Sehr geehrte Ausstellerinnen und Aussteller,  
sehr geehrte Besucherinnen und Besucher,

vor 25 Jahren – im September 1997 – feierte mit der ALUMINIUM die erste Messe für die internationale Aluminiumindustrie ihre Premiere. Sie war von Beginn an eine Veranstaltung aus der Branche für die Branche: Sie sollte der Aluminiumindustrie erstmals ein eigenes Forum bieten und die Potentiale des Werkstoffs sichtbar machen. Vor allem aber sollte sie Menschen zusammenführen, die gemeinsam die Zukunft der Aluminiumindustrie aktiv gestalten.

Diese Zukunft ist heute vielversprechend: Aluminium ist eine der besten Lösungen für die Anforderungen eines nachhaltigen und ressourcenschonenden Lebens, einer modernen Kreislaufwirtschaft und einer sich rasant entwickelnden Mobilitätswende. Auch im Verpackungssektor, im Bau- und Konstruktionswesen oder in der additiven Fertigung wird kein Weg mehr an Aluminium vorbeiführen.

Längst ist rund um den Werkstoff eine Vision entstanden, die wir auf der ALUMINIUM sichtbar machen. Und die wir gemeinsam mit Ihnen unter dem Motto „Sharing a vision“ auch künftig weitertragen werden.

Auch wenn die gesamte Branche kurz-, mittel- und langfristig vor immensen Herausforderungen steht – von der Dekarbonisierung der Industrie über Fragen der Energiesicherheit bis zur Digitalisierung: Mehr denn je arbeitet die Aluminiumindustrie heute mit vereinten Kräften daran, den Werkstoff zukunftssicher zu machen.

**Benedikt Binder-Krieglstein**  
CEO RX Austria & Germany

Wie, das wird in den kommenden drei Tagen deutlich. Gemeinsam mit unseren Partnern – allen voran unseren beiden ideellen Trägern Aluminium Deutschland und European Aluminium – sowie unserem starken Partner-Netzwerk haben wir als Veranstalter die Zeit genutzt, die ALUMINIUM thematisch und konzeptionell weiterzuentwickeln. Der Austausch und Wissenstransfer rücken dabei immer mehr in den Mittelpunkt. So findet die ALUMINIUM Conference ab diesem Jahr inmitten des Ausstellungsgebietes statt. Für die Zukunftsthemen Nachhaltig und Recycling oder die additive und digitale Fertigung haben wir neue Formate wie die Innovation Plazas und Speakers Corners geschaffen.

Die ALUMINIUM 2022 wird damit zur Zukunftsplattform für die Innovationen, Trends und Lösungen der Aluminiumindustrie. Ich heiße Sie herzlich willkommen und wünsche Ihnen drei inspirierende und erfolgreich Messe- und Kongresstage.

Ihr

**Benedikt Binder-Krieglstein**  
CEO RX Austria & Germany

**Benedikt Binder-Kriegelstein**  
CEO RX Austria & Germany

Dear exhibitors,  
dear visitors,

25 years ago - in September 1997 - ALUMINIUM, the first trade fair for the international aluminium industry, celebrated its premiere. From the very beginning, it was an event from the industry for the industry: It was to offer the aluminium industry its own forum for the first time and to make the potential of the material visible. Above all, however, it was to bring people together who would actively shape the future of the aluminium industry.

This future is promising today: aluminium is one of the best solutions for the requirements of a sustainable and resource-efficient life, a modern circular economy and a rapidly developing mobility revolution. There is also no way around aluminium in the packaging sector, in building and construction or in additive manufacturing.

A vision has already emerged around this material, and we are making it visible at ALUMINIUM. Together with you, we will continue to carry this vision forward in the future under the motto „Sharing a vision“.

Even when the entire industry is facing immense challenges in the short, medium and long term - from the decarbonisation of the industry to questions of energy security and digitalisation: today, more than ever, the aluminium industry is working with joined forces to make the material fit for the future.

