### Lizenzbedingungen

#### A) Siemens Lizenzbedingungen

##### Allgemeine Bedingungen zur Überlassung von Software für Automatisierungs- und Antriebstechnik (2011-08-01)

- **1. Überlassung der Software an Lizenznehmer und Einräumung von Nutzungsrechten an der Software**
  - - 1.1 Für die Überlassung von Software für Automatisierungs- und Antriebstechnik durch uns an den Lizenznehmer gelten ausschließlich diese Allgemeinen Bedingungen. Allgemeine Geschäftsbedingungen des Lizenznehmers gelten nur insoweit, als wir ihnen ausdrücklich schriftlich zugestimmt haben. Für den Umfang der Überlassung der Software sind die beiderseitigen übereinstimmenden schriftlichen Erklärungen maßgebend. Wir räumen dem Lizenznehmer Nutzungsrechte an der in der Auftragsbestätigung oder - falls der Lizenznehmer keine Auftragsbestätigung erhält - an der im Certificate of License oder - falls der Lizenznehmer anstelle des Certificate of License einen Softwareproduktschein erhält - an der im Softwareproduktschein genannten Software (nachfolgend "SW" genannt) ein. Das Certificate of License und der Softwareproduktschein werden nachfolgend zusammenfassend "CoL" genannt. Der Lizenznehmer erhält das CoL mit der Überlassung der SW bzw. des Lieferscheins. Die Form der Überlassung der SW ergibt sich ebenfalls direkt aus der Auftragsbestätigung oder aus der in der Auftragsbestätigung enthaltenen Bestellnummer der SW in Verbindung mit den dazugehörigen Bestelldaten unseres zum Zeitpunkt der Auftragsbestätigung gültigen Katalogs (nachfolgend zusammenfassend "Auftragsdaten" genannt) bzw. aus dem CoL. Erhält der Lizenznehmer keinen Datenträger, ist er berechtigt, die bei ihm bereits vorhandene SW in dem zur Ausübung der ihm eingeräumten Nutzungsrechte erforderlichen Umfang zu vervielfältigen. Dies gilt entsprechend bei elektronischer Überlassung der SW (downloading). Soweit in diesen Allgemeinen Bedingungen auf die Auftragsdaten bzw. das CoL verwiesen wird, ist der Verweis auf das CoL dann von Bedeutung, wenn der Lizenznehmer keine Auftragsbestätigung erhält. In jedem Fall sind die in den Auftragsdaten enthaltenen Daten auch im CoL enthalten.
    - 1.2 Die zu der SW gehörende Dokumentation (nachfolgend "Dokumentation" genannt) ist getrennt zu erwerben, es sei denn, es ergibt sich aus den Auftragsdaten bzw. dem CoL, dass diese zum Lieferumfang gehört. Ist der Lizenznehmer nach Ziffer 1.1 zum Vervielfältigen der SW berechtigt, so gilt dies entsprechend für die Dokumentation, soweit diese zum Lieferumfang gehört.
    - 1.3 Erhält der Lizenznehmer von uns für die SW einen License Key, der zur technischen Freischaltung der SW dient (nachfolgend "License Key" genannt), so ist dieser mit zu installieren.
    - 1.4 Die dem Lizenznehmer an der SW eingeräumten Rechte ergeben sich aus dem Lizenz-Typ (siehe Abschnitt 2) und dem Software-Typ (siehe Abschnitt 3). Lizenz-Typ und Software-Typ ergeben sich aus den Auftragsdaten bzw. aus dem CoL. Erfolgt die Überlassung der SW elektronisch oder durch die Einräumung von Vervielfältigungsrechten, beziehen sich die in diesen Allgemeinen Bedingungen genannten Rechte und Pflichten auf die rechtmäßig erstellten Kopien.

