GUIDE TO THIS BOOK

This book contains the Program Guide, New Research Guide, and Exhibits Guide. Located within the Program Guide you will find a topic index in addition to program tracks (color-coded) that will assist you in finding scientific sessions of interest. The individual program for each day of the meeting is also color-coded so that you can easily find the day(s) of the meeting that interest you. The program is listed by start time with the formats listed alphabetically under those times. To make it even easier to plan your day a separate Days-at-a-Glance has been included with your registration materials. The New Research Guide lists the titles of the Posters that will be presented at this meeting, organized numerically by session/day. There is a topic index for the Posters at the end of the New Research Guide. The Exhibits Guide contains a list of the exhibitors and a floor plan of the exhibit hall, along with information about the Product Theaters.

Dear Colleagues and Guests:

Welcome to New York City—“the greatest city in the world”—and to the 167th Annual Meeting of the American Psychiatric Association. Both the city and the meeting offer an incredibly broad range of excitement, education, and experiences for all who attend. The annual APA meeting is not only the largest psychiatric meeting in the world but it is truly a global meeting with presenters and attendees from around the world.

Under the leadership of APA President, Jeffrey Lieberman, MD, the Scientific Program Committee has planned a diverse educational program reflecting the presidential theme, “Changing the Practice and Perception of Psychiatry.” Please plan to attend the Annual Business meeting on Sunday May 4, 12:30 pm to 1:30 pm at the New York Marriott Marquis. The Opening Session, Sunday May 4, 4:30 pm at the Javits Convention Center, will feature a not-to-be-missed discussion between Emmy Award winner Alan Alda, Nobel laureate Eric Kandel, MD and APA President, Jeffrey Lieberman, MD.

Among “tracks” at the meeting are Ethics, Military, NIMH, and Psychosomatic Medicine featuring distinguished presenters including Thomas Insel, MD, Ezekiel Emanuel, MD, PhD, Nora Volkow, MD, Steven Hyman, MD, Elspeth Ritchie, MD, Wayne Katon, MD, Jurgen Unutzer, MD, MPH, Robert Heinssen, PhD, and many others. Distinguished Psychiatrist lectures will be given by Karl Diesseroth, MD, PhD, Gary Gottlieb, MD, MBA, Jonathan Javitch, MD, PhD, Eric Kandel, MD, Daniel Pine, MD, Steven Paul, MD, MS, and Kimberly Yonkers, MD. Frontiers of Science lectures will be presented by BJ Casey, PhD, Scott Small, MD, Nora Volkow, MD, and Huda Zoghbi, MD.

This year the Advances in Research session chaired by Dr. Herbert Pardes will be a two-part, full day symposium featuring an all-star group of presenters addressing topics including psychotherapy, imaging,

genetics, epidemiology, integrated care, therapeutic discovery, neuroscience, and psychiatric services. Presenters will discuss how research translates into clinical practice for today and for the future.

Media sessions will include:

- *No Kidding? Me Too!*, a documentary produced by Emmy Award winner Joe Pantoliano, followed by a discussion with Mr. Pantoliano and APA President-elect Paul Summergrad;
- *Six Million and One*, produced and discussed by David Fisher; and
- *Side Effects*, followed by a discussion with the producer/writer, Scott Z. Burns and co-producer, A. Sasha Bardey, MD.

In addition to the very popular Children of Psychiatrists session, chaired by Drs. Leah Dickstein and Michelle Riba, this year we will offer a new session entitled *When a Psychiatrist Loses a Parent*, chaired by Lisa Mellman, MD. Dr. Richard Kogan will once again present on a famous composer and his psychiatrist—this year Sergei Rachmaninoff and his psychiatrist.

As always the meeting has a fantastic array of Advances sessions, including Mind-Body Medicine, Advances in Sleep Disorders, Pharmacology in the Medically Ill, and Reductions in Coronary Heart Disease Mortality; Lessons for Psychiatry (presented by Dr. Lee Goldman, Dean of Columbia University College of Physicians and Surgeons).

The challenge for all will be how to benefit the most from both the meeting *and* the wonders of New York City. With so much to offer the 167th APA Meeting promises to be an outstanding event. We look forward to seeing you in the Big Apple.

Sincerely,

Philip R. Muskin, M.D.

Dear Colleagues and Guests:

Welcome to the 167th Annual Meeting of the American Psychiatric Association in New York City. “Changing the Practice and Perception of Psychiatry” is this year’s theme. The theme resonates with several key forces impacting psychiatric medicine and mental health care: *scientific discovery*—leading to changes in our understanding of the brain, behavior, and mental disorders and our ability to treat them; and *health care reform*—which is changing the way health care and mental health care are provided and financed.

I am pleased that Vice President Joe Biden, well known as an advocate for mental health policy and services, will be delivering the William C. Menninger Memorial Convocation Lecture (Monday, from 2 p.m. to 3 p.m. in Hall 3E, Jacob K. Javits Convention Center).

As part of the Opening Session (Sunday, 4:30 – 6:45 p.m., Hall 3E, Convention Center), I am privileged to host what promises to be a fascinating conversation with Nobel laureate Eric Kandel, MD and Emmy Award Winner Alan Alda. Alan Alda, well known as a television, stage and film actor, director and writer, has had a lifelong interest in science and hosted PBS’ *Scientific American Frontiers* from 1993 to 2005 and the 2010 documentary mini-series *The Human Spark*.

The fields of psychiatric medicine and mental health care are poised on the brink of transformative advances in diagnostic methods and therapeutic modalities, all featured in this meeting: the genetics and neuroscience underpinnings of schizophrenia, bipolar disorder, Alzheimer’s disease, autism, addictions, and other serious conditions. For example, the Frontiers of Science lecturers will include Scott Small, M.D., whose work combines brain imaging with gene-expression technologies to study Alzheimer’s disease, and B.J. Casey, Ph.D., who has pioneered novel uses of neuroimaging methodologies to examine behavioral and brain development.