The next three days will show how. Together with our partners - first and foremost our two ideal sponsors Aluminium Deutschland and European Aluminium - as well as our strong partner network, we as organisers have used the time to further develop ALUMINIUM thematically and conceptually. The focus is increasingly on exchange and knowledge transfer. From this year on, the ALUMINIUM Conference will take place in the middle of the exhibition area. For future topics such as sustainability and recycling or additive and digital manufacturing, we have created new formats such as the Innovation Plazas and Speakers Corners.

ALUMINIUM 2022 will become the future platform for the innovations, trends and solutions of the aluminium industry. I would like to welcome you and wish you three inspiring and successful days at the trade fair and congress.

Yours

Benedikt Binder-Kriegelstein  
CEO RX Austria & Germany

Sharing a vision.

**GRUSSWORTE.  
EDITORIALS.**

**Rob van Gils**  
Präsident Aluminium Deutschland e.V.

Liebe Besucherinnen und Besucher,  
liebe Ausstellerinnen und Aussteller,

nach vier Jahren des Wartens ist es wieder so weit: Die ALUMINIUM öffnet ihre Tore und feiert dabei ein kleines Jubiläum. Denn vor 25 Jahren fand die Messe zum ersten Mal statt. Das unterstreicht ihre Bedeutung und ihren Anspruch als Weltleitmesse für unsere Industrie und den Werkstoff. Mit über 700 Ausstellern und zahlreichen Expertinnen und Experten aus aller Welt kommt hier die internationale Aluminium-Community zusammen. In diesen angespannten Zeiten setzt die Messe ein positives Zeichen und – auch wenn es aktuell nicht leichtfällt – Zuversicht ist der richtige Begleiter. Aluminium ist der Zukunftswerkstoff, der Enabler auf unserem Weg hin zu einer klimaneutralen Industrie und Gesellschaft. Denn wir alle wissen, dass die Bewältigung der großen Herausforderungen, vor denen unsere Gesellschaft steht, nur mit unserem Werkstoff möglich ist. Der Ausbau der erneuerbaren Energien funktioniert nur mit Aluminium, ebenso wie der Hochlauf der Elektromobilität – um nur zwei prominente Beispiele unter vielen zu nennen.

Dementsprechend steht die ALUMINIUM in diesem Jahr vor allem unter dem Zeichen von Nachhaltigkeit und Dekarbonisierung. Unsere Industrie befindet sich in einem nie dagewesenen Transformationsprozess und wird sich in den kommenden Jahren grundlegend wandeln. Das gilt für die gesamte Aluminium-Lieferkette von den Primärproduzenten über die Halbzeuger bis hin zu den Recyclern und bezieht auch unsere Kundenbranchen mit ein. Zudem eröffnen Digitalisierung und Circular Economy neue Geschäftsfelder und -modelle. Den bereits eingeschlagenen Pfad zeigen die Unternehmen hier mit ihren Produkten und Innovationen. Sie demonstrieren eindrucksvoll, welche Lösungskompetenz in Aluminium steckt. Seien Sie sich sicher: Die Industrie liefert!

Zudem gibt es auf der ALUMINIUM in diesem Jahr wichtige Neuerung: Zum ersten Mal findet die Conference an allen drei Messetagen auf dem Gelände statt. Mit diesem logischen Schritt stellt sich die Messe organisatorisch sowie inhaltlich noch besser auf – die Conference ist ein Muss für jede Expertin und jeden Experten aus der Branche. Das Programm umfasst die top-aktuellen Themen Sustainability, Mobility, Additive Manufacturing sowie Building & Construction. In Halle 3 kommen bei der Conference Entscheiderinnen und Entscheider aus Wirtschaft, Industrie und Politik sowie von Think Tanks und NGOs zusammen und teilen ihre Sicht auf Industrie und Werkstoff mit uns. Das ermöglicht uns einen noch intensiveren Dialog und hilft uns dabei, den Blick zu schärfen, um die vor uns liegenden Aufgaben erfolgreich zu meistern.

