friction. One of those small detail that helps complete a Glock trigger job. Includes Wolff safety plunger spring. **SPECS:** Solid titanium, titanium nitride coated. **Small** - fits all other Glock pistols. .1 oz., (2.8 g) weight. **Large** - fits Model 21 and 30 pistols.  
#642-102-021 Small Safety Plunger, 2D18K74 . . . . . \$ 24.99  
#642-102-017 Large Safety Plunger, 2D20M79 . . . . . 25.99

## LONE WOLF CONNECTOR for GLOCK®

Smooths Trigger Pull,  
Aids In Faster Reset

Drop-in replacement connector gives an immediate improvement in trigger performance on any Glock pistol. Provides the same 3.5 lb. trigger pull as the factory connector, but its 25% lighter weight and a highly polished, nickel-plated surface makes the pull smoother and more consistent. Helps the trigger reset more quickly for faster follow up shots and less temptation to jerk the trigger and compromise accuracy. Requires no permanent alterations to pistol, so factory connector can be reinstalled any time. Use in conjunction with Lone Wolf Ultimate Trigger Stop (available separately) for an even cleaner pull. Available alone or paired with Lone Wolf's 6 lb. **Trigger Spring**, a popular upgrade for an even better trigger pull. **SPECS:** Steel, nickel plated, high-polish finish. Fits all Glock pistol models, except G42 & 43.  
#100-006-204 3.5 Connector for Glock, 2K00LKD . . . . . \$ 15.99  
#100-803-024 3.5 Connects & 6 lb. Spring for Glock, 2K00LES . . . . . 18.99

## POWDER RIVER PRECISION SPRINGFIELD XD/XDM STRIKER UPGRADE PARTS

For A Lighter, Cleaner Trigger Pull

**XD/XDM STRIKER** - Steel striker is heat-hardened to Rc 52-53, with a micro-polished face that helps smooth the trigger pull. Works with the factory trigger components and Powder River Easy-Fit trigger kits. APG approved. **SPECS:** Chrome-alloy steel, natural finish. Fits 9mm and .40 S&W Springfield XD and XDM pistols.  
#100-005-384 XD/XDM Striker, 5C41J59 . . . . . \$ 51.99

**STRIKER SAFETY KIT** - Titanium striker safety weighs less than factory part and works with the included reduced-power striker safety spring to reduce trigger pull and lock time, while maintaining proper safety function. Compatible with Powder River trigger kits and factory trigger components. APG approved. **SPECS:** Titanium, with steel spring.  
#100-005-385 XD/XDM Striker Safety Kit, 5C28L04 . . \$ 32.99

**STRIKER INDICATOR KIT** - Low-mass Titanium striker indicator is about 40% lighter than the factory steel part, for faster lock time and a crisper trigger pull in a 9mm/.40 caliber XD/XDM pistol. Included reduced-power striker spring and rebound spring helps ensure consistent primer ignition. Works with factory trigger components and Powder River trigger kit. **SPECS:** Titanium, with steel spring. Fits 9mm and .40 S&W Springfield XD and XDM pistols.  
#100-005-386 XD/XDM Striker Indicator Kit, 5C22C09 . . . . . \$ 25.99

## SPRINGER PRECISION SPRINGFIELD XD/XDM TRIGGER/SPRING KITS

For A Smooth,  
Crisp Trigger Pull

CNC machined components allow a smooth, crisp trigger with a much lighter pull and more precise letoff for better accuracy and fast follow up shots. Cuts sear pre-travel by about ¼" to help increase control and prevent accuracy degrading creep. Kits include the reduced-travel sear with pre-polished face, heat-treated to Rc 45-50, plus trigger and sear springs, trigger bar, 10% reduced power striker spring and 15% extra power striker spring. Lightens trigger pull by approximately 1 to 1½ lbs. **SPECS:** Steel, in-the-white. Includes: Sear, heat treated to Rc 45-50, trigger/sear springs, and trigger bar. **Striker Springs** - Steel, tempered, (1) 10% reduced power, (1) 15% extra power.

## GHOST TRIGGER CONNECTORS for GLOCK®

Lightens & Improves Trigger Feel

Drop-in stainless steel connector reduces the length of trigger pull, improves reset, and eliminates accuracy-robbing overtravel. **Ghost 3.5** lowers pull weight to 3.5 lbs. for competition and sporting use. **Tactical 5.0** and **Rocket 3.5** reduce trigger-pull weight to 5 lbs. and 3.5 lbs. respectively; both have an extra tab that contacts the trigger bar and prevents overtravel after the trigger falls. Both may require minor fitting. **SPECS:** Stainless steel, polished finish. Fits all models.  
#100-000-936 Ghost 3.5 Trigger Connector, 7K11F89 . . \$ 13.99  
#100-000-631 3.5 Rocket Connector, 7K23B19 . . . . . 28.99  
#100-000-935 5.0 Tactical Trgrg Connector, 7K19I19 . . . 23.99

**3.5 ULTIMATE & 4.5 RANGER** - Stainless steel connectors reduce trigger pull weight to 3.5 lbs. and 4.5 lbs. respectively. Debris channel "hole" is self-cleaning and reduces friction of trigger parts for smooth, reliable pulls. **SPECS:** Gunsmith installation recommended for 4.5 Ranger trigger.  
#100-002-007 3.5 Ultimate Connector, 7K19I99 . . . . . \$ 24.99  
#100-002-008 4.5 Ranger Connector, 7K18D39 . . . . . 22.99