The Affordable Care Act, the rise of accountable care organizations, and a renewed focus on patient-centered care, afford psychiatrists and primary care providers an unprecedented opportunity to work collaboratively to improve health. The Integrated Care track addresses the changing roles and different approaches, and provides practical skills for leadership roles within collaborative care teams. Understanding and embracing these changes is key to the future of psychiatry. Ezekiel J. Emanuel, M.D., Ph.D., a former special advisor to the Obama Administration on health policy, will offer insights on the Affordable Care Act and the future of mental health care.

Topical tracks represented in the *Guide to the Annual Meeting* highlight our featured program partner, the National Institute on Mental Health (NIMH), and our subspecialties (addiction, child and adolescent psychiatry, forensic psychiatry, geriatric psychiatry, and psychosomatic medicine). Once again there are strong concentrations in military mental health, ethics, and DSM-5.

Additional meeting highlights include the always-popular *MindGames*, APA’s national Jeopardy-like competition for residents (Tuesday, 6:00 p.m., Marriott Marquis); and the annual American Psychiatric Foundation Benefit at the National Historic Landmark Intrepid aircraft carrier (Saturday, 7:00 – 10:00 p.m., *ticket required*).

Special thanks to the Scientific Program Committee, under the leadership of chair Philip R. Muskin, M.D., for its outstanding work. The meeting offers hundreds of sessions to learn the latest science, clinical advances, and promising practices from among the best in the field, along with abundant networking and social opportunities.

Sincerely,

A handwritten signature in black ink that reads "Jeffrey Lieberman MD". The signature is fluid and cursive.

Continuing Medical Education

Educational Objectives

At the conclusion of this meeting the participant will be able to:

1. Review new research findings in the fields of psychiatry and neuroscience and address gaps in knowledge;
2. Acquire new knowledge and skills in clinical psychiatry, which can be utilized to improve patient care;
3. Identify and remove barriers to the transfer of new knowledge for your practice, including provision of culturally competent care for diverse populations;
4. Assess a variety of treatment choices, including psychotherapeutic and pharmacological options; and
5. Recognize mental health service delivery issues, including barriers to care.

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The APA designates this live activity for a maximum of 50 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Please note: Formats on the scientific program, as outlined below, have been approved for CME credit.

The scientific sessions on the official Annual Meeting program, with some exceptions, meet the criteria for *AMA PRA Category 1 Credit™*. Sessions in the following program formats are designated as category 1: ***Advances in... Series; Case Conferences; CME Courses; Focus Live; Forums; Lectures; Master Courses; Presidential Symposia; Scientific and Clinical Reports; Seminars; Small Interactive Sessions; Symposia; and Workshops.***

New Research Poster Sessions are NOT designated for AMA PRA Category 1 Credit™.

Scientific sessions are open to all Annual Meeting registrants with the exception of Case Conferences, which are open to APA members only. CME Courses and Master Courses require an additional fee.

To document CME credit earned at the Annual Meeting, participants should maintain a list of sessions they attended. Credit is earned on an hour-for-hour basis. A daily attendance log is provided in this book for listing your sessions and credits.

Scientific Session Capacity Guidelines

If overcrowding occurs in a scientific session we ask your assistance so that all in attendance can benefit. Please abide by the following guidelines if you are in a crowded room.

1. Take a seat as close to the front of the room as possible;
2. Move to the center of the row and fill all seats, so that chairs are available on the aisles for additional attendees;

GENERAL INFORMATION

3. Don't stand or sit in the aisles or lean against walls. Overcrowding of meeting rooms may subject the session to shut down by the Fire Marshall; therefore, please either find a seat or attend another session.

Shuttle Bus Desk and Service

Curbside

Saturday–Wednesday, 7:00 a.m. Pick up at hotels.

Sunday–Monday, last departure from Javits Convention Center 7:30 p.m.

Saturday, Tuesday, Wednesday, last departure from Javits Convention Center 5:30 p.m.

A 2014 meeting badge is required to ride on the courtesy shuttle bus. The Javits Convention Center will serve as the “hub” for all shuttle bus routes. A detailed shuttle bus schedule will be available on site and will be posted in the lobbies of participating hotels.

Smoking Policy

No smoking is allowed anywhere in the Javits Convention Center.

Tape Recording and Visual Reproduction Policies

Case Conferences and the Keynote Address may not be recorded. For other sessions, unless prohibited by the

presenters, audio recording is permitted for personal use only. Attendees may use their own small, portable devices to audio record. Attendees are not permitted to photograph (including with cell phone cameras) or video any session because the intrusive nature of the recording may disrupt the session. Larger, professional recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional firm to record sessions. Badges of personnel representing this firm will clearly identify them.

DISCLOSURE INDEX

AMERICAN PSYCHIATRIC ASSOCIATION CONTINUING MEDICAL EDUCATION POLICY ON FULL DISCLOSURE

The American Psychiatric Association requires disclosure by all program planners and presenters at CME activities of any financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the educational activity. A “financial interest” may include, but is not limited to: being an employee and/or being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An “affiliation” may include holding a position on an advisory committee, speakers’ bureau or some other role or benefit to a supporting organization.

In compliance with the ACCME’s Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters’ or program planners’ affiliations with every commercial interest by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by

slide or overhead is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or an immediate family member have a financial interest or other affiliation with a commercial entity producing, marketing, reselling, or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor an immediate family member has any relationship to disclose.

All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes the presenters of the Scientific Program and New Research Poster Sessions.