Wie Sie sehen: Am Werkstoff und an der ALUMINIUM führt kein Weg vorbei. Ich freue mich auf Ihren Besuch, neue und bekannte Kontakte und viele interessante Diskussionen!

Ihr  
Rob van Gils  
Präsident Aluminium Deutschland e.V.

Dear visitors,  
dear exhibitors,

After four years of waiting, ALUMINIUM is opening its doors again and celebrating a small anniversary. 25 years ago, the fair was held for the first time. This underlines its importance and its claim to be the world's leading trade fair for our industry and the material. With over 700 exhibitors and numerous experts from all over the world, the international aluminium community comes all together here. In these tense times, the fair sends a positive signal and - even if it is not easy at the moment - confidence is the right spirit to follow. Aluminium is the material of the future, the enabler on our way to a climate-neutral industry and society. Because we all know that overcoming the major challenges facing our society is only possible with our material. The increase in renewable energies only works with aluminium, as does the take-off of electromobility - to name just two prominent examples among many.

Accordingly, this year's ALUMINIUM is above all under the sign of sustainability and decarbonisation. Our industry is undergoing an unmatched transformation process and will change fundamentally in the upcoming years. This applies to the entire aluminium supply chain, from primary producers to semi-finished products to recyclers, and also includes our customer industries. In addition, digitalisation and the circular economy are opening up new business areas and models. The companies here show the path they have already taken with their products and innovations. They impressively demonstrate the solution expertise that aluminium has to offer. Be sure: the industry performs!

**Rob van Gils**  
President Aluminium Deutschland e.V.

In addition, there is an important innovation at this year's ALUMINIUM: for the first time, the Conference will be held on all three days of the fair. With this logical step, the fair is positioning itself even better in terms of organisation and content - the conference is a must for every expert in the industry. The programme includes the current topics of Sustainability, Mobility, Additive Manufacturing and Building & Construction. In Hall 3, decision-makers from business, industry and politics as well as from Think Tanks and NGOs will come together at the conference and share their views on industry and materials with us. This enables us to engage in an even more intensive dialogue and helps us to sharpen our focus in order to successfully master the tasks ahead of us.

As you can see: There is no way around the material and the ALUMINIUM. I look forward to your visit, new and familiar contacts and many interesting discussions!

Your  
Rob van Gils  
President Aluminium Deutschland e.V.

**Paul Voss**  
Director General European Aluminium

Liebe Besucherinnen und Besucher,  
liebe Ausstellerinnen und Aussteller,

wenngleich ich erst seit Februar Director General bei European Aluminium bin, so bin ich mir dennoch bewusst, was für eine wichtige Plattform die ALUMINIUM für unsere Branche ist. Seit Monaten habe ich diesen Termin in meinem Kalender markiert und ich freue mich auf drei Tage inspirierenden Austauschs zu den Chancen, welche die grüne Energiewende für unser Metall in Europa und auf der ganzen Welt schaffen wird. Aluminium ist aus unserer Gesellschaft nicht wegzudenken: Elektroautos, Stromkabel, Batterien bis hin zu Wind- und Solarenergie – sie alle bauen auf Aluminium!

Und dennoch: Es wäre leichtsinnig und unverantwortlich, die Herausforderungen zu ignorieren, mit denen wir im Hier und Jetzt konfrontiert sind. Zwischen den immer deutlicher spürbaren Auswirkungen des Klimawandels, ernsthaften Bedenken hinsichtlich der Energiepreise und Versorgungssicherheit, höchst unsicheren Aussichten für die Weltwirtschaft und einem geopolitischen Kontext, bei dem ich oft bereue, die Zeitung aufgeschlagen zu haben, mangelt es uns nicht an Grund zur Sorge. Die gute Nachricht ist, dass wir in den letzten Jahren bereits bewiesen haben, wie widerstandsfähig unsere Beschäftigten, Unternehmen und Kunden sind. Noch grundlegender ist die Erkenntnis, dass der Bedarf an Aluminium in Europa und weltweit in den kommenden Jahren und Jahrzehnten weiter steigen wird. Dies gibt uns sowohl die Möglichkeit, als auch die Verantwortung, den Übergang zu einer kohlenstoffarmen Kreislaufwirtschaft zu vollziehen und zu beschleunigen.