**EDGE 3.5** - Delivers the light, smooth pull and self-cleaning capabilities of the Ultimate and Ranger, plus the additional benefit of eliminating the bump or "hitch" that is the first resistance you feel as you squeeze the trigger and the trigger bar "bumps" into the connector. Some shooters dislike the hitch; with the Edge 3.5 connector, they don't have to worry about it any more. **SPECS:** Stainless steel, polished finish. Fits all Gen 1 thru 4 pistols, except 42/43.  
#100-017-395 Edge 3.5 Trigger Connector, 7K20D39 . . \$ 23.99

**MINUS 3.5 CONNECTOR** - Provides the 3.5 lb. trigger pull of the factory "-" connector, but its highly polished stainless steel surface makes the pull smoother, lighter, and more consistent. Less resistance counteracts the urge to jerk the trigger and compromise accuracy. Resets faster, too, for faster follow up shots. Requires no permanent alterations to pistol, so the factory connector can be reinstalled. Fits all Glock pistols, except the 42 and 43.  
#100-018-171 Minus 3.5 Trigger Connector, 7K8H79 . . \$ 10.99

**ARMORER'S SLIDE COVER PLATE** - A "must have" for easy, error-free installation of Ghost Rocket 3.5 and Ghost Tactical 5.0 trigger connectors. Plate is sectioned by one-third to permit viewing the sear and firing pin engagement during connector installation. **SPECS:** Clear polymer with grooved face.  
#100-001-260 Armorer's Slide Cover Plate, 7K5Q99 . . . \$ 7.99

### WOLFF BERETTA TRIGGER CONVERSION UNIT

Improves Reliability, Smooths Pull

Drop-in, captured spring unit replaces the factory mousetrap trigger spring to eliminate breakage. Gives a smoother pull and improves trigger control. Robar NP3® coated to reduce friction. **USA**  
**SPECS:** Steel, NP3 coated. Fits Beretta, 92/96, 96D and Centurion plus Taurus PT92/96. Does not fit late production guns with polymer triggers. Factory weight or 20% reduced power.

- #969-000-060 Factory Wght Trgr Unit, 9F21F24 . . . . . \$ 24.99
- #969-000-061 Redcd Power Trgr Unit, 9F26G39 . . . . . 32.99

### CYLINDER & SLIDE BERETTA 92/96 LOW-MASS DROP-IN TRIGGER PULL KIT

For A Smoother, Lighter Trigger Pull

Precision-machined replacements for factory parts let you perform a professional trigger job on a Beretta 92 or 96 pistol for a lighter, smoother trigger pull, more precise, left-of, better shot placement, and faster follow-up shots. When properly installed, kit provides a 4.5 lb. trigger pull that can be further reduced to 3 lb. to 3.5 lb. with proper stoning. C&S Beretta Low-Mass Hammer and C&S Beretta Match Sear are CNC wire-EDM cut from solid stainless steel billet plate stock, then finish machined to tolerances of +/- .0005", heat treated to Rc 50-54, and 100% inspected for quality, fit, and function. Light pull hammer spring and trigger return spring included. Recommended for competition use only. **USA**  
**SPECS:** Hammer and sear - stainless steel, silver finish. Springs - music wire. Fits Beretta models 92 and 96 only.

- #206-000-022 Low Mass Trigger Pull Set, 6K184B49 . . \$ 204.99

### CYLINDER & SLIDE BROWNING HI-POWER HAMMER, SEAR & SPRING SET

Premium Components For A Smooth, Crisp, Trigger Pull

Four-piece, target set allows precise fitting for sear engagement to greatly improve trigger feel and function. Includes a heat-treated, CNC-machined sear; 21 lb., reduced-power, hammer spring; factory-weight, firing pin spring and commander-style hammer for no-bite, shooting comfort. **CS281** features a standard, round spur hammer with narrow, chamfered edges to eliminate drag.

**CS283** and **CS283HC** include a skeletonized, Type II hammer for less weight and decreased lock time. **CS285** and **CS285HC** have chamfered ring hammer with deep, contoured back for less weight and reduced lock time. Tool steel sear replaces the factory, cast part; polishes easily and holds its angles for thousands of rounds. Serrated hammers are available in blue or silver, hard chrome (HC) finish. Includes instructions. Gunsmith fitting recommended. **USA**  
**SPECS:** Hammer - 4140 chrome moly, carbon steel; blue finish or silver, hard chrome (HC) finish. Rc 50-53. Sear - Tool steel, in-the-white. Rc 50-53. Hammer Spring - 21 lb. (9.5 kg) reduced power, factory is 32 lb. (14.5 kg). Firing Pin Spring - Standard weight. Fits Browning Hi-Power 9mm and .40 S&W.

### CYLINDER & SLIDE BROWNING HI-POWER CNC SEAR

Precision Machined For A Trigger Job That Lasts

CNC machined, not cast, from solid steel for a trigger job that breaks light and clean but lasts for thousands of rounds. Outlasts the factory cast sear because it's made from hardened, heat-treated, tool steel that will cut and polish beautifully plus, hold those crisp, finely honed edges without breaking down or rounding off. **USA**  
**SPECS:** Tool steel, in-the-white. Heat treated to Rc 50-53. Fits Browning Hi-Power and some clones.