FORMAT DESCRIPTIONS

Advances in Series

These sessions are intended to highlight important new advances occurring in the field of psychiatry involving selected disorders or treatments. Some of these sessions are chaired by editors of recent textbooks published by American Psychiatric Publishing, (APP), and feature selected chapter authors from these texts. The books discussed at these sessions may be purchased at the APPI bookstore or online. During the **Advances in Research** session, leading clinical researchers present the latest developments in research. Other types of **Advances in Medicine** sessions include topics designed to provide psychiatrists with the latest in clinical developments in other areas of medicine. The intent is to give the audience an update from a physician in a particular specialty. These sessions will help attendees keep pace with the rapidly expanding knowledge base and technology in various branches of medicine.

Case Conferences

During these 90-minute sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case.

Courses/Master Courses

Courses are designed to emphasize learning experiences that actively involve participants and include the opportunity for informal exchange with the faculty. Offered in four-hour (half-day), six-hour (full-day), and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present

advanced material on a circumscribed topic. Attendees must be registered for the meeting and purchase tickets to attend.

FOCUS Live!

These 90-minute sessions allow attendees to test their knowledge using an interactive Audience Response System (ARS), offering a new and entertaining way to learn. By using the ARS, attendees will feel like they are involved in a small group consultation with an expert clinician, even though the session is being attended by a large number of people. Experts, who served as guest editors of *FOCUS*, will lead lively multiple choice question-based discussions, and the audience will enter their answers using hand-held devices. The results are instantly tallied and projected on the screen.

Forums

These are flexible presentations that afford an opportunity to highlight and select topics that are of timely interest to psychiatrists and other mental health professionals. Speakers and panel members are chosen by the Scientific Program Committee for their expertise and leadership in the field.

Lectures

Lectures feature a small number of distinguished speakers discussing scientific and cultural topics, many of which will extend our understanding beyond the usual limits of clinical psychiatry. The Scientific Program Committee invites the lecturers. Award lectures

are selected by the various APA Award Boards and/or Councils. All award lecturers are approved by the Board of Trustees.

New Research

This format allows for presentation of very recent findings. Posters, which are visual, are self-explanatory presentations. Two poster sessions on Monday will be designated as Young Investigators' Poster Sessions, which will contain poster presentations from young investigators, residents, medical students, and research or clinical fellows.

Scientific And Clinical Reports

Scientific and Clinical Reports are oral presentations of papers prepared for submission before publication. In this 90-minute format, reports are grouped by topic, with discussion from the audience following the presentation of each paper. There is no formal discussant.

Seminars

Seminars are designed to emphasize in-depth learning experiences that actively involve participants and include the opportunity for informal exchange with the presenters. Offered in four-hour (half-day) sessions, seminars either review basic concepts in a special subject area or present advanced material on a circumscribed topic.

Interactive Sessions

This 90-minute format allows small groups to meet informally with either selected experts in psychiatry to discuss topics chosen by the expert; to obtain consultations for problems in research from senior researchers; or utilize clinical material offered by the attendee and hear clinically-based seminars presented by outstanding educators.

Symposia/ Presidential

Symposia are two or three-hour sessions consisting of four to six presentations that are thematically linked and focus on a specific topic relevant to clinical psychiatry. They are designed to provide comprehensive treatment on a topic or discussion of the topic from several points of view by the participants and stimulate discussion with the audience.

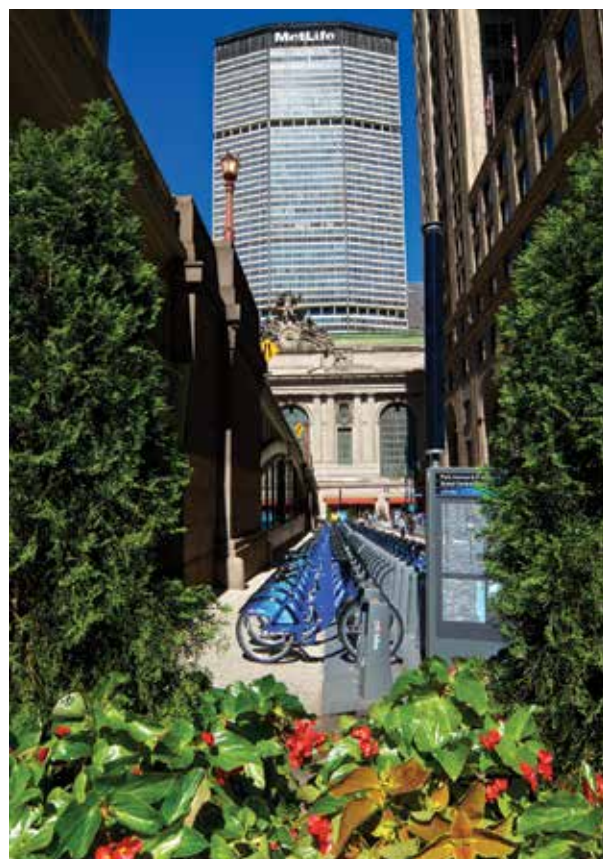

Workshops/ Media

Workshops are 90-minute sessions, which typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and should be highly interactive. Media Workshops are three-hour sessions where a feature-length film is shown and discussed.

NIMH Guest Lecture

Steven E. Hyman, M.D.
Saturday 9:00 a.m.–10:30 a.m.