- 1.5 Ist der Lizenznehmer berechtigt im Besitz einer früheren Version/Release der SW (nachfolgend "Frühere Version" genannt), hat der Lizenznehmer das Recht, die an der SW eingeräumten Nutzungsrechte nach seiner Wahl entweder an der SW oder - soweit dies technisch vorgesehen ist - an der Früheren Version auszuüben (downgrading). Wenn die SW ein Upgrade oder PowerPack gemäß Abschnitt 4 ist, gilt ergänzend Abschnitt 4.
- 1.6 Sofern in der Readme-Datei der SW unter der Rubrik "Parallele Nutzung" Frühere Versionen aufgeführt sind, hat der Lizenznehmer das Recht, die an der SW eingeräumten Nutzungsrechte alternativ auch an den dort aufgelisteten Früheren Versionen in einer (1) Instanz auszuüben. Lautet die in den Auftragsdaten bzw. im CoL genannte "Art der Nutzung": "Installation" oder "User", so steht dem Lizenznehmer das zuvor beschriebene Recht zusätzlich und gleichzeitig an den dort aufgelisteten Früheren Versionen in einer Instanz zu. Eine "Instanz" im Sinne dieser Allgemeinen Bedingungen ist entweder eine Instanz in einer physischen Betriebssystem-Umgebung oder eine Instanz in einer virtuellen Betriebssystem-Umgebung. Die Übertragbarkeit der Nutzungsrechte an den Früheren Versionen ist nur gemeinsam mit den Nutzungsrechten an der SW gem. Ziffer 5.3 zulässig.
- 1.7 Ergibt sich aus den Auftragsdaten bzw. dem CoL, dass der Lizenznehmer nur den Datenträger aber keine Lizenz erhält, so ist der Lizenznehmer zur Nutzung der SW erst berechtigt, wenn er eine Lizenz entsprechend Abschnitt 2 erwirbt. Bis zum Erwerb der Lizenz ist der Lizenznehmer auch nicht zur Weitergabe der SW an Dritte berechtigt.
- 1.8 Soweit die SW Open Source Software oder ähnliche Software Dritter (nachfolgend "OSS" genannt) enthält, ist diese in der Readme\_OSS-Datei der SW aufgeführt. Der Lizenznehmer ist berechtigt, die OSS gemäß den jeweils einschlägigen, für die OSS geltenden Lizenzbedingungen zu nutzen. Diese sind auf dem Datenträger, mit dem der Lizenznehmer die SW erhält, enthalten. Für OSS gelten vorrangig vor den vorliegenden Allgemeinen Bedingungen die Lizenzbedingungen, denen die jeweilige OSS unterliegt. Soweit die Lizenzbedingungen für die OSS eine Herausgabe des Quellcodes vorsehen, werden wir diesen auf Verlangen des Lizenznehmers gegen entsprechenden Aufwandsersatz zur Verfügung stellen.
- 1.9 Die SW kann neben OSS auch andere Lizenzsoftware sein oder enthalten, d. h. Software, die nicht von uns selbst entwickelt wurde, sondern die wir von Dritten (nachfolgend "Lizenzgeber" genannt), z. B. Microsoft Licensing Inc., lizenziert bekommen haben. Erhält der Lizenznehmer in diesem Fall mit der SW in der Readme\_OSS-Datei Bedingungen des jeweiligen Lizenzgebers, so gelten diese im Hinblick auf die Haftung des Lizenzgebers dem Lizenznehmer gegenüber. Für unsere Haftung dem Lizenznehmer gegenüber gelten in jedem Fall diese Allgemeinen Bedingungen.

- **2. Lizenz-Typ**

Je nach Lizenz-Typ werden dem Lizenznehmer an der SW die folgenden Rechte eingeräumt:

- - 2.1 Single License (One Off License, Copy License)
 

Der etwaig im Softwareproduktschein verwendete Begriff One Off License oder Copy License entspricht der Single License. Die folgende Regelung gilt für die One Off License/Copy License voll umfänglich. Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich unbegrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW in einer (1) Instanz zu installieren und die so installierte SW auf die in den Auftragsdaten bzw. im CoL genannte Art (s. "Art der Nutzung") zu nutzen.
  - 2.2 Floating License
 

Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich unbegrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW auf beliebig vielen Geräten des Lizenznehmers zu installieren. Die Anzahl der Objekte (z.B. Benutzer oder Geräte), die die SW zeitgleich benutzen dürfen ergibt sich aus den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung").

- 2.3 Rental License
 

Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich gemäß den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung") begrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW in einer (1) Instanz zu installieren und zu nutzen. Ist die Nutzungsdauer in Stunden angegeben, beginnt die für die Berechnung der zeitlichen Begrenzung maßgebliche Nutzung jeweils mit dem Starten und endet mit dem Schließen der SW. Ist die Nutzungsdauer in Tagen, Wochen oder Monaten angegeben, so gilt der angegebene Zeitraum - beginnend mit dem erstmaligen Starten der SW - unabhängig von der tatsächlichen Nutzung. Ist die Nutzungsdauer mit einem Datum angegeben, endet das Nutzungsrecht mit diesem Datum - unabhängig von der tatsächlichen Nutzung.
- 2.4 Rental Floating License
 

Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich gemäß den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung") begrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW auf beliebig vielen Geräten des Lizenznehmers zu installieren. Die Anzahl der Objekte (z.B. Benutzer oder Geräte), die die SW zeitgleich benutzen dürfen, ergibt sich ebenfalls aus den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung"). Ist die Nutzungsdauer in Stunden angegeben, beginnt die für die Berechnung der zeitlichen Begrenzung maßgebliche Nutzung jeweils mit dem Starten und endet mit dem Schließen der SW. Ist die Nutzungsdauer in Tagen, Wochen oder Monaten angegeben, so gilt der angegebene Zeitraum – beginnend mit dem erstmaligen Starten der SW – unabhängig von der tatsächlichen Nutzung. Ist die Nutzungsdauer mit einem Datum angegeben, endet das Nutzungsrecht mit diesem Datum - unabhängig von der tatsächlichen Nutzung.
- 2.5 Demo License
 

Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich gemäß den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung") begrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW in einer (1) Instanz zu installieren und zu Validierungszwecken zu nutzen. Ist die Nutzungsdauer in Tagen, Wochen oder Monaten angegeben, so gilt der angegebene Zeitraum – beginnend mit dem erstmaligen Starten der SW – unabhängig von der tatsächlichen Nutzung. Ist die Nutzungsdauer mit einem Datum angegeben, endet das Nutzungsrecht mit diesem Datum - unabhängig von der tatsächlichen Nutzung.
- 2.6 Demo Floating License
 