- #206-035-031 Hi-Power Sear, 6K45L04 . . . . . \$ 52.99

### CYLINDER & SLIDE BROWNING HI-POWER COMMANDER-STYLE HAMMER

Narrowed, Light, Commander-Style; Ends Hammer Bite

Premium, hardened and heat treated, combat grade hammer is fully EDM machined for better fit, function and longer life. Oversized fitting pads below the full cock notch help the gunsmith achieve proper sear engagement and a smoother trigger pull. Exposed edges are chamfered to minimize slide drag and clothing wear. **Standard** - fine line serrated, round spur is easy to cock, has attractive style. **Type II** - narrowed sides reduce slide drag. Lightweight, skeletonized and serrated spur speeds lock time. **USA**  
**SPECS:** 4140 chrome-moly steel. Hardened to Rc 50-53. Blued finish. **Standard** - .53 oz., (15 g) weight. **Type II** - .49 oz., (14 g) weight. Includes instructions. Gunsmith installation recommended.

- #206-035-100 Blue Standard Hammer, 6K66G29 . . . . . \$ 77.99
- #206-035-102 Blue Type II Hammer, 6K74H79 . . . . . 87.99

**HAMMER & SEAR SET** - Combines above hammers and the CNC machined sear, listed elsewhere, into a convenient package that will greatly improve the trigger pull on your Hi-Power. **Standard Set** features blue, standard hammer. **Type II Set** uses type II hammer. **USA**

- #206-000-005 Std. Hammer/Sear Set, 6K103E69 . . . \$ 121.99
- #206-000-006 Type II Hammer/Sear Set, 6K113B89 . . 133.99

### NEW! APEX TACTICAL FN 509/FNS HEAVY-DUTY STRIKER

Maybe Not "Failure Proof" (What Is?) But HIGHLY "Failure Resistant"

If its striker breaks or otherwise fails, your FN pistol is dead in the water - with the risk of you joining it if you're in a critical self-defense situation! Apex's a beefed-up striker is machined from billet stainless steel and heat-treated for extra strength to resist breakage. It's a drop-in replacement for the factory striker on any FN 509, including Mid-Size and Tactical, or FNS-series pistol, including FNS Longslide and FNS Compact. Apex provides ONLY the striker, so you'll need to retain your pistol's striker spring stop, striker spring stop pin, striker return spring, and striker spring guide. **USA**  
**#100-036-830 FN 509 Heavy-Duty Striker, 7F00CMK . . . . . \$ 47.99**

### FIRING PIN ASSEMBLY KIT for GLOCK®

Quickly & Easily Replace Firing Pin Components

Convenient kit of genuine factory parts helps you easily replace a firing pin assembly that's damaged or has just "given up the ghost". Each kit contains a firing pin, spacer sleeve, firing pin spring, and firing pin safety with spring. A firing pin spring cup is included in kits for models that need it. Kits available for Glock® pistols chambered in 9mm, .40 S&W/.357 SIG/.45 GAP, 45 ACP/10mm, and .380 ACP.

- #100-015-949 Firing Pin Assembly Kit, 9mm, 1D51L99 . . . . . \$ 64.99
- #100-015-950 Firing Pin Assembly Kit, 40/357/45GAP, 1D53H54 . . . . . 62.99
- #100-015-951 Firing Pin Assembly Kit, 45ACP/10mm, 1D60I79 . . . . . 75.99
- #100-015-952 Firing Pin Assembly Kit, 45ACP/10mm, 1D56C09 . . . . . 65.99

### ZEV TECHNOLOGIES CUSTOM SKELETONIZED STRIKER for GLOCK®

Lightweight For Fast Locktime; Mirror-Polished For Smoothness & Speed

Drop-in replacement for factory striker has 15-20% less mass and a highly polished surface for fast lock time and a light, smooth-feeling trigger pull, plus ultra-fast reset for minimum delay between follow-up shots. Precision machined from solid stainless steel with skeletonized cuts like those used on bulkheads in aircraft to reduce weight without sacrificing strength. Hard, polished surface resists galling, wear, and corrosion for years of reliable service. For best results, use with reduced-power striker spring from GlockWorX Competition Spring Kit, available separately. **USA**  
**SPECS:** Stainless steel, natural polished finish. Fits Glock pistols chambered in 9mm, .357 Sig, and .40 S&W.

- #100-004-117 Custom Skeletonized Striker, 8B75N99 . . \$ 79.99

### POWER CUSTOM RUGER® MARK I/II/III™ & 22/45™ TOOL STEEL FIRING PIN

For Positive Ignition & Reduced Risk Of Misfire

Replacement firing pin has a larger surface area on the impact point than the factory pin to help ensure positive ignition. Reduces chance of a misfire with ammo made of slightly harder than normal brass. High surface hardness resists wear, too, so you can fire thousands of rounds from your Ruger .22 pistol. **USA**  
**SPECS:** A2 tool steel, in the white. Fits Ruger Mark I/II/III and 22/45™ pistols.  
**#713-000-142 Ruger .22 Pistol Firing Pin, 3A27G19 . . . \$ 31.99**