**Steven E. Hyman, M.D.**

is currently Director of the Stanley Center for Psychiatric Research and

Core member of the Broad Institute of MIT and Harvard. He received his degree from Harvard Medical School, followed by a residency in psychiatry at McLean Hospital in Massachusetts. He was Director of NIMH from 1996 to 2001, where he pursued research on basic molecular mechanisms of psychiatric disorders such as autism, schizophrenia, and bipolar disorder and the potential for therapy offered by genetics. The identification of hundreds of risk-associated genes raised the problem of how to interrogate their biological actions. To this end, Dr. Hyman has committed the Stanley Center to producing human stem-cell-derived neurons and circuits and perfecting genetic engineering technologies such as CRISPR. In addition to ongoing research, Dr. Hyman has been Editor of the Annual Review of Neuroscience (2001–2011) and was Chair of the IOM Forum of Neuroscience and Nervous System Disorders. In 2013, he was President-elect of the Society for Neuroscience. Dr. Hyman has authored numerous publications on topics such as the human genome project and its impact on psychiatry, neuropsychiatric disorders, targets for psychopharmacology, and integrating neuroscience into the DSM-V. Dr. Hyman is the principal investigator at The Stanley Medical Research Institute, where he is involved in a collaborative effort with other investigators from the Broad Institute, MIT, Harvard University, and Massachusetts General Hospital whose goal is to uncover the underlying molecular mechanisms of schizophrenia, bipolar disorder, and autism and eventually discover new therapeutics.

APA Distinguished Psychiatrist Lecture Series

Steven M. Paul, M.D.
Saturday 9:00 a.m.–10:30 a.m.

**Steven M. Paul, M.D.**

is Director of the Appel Alzheimer's Disease Research Institute, a

Burton P. and Judith B. Resnick Distinguished Professor in Neurodegenerative Diseases, and a DeWitt Senior Scholar. Dr. Paul is also a Professor at Weill Cornell Medical College. He received his M.D. from Tulane University School of Medicine followed by a residency in Psychiatry at the University of Chicago Pritzker School of Medicine. After serving as Scientific Director of the NIMH from 1988 to 1993, Dr. Paul moved to Lilly Research Laboratories where, under his leadership, several of the company's most successful new medicines were developed and launched. He has been the recipient of many honors and scientific recognitions and is currently serving on the IOM's Board on Health Sciences Policy. His research activities have established an important role for specific neurotransmitter receptors in mediating the central actions of various neuroactive drugs. His work on new therapeutic approaches for Alzheimer's disease resulted in the discovery of a novel monoclonal antibody (solanezumab) directed at the amyloid β -peptide. Dr. Paul has authored or co-authored more than 500 papers and invited book chapters and was listed as one of the most highly cited scientists in the world. He holds nine patents on inventions made both at NIH and Lilly. Dr. Paul serves on the editorial boards of several scientific journals and has served on several NIH committees.

NIMH Guest Lecture

Thomas R. Insel, M.D.
Saturday 11:00 a.m.–12:30 p.m.

Thomas R. Insel, M.D., is Director of the National Institute of Mental Health (NIMH), the

component of the National Institutes of Health charged with generating knowledge to understand, treat, and prevent mental disorders. His tenure at NIMH has been distinguished by groundbreaking findings on the genetics and neurobiology of mental disorders and efforts to transform the diagnosis and treatment of serious mental illnesses. Prior to his appointment as NIMH Director, Dr. Insel was Professor of Psychiatry at Emory University, where he was founding director of the Center for Behavioral Neuroscience. At Emory, Dr. Insel continued his earlier research, studying the neurobiology of complex social behaviors. He has published more than 280 scientific articles and four books, including the *Neurobiology of Parental Care* (with Michael Numan). Dr. Insel is a member of the Institute of Medicine, a fellow of the American College of Neuropsychopharmacology, and a recipient of several awards, including the Outstanding Service Award from the U.S. Public Health Service and the 2010 La Fondation IPSSEN Neuronal Plasticity Prize. Dr. Insel graduated from the combined B.A.–M.D. program at Boston University in 1974 with an internship at Berkshire Medical Center, Pittsfield, Massachusetts, and a residency at the Langley Porter Neuropsychiatric Institute at the University of California-San Francisco.

Huda Y. Zoghbi, M.D.
Saturday 11:00 a.m.–12:30 p.m.

Huda Y. Zoghbi, M.D., is Professor of Pediatrics, Neurology, Neuroscience,

and Molecular and Human Genetics at Baylor College of Medicine and serves as an Investigator with the Howard Hughes Medical Institute. She is also the Director of the Jan and Dan Duncan Neurological Research Institute at Texas Children's Hospital. Her main research interest is in using the tools of modern genetics to understand the proper development of the brain as well as what goes awry in specific neurodevelopmental and neurodegenerative conditions. She has published seminal work on the molecular basis of Rett syndrome and of late-onset neurodegenerative diseases. Dr. Zoghbi is a member of several professional organizations, including the McKnight Foundation Neuroscience Board, and is a senior editor for the newly founded journal *eLife*. Among Dr. Zoghbi's honors are the E. Mead Johnson Award from the Society of Pediatric Research, the IPSEN prize in neuronal plasticity, the Bristol-Myers Squibb Neuroscience Distinguished Achievement Award, the Vilcek Prize, and the Gruber prize in Neuroscience. In 2000 she was elected to the Institute of Medicine, and in 2004 she was elected to the National Academy of Sciences.

APA Distinguished Psychiatrist Lecture Series

Kimberly Yonkers, M.D.
Saturday 1:30 p.m.–3:00 p.m.

Kimberly Yonkers, M.D., is an attending psychiatrist and professor in the Departments of

Psychiatry and Obstetrics and Gynecology and the School of Epidemiology and Public Health at the Yale School of Medicine. She has spent more than two decades as a women's mental health researcher. Her primary research interests involve the effects of psychiatric illness and substance use disorders and pharmacotherapy on birth outcomes and clinical outcomes of pregnant women. Her work also includes treatment development and treatment applications for pregnant and postpartum women with psychiatric and substance use disorders.

APA Frontiers of Science Lecture Series

Nora D. Volkow, M.D.
Saturday 1:30 p.m.–3:00 p.m.