Ich freue mich sehr darauf, Sie auf der ALUMINIUM begrüßen zu dürfen. Unsere Community braucht Sie mehr denn je!

Dear exhibitors and visitors,

Having joined European Aluminium in February, I may be new to aluminium, but even I know what an important platform the ALUMINIUM fair is for our industry. I've had it marked on my calendar for months, and I'm looking forward to three days of inspiring exchanges about the massive opportunities the green energy transition will create for our metal in Europe and around the world. Aluminum is everywhere: from electric cars, electricity cables, and batteries to wind and solar power!

And while this hasn't changed, it would be tone deaf and irresponsible to ignore the very real challenges we're facing in the here and now. Between the increasingly tangible impacts of climate change, serious concerns about energy prices and security of supply, a highly uncertain outlook for the global economy, and a geopolitical context that often makes me regret opening the newspaper, we're not short of reasons to worry.

The good news is we've already seen how resilient our people, companies, and customers are over the past couple of years. More fundamentally still, there's encouragement, motivation, and pride to be found in the enduring truth that the need for aluminium in Europe and worldwide will only grow in the years and decades to come. This gives us both an opportunity and a responsibility to deliver and accelerate our shift to a decarbonised and circular industry.

I'm so much looking forward to seeing you. Our community needs you more than ever!

**Paul Voss**  
Director General of European Aluminium

**Michael Schäfer**  
Executive Vice President Flat Products  
SMS group GmbH

Sehr geehrte Besucher und Besucherinnen,  
sehr geehrte Aussteller und Ausstellerinnen  
der ALUMINIUM 2022,

wie haben sich Produkte und Serviceleistungen rund um den Werkstoff Aluminium seit der letzten ALUMINIUM-Messe vor vier Jahren weiterentwickelt? Konnte sich sein Potenzial gerade im Hinblick auf die Entwicklungen im Bereich der Elektromobilität weiter entfalten? Und wie schlägt sich das moderne Leichtmetall im Vergleich zu alternativen Werkstoffen?

Wenn die ALUMINIUM 2022 nach der Zwangspause wieder ihre Pforten für das internationale Fachpublikum öffnet, dürfen wir gespannt sein – auf neue Anwendungen und innovative Lösungen, die Kunden und Experten gleichermaßen begeistern. Die Leitmesse der Branche in Düsseldorf bietet allen Ausstellern die ideale Plattform, diese Entwicklungen dem Fachpublikum zu präsentieren.

Die SMS group bietet als weltweit aufgestellte Unternehmensgruppe mit einem breiten Portfolio führende Lösungen im Bereich Schmelzen, Gießen, Schmieden, Strangpressen und Flachwalzen sowie Transport-, Lager- und Verpackungslogistik. Wir freuen uns darauf, Ihnen auf unserem Messestand zukunftsweisende Technologien zur kostenoptimierten, digitalisierten und CO<sub>2</sub>-reduzierten Herstellung von Qualitätsprodukten vorzustellen. Neben Modernisierungen ist SMS auch der Experte für Neuprojekte und Ansprechpartner für Unternehmen, die neu in den Aluminium-Markt eintreten wollen.

Entsprechend dem diesjährigen Motto *Sharing a vision* freuen wir uns darauf, bei einem persönlichen Treffen auf unserem Messestand 5A34 in Halle 5 unsere Vision rund um den Werkstoff Aluminium mit Ihnen zu teilen und mit Ihren Ideen abzugleichen.

Dear Visitors and Exhibitors at ALUMINIUM 2022,

What developments and trends have there been in products and services for aluminum since the last ALUMINIUM trade fair 4 years ago? Has its potential grown further, especially in terms of what's happening in the field of electromobility, and how does this modern light metal hold up compared to alternative materials?

When ALUMINIUM 2022 opens its doors once again to an international trade audience following the forced hiatus, it will be exciting to see what new applications and innovative solutions there will be to inspire customers and experts alike. The industry's leading trade fair in Düsseldorf offers all exhibitors the ideal platform for presenting these developments to an expert audience.