### SPRINGER PRECISION SPRINGFIELD XD REDUCED TRAVEL SEAR

Drop-In Sear Shortens Trigger Take-Up, Improves Pull

Drop-in sear reduces trigger travel for a more consistent trigger pull and improved accuracy. Cuts pre-travel about 1/4" to help increase control and help prevent accuracy degrading creep. Lessens total travel to limit finger movement for better follow through. Fits all calibers and models. Comes with pre-polished sear face to speed up installation. Gunsmith installation recommended. **USA**  
**SPECS:** Steel, in-the-white. Fits all calibers and models.  
**#100-003-112 Reduced Travel Sear, 1B63E19 . . . . . \$ 78.99**

### VOLQUARTSEN RUGER® MARK II/III TARGET SEAR

Replacement For Factory Sear Produces A Light, Clean-Breaking Trigger Pull

Drop-in sear provides a crisp, clean, responsive trigger pull for Ruger semi-auto .22 LR pistols. Engagement surface is precision-ground and polished—no stoning required. Made from tool steel and then hardened. Includes sear spring. **USA**  
**SPECS:** A2 tool steel, in-the-white, hardened to Rc 58-60. Includes sear spring. Fits Ruger Mark II, III, and .22/45 pistols.

- #930-000-050 Mark II/III Target Sear, 3Z26A09 . . . . . \$ 28.99

### VOLQUARTSEN RUGER® MARK II HAMMER BUSHING

Close Tolerances For A Smooth, Consistent Trigger Pull

CNC machined from hardened steel to exceptionally close tolerances to help ensure a smooth, consistent trigger pull. Advanced screw machine technology is used to drill and ream the pivot pin hole perfectly concentric for optimal hammer-to-sear engagement. Black oxide finish for added durability and resistance against corrosion. **USA**  
**SPECS:** Steel, black oxide finish. Fits Ruger Mark II pistols only.

- #930-000-056 Mark II Hammer Bushing, 3Z7Q99 . . . . . \$ 9.99

### TITANIUM, CARBON STEEL, STAINLESS STEEL, OR WHAT?

Throughout the catalog you'll see similar parts - hammers and sears for example - made out of all three materials. So what's the difference, which is better? We'll start with the simplest choice, **Carbon** or **Stainless** steel. It's really just a matter of looks, the two metals are so close in wear characteristics, and how smooth a finish you can achieve on the hooks and notches, that it comes down to what you like. If you want a blue hammer on a blue gun, pick a carbon steel part. If you want something to contrast with the bluing, a stainless steel hammer can be finished to a soft matte, almost gray, or polished bright to look much like chrome. Same goes for a stainless gun, match it, or create contrasts with a bright or matte blued hammer. Whatever you choose you'll have excellent wear life out of either a carbon steel or stainless steel part. **Titanium** can help deliver the ultimate action speed, and the lightest possible trigger pulls. An identical part made from titanium will weigh about 62% as much as its steel counterpart. If the hammer, strut, mainspring cap and firing pin are 38% lighter, there's less resistance to overcome as you squeeze the trigger, hence, a lighter pull. Since the mainspring can accelerate those parts more quickly, you'll also get a faster lock time. Less time for the sights to slip off target! The drawback - you knew there was one - is that titanium wears much more quickly than steel and can gall pretty easily, which will slow everything back down. The all-important hooks on a titanium hammer will lose their sharp edges much more quickly than those on a steel hammer. That means you (or your gunsmith) will have to re-stone that hammer more often and it will eventually wear out, sooner. If you clean and lube regularly to prevent galling and accept the fact that total life of these parts will be less than steel, the light weight can help your race gun go really fast. **TiN**, or Titanium Nitride, isn't a metal, it's an extremely thin, very hard, smooth coating that greatly increases the wear characteristics of the metal to which it is added. A good addition for maximum service life, and that gold color's a great way to set a gun's looks apart from the crowd. This is a quick look; if you have specific questions on your application, call one of our Tech Support staff, 800-741-0015.

GUARANTEED. FOREVER.® SINCE 1939

## LIGHTNING STRIKE GLOCK® & SIG P365 LIGHTWEIGHT STRIKER

Cuts Lock Time By Up To 50%!

Ultra-lightweight **Titanium Striker for Glock®** has significantly less mass than the factory striker, so it reduces lock time by a minimum of 50% for a faster shot and improved accuracy. Drops in with no gunsmithing and no permanent alterations to the firearm required. CNC machined from Titanium and hardened for long-lasting performance. Includes Wolff striker spring. Ultra-strong **Tool Steel Striker for Glock®** is still 32% lighter than factory part, heat treated for exceptional strength and performance with hot loads. Coated with Kolene Nutride for greater lubricity and corrosion resistance. Use pistol's current spring. **SIG Sauer P365** striker is made of hardened 17-4 stainless steel, so it's much more robust than the factory part. Fits ALL variations of P365 made to date. Use existing spring. Mission-critical part of the gun - do you really want to risk failure to fire due to a worn out or broken striker?

**SPECS:** Solid Titanium, TiNi coated gold, EDT150 tool steel, heat treated to Rc 70, or 17-4 stainless steel. **Standard Frame** fits Glock 9mm/.40 S&W. **Large Frame** fits Glock 10mm/.45 ACP.

## POWER CUSTOM RUGER® MARK II TITANIUM PARTS

Lighter Weight Means Superior Performance

Both parts are machined from solid, titanium alloy for long-lasting performance and minimum increase in weight.

**TITANIUM BOLT RACKER** - Fast, one-finger racking even on scoped pistols. Attaches to the rear of the bolt and provides a convenient handle for faster racking. **SPECS:** Titanium, matte finish. 2.4" (6cm) long. .7 oz. (19 g) wt.