Der Lizenznehmer erhält das nicht-ausschließliche, zeitlich gemäß den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung") begrenzte, gemäß Ziffer 5.3 übertragbare Recht, die SW auf beliebig vielen Geräten des Lizenznehmers zu installieren. Die Anzahl der Objekte (z.B. Benutzer oder Geräte), die die SW zeitgleich zu Validierungszwecken benutzen dürfen, ergibt sich ebenfalls aus den Auftragsdaten bzw. dem CoL (s. "Art der Nutzung"). Ist die Nutzungsdauer in Tagen, Wochen oder Monaten angegeben, so gilt der angegebene Zeitraum – beginnend mit dem erstmaligen Starten der SW – unabhängig von der tatsächlichen Nutzung. Ist die Nutzungsdauer mit einem Datum angegeben, endet das Nutzungsrecht mit diesem Datum - unabhängig von der tatsächlichen Nutzung.
- 2.7 Trial License
 

Der Lizenznehmer erhält das nicht-ausschließliche, nicht-übertragbare Recht, die SW in einer (1) Instanz zu installieren und zu Validierungszwecken auf die in den Auftragsdaten bzw. im CoL genannte Art (s. "Art der Nutzung") zu nutzen. Die Nutzungsdauer ist auf 14 Tage - beginnend mit dem erstmaligen Starten der SW - begrenzt, es sei denn, aus den Auftragsdaten bzw. dem CoL ergibt sich eine andere Nutzungsdauer.
- **3. Software-Typ**

Ist der Software-Typ weder in den Auftragsdaten, noch im CoL angegeben, so gelten für die SW die Rechte nach Ziffer 3.2 (Runtime Software).

  - 
  - 3.1 Engineering Software (nachfolgend "E-SW" genannt)

Erzeugt der Lizenznehmer mit E-SW eigene Programme oder Daten, die Teile der E-SW enthalten, so hat der Lizenznehmer das lizenzgebührenfreie Recht, diese Teile der E-SW als Bestandteil seiner eigenen Programme oder Daten zu vervielfältigen, zu nutzen oder Dritten zur Nutzung zu überlassen. Bei der Überlassung an Dritte sind diesen hinsichtlich der o.g. Teile der E-SW den Ziffern 5.1. und 5.2. entsprechende Bestimmungen schriftlich aufzuerlegen.

- 3.2 Runtime Software (nachfolgend "R-SW" genannt)

Bindet der Lizenznehmer R-SW oder Teile davon in eigene Programme oder Daten ein, so muss der Lizenznehmer vor jeder Installation oder Vervielfältigung - je nachdem, was früher erfolgt - der eigenen Programme oder Daten, die R-SW oder Teile davon enthalten, eine Lizenz an der R-SW entsprechend der beabsichtigten Nutzungsart gemäß dem dann gültigen Siemens-Katalog erwerben. Überlässt der Lizenznehmer die genannten Programme oder Daten Dritten zur Nutzung, so sind diesen hinsichtlich der darin enthaltenen Teile der R-SW dem Abschnitt 5 entsprechende Bestimmungen schriftlich aufzuerlegen. Davon unberührt bleibt die Verpflichtung des Lizenznehmers, eine Lizenz an der R-SW zu erwerben, wenn diese im Original vervielfältigt wird. Sofern in der R-SW Tools zur Parametrierung/Konfiguration enthalten und für diese erweiterte Rechte eingeräumt sind, ergibt sich dies aus der Readme-Datei der R-SW.

- **4. Upgrade und PowerPack**

Ergibt sich aus den Auftragsdaten bzw. dem CoL, z.B. durch den Zusatz "Upgrade" oder "PowerPack" beim Produktnamen der SW, dass die SW der Hochrüstung einer anderen Software dient (nachfolgend "Ursprungslizenz" genannt), enden mit der Hochrüstung die dem Lizenznehmer an der Ursprungslizenz ursprünglich eingeräumten Nutzungsrechte. Die Nutzungsrechte gem. Ziffer 1.6 bleiben hiervon unberührt. Der Lizenznehmer ist jedoch berechtigt, jederzeit die Hochrüstung - soweit dies technisch vorgesehen ist - rückgängig zu machen (downgrading) und die ihm eingeräumten Nutzungsrechte an der SW an der Ursprungslizenz in entsprechender Anwendung von Ziffer 1.5 auszuüben.