As a globally positioned group of companies, SMS group has a wide-ranging portfolio that covers cutting-edge solutions in the fields of melting, casting, forging, extrusion presses, and flat rolling, as well as handling, storage and packaging logistics. We look forward to seeing you at the trade fair and presenting to you our pioneering technologies for the cost-optimized, digitalized, and CO<sub>2</sub>-reduced manufacture of high-quality products. In addition to revamps and upgrades, SMS is also your expert partner for new projects and the go-to contact for companies entering the aluminum market for the first time.

In line with this year's motto „*Sharing a vision*“, we look forward to sharing our vision for aluminum with you and aligning it with your ideas in a personal meeting at our booth 5A34 in hall 5.

**Michael Schäfer**  
Executive Vice President Flat Products  
SMS group GmbH

## Hauptsponsor / Main Sponsor

SMS group GmbH  
Stände: 5A34, 5A35

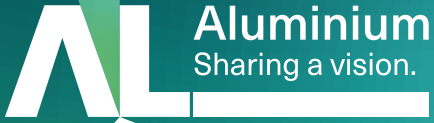

Die SMS group steht weltweit für zukunftsorientierte Technologie und herausragenden Service im Maschinen- und Anlagenbau in der Metallindustrie. Für die Aluminium verarbeitende Industrie umfassen SMS-Lösungen die mechanischen Komponenten, weltweit geschützte technologische Verfahren, eine durchgängige Automation und digitale Lösungen.

Das Unternehmen nutzt seine 150 Jahre Erfahrung und sein digitales Know-how für kontinuierliche Innovationen auch über sein Kerngeschäft hinaus – und erwirtschaftet weltweit einen Umsatz von über 2,7 Milliarden Euro. SMS ist der richtige Partner für anspruchsvolle Projekte. Das Unternehmen begleitet seine Kunden während des gesamten Lebenszyklus ihrer Anlagen und ermöglicht dadurch profitable, ressourcenschonende Wertschöpfungsketten. Wegbereiter für eine kohlenstoffneutrale und nachhaltige Metallindustrie zu sein, ist das erklärte Ziel des Unternehmens. Als Global Player mit deutschen Wurzeln übernimmt SMS Verantwortung für seine rund 14.500 Mitarbeitenden.

SMS group is renowned worldwide for its future-oriented technologies and outstanding service for the metals industry. For the aluminum-processing industry, SMS' solutions embrace the mechanical components, technological processes protected worldwide by industrial property rights, a consistently high level of automation and digital solutions.

The company applies its 150 years of experience and its digital know-how to provide the industry continuously with innovative products and processes – even beyond its core business – and generates worldwide sales of around 2.6 billion euros. SMS is the right partner for challenging projects, and supports its customers throughout the lifecycle of their plants, enabling profitable and resource-efficient value creation chains. Paving the way for a carbon-neutral and sustainable metals industry is the company's stated goal. As a global player with German roots, SMS takes responsibility for its 14,500 employees.

## European Aluminium

Stand: 4F48

European Aluminium – gegründet 1981 – ist mit seinem Hauptsitz in Brüssel Sprachrohr der europäischen Aluminiumindustrie. Im Rahmen unserer Aktivitäten führen wir einen aktiven Dialog mit allen für unsere Industrie relevanten Entscheidungsträgern und Interessengruppen. Ziel ist dabei vor allem die Bewerbung der einzigartigen Eigenschaften von Aluminium und die Sicherung der für Wachstum notwendigen Rahmenbedingungen. Durch Fachwissen im Bereich Umwelt und Technik, wirtschaftliche und statistische Analysen, wissenschaftliche Forschung, Bildung und den Austausch bewährter Methoden, Öffentlichkeitsarbeit und Kommunikationsaktivitäten fördert European Aluminium die Verwendung von Aluminium als Material mit dauerhaften Eigenschaften, das Teil der Lösung ist, um nachhaltige Ziele zu erreichen, während gleichzeitig das Image der Industrie, des Materials und seiner Anwendungsmöglichkeiten bei den Interessenvertretern verbessert wird. Zu unseren mehr als 80 Mitgliedern mit ihren über 600 Werken in 30 europäischen Ländern gehören alle führenden Produzenten von Primäraluminium, nachgelagerte Hersteller von Strangpress-, Walz- und Gussprodukten, Aluminium-Recycler sowie nationale Aluminiumvereinigungen.