#713-275-002 Titanium Bolt Racker, 3A39N09..... \$ 45.99

**TITANIUM FIRING PIN** - Significantly lower locktime and more consistent ignition. No modifications. **SPECS:** Titanium, matte finish. 1.8" (4.7cm) long. 1 oz. (2.4 g) wt.

#713-275-001 Titanium Firing Pin, 3A27H19..... \$ 31.99

## BROWNELLS RUGER® MARK I/II/III ALLEN-HEAD GRIP SCREWS

Blue Or Silver;  
Improves Looks & Function

Excellent looking Allen-head screws dress up the Ruger Mark I, Mark II, or Mark III™ pistol, plus give positive wrench engagement to help prevent stripped-out heads. Fits flush on all factory and aftermarket grips. Available in 4-Paks.

**SPECS:** Steel, blue or nickel-plated. 6-40 tip, .250" (6.3mm) diameter head, .325" (8.1mm) long. Installation requires 1/16" Allen wrench.

## KRUNCH PRODUCTS PRO GRIP ENHANCER

Non-Sticky, Non-Abrasive;  
Keeps Your Pistol In Your Hand

Used and endorsed by USPSA Master Shooters to enhance their natural grip for increased recoil control and more consistent accuracy. Non-sticky formula actually works with your natural skin oils to repel moisture and perspiration, and keep your pistol or rifle firm in your grip. Non-toxic, washes off with soap and water; will not stain clothing or damage gun finishes. **Flip Top or Pump dispenser.**

**SPECS:** Liquid, 2 fl. oz. (59ml), resealable container.

#474-100-001 Pump Pro Grip Enhancer, 4G11F04.... 12.99

## HOGUE SEMI-AUTO HANDALL™ GRIP

Comfortable, Non-Slip Grip For  
Semi-Auto Pistols

Slip-on sleeve offers a contoured, non-slip grip with no gun modifications. Proportioned finger grooves and a slight ambidextrous palm swell give extra support for greater shooting control and pointability. Made from recoil-absorbing soft rubber that dramatically improves shooting comfort and accuracy. **Semi-Auto HandAll** fits most pistols with full-size grip frame and no grip safety. **HandAll Jr.** fits most .22/.25 ACP semi-auto pocket pistols. **Glock** model fits all full-size and compact Glock® pistols, plus other similarly proportioned semi-autos without a grip safety. **SIG P320** fits full-size grip frame. Also fits P320 X-Five, FN 509, and Smith & Wesson M&P M2.0. **Kahr/S&W M&P Shield .45** has a generous beavertail that fits Kahr P9/P40/CW9/CW4 and S&W M&P Shield .45 ACP pistols, plus Bersa Thunder 380, Ruger SR22, SCCY CPX-2, Springfield XD-E. Also fits Walther PK380, PPK/S 380, and P22. **Springfield** fits Springfield XD and XDM chambered in 9mm, .40 S&W, and .357 Sig, and many similarly proportioned semi-autos without a grip safety.

**SPECS:** Soft rubber, textured, Black (BLK), Flat Dark Earth (FDE) or O.D. Green (ODG). Approximately 2 1/4" (6cm) long, 1 1/4" (3cm) wide, 3 1/4" (8cm) high.

## BROOKS TACTICAL SEMI-AUTO AGRIP

Improves Handling & Control,  
Secure Grip Helps Increase Accuracy

Pre-cut, wrap around sleeve sticks on easily with an ultra high-tech, pressure-sensitive adhesive. Won't peel off in harsh conditions, even under water. Provides a comfortable, secure grip for competition, law enforcement and tactical firearms. Non-slip and non-abrasive, with a soft feel that's not tacky. Extremely durable, resists splitting, tearing, abrasion, and wear. Flexible, so it conforms to Glock frames with and without finger grooves. Resistant to most oils and solvents. Use 5" x 8", **AGrip Sheet** to cover rifles, shotgun stocks, forends, flashlights and tools or handguns not listed below.

**SPECS:** Black. Soft texture.

## PACHMAYR TACTICAL GRIP GLOVE

Absorbs Recoil, Prevents Slippage

Recoil-absorbing, soft rubber sleeve offers a contoured, non-slip grip that dramatically improves shooting comfort and accuracy from your semi-auto duty pistol. Finger grooves and a slight palm swell help reduce felt recoil and muzzle jump for fast, accurate follow-up shots. Vertical and horizontal serrations provide a textured surface that's comfortable and easy-to-hold, especially during long periods in the ready position. Slides over pistol grip.

**SPECS:** Rubber, textured finish, black. Approximately 2 1/4" (5.7cm) long, 1" (2.5cm) wide, 2 3/4" (6cm) high. .7 oz. (20g) weight. **Glock** fits 17, 20, 21, 22, 31, 34, 35, 37. **Glock Compact** fits 19, 23, 25, 32, and 38. **M&P** fits Smith & Wesson M&P, all models, all calibers. **XD/XDM** fits full-size Springfield Armory XD and XDM, all calibers. **Ruger LCP/Kel-Tec** fits Ruger LCP, Taurus 738 TCP, and Kel-Tec P-3AT/P-32 pistols.