Nora D. Volkow, M.D., became Director of the National Institute on Drug Abuse in May 2003, where

her work helped demonstrate that drug addiction is a disease of the human brain. As a research psychiatrist and scientist, Dr. Volkow pioneered the use of brain imaging to investigate the toxic effects and addictive properties of abusable drugs. She has also made important contributions to the neurobiology of obesity, ADHD, and aging. Dr. Volkow earned her degree from the National University of Mexico and completed her psychiatric residency at New York University. She spent most of her professional career at the Brookhaven National Laboratory as Director of Nuclear Medicine, Chairman of the Medical Department, and Associate Director for Life Sciences. She was also a professor in the Department of Psychiatry and Associate Dean of the Medical School at SUNY-Stony Brook. Dr. Volkow has published more than 530 peer-reviewed articles and has edited three books on neuroimaging for mental and addictive disorders. She was selected for membership in the Institute of Medicine and received the International Prize from the French Institute of Health and Medical Research for her pioneering work in brain imaging and addiction science. She was recently named one of Time Magazine's "Top 100 People Who Shape our World," and was named "Innovator of the year" by U.S. News & World Report in 2000.

John M. Oldham, M.D., is currently Senior Vice President and Chief of Staff of the Men-

ninger Clinic, the Barbara and Corbin J. Robertson Jr. Endowed Chair in Personality Disorders, and Professor and Executive Vice Chair of the Menninger Department of Psychiatry and Behavioral Sciences at the Baylor College of Medicine. Dr. Oldham previously served as Director of the New York State Psychiatric Institute, Chief Medical Officer of the New York State Office of Mental Health, and the Elizabeth K. Dollard Professor and Acting Chairman of the Department of Psychiatry, Columbia University College of Physicians and Surgeons. Dr. Oldham is Past President of the American Psychiatric Association, the American College of Psychiatrists, the New York County District Branch of the American Psychiatric Association, the South Carolina Psychiatric Association, the International Society for the Study of Personality Disorders, and the Association for Research on Personality Disorders. He is actively involved in teaching and research focused on the diagnosis and treatment of patients with severe personality disorders. He is editor-in-chief of the *Journal of Psychiatric Practice* and joint editor-in-chief of *Borderline Personality Disorder and Emotion Dysregulation*, and he has published extensively.

NIMH Guest Lecture

Greg E. Simon, M.D.
Saturday 3:30 p.m.–5:00 p.m.

Greg E. Simon, M.D.,

is an investigator at Group Health Research Institute and a psychiatrist in Group Health's Behavioral Health Service. He is also a Research Professor in the Department of Psychiatry and Behavioral Sciences at the University of Washington and chair of the national scientific advisory board of the Depression and Bipolar Support Alliance. Dr. Simon completed residency training in internal medicine at the University of Washington, residency training in psychiatry at Massachusetts General Hospital, and fellowship training in the Robert Wood Johnson Clinical Scholars program at the University of Washington. Dr. Simon's research focuses on improving access to and quality of care for mood disorders, both unipolar depression and bipolar disorder. Specific areas of research include improving adherence to medication, increasing the availability of effective psychotherapy, evaluating peer support by and for people with mood disorders, suicide prevention, cost-effectiveness of treatment, and comorbidity of mood disorders with chronic medical conditions. Dr. Simon currently leads the Mental Health Research Network, an NIMH-funded cooperative agreement supporting population-based mental health research across eleven large health systems.

APA Patient Advocacy Award Lecture

Michael R. Phillips, M.D., M.P.H.

Sunday 8:00 a.m.–9:30 a.m.

Michael R. Phillips, M.D., M.P.H., is a

Canadian citizen who has been a permanent resident of China for 30 years.

He completed his psychiatry residency at the University of Washington followed by a two-year Robert Wood Johnson Research Training Fellowship. He is currently Director of the Shanghai Mental Health Center–Emory University Collaborative Center for Global Mental Health, Executive Director of the WHO Collaborating Center for Research and Training in Suicide Prevention at Beijing Hui Long Guan Hospital, and Professor of Psychiatry and Global Health at Emory University. Dr. Phillips runs a number of research training courses each year, supervises Chinese and foreign graduate students, and helps coordinate WHO mental health activities in China. He received the 2012 International Scientific and Technological Award of the People's Republic of China, the highest honor for scientific achievement awarded to foreigners by the Chinese government.

APA International Guest Lecture

Patrick D. McGorry, M.D., Ph.D.

Sunday 8:00 a.m.–9:30 a.m.

Patrick D. McGorry, M.D., Ph.D.,

is Executive Director of Orygen Youth Health, Australia's largest youth mental health organization, targeting the needs of young people with emerging serious mental illness. He is also Professor of Youth Mental Health at the University of Melbourne, a founding member of the National Youth Mental Health Foundation Board, and the current President of the Australasian Society for Psychiatry Research (2013–2015). Dr. McGorry's innovative research in early psychosis and youth mental health has played an integral role in the development of safe, effective treatments that have helped transform the lives of tens of thousands of young people the world over. Dr. McGorry has successfully led the campaign for the establishment of a national early psychosis program and is frequently asked to advise on youth mental health policy. Dr. McGorry has published more than 500 papers and book chapters, edited six books, and has been the recipient of numerous awards, including the Castilla Del Pino Award in recognition of his significant contribution to the field of psychiatry in Spanish-speaking countries in 2009, the Australian Government Centenary Medal in 2003, and the Founders' Medal of the Australian Society for Psychiatric Research in 2001.

APA Administrative Psychiatry Award Lecture

Paul Fink, M.D.
Sunday 12:30 p.m.–2:00 p.m.