- **5. Weitere Rechte und Pflichten des Lizenznehmers**

- - 5.1 Wenn auf dem Datenträger oder der Readme-Datei der SW kein gegenteiliger Vermerk über eine bestimmte Anzahl von Kopien enthalten ist, darf der Lizenznehmer von jedem Exemplar der SW, zu dessen Nutzung er nach diesen Allgemeinen Bedingungen berechtigt ist, eine angemessene Anzahl von Kopien anfertigen, die ausschließlich für Datensicherungszwecke verwendet werden dürfen. Im Übrigen darf der Lizenznehmer die SW nur vervielfältigen, wenn und soweit ihm von uns schriftlich Vervielfältigungsrechte eingeräumt sind.
  - 5.2 Der Lizenznehmer darf die SW nicht ändern, nicht zurückentwickeln oder übersetzen und er darf keine Teile herauslösen, soweit dies nicht nach den Bestimmungen des Urheberrechtsgesetzes zwingend erlaubt ist. Der Lizenznehmer darf ferner alphanumerische Kennungen, Marken und Urheberrechtsvermerke von der SW oder dem Datenträger nicht entfernen und wird sie, soweit er zur Vervielfältigung berechtigt ist, bei dieser unverändert mit vervielfältigen. Die vorstehende Regelung gilt entsprechend für die gemäß Abschnitt 1 überlassene Dokumentation.
  - 5.3 Der Lizenznehmer ist berechtigt, das ihm eingeräumte Nutzungsrecht komplett auf einen Dritten zu übertragen, vorausgesetzt er trifft mit dem Dritten eine schriftliche Vereinbarung, die allen Bestimmungen dieses Abschnitts 5 entspricht und er keine Kopien der SW behält. Hat der Lizenznehmer für die SW einen License Key erhalten, so ist dieser dem Dritten zusammen mit der SW zu überlassen. Ferner ist dem Dritten das CoL zusammen mit diesen Allgemeinen Bedingungen zu übergeben. Der Lizenznehmer wird uns auf unseren Wunsch jederzeit das für die SW erhaltene CoL vorlegen.
  - 5.4 Ist die SW ein PowerPack oder ein Upgrade, wird der Lizenznehmer das CoL der Ursprungslizenz aufbewahren und auf Wunsch von uns jederzeit zusammen mit dem CoL der SW vorlegen. Überträgt der Lizenznehmer sein Nutzungsrecht an der

PowerPack SW bzw. Upgrade SW gemäß Ziffer 5.3, wird er dem Dritten auch das CoL der Ursprungslizenz übergeben.

- 5.5 Erhält der Lizenznehmer einen Datenträger, der neben der SW weitere Software-Produkte enthält, die zur Nutzung freigeschaltet sind, so hat er an diesen freigeschalteten Software-Produkten ein zeitlich begrenztes, unentgeltliches Recht, sie ausschließlich für Validierungszwecke zu nutzen. Die zeitliche Begrenzung beträgt 14 Tage, beginnend mit dem erstmaligen Starten des jeweiligen Software-Programms, soweit nicht, z.B. in der Readme-Datei des jeweiligen Software-Produkts, ein anderer Zeitraum genannt ist. Für diese ausschließlich zu Validierungszwecken überlassenen Software-Produkte gelten die Bestimmungen dieser Allgemeinen Bedingungen entsprechend. Der Lizenznehmer ist nicht berechtigt, diese Software-Produkte getrennt, d.h. ohne die SW an einen Dritten weiterzugeben. Es gelten die Bedingungen des Kaufvertrags, soweit nachfolgend für die Open Source Software nicht anders geregelt.

## **B) Lizenzbedingungen und Haftungsausschlüsse für Open Source Software sowie andere Lizenzsoftware**

Im Produkt "ROS (for ROS-CF52 and ROS-MPC83 based products)", Copyright Siemens AG, 2015 (nachfolgend "Produkt" genannt) kommt die unten aufgelistete Open Source Software in unveränderter oder von uns geänderter Form sowie die unten aufgelistete andere Lizenzsoftware zum Einsatz.

### **Haftung für Open Source Software**

Die Open Source Software wird unentgeltlich überlassen. Wir haften für das Produkt einschließlich der darin enthaltenen Open Source Software entsprechend den für das Produkt gültigen Lizenzbestimmungen. Jegliche Haftung für die Nutzung der Open Source Software über den von uns für das Produkt vorgesehenen Programmablauf hinaus sowie jegliche Haftung für Mängel, die durch Änderungen der Open Source Software verursacht werden, ist ausgeschlossen.

Wir leisten keine technische Unterstützung für das Produkt, wenn dieses geändert wurde.

**Lesen Sie bitte die Lizenzbedingungen und Copyright Hinweise der Open Source Software sowie der anderen Lizenzsoftware.**

## **License Conditions**

### **A) Siemens License Conditions**

#### **General License Conditions for Software Products for Automation and Drives (2011-08-01)**

- **1. Supply of Software to Licensee and Granting of Rights to use the Software**

- 1.1 These General License Conditions shall exclusively apply to the delivery of Software for Automation and Drives to the Licensee. General terms and conditions of the Licensee shall apply only where expressly accepted in writing by us. The scope of delivery of the Software shall be determined by the congruent mutual written declarations of both parties. We shall grant the Licensee rights to use the software specified in the Confirmation of Order or, if the Licensee does not receive a Confirmation of Order, the Confirmation specified in the Certificate of License or that specified in the Software Product Sheet, if the Licensee is instead submitted a Software Product Sheet (hereinafter referred to as "SW"). The Certificate of License and the Software Product Sheet shall be collectively referred to as "CoL" hereinafter. The Licensee shall be submitted the CoL when the SW is supplied or in conjunction with the delivery bill. The way in which the SW is supplied is also derived directly from the Confirmation of Order or from the SW purchase order number contained in the Confirmation of Order, in conjunction with the associated order data of our catalog valid at the time of the Confirmation of Order

(hereinafter collectively referred to as "Order Data"), or from the CoL. If the Licensee does not receive a data medium, it shall be authorized to copy the SW already available to it to the extent necessary to exercise the rights to use the SW granted to it. The aforesaid shall apply, mutatis mutandis, to electronic supply of the software (downloading). Where reference is made to the Order Data or the CoL in these General License Conditions, the reference to the CoL is of significance if the Licensee has not received a Confirmation of Order. In any case, the data contained in the Order Data is also contained in the CoL.

