

Concept Note

May 2017

Today's world is complex, interconnected and in perpetual transformation. Even the smallest decision can impact society and the planet. How do we ensure that political and economic leaders, and all decision-makers, are fully aware of key global challenges, are well equipped to integrate these elements in their professional practices and assume the consequences of their choices?

The Sustainability Literacy Test », [Sulitest](http://Sulitest.org), was created following the United Nations Conference on Sustainable Development, RIO + 20 (Article 47 of the final document "Assess and Report"). **Easy to use, on-line, multiple choice question format**, this test consists of an identical **an international set of questions** identical for all users throughout the world, and other specialized module of **local questions** that take into account national, regional and cultural specificities (environment, laws, and practices). It is also possible to create "**customized**" **modules** with a specific set of questions personalized to their own needs and culture (CSR strategy, sector or professions challenges ...)

This test, led by an independent NGO, is [supported](#) by some forty international institutions and networks such as UNESCO, UNEP, UNGC PRME, GRLI, IAU or UNDESA. He has received numerous supporters from [personalities](#), universities, student networks and companies from around the world.

Recognized as one of the 17 featured initiatives on United Nations partnerships for Sustainable Development Goals (SDGs), Sulitest is now **one of the tools for measuring and monitoring the SDGs**. Each Sulitest question is aligned with one or more goal of the global Agenda signed by 193 States, creating the largest database on citizens' awareness and understanding to SDGs. Sulitest will present its annual report to the [High-Level Political Forum](#) (HLPF), to be held at UN Headquarters in July. A specific module on SDGs carried out by UNDESA has also been launched.

Initially deployed in the academic world, **it has already taken by more than 60,000 students** from 500 universities in 53 countries. Sulitest is now used by any kind of organization (Corporation, NGO, institutions...). Today it is used both as a support tool as a support tool for internal change management, for training and awareness raising and for "revealing the talents" of their future employees.