Paul Fink, M.D., a prominent psychiatrist, psychoanalyst, and speaker, is a Professor of

Psychiatry at Temple University School of Medicine and a nationally recognized expert on youth violence and its prevention. Dr. Fink has extensive managerial, educational, planning, and clinical experience and is an expert on program development and enhancement. He is a Past President of the American Psychiatric Association, the American College of Psychiatrists, the National Association for Psychiatric Healthcare Systems, and the American Association of Chairmen of Departments of Psychiatry. Dr. Fink has received numerous

national awards and honors, including the APA's Vestermark Award and the Francis J. Braceland Award for Public Service. He is the co-editor of the book *The Stigma of Mental Illness*. His career in administrative medicine began as Professor and Director of Education in Psychiatry at Hahnemann University (1964–1972). He then became Professor and Chairman of the Department of Psychiatry at Eastern Virginia Medical School (1972–1976) and returned to Philadelphia to Chair the Department of Psychiatry at Thomas Jefferson University (1976–1984). He served as Chairman of the Department of Psychiatry at Albert Einstein Medical Center and Medical Director of Belmont Center for Comprehensive Treatment where he later served as Associate Vice President of the Albert Einstein Healthcare Network (1984–1995). During his association with the Albert Einstein Healthcare Network, he founded and directed the Einstein Center for the Study of Violence.

2:30 P.M. - 4:00 P.M.

William H. Reid, M.D., M.P.H., received undergraduate, graduate, medical, and residency

training at the University of Minnesota, University of California at Berkeley, and University of California at Davis. He has worked in private practice, full-time academia (University of Nebraska Medical Center), and public sector mental health systems, has published several hundred professional articles and book chapters, and has authored, edited, or co-edited 17 professional books. A past president of the American Academy of Psychiatry and the Law and the Texas Society of Psychiatric Physicians, he is a Fellow or Distinguished Fellow of the APA, the American College of Physicians, and the Royal College of Physicians (Edinburgh). Since stepping down in 1996 from the post of Medical Director, Texas Department of Mental Health and Mental Retardation, his practice has involved clinical consultation, teaching at several Texas medical schools, and civil and criminal forensic work throughout the United States. He enjoys performing and writing music and, when his knee doesn't hurt, playing tennis with his wife, Elise.

APA George Tarjan Award Lecture

Jose Canive, M.D.

2:30 P.M. - 4:00 P.M.

José M. Cañive, M.D., F.R.C.P., is Director of Psychiatry Research at the

Albuquerque Veterans Administration and Tenured Professor of Psychiatry and Neurosciences at the University of New Mexico (UNM). He was born in Cuba, earned his medical degree from the Universidad Complutense, Madrid, Spain, and trained at McGill University, Montreal, Canada. His research on the cortical basis of the schizophrenia sensory gating deficit is at the cutting edge of clinical neuroscience. He has also contributed significantly to the understanding of psychosocial and ethnic factors in psychopathology. He has been a member of several NIMH Review Committees and is still called to serve on an ad hoc basis. He has received numerous awards, including the Exemplary Psychiatrist Award from the National Alliance on Mental Illness, UNM's Department of Psychiatry Milton Rosenbaum Award, APA's Simon Bolivar Award, and UNM's Earl Walker Award for Outstanding Achievement in Neuroscience Research. He is a member of the American College of Psychiatrists and the American College of Neuropsychopharmacology and has been President of the American Society of Hispanic Psychiatry and the APA's District Branch. He has lectured widely in the United States, Latin America, and Spain. He is a reviewer for several prominent journals, has authored more than 100 peer-reviewed publications, and has mentored a cadre of new (especially minority) investigators.

Adjournment

A Special Dialogue on Science, Psychiatry, and Media between Dr. Jeffrey A. Lieberman, Dr. Eric R. Kandel, and Mr. Alan Alda

Nobel Prize-Winning psychiatrist Dr. Eric R. Kandel and famed actor and science communicator, Mr. Alan Alda will discuss with APA President Dr. Jeffrey A. Lieberman, the impact of science and the media on psychiatry and how they will influence the future of mental health care.

Eric R. Kandel, M.D., University Professor & Kavli Professor of Brain Science, Departments of Neuroscience, Biochemistry, and Psychiatry, Columbia University; Director, The Kavli Institute for Brain Science; Co-director, Mortimer B. Zuckerman Mind Brain Behavior Institute; Senior Investigator, Howard Hughes Medical Institute. Kandel is the only American psychiatrist to have received the Nobel Prize, which he did in 2000 for his discoveries concerning the cell and molecular mechanisms of learning and memory.

Jeffrey A. Lieberman, M.D., is President of the American Psychiatric Association and, as a physician and scientist, has spent more than 25 years caring for patients and studying the nature and treatment of mental illness. His research, supported by institutions such as the National Institutes of Health, has focused on the neurobiology, pharmacology, pathophysiology, and treatment of schizophrenia and related psychotic disorders and has advanced our understanding of the pharmacology and clinical effectiveness of antipsychotic drugs.

Alan Alda, the Emmy Award-winning actor who played Hawkeye Pierce on the classic television series, *M*A*S*H*, has a long-time interest in science. He hosted the award-winning series “Scientific American Frontiers” for eleven years on which he interviewed hundreds of scientists from around the world, a science series called “The Human Spark” (2010), and “Brains on Trial” (2013), all on PBS. He received the National Science Board’s Public Service Award for helping to broaden the public’s understanding of science.

BIO

William C. Menninger Convocation Lecture

Vice President Joe Biden
Monday 2:00 p.m.–3:00 p.m.