- 1.2 The Documentation relating to the SW (hereinafter referred to as "Documentation") shall be purchased separately, unless either the Order Data or CoL contains a stipulation stating that it belongs to the scope of delivery. If the Licensee is authorized to copy the SW in accordance with Clause 1.1, this shall also apply to the Documentation provided that it is included in the scope of delivery.
- 1.3 In the event that we submit a License Key to the Licensee, which unlocks the SW (hereinafter referred to as "License Key"), this License Key must also be installed.
- 1.4 The rights granted to the Licensee with respect to the SW are based on the License Type (see Section 2) and the Software Type (see Section 3). The license and Software Types are detailed in the Order Data or CoL. If the SW is supplied electronically or if copying rights are granted for it, the rights and duties specified in these General License Conditions shall apply to the legitimately generated copies.
- 1.5 If the Licensee is legitimately in possession of a previous SW version/release (hereinafter referred to as "Previous Version"), the Licensee shall be authorized to exercise the rights to use the SW granted to it either with respect to the SW or - if this is intended from a technical point of view - to the Previous Version, at its own discretion (downgrading). If the SW is an Upgrade or PowerPack in accordance with Section 4, Section 4 shall apply additionally.
- 1.6 If Previous Versions are listed in the Readme file of the SW under the category "parallel use", the Licensee has the right to exercise, alternatively to the user rights granted to him for the SW, the user rights for the listed Previous Versions in one (1) Instance. If the "Type of use" named in the Order Data or the CoL is: "Installation" or "User", the Licensee is entitled to the previously described right additionally to and at the same time as the Previous Versions listed in one Instance. An "Instance" in the context of these General License Conditions is either an instance in a physical operating system environment or an instance in a virtual operating system environment. The transferability of the user rights onto Previous Versions is only permissible in conjunction with the user rights for the SW in accordance with Clause 5.3.
- 1.7 In case the Licensee obtains only the data media but no license as per the Order Data or the CoL, any use of the SW by the Licensee is subject to the acquisition of a license according to Section 2. Up to the acquisition of the license, the Licensee is not entitled to supply the SW to third parties.
- 1.8 In case the SW contains Open Source Software or any similar software of a third party (hereinafter referred to as "OSS") the OSS is listed in the Readme\_OSS-file of the SW. The Licensee is entitled to use the OSS in accordance with the respective license conditions of the OSS. The license conditions are provided on the same data carrier as the SW. The license conditions of the respective OSS shall prevail over these General License Conditions with respect to the OSS. If the license conditions of the OSS require the distribution of the source code of such OSS we shall provide such source code on request against payment of the shipping and handling charges.
- 1.9 The SW may be or contain licensed software other than OSS, i.e. software which has not been developed by us itself but which has been licensed to us by a third party (hereinafter referred to as the "Licensor"), e.g. Microsoft Licensing Inc. If the Licensee receives the terms and conditions stipulated by the relevant Licensor together with the SW in the Readme\_OSS file in this case, such terms and conditions shall apply with

respect to the Licensor's liability vis-à-vis the Licensee. Our own liability vis-à-vis the Licensee shall be governed in any case by these General License Conditions.

- **2. License Type**

Depending on the License Type, the Licensee shall be granted the following rights to the SW:

- - 2.1 Single License (One Off License, Copy License)

The term "One Off License" or "Copy License" which may be used in the Software Product Sheet corresponds to the term "Single License". The following regulation shall apply to the full scope of the One Off License / Copy License. The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and valid for an unlimited period of time, to install the SW in one (1) Instance and to utilize the SW thus installed in the manner specified in the Order Data or CoL (see "Type of Use").
  - 2.2 Floating License

The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and valid for an unlimited period of time, to install the SW on any desired number of the Licensee's hardware devices. The number of objects (for example, users or devices) permitted to utilize the SW at the same time can be derived from the Order Data or CoL (see "Type of Use").
  - 2.3 Rental License

The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and limited in time as stipulated in the Order Data or CoL (see "Type of Use"), to install and use the SW in one (1) Instance. If the period of use is specified in hours, the usage decisive for the calculation of the time limit commences with the software start-up and finishes with its shut-down. If the period of usage is specified in days, weeks or months, the specified period, which commences in conjunction with the first SW start-up, shall apply independently of the actual time of usage. If the period of use is specified with a date, the right of use ends on this date – regardless of the actual period of use.
  - 2.4 Rental Floating License

The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and limited in time as stipulated in the Order Data or the CoL (s. "Type of use"), to install the SW on any desired number of the Licensee's hardware devices. The number of objects (for example, users or devices) permitted to utilize the SW at the same time can be derived from the Order Data or CoL (see "Type of Use) as well. If the period of use is specified in hours, the usage decisive for the calculation of the time limit commences with the software start-up and finishes with its shut-down. If the period of usage is specified in days, weeks or months, the specified period, which commences in conjunction with the first SW start-up, shall apply independently of the actual time of usage. If the period of use is specified with a date, the right of use ends on this date – regardless of the actual period of use.
  - 2.5 Demo License