European Aluminium, founded in 1981 and based in Brussels, is the voice of the aluminium industry in Europe. We actively engage with decision makers and the wider stakeholder community to promote the outstanding properties of aluminium, secure growth and optimise the contribution our metal can make to meeting Europe's sustainability challenges. Through environmental and technical expertise, economic and statistical analysis, scientific research, education and sharing of best practices, public affairs and communication activities, European Aluminium promotes the use of aluminium as a material with permanent properties that is part of the solution to achieving sustainable goals, while maintaining and improving the image of the industry, of the material and of its applications among their stakeholders. Our 80+ members include primary aluminium producers; downstream manufacturers of extruded, rolled and cast aluminium; producers of recycled aluminium and national aluminium associations are representing more than 600 plants in 30 European countries.

## Aluminium Danmark

Stand: 4C44, 6D23

Als Teil der Fertigungsindustrie und der Konföderation der dänischen Industrie bringt Aluminium Danmark Firmen zusammen, die Aluminium als strategisches Material benutzen. Aluminium Denmark initiiert Aktivitäten, die den kompetitiven Vorteil der Mitgliedsfirmen in Dänemark involvieren, stärken und weiterentwickeln – beispielsweise Wissensaustausch, Exportförderung und Kreislaufwirtschaftsaktivitäten, die den einzigartigen Charakter des Materials betonen. Mit sowohl der Fertigungsindustrie als auch der Konföderation der dänischen Industrie im Rücken, konzentrieren wir uns auf die Kreation von Partnerschaften mit den Innovationsnetzwerken der Industrie, Bildungs- und Wissensinstitutionen und die Ausführung von Aktivitäten, die den Firmen in der Industrie von Nutzen sind. Durch starke Beziehungen mit dem European Aluminium stellen wir Zugang zu und Einfluss auf die zukünftige Legislatur der Industrie sicher.

Aluminium Denmark organizes as part of the Manufacturing Industry and the Confederation of Danish Industry (DI) companies with aluminum as a strategic material. Aluminium Denmark initiate activities that involve, strengthen and develop the competitive advantage of the member companies in Denmark - knowledge sharing, export promotion and circular economy activities that highlights the material's unique properties. With the manufacturing industry and DI in the back, we focus on value creating partnerships with the industry innovation networks, education and knowledge institutions, and carry out activities that benefit companies in the industry. Through strong relationships with the industry's European Aluminium we ensure access to and influence on future legislation for the industry.

[www.alu.dk](http://www.alu.dk)

## Aluminium Stewardship Initiative (ASI)

Die Aluminium Stewardship Initiative (ASI) ist eine globale, gemeinnützige Organisation zur Festlegung von Qualitätsstandards und zur Vergabe von Zertifizierungen. Wir bringen Hersteller, Anwender und Interessengruppen der Aluminium-Wertschöpfungskette zusammen, um den Beitrag von Aluminium zu einer nachhaltigen Gesellschaft zu maximieren. Gemeinsam wollen wir eine verantwortungsvolle Produktion, Beschaffung und Bewirtschaftung von Aluminium fördern.

The Aluminium Stewardship Initiative (ASI) is a global non-profit standard setting and certification organisation. We bring together producers, users and stakeholders in the aluminium value chain with a commitment to maximise the contribution of aluminium to a sustainable society. Working together, we aim to collaboratively foster responsible production, sourcing and stewardship of aluminium.

**Stand: 6A05-03**

CRU bietet unübertroffene Geschäftsinformationen über die globale Metall-, Bergbau- und Düngemittelindustrie durch Marktanalysen, Preisbewertungen, Beratung und Veranstaltungen.