## FALCON ERGO RUGER® MK II & III GRIP

Palm Swell Gives Consistent Grip For  
Competition & Target Shooting

Over-molded grips drop in to Ruger MKII and MKIII pistols to give comfortable, enhanced grip. Ambidextrous palm-swell design provides easy-to-hold shape that helps give a more consistent grip. Unique injection-molded texture helps you grip the gun in all conditions. Installs with original factory screws. Available in black.

#573-000-072 Ergo Ruger MKII & MKIII Grip, 3G18L99... \$ 19.99

## HOGUE SEMI-AUTO PISTOL GRIPS

Gives Firm Grasp On Pistol & Absorbs Recoil

Hand-filling, molded rubber grips help absorb recoil by spreading the shock over a wider area of the hand. Finger groove models for semi-autos tighten the grip upward, into the triggerguard for better recoil control. **SPECS:** Molded rubber w/pebble finish. Model designations abbreviated as follows. Abbreviations in table below: Checkered (CH); Finger Grooves (FG); Rubber (RU); Slabs (SL); Palm Swells (PS). Slabs (SL). Ruger 22/45 RP fits pistols with removable grip panels ONLY.

## HOGUE SIG P226 EXTREME ALUMINUM GRIPS

Comfortable, Good-Looking;  
Machined From Solid Aluminum  
For Strength & Durability

Extreme-duty grips precision machined from solid 6061 T6 aluminum billet help you maintain a firm, comfortable, no-slip grasp on your pistol, even when your hands are wet. These grips weigh only slightly more than factory grips, yet stand up to the harsh wear and tear of duty and tactical operations. The crisp, precision-cut diamond pattern on the sides and backstrap replicates fine 18 lpi checkering and provides a superior gripping surface that won't bite into your hand. Type III hard anodized for additional strength and outstanding resistance to surface wear. **SPECS:** Machined 6061 T6 aluminum, Type III hard anodized, matte black finish. Fits SIG P226.

**WILSON COMBAT BERETTA 92/96 CHECKERED G10 GRIPS**

A Subtle Upgrade to Your Pistols That's Practical AND Good-Looking

Why should the 1911 crowd get all the benefits of tough, long-wearing, non-slip G10 fiberglass grips? Wilson brings all those benefits to the Beretta 92/96 pistol with these good-looking AND practical grips. They are machined from G10 fiberglass laminate material for a precise fit with an extra-thin profile so even folks with smaller hands will be able to maintain a hold on their '92 that's both comfortable and secure. And the aggressive checkering means you pistol stays firmly under your control, even during rapid fire with wet hands. The handsome Wilson Combat logo medallion is a bonus. The color is Wilson's "Dirty Olive," which offers a subtle visual difference from traditional black/dark gray but doesn't stand out in the wrong way. Fits full-size Beretta 92 and 96 grip frames. Includes rubber O-rings to replace the factory washers and ensure a snug fit. You'll have to reuse your gun's existing grip screws. **#965-000-336 Beretta 92/96 G10 Grips, 5F71P09 . . . . . \$ 76.95**

**KAK INDUSTRIES AR-15 PISTOL SHOCKWAVE BLADE & 2.0 PISTOL BRACES**

Original Shockwave Blade

Adj.-length Shockwave 2.0 Blade & Buffer Tube

Ride the 'Wave to Better Control & More Comfortable Shooting of Your AR-15 Pistol

Pistols based on the AR-15 platform, both in rifle calibers (like 5.56 NATO, .300 AAC Blackout) and actual pistol calibers (9x19mm, 40 S&W, .45 ACP), have become wildly popular in recent years. But let's face it: a handgun build on a rifle platform, even one as compact and lightweight as the AR-15, is a bit of a handful to shoot. KAK's Shockwave Blade solves that problem. It installs on AR-15 pistol buffer tubes and helps you maintain better control over the gun in one of two ways: for one-handed shooting, you can rest the vertical "fin" of the Blade against the inside of your forearm to stabilize the pistol while you're firing OR you can rest the Blade against your cheek for a steady sight picture. Either way, adding the Shockwave Blade makes your AR-pistol a whole lot easier to control and more fun to shoot. Made from lightweight yet high-strength glass-reinforced molded polymer, the "Wave" fits all pistol firearms equipped with a standard AR-15 pistol buffer tube (up to 1.25" in O.D., including the CZ Scorpion Evo 3, Heckler & Koch HK9X, and others) and a carbine buffer inside. Just slip it on, tighten the large setscrew, and hit the range. Sold as the **Shockwave Blade ONLY** or in the original **Shockwave Kit** that contains the stabilizing Blade, pistol buffer tube, standard carbine buffer & spring, castle nut, and endplate. **Shockwave 2.0** is 5-position adjustable for length; comes with a proprietary buffer tube that works with a carbine weight buffer and spring. **All** come with a copy of the ATF letter stating that the Shockwave is totally A-OK to install on AR-15 (and similar) firearms designated as pistols. Available colors: Black (BLK), Flat Dark Earth (FDE), O.D. Green (ODG), and Gray. **#100-022-567 Shockwave Blade ONLY, BLK, 1K39F99 . . . \$ 49.99**

