Active User Community

BlueCherry User Groups, Customer Satisfaction Representatives, Business Process Improvement Review, BlueCherry Community Events, Active LinkedIn Group

The best-in-class BlueCherry Infinity Global Enterprise solution empowers fashion, softgoods, and other consumer products companies to better manage their entire business and supply chain; from concept to consumer. Through a comprehensive range of fully integrated software modules, it enables retailers, brands, manufacturers and suppliers to streamline processes, gain visibility, reduce costs, increase productivity, and enhance competitiveness.

The One Solution with the Power to Manage your Entire Business

Being a great marketer, developer, or manufacturer is simply no longer enough. To succeed in the fast-paced and ultra-competitive world of fashion, retailers, brands, manufacturers, and suppliers must synchronize their efforts to deliver compelling products with frequent innovation and customer-perceived value. To sustain this success, these companies must master every aspect of their internal and external demand and supply chain operations.

To meet these new mandates, companies are embracing technology as never before. But many are discovering that limited-purpose software or independently linked systems do not effectively provide the visibility and control needed across the entire enterprise.

BlueCherry Infinity solves this challenge by providing all the tools needed to run the business; including financials and reporting, product development and sampling, sourcing and production, warehousing and distribution, sales and retail compliance. Comprising a wide range of fully integrated software modules, BlueCherry empowers fashion and softgoods companies to choose the configuration they need to achieve the operational efficiency, process visibility, and global collaboration they need to reach and sustain their competitive advantage.

BlueCherry Infinity is your single-source for these fashion-critical solution modules:

- Enterprise Resource Planning (ERP)
- Product Lifecycle Management (PLM)
- Supply Chain Management (SCM)
- Warehouse Management (WMS)
- Mobile Sales Management (B2B/SFA)
- Data Warehouse/Business Intelligence (BI)
- Electronic Data Interchange (EDI)
- Multi-Channel Merchandise Planning (MCMP)
- Shop Floor Control (SFC)