The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and limited in time as stipulated in the Order Data or the CoL (s. "Type of use"), to install the SW in one (1) Instance and to use it for validation purposes. If the period of usage is specified in days, weeks or months, the specified period, which commences in conjunction with the first SW start-up, shall apply independently of the actual time of usage. If the period of use is specified with a date, the right of use ends on this date – regardless of the actual period of use.
  - 2.6 Demo Floating License

The Licensee shall be granted the non-exclusive right, transferable in accordance with Clause 5.3 and limited in time as stipulated in the Order Data or the CoL (s. "Type of use"), to install the SW on any desired number of the Licensee's hardware devices. The

number of objects (for example, users or devices) permitted to utilize the SW at the same time can be derived from the Order Data or CoL (see "Type of Use") as well. If the period of usage is specified in days, weeks or months, the specified period, which commences in conjunction with the first SW start-up, shall apply independently of the actual time of usage. If the period of use is specified with a date, the right of use ends on this date – regardless of the actual period of use.

- 2.7 Trial License

The Licensee shall be granted the non-exclusive and non-transferable right to install the SW in one (1) Instance and to use it for validation purposes in the manner specified in the Order Data or CoL (see "Type of Use"). The period of usage is limited to 14 days and commences with the SW start-up, unless a different period of usage is specified in the Order Data or CoL.

- **3. Software-Type**

If the Software Type is not specified in the Order Data or CoL, the rights specified in Clause 3.2 (Runtime Software) shall apply to the SW.

- - 3.1 Engineering Software (hereinafter referred to as "E-SW")

In the event that the Licensee uses E-SW to generate its own programs or data containing parts of the E-SW, the Licensee shall have the right, without having to pay any license fee, to copy and to use these parts of the E-SW as a part of its own programs or data, or to supply them to third parties for use. In the event that such parts are supplied to third parties for use, these parties shall be bound in writing to comply with stipulations corresponding to those in Clauses 5.1 and 5.2 with respect to the above parts of the E-SW.

- 3.2 Runtime Software (hereinafter referred to as "R-SW")

If the Licensee incorporates R-SW or any parts thereof into its own programs or data, it shall purchase a license with respect to the R-SW each time it installs or copies - depending on what is done first - its own programs or data containing R-SW or parts thereof, in accordance with the relevant intended Type of Use and on the basis of the Siemens catalog valid at that time. In the event that the Licensee supplies the specified programs or data to third parties for their use, these parties shall be bound in writing to adhere to stipulations corresponding to those in Section 5, with respect to the R-SW parts contained therein. The aforesaid shall not affect the Licensee's obligation to purchase a license for the R-SW if the R-SW original is copied. If the R-SW contains tools for parameterization/configuration and extended rights have been granted in this regard, this will be detailed in the readme file of the R-SW.

- **4. Upgrade and PowerPack**

If it is apparent from the Order Data or CoL, e.g. by the addition "Upgrade" or "PowerPack" after the SW product name, that the SW is an upgrade for another software item (hereinafter referred to as "Source License"), the rights originally granted to the Licensee to use the Source License end in conjunction with the upgrade measure. The rights of use in accordance with Clause 1.6 remain unaffected by this. However, the Licensee is entitled to undo the upgrading (downgrading) - if this is intended from a technical point of view - and to exercise the rights to use the SW granted to it with respect to the Source Version in accordance with Clause 1.5.

- **5. Further Rights and Duties of the Licensee**

- - 5.1 Unless a stipulation to the contrary relating to a specific number of copies is contained on the data medium or in the readme file of the SW, the Licensee may generate an appropriate number of copies of every item of SW which it is authorized to use in accordance with these General License Conditions, where such copies shall be

used exclusively for data backup purposes. Furthermore the Licensee may only copy the SW if and insofar as it has been granted copying rights by us in writing.

- 5.2 The Licensee shall not be entitled to modify, decompile or reverse engineer the SW. Nor may it extract any individual parts unless this is permitted by mandatory copyright law. Furthermore, the Licensee shall not be entitled to remove any alphanumeric identifiers, trademarks or copyright notices from the SW or the data medium and, insofar as it is entitled to make copies of the SW, shall copy them without alteration. The aforementioned regulation shall apply accordingly to the Documentation supplied in accordance with Section 1.
- 5.3 The Licensee shall be entitled to completely transfer the right to use the SW granted to it to a third party, provided that it concludes a written agreement with the third party in conformance with all of the conditions contained in this Section 5 and on the proviso that it does not retain any copies of the SW. If the Licensee has received a License Key for the SW, this key shall be supplied to the third party together with the SW. Furthermore, the third party shall be submitted the CoL together with these General License Conditions. The Licensee shall submit the CoL received for the SW to us at any time, if requested.
- 5.4 If the SW is a PowerPack or an Upgrade, the Licensee shall keep the CoL of the Source License and submit it to us at any time, if requested, together with the CoL for the SW. In the event that the Licensee transfers its right to use the PowerPack SW or Upgrade SW in accordance with Clause 5.3, it shall also submit the CoL of the Source License to the third party.
- 5.5 If the Licensee receives a data medium which, in addition to the SW, contains further software products which are released for use, then it shall have the right to use these released software products exclusively for validation purposes, for a limited period of time and free of charge. The period of use shall be limited to 14 days, commencing with the first start-up of the relevant software program unless a different period is specified e.g. in the readme file of the relevant software product. These software products supplied exclusively for validation purposes shall be governed, mutatis mutandis, by the stipulations contained in these General License Conditions. The Licensee shall not be authorized to pass on these software products separately, i.e. without the SW, to a third party. The conditions of the purchase contract apply if not otherwise stipulated hereafter for the Open Source Software.