Vice President Joe Biden

graduated from the University

of Delaware and Syracuse Law School and served on the New Castle County Council. Then, at age 29, he became one of the youngest people ever elected to the United States Senate. As a Senator from Delaware for 36 years, Senator Biden established himself as a leader on some of our nation's most important domestic and international challenges. As Chairman or Ranking Member of the Senate Judiciary Committee for 17 years, then-Senator Biden was widely recognized for his work on criminal justice issues including the landmark 1994 Crime Bill and the Violence Against Women Act. He has been at the forefront of issues and legislation related to terrorism, weapons of mass destruction, post-Cold War Europe, the Middle East, and Southwest Asia. Now, as the 47th Vice President of the United States, Joe Biden has continued his leadership on important issues facing the nation. The Vice President was tasked with implementing the American Recovery and Reinvestment Act, helping to rebuild our economy and lay the foundation for a sustainable economic future. As part of his continued efforts to raise the living standards of middle class Americans across the country, Vice President Biden has also focused on the issues of college affordability and American manufacturing growth, key priorities of the Administration.

APA Distinguished Psychiatrist Lecture

Jonathan A. Javitch, M.D., Ph.D.
Monday 3:00 p.m.–4:30 p.m.

Jonathan A. Javitch, M.D., Ph.D., is currently the Lieber Professor of Experimental Therapeutics in

Psychiatry and Professor of Pharmacology in the Center for Molecular Recognition and in Physiology and Cellular Biophysics at the Columbia University College of Physicians and Surgeons. He is also Director of the Lieber Center for Schizophrenia Research and Treatment, and Chief of the Division of Molecular Therapeutics at the New York State Psychiatric Institute. Dr. Javitch obtained his B.S. and M.S. in Biological Sciences at Stanford University. He completed the joint M.D.–Ph.D. program at the Johns Hopkins University School of Medicine where he worked as a graduate student with Solomon Snyder to demonstrate that a key step in the neurotoxicity of MPTP is the uptake of its metabolite MPP+ by the dopamine transporter. He then completed a medical internship and psychiatric residency at the Columbia Presbyterian Hospital and the New York State Psychiatric Institute. His postdoctoral work at Columbia University focused on the structure of dopamine receptors with Dr. Arthur Karlin. His current research focuses on the structure, function, and regulation of G protein-coupled receptors and neurotransmitter transporters.

APA Isaac Ray Award Lecture

J. Richard Ciccone, M.D.
Monday 3:00 p.m.–4:30 p.m.

J. Richard Ciccone, M.D., is Professor of Psychiatry and Founding Director of the

Psychiatry and Law Program at the University of Rochester School of Medicine. He received the APA 2013 Isaac Ray Award for outstanding contributions to forensic psychiatry. He has been described as a visionary leader who played an important role in creating the academic discipline of forensic psychiatry. He was President of the American Academy of Psychiatry and the Law (1986–1987), and founder of AAPL's Forensic Psychiatry Course. He was chair of the APA Commission on Judicial Action (1993–2000) and chair of the APA Commission on Public Policy, Litigation, and Advocacy (2000–2002). He has lectured and published nationally and internationally on forensic psychiatry and ethics, comparative forensic psychiatry, and the history of forensic psychiatry. In 2002, in recognition of his work on behalf of forensic psychiatry and patient advocacy, he was awarded an APA Special Presidential Commendation.

Andrew Solomon, Ph.D.
Tuesday 11:00 a.m.–12:30 p.m.

Andrew Solomon, Ph.D., is a writer and lecturer on politics, culture,

and psychology. His newest book, *Far From the Tree: Parents, Children, and the Search for Identity*, has so far won the National Book Critics Circle award for nonfiction and eleven other national awards; it was a *New York Times* bestseller and will be published in nine languages. It tells the stories of parents who not only learn to deal with their exceptional children but also find profound meaning in doing so. Dr. Solomon's previous book, *The Noonday Demon: An Atlas of Depression* (Scribner, 2001), won the 2001 National Book Award for Nonfiction and was a finalist for the 2002 Pulitzer Prize. He is a lecturer in Psychiatry at Weill Cornell Medical College. Dr. Solomon is an activist and philanthropist in LGBT rights, mental health, education, and the arts. He lives with his husband and son in New York and London and has dual citizenship.

APA Simon Bolivar Award Lecture

Roberto Lewis-Fernandez, M.D.
Tuesday 3:30 p.m.–5:00 p.m.

Roberto Lewis-Fernandez, M.D., is Professor of Psychia-

try at Columbia University Medical Center and is Director of both the New York State Center of Excellence for Cultural Competence and the Hispanic Treatment Program at New York State Psychiatric Institute. Dr. Lewis-Fernandez received an M.D. from Yale and a master's degree in theological studies from the Harvard Divinity School. While at Harvard, he also trained in medical anthropology. His research is focused on developing culturally valid interventions and instruments to enhance patient engagement, reduce misdiagnosis, and help overcome disparities in the care of underserved cultural groups, especially Latinos. He is President of the American Society of Hispanic Psychiatry, Chair of the Cultural Committee of the Group for the Advancement of Psychiatry, and President-Elect of the Society for the Study of Psychiatry and Culture. He was until recently a member of the NIMH National Advisory Mental Health Council and Chair of the Cross-Cultural Issues Subgroup of DSM-5.

APA Distinguished Psychiatrist Lecture Series

Daniel S. Pine, M.D.

Wednesday 9:00 a.m.–10:30 a.m.

