

Scandlines has chosen and implemented Nowhere Networks internet solution on its entire fleet

The German-Danish shipping company Scandlines has chosen Nowhere Networks as its strategic supplier for fast internet for its Baltic Sea fleet. The green and innovative ferry operator has now connected its entire fleet with Nowhere Network's internet solution.

For some time Scandlines looked for a better and more stable internet solution for its fleet to replace its current setup. After a period of evaluation it chose Nowhere Network's complete internet solution for maritime use which the company has now implemented on its entire fleet.

"We have implemented Nowhere Networks solution on our fleet of eight ships and it has lived up to our high demands. Nowhere Networks has kept its promises on speed and quality. We are glad that we chose this solution and feel confident that Nowhere Networks will continue to live up to our expectations," says Morten Hald Nielsen, Senior Vice President, IT at Scandlines Danmark ApS

"To be able to count Scandlines, one of the largest ferry operators in Northern Europe, to our list of customers is really fantastic. It is further evidence that what we are doing brings great value to our customers. Our full service concept, which includes a complete solution for long range internet connectivity, 24 hours a day, 365 days a year, is setting a new standard within the maritime industry in Europe," says CG Sänne, Deputy CEO, Nowhere Networks.

Scandlines

Scandlines stands as a symbol of a historical and close cooperation between Denmark and Germany. Scandlines runs two ferry routes with high capacity and frequency as well as with a green vision for the future. The core business is to provide an efficient and reliable transport service for both passengers and freight customers. The main focus for all activities in Scandlines is to create value for our customers on board the ferries as well as in our shops. With more than 41,500 departures on eight ferries, in 2019 Scandlines transported 7.2 million passengers, 1.7 million cars and around 700,000 freight units and 34,000 busses on the routes Puttgarden-Rødby and Rostock-Gedser.

Nowhere Networks

Nowhere Networks is a leading, fast-growing Swedish high-tech company that develops its own cost-effective internet broadband solution for the shipping industry. The business concept is to provide internet connection with higher speed and higher quality to ships, at a significantly lower cost compared to older systems / other available solutions in the market. The technical solution consists of a radio communication solution with built-in antenna tracking technology that automatically communicates wireless signals from ship to land and keeps the vessels connected at all times. Our intelligent cloud-based software platform scales to over 10,000 vessels and enables automated control and automatic resource optimization of the solution.
