Product Name:	Rosin		
Product Type:	Concentrate		
Perishable: Yes/No	No	Shelf Life: If perishable.	

Product Description: Details must include the color, shape, and texture.	Rosin has a bright golden yellow to amber color and can have a gooey to brittle consistency. Rosin is sticky and oily in nature. Rosin is soft and pliable.		
--	---	--	--

Ingredients: This box is not applicable to marijuana concentrates.	Not Applicable.		
--	-----------------	--	--

Standard Production Procedure and Detailed Manufacturing Process:	<p>A Rosin Press is at the center of rosin production, a machine responsible for producing controlled amounts of heat and pressure over short periods of time. To produce rosin, three components are required: heat, pressure, and time. The technique in rosin production rests within the ability to balance these three components together to create a superior product in flavor and effect.</p> <p>Cannabis flowers are screened, broken down and packaged into a small bindle, which is then placed into the Rosin Press onto heated plates, pressure is then applied to the plates and the rosin is squeezed out and collected.</p>