Daniel S. Pine, M.D., is Chief, Section on Development and Affective Neuroscience, in the

NIMH Intramural Research Program. After graduating from medical school at the University of Chicago, Dr. Pine began research on the epidemiology, biology, and treatment of psychiatric disorders in children and adolescents, especially the biological and pharmacological aspects of mood, anxiety, and behavioral disorders in children, as well as classification of psychopathology across the lifespan. He has authored more than 350 peer-reviewed papers on these topics. His current research at the NIMH involves examining the degree to which mood and anxiety disorders in children and adolescents are associated with underlying abnormalities in the amygdala, prefrontal cortex, and other brain regions that modulate activity in these structures. In addition to his research, Dr. Pine has served as Chair of the Psychopharmacologic Drug Advisory Committee for the FDA and the Chair of the Developmental Working Group for the DSM-5 Task Force. Among his many awards are the Irving Philips Award from the American Academy of Child and Adolescent Psychiatry and the Blanche Ittelson Award from the American Psychiatric Association for outstanding research contributions to the field of child psychiatry.

Kun-Po Soo Award Lecture

Ira D. Glick, M.D.

Wednesday 9:00 a.m.–10:30 a.m.

Ira D. Glick, M.D., Professor Emeritus of Psychiatry and Behavioral Sciences and Chief of the

Schizophrenia Clinic at the Stanford University School of Medicine, has an extensive background in research, education, and academic medicine. He has been a professor at the University of California San Francisco, Cornell, and Stanford, as well as Senior Science Advisor to the Director of the National Institutes of Health. He has served on the Boards of the American Society of Clinical Psychopharmacology and American Family Therapy Academy and is a founder of the International Society for Sport Psychiatry and the American Society of Clinical Psychopharmacology. He serves on numerous editorial boards, has written more than 200 articles and chapters, and has received more than 50 research grants for studies of psychotropic medication and psychosocial treatment for psychiatric disorders. Dr. Glick's numerous awards include the American College of Psychiatry's Distinguished Service in Psychiatry Award and Exemplary Psychiatrist Award from the National Alliance on Mental Illness. Dr. Glick received his MD from New York Medical College and completed residency at Hillside Hospital in Queens, NY, and Mt. Zion Hospital in San Francisco.

APA Distinguished Psychiatrist Lecture Series

Karl Deisseroth, M.D., Ph.D.
Wednesday 11:00 a.m.–12:30 p.m.

Karl Deisseroth, M.D., Ph.D., is the D.H. Chen Professor of Bioengineering and Psy-

chiatry at Stanford University and an Investigator and Early Career Scientist at the Howard Hughes Medical Institute. He received his Ph.D. (neuroscience, 1998) and M.D. (2000) from Stanford University. He also completed an internship and his residency there. Dr. Deisseroth's research efforts have resulted in the development of high-resolution optical methods for investigating intact biological systems. His group has pioneered optogenetics, a technology that uses light for controlling activity patterns in the brains of freely moving mammals, and CLARITY, a chemical engineering technology that enables high-resolution structural and molecular access to intact brains. Among his numerous honors and awards for his work in optogenetics are the McKnight Foundation Scholar Award, the BRAIN Prize (Lundbeck Research Foundation), and an award from Premio Citta' di Firenze for Molecular Sciences for his work in optogenetics and CLARITY. He has been elected to both the Institute of Medicine (IOM) and the National Academy of Sciences (NAS). A practicing psychiatrist, Dr. Deisseroth has applied his technologies to study parkinsonian motor behaviors, anxiety, depression, and social dysfunction and has used CLARITY for mapping the nervous system.

APA Alexandra Symonds Award Lecture

Margaret Spinelli, M.D.
Wednesday 11:00 a.m.–12:30 p.m.

Margaret Spinelli, M.D., is an Associate Professor of Clinical Psychiatry and founder and

former Director of the Women's Mental Health Program in Psychiatry at Columbia University College of Physicians and Surgeons. She is also a Research Psychiatrist at the New York State Psychiatric Institute. Prior to receiving her medical education, Dr. Spinelli had a 15-year career as an obstetrical nurse. She received her medical degree from Cornell University Medical College and received additional training at the Mother-Baby Postpartum Unit of the Maudsley and Royal Bethlehem Hospital in London. Dr. Spinelli completed her residency training in Psychiatry at the Payne Whitney Clinic and the New York Hospital at Cornell. She had a post-doctoral research fellowship at Columbia University and the New York State Psychiatric Institute. Dr. Spinelli's clinical, teaching, and research activities (funded by the National Institute of Mental Health) have focused on psychiatric disorders during pregnancy and the postpartum period. Her work on postpartum mental disorders has also focused on infanticide in women with mental illness. The importance of her work as a perinatal psychiatrist has gained her national and international recognition.

APA Frontiers of Science Lecture Series

Scott A. Small, M.D.

Wednesday 3:30 p.m.–5:00 p.m.

Scott A. Small, M.D., received his degree from Columbia University School of Physicians

and Surgeons and is currently the Boris and Rose Katz Professor of Neurology. After receiving his M.D., he completed a residency in neurology at Columbia Presbyterian Medical Center, and received a fellowship in neurobehavior. His research has used high-resolution variants of fMRI (functional magnetic resonance imaging) in patients and animal models to determine patterns of regional vulnerability within the hippocampal circuit linked to Alzheimer's disease, normal cognitive aging, and schizophrenia. He has used longitudinal imaging of patients at clinical risk for

psychosis and has studied the molecular mechanism for age-related memory loss. Dr. Small worked on a randomized controlled trial of the effects of aerobic exercise on cognitive decline and mediating that decline. Another study with a larger sample of older subjects applied his imaging approach to determine whether exercise enhances cognitive function by increasing neurogenesis in an area of the brain that may play a role in the formation of new episodic memories. He has also studied the potential of combining recent drug discoveries with translational imaging technology to identify a treatment protocol capable of ameliorating age-related memory decline. Among Dr. Small's many awards are the McKnight Neuroscience of Brain Disorders Award, The Derek Denny-Brown Young Neurological Scholar Award from the American Neurological Association, and The Harold and Golden Lampport Award for Excellence in Clinical Science Research from Columbia University.