This code is a modified version of crypting code in Infozip distribution  
The encryption/decryption parts of this source code (as opposed to the non-echoing password parts) were originally written in Europe. The whole source package can be freely distributed, including from the USA.

(Prior to January 2000, re-export from the US was a violation of US law.)  
This encryption code is a direct transcription of the algorithm from Roger Schlafly, described by Phil Katz in the file appnote.txt. This file (appnote.txt) is distributed with the PKZIP program (even in the version without encryption capabilities).  
If you don't need crypting in your application, just define symbols NOCRYPT and NOUNCRYPT.

### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Distributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for Contributors. Therefore, if a Distributor includes the Program in a commercial product offering, such Distributor ("Commercial Distributor") hereby agrees to defend and indemnify every Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Distributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Distributor in writing of such claim, and b) allow the Commercial Distributor to control, and cooperate with the Commercial Distributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Distributor might include the Program in a commercial product offering, Product X. That Distributor is then a Commercial Distributor. If that Commercial Distributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Distributor's responsibility alone. Under this section, the Commercial Distributor would have to defend claims against the Contributors related to those performance claims and warranties, and if a court requires any Contributor to pay any damages as a result, the Commercial Distributor must pay those damages.

### 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

### 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING

NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### 7. EXPORT CONTROL

Recipient agrees that Recipient alone is responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries).

#### 8. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against a Contributor with respect to a patent applicable to software (including a cross-claim or counterclaim in a lawsuit), then any patent licenses granted by that Contributor to such Recipient under this Agreement shall terminate as of the date such litigation is filed. In addition, if Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

LUCENT may publish new versions (including revisions) of this Agreement from time to time. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. No one other than LUCENT has the right to modify this Agreement. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

install the software.

**FREESCALE SEMICONDUCTOR SOFTWARE LICENSE AGREEMENT  
SOFTWARE FOR: Freescale MQX]**

This is a legal agreement between you (either as an individual or as an authorized representative of your employer) and Freescale Semiconductor, Inc. ("Freescale"). It concerns your rights to use this file and any accompanying written materials (the "Software"). In consideration for Freescale allowing you to access the Software, you are agreeing to be bound by the terms of this Agreement. If you do not agree to all of the terms of this Agreement, do not download the Software. If you change your mind later, stop using the Software and delete all copies of the Software in your possession or control. Any copies of the Software that you have already distributed, where permitted, and do not destroy will continue to be governed by this Agreement. Your prior use will also continue to be governed by this Agreement.

**LICENSE GRANT.** Exclusively in conjunction with Licensee's development and sale of a product containing a programmable processing unit (e.g., a microprocessor, microcontroller, or digital signal processor) supplied directly or indirectly from Freescale ("Freescale System") and listed under "By Products" on the Freescale MQX website ([www.freescale.com/mqx](http://www.freescale.com/mqx)), Freescale grants to you, free of charge, the non-exclusive, non-transferable right (1) to use the Software, (2) to reproduce the Software, (3) to prepare derivative works of the Software, (4) to distribute the Software and derivative works thereof in object (machine-readable) form as part of a Freescale System, and (5) to sublicense to others the right to use the distributed Software as included within the Freescale System. You must prohibit your sublicensees from translating, reverse engineering, decompiling, or disassembling the Software except to the extent applicable law specifically prohibits such restriction. If you violate any of the terms or restrictions of this Agreement, Freescale may immediately terminate this Agreement, and require that you stop using and delete all copies of the Software in your possession or control.

**COPYRIGHT.** The Software is licensed to you, not sold. Freescale owns the Software, and United States copyright laws and international treaty provisions protect the Software. Therefore, you must treat the Software like any other copyrighted material (e.g. a book or musical recording). You may not use or copy the Software for any other purpose than what is described in this Agreement. Except as expressly provided herein, Freescale does not grant to you any express or implied rights under any Freescale or third-party patents, copyrights, trademarks, or trade secrets. Additionally, you must reproduce and apply any copyright or other proprietary rights notices included on or embedded in the Software to any copies or derivative works made thereof, in whole or in part, if any.

**SUPPORT.** Freescale is NOT obligated to provide any support, upgrades or new releases of the Software. If you wish, you may contact Freescale and report problems and provide suggestions regarding the Software. Freescale has no obligation whatsoever to respond in any way to such a problem report or suggestion. Freescale may make changes to the Software at any time, without any obligation to notify or provide updated versions of the Software to you.