**VOLQUARTSEN RUGER® MARK III™ VOLTHANE PISTOL GRIPS**

Hand-Filling Target Grips for Comfortable Hold & Better Control

Large, contoured, bottom-swell heelrest and wide, upswept thumb-rest straighten and extend the wrist for a relaxed, steadier hold and more reliable accuracy. Wedge-shaped grip area (wide in the rear, narrow in front) and evenly spaced finger grooves match the natural shape of the hand. Flexible, synthetic rubber construction with impressed checking ensures secure, no-slip one- or two-hand hold. Two-piece design fits Ruger® Mark III™ ONLY. **SPECS:** Thermo-molded Volthane rubber, black. Approx. 3 1/4" (8.2cm) wide at base, 4 1/4" (10.7cm) high, 5.2 oz. (147g). Right-hand only. Includes Allen head screws and wrench.  
**#930-000-047 RH Volthane Grips, Mark III, 3Z43B19 . . . . . \$ 47.99**

**SMART LOCK TECHNOLOGY**

**MAGLOC® THUMB REST FOR GLOCK®**

Improves Control & Reduces Muzzle Jump For Better Accuracy

Ambidextrous rest provides comfortable support for the thumb of your shooting hand. Helps you control muzzle flip for fast, accurate follow-up shots, while the extended beavertail protects the web of the hand from painful contact with the slide. Stainless steel pin replaces the factory trigger housing pin to anchor the rest securely to the grip frame. May require some fitting, but no permanent modification to gun. **Competition 2-M** features 3/8" wide thumb rests for maximum support and muzzle control in action shooting events. **Duty-M** has slightly narrower, 5/16" wide rests for improved fit in duty holsters. **Both rests may limit access to slide lock lever with thumb of shooting hand, and are not recommended for use with thumb-break holsters.** **SPECS:** Molded polymer, black. Fits Glock 17, 18, 19, 20, 21, 21SF, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39. Does not fit slim line Glock 36 or 21SF. Some models, such as 10mm and .45 ACP made after 2007 with serial number starting with L, require enlarged holes on the rest to ensure proper fit. **Competition 2-M** - 1 1/2" (3.8cm) long, 2" (5.1cm) wide, .35" (8.99mm) beavertail. .39 oz. (11g) weight. **Duty-M** - 1 1/2" (3.8cm) long, 2" (5.1cm) wide, .75" (19.1mm) beavertail. .35 oz. (9.9g).  
**#100-005-389 Competition 2-M Thumb Rest, 2A21C74 . . . . . \$ 28.99**

**NEW! STRIKE INDUSTRIES AR-15 & SIG SAUER MCX/MPX PISTOLS PDW STABILIZER**

Compact, Yet Full-Featured & Comfortable To Give You Enhanced Control of Your AR Pistol

The PDW Stabilizer fits any mil-spec AR-15 receiver and makes your AR pistol vastly more comfortable and easier to shoot. In its compressed position, the stabilizer enables effortless maneuverability in close quarters and in vehicular operations. With the press of a button, the rapid deployment system instantly springs the stabilizer to the extended position for a more stable shooting platform, better shot placement, and faster reaction time. Installation is wonderfully "drop-in," just like installing a traditional AR-15 carbine buttstock. The on-board buffer system is carefully engineered to deliver extremely reliable cycling AND allows for the use of a standard bolt carrier. The included flat-wire buffer spring increases bolt load, despite the compact dimensions for excellent reliability, even in extremely short-barreled configurations. The rubberized cheek rest provides a secure, comfortable cheekweld, and there are even built-in QD swivel sockets for expanded sling mounting options. The Stabilizer's exterior has had all snag hazards and abrasion zones removed, further ensuring the shooter's comfort. The SIG Sauer MCX/MPX Stabilizer delivers the same benefits to those platforms, including the easy, drop-in installation.  
**#100-037-035 PDW Stabilizer, 2H00FRB . . . . . \$ 264.99**

## SB TACTICAL PISTOL BRACES

**Gives the Shooter Enhanced Control  
Over Carbine- & SMG-Based Semi-Auto Pistols**

The folks at SB started the "Brace Revolution" with their original Brace for AR-15 pistols that made shooting a handgun based on a rifle, carbine, or submachinegun a whole lot more manageable AND fun to shoot. They have continued expanding the line to cover a variety of similar but non-AR based pistols. While originally designed to help handicapped shooters, the concept is the same for all: The Brace can be strapped comfortable to the forearm of the shooting hand for more accurate one-handed shooting with less fatigue OR it can be rested against the shoulder or cheek like a traditional stock for a third point of contact to stabilize the pistol for fast yet carefully aimed shots. Either way, the shooter is able to maintain excellent control over the weapon. The Braces themselves are molded from reinforced hard polymer and fitted with the necessary hardware to "interface" securely and solidly with the receiver of the firearm. All come with a nylon webbing strap for cinching the brace to the shooter's forearm. 

**SBA4 5-POSITION BRACE** - This Brace fits firearm platforms that accept an AR-15 carbine receiver extension (i.e., an adjustable carbine stock buffer tube). It's 5-position adjustable for length thanks to the M4 carbine buffer tube that comes with it, and there's an ambidextrous socket for QD sling swivels. The tube is made of extra-strong 7075 T6 aluminum and has a "mil-spec" (1.14") O.D. Sounds like an AR-15 only proposition but in fact, more and more non-AR firearms are coming with adapters to allow use of the many available AR accessories. Buffer and spring are not included.