**NO WARRANTY.** TO THE MAXIMUM EXTENT PERMITTED BY LAW, FREESCALE EXPRESSLY DISCLAIMS ANY WARRANTY FOR THE SOFTWARE. THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. YOU ASSUME THE ENTIRE RISK ARISING OUT OF THE USE OR PERFORMANCE OF THE SOFTWARE, OR ANY SYSTEMS YOU DESIGN USING THE SOFTWARE (IF ANY). NOTHING IN THIS AGREEMENT MAY BE CONSTRUED AS A WARRANTY OR REPRESENTATION BY FREESCALE THAT THE SOFTWARE OR ANY DERIVATIVE WORK DEVELOPED WITH OR INCORPORATING THE SOFTWARE WILL BE FREE FROM INFRINGEMENT OF THE INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES.

**INDEMNITY.** You agree to fully defend and indemnify Freescale from any and all claims, liabilities, and costs (including reasonable attorney's fees) related to (1) your use (including your sublicensee's use, if permitted) of the Software or (2) your violation of the terms and conditions of this Agreement.

**LIMITATION OF LIABILITY.** IN NO EVENT WILL FREESCALE BE LIABLE, WHETHER IN CONTRACT, TORT, OR OTHERWISE, FOR ANY INCIDENTAL, SPECIAL, INDIRECT, CONSEQUENTIAL OR PUNITIVE DAMAGES, INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, OR LOST PROFITS, SAVINGS, OR REVENUES TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

**COMPLIANCE WITH LAWS; EXPORT RESTRICTIONS.** You must use the Software in accordance with all applicable U.S. laws, regulations and statutes. You agree that neither you nor your licensees (if any) intend to or will, directly or indirectly, export or transmit the Software to any country in violation of U.S. export restrictions.

**GOVERNMENT USE.** Use of the Software and any corresponding documentation, if any, is provided with RESTRICTED RIGHTS. Use, duplication or disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of The Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraphs (c)(1) and (2) of the Commercial Computer Software--Restricted Rights at 48 CFR 52.227-19, as applicable. Manufacturer is Freescale Semiconductor, Inc., 6501 William Cannon Drive West, Austin, TX, 78735.

**HIGH RISK ACTIVITIES.** You acknowledge that the Software is not fault tolerant and is not designed, manufactured or intended by Freescale for incorporation into products intended for use or resale in on-line control equipment in

hazardous, dangerous to life or potentially life-threatening environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, direct life support machines or weapons systems, in which the failure of products could lead directly to death, personal injury or severe physical or environmental damage ("High Risk Activities"). You specifically represent and warrant that you will not use the Software or any derivative work of the Software for High Risk Activities.

**CHOICE OF LAW; VENUE; LIMITATIONS.** You agree that the statutes and laws of the United States and the State of Texas, USA, without regard to conflicts of laws principles, will apply to all matters relating to this Agreement or the Software, and you agree that any litigation will be subject to the exclusive jurisdiction of the state or federal courts in Texas, USA. You agree that regardless of any statute or law to the contrary, any claim or cause of action arising out of or related to this Agreement or the Software must be filed within one (1) year after such claim or cause of action arose or be forever barred.

**PRODUCT LABELING.** You are not authorized to use any Freescale trademarks, brand names, or logos.

**ENTIRE AGREEMENT.** This Agreement constitutes the entire agreement between you and Freescale regarding the subject matter of this Agreement, and supersedes all prior communications, negotiations, understandings, agreements or representations, either written or oral, if any. This Agreement may only be amended in written form, executed by you and Freescale.

**SEVERABILITY.** If any provision of this Agreement is held for any reason to be invalid or unenforceable, then the remaining provisions of this Agreement will be unimpaired and, unless a modification or replacement of the invalid or unenforceable provision is further held to deprive you or Freescale of a material benefit, in which case the Agreement will immediately terminate, the invalid or unenforceable provision will be replaced with a provision that is valid and enforceable and that comes closest to the intention underlying the invalid or unenforceable provision.

**NO WAIVER.** The waiver by Freescale of any breach of any provision of this Agreement will not operate or be construed as a waiver of any other or a subsequent breach of the same or a different provision.

### **GNU GENERAL PUBLIC LICENSE**

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### **Preamble**

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## **TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION**

**0.** This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

**1.** You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

**2.** You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a)** You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b)** You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c)** If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print

such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

**3.** You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

**a)** Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

**b)** Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

**c)** Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

**4.** You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who

have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

**5.** You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

**6.** Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

**7.** If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

**8.** If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

**9.** The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software

Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

**10.** If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## **NO WARRANTY**

**11.** BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

**12.** IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence

the version number 2.1.]

## **Preamble**

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## **TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION**

**0.** This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library

(independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

**1.** You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

**2.** You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- **a)** The modified work must itself be a software library.
- **b)** You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- **c)** You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- **d)** If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

**3.** You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to

this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

**4.** You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

**5.** A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

**6.** As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for

the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- **a)** Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- **b)** Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- **c)** Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- **d)** If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- **e)** Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- **a)** Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- **b)** Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

**8.** You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

**9.** You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

**10.** Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

**11.** If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

**12.** If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

**13.** The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

**14.** If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### **NO WARRANTY**

**15.** BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

**16.** IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### **END OF TERMS AND CONDITIONS**