**#100-033-455 SBA4 5-Position Adj. Brace, Black, 5Z116G99 . . . . . \$ 129.99**

**#100-033-456 SBA4 5-Position Adj. Brace, Flat Dark Earth, 5Z118N79 . . . . . 131.99**

**new 100-039-622 SBA4 5-Position Adj. Brace, O.D. Green, 5Z116L99 . . . . . 129.99**

**new 100-039-621 SBA4 5-Position Adj. Brace, Stealth Gray, 5Z116G99 . . . . . 129.99**

**TF1913™ TRIANGULAR FOLDING BRACE** - Minimalist, left side-folding open-triangle brace fits firearms that have an MIL-STD 1913 Picatinny attachment point at the rear of the receiver. This includes the SIG Sauer MPX and MCX, SIG Sauer Rattler, Rock River Arms LAR-PDS, etc.) The TF1913™ comes complete and ready to install. The robust steel hinge mechanism locks both open and folded; its pull-through configuration enables quick unfolding of the brace. Rigid reinforced polymer structure with flexible arm cuff. Length: 9.5". Width: 1" max. Strap width: 1".

**new 100-040-259 TF1913 Triangular Folding Brace, Black, 5Z00FDS . . . . . \$ 159.99**

**FS1913™/FS1913A™ FOR SIG MCX/MPX** - The Brace comes the SIG MCX/MPX platform! This Brace clamps to any firearm with an MIL-STD 1913 Picatinny stock attachment point at the rear of the receiver. The SIG MCX/MPX pistols are the most popular platform that use this interface right now, and the FS1913™ will also fit the SIG Rattler and Rock River LAR-PDS - or any similar firearm with an M1913 stock interface. It's a straightforward "strut" type brace that provides a shooting interface like factory MCX/MPX stock. Folds to the left, so it will not interfere with the ejection port when stowed. It deploys in

the blink of an eye and locks open with reassuring solidity via the ultra-strong, smooth-operating STEEL hinge mechanism. Locks closed, too, to prevent accidental deployment. It looks spindly, but when extended, the FS1913™ provides a pleasantly secure shooting platform for accurate aimed fire under stress. **FS1913™** has a lightweight reinforced polymer strut. **FS1913A™** is the same design but with an extra-strong (and still light) *aluminum* strut for use in high-stress operations.

**#100-032-047 FS1913 Polymer Brace for SIG MCX/MPX, 5Z00NQB . . . . . \$ 161.99**

**new 100-039-623 FS1913A Aluminum Brace for SIG MCX/MPX, 5Z00BMH . . . . . 199.99**

**CZPDW FOR CZ SCORPION EVO** - This quick-deploying, length-adjustable brace tames the sting in your Scorpion's tail during sustained fire. It can be extended in one fluid motion without having to depress a release button. And the user can choose one of three (3) length positions, so it's totally adaptable to fit different shooters. There's even a socket for a standard pushbutton QD sling swivel, so you can also stabilize your Scorpion with a sling. The CZPDW is constructed of strong yet lightweight 6061 T6 aluminum alloy, with a tough hardcoat anodized finish for excellent resistance to surface wear and corrosion. Two colors to choose from: basic Black (**BLK**) or Flat Dark Earth (**FDE**). Length: 3.25" (fully retracted), 7" (mid position), and 9.25" (fully extended). Like all SB Tactical braces, the CZPDW enables handicapped shooters to enjoy shooting the CZ Scorpion Evo, and helps other shooters enjoy shooting it *even more*.

CZPDW retracted

**#100-032-040 CZ Scorpion Evo Brace, BLK, 5Z00JXJ . . . \$ 228.99**

**#100-032-041 CZ Scorpion Evo Brace, FDE, 5Z00BYD . . . 223.99**

**HKPDW™ FOR H&K MP5 & CLONES** - This 3-position adjustable Brace fits the Heckler & Koch MP5, MP5K, HK53, and "reverse stretch" clones. It features SB's quick-deploying "pull through" system that lets you extend the Brace just by, well, pulling on it. The rods are steel and the adapter that attaches to the parent firearm is made of 6061 T6 aluminum (hardcoat anodized finish), so it's built for serious use. Integral socket for QD pushbutton sling swivel. Length: 3.2" (fully collapsed), 5.3" (mid position), 8.0" (fully extended). Due to varying tolerances between roller lock manufacturers, gunsmith fitting may be required.

HKPDW in mid position

**#100-033-457 HKPDW Brace for H&K MP5/MP5K/HK53 & Clones, 5Z224I39 . . . . . \$ 263.99**

**SBA3™ 1022 CHARGER TD** - This is a 3-position Brace and mini chassis assembly for the Ruger® 10/22 Charger® Takedown pistol. It's made of sturdy yet lightweight reinforced molded polymer (in black) and includes a "forearm" piece so your gun looks like it came from the factory with SB's components. It will fit Chargers with both the standard and .920" bull barrel. Overall length of firearm with Brace installed : 22.75" (brace fully collapsed), 24" (mid position), 25" (fully extended).

**#100-033-460 SBA3 1022 Charger TD Brace, 5Z135C99 . . . . . \$ 159.99**

**SBT BRACE** - This is a side-folding Brace that fits the B&T APC and the Heckler & Koch UMP pistols. All the necessary mounting hardware is part of it. The styling purposely replicates that of stocks B&T manufactured for various H&K platforms. It's very basic - the OAL comes out to 10.5" - but it gets the job done! **#100-027-722 SBT Brace, 5Z98H99 . . . . . \$ 131.99**