Wenn Sie vor kritischen Geschäftsentscheidungen stehen, können Sie sich auf unser Wissen aus erster Hand verlassen, um einen vollständigen Überblick über einen Rohstoffmarkt zu erhalten. Und Sie können sich direkt an unsere Experten wenden, um ein umfassendes Bild zu erhalten und eine persönliche Antwort zu bekommen. CRU - groß genug, um einen hochwertigen Service zu bieten, klein genug, um sich um alle unsere Kunden zu kümmern.

CRU offers unrivalled business intelligence on the global metals, mining and fertilizer industries through market analysis, price assessments, consultancy, and events.

When facing critical business decisions, you can rely on our first-hand knowledge to give you a complete view of a commodity market. And you can engage with our experts directly, for the full picture and a personalised response. CRU – big enough to deliver a high quality service, small enough to care about all of our customers.

## EAFA e.V. - European Aluminium Foil Association

Stand: 4C05

Die European Aluminium Foil Association (EAFA) ist die internationale Organisation der Hersteller von Folienwalzprodukten und Haushaltsfolien aus Aluminium sowie von Aluschraubverschlüssen, Alufolienbehältern und flexiblen Verpackungen. Ihre mehr als 100 Mitgliedsunternehmen sind in West-, Zentral- und Osteuropa beheimatet. Zu den Hauptaufgaben des Verbandes gehören die Zusammenstellung statistischer Daten aus der Marktforschung, Öffentlichkeitsarbeit und Promotion von Aluminiumfolie als auch die Interessen-Vertretung gegenüber der Öffentlichkeit und vor- und nachgelagerten Branchen. Im Fokus stehen auch Fragen der Nachhaltigkeit von Aluminiumfolie und flexiblen Verpackungen.

The European Aluminium Foil Association (EAFA) is the international body representing companies engaged in the rolling and rewinding of alufoil and in the manufacture of aluminium closures, alufoil semi-rigid containers and of all kind of flexible packaging. Its more than 100 members include companies in Western, Central and Eastern Europe. The association's activities on behalf of its members include the compilation and sharing of statistical information, market research, and promoting aluminium foil and developing the interests of the industry with third parties. Sustainability issues are also high on the agenda for both aluminium foil and flexible packaging.

[www.alufoil.org](http://www.alufoil.org)

## EFM - Europäische Forschungsgemeinschaft Magnesium

e.V. / European Research Association for Magnesium

(EFM e.V.)

Stand: 7aF22

Die EFM ist eine Magnesium-Forschungsgemeinschaft, bestehend aus europäischen Firmen, gegründet im Jahre 1991 in Aalen, Baden-Württemberg. Die Mitgliedschaft ist offen für Magnesiumgießereien, Lieferanten von stranggepresstem Material, Maschinen- und Teilelieferanten, Ofenhersteller, Firmen der Oberflächenveredlung und Systemlieferanten. Unser Ziel ist die Förderung industrieller Magnesiumapplikationen durch die Unterstützung von Forschungs- und Entwicklungsvorhaben in Kooperation mit anderen Hochschulen und Instituten. Für einen verbesserten Erfahrungsaustausch findet neben der Errichtung von Arbeitskreisen u.a. ein jährliches Abnehmer- und Automotiveseminar statt.

The EFM is a Magnesium Research Association of European companies founded at Aalen University in the southern part of Germany in 1991. The membership is open for companies as magnesium foundries, suppliers of extruded material, machine and part suppliers, suppliers of furnaces, companies of surface finishing and systems suppliers. Our goal is to encourage an increased industrial use of magnesium applications via supporting research and development projects in cooperation with other Universities and Institutes. For an improved exchange of experiences among others our annual User- and Automotive Seminar as well as working groups have been established.

## FUNDIGEX

Stand: 6C60

FUNDIGEX, der spanische Verband für Gießereien und Gussausstattungshersteller, ist eine 1985 gegründete gemeinnützige Organisation, der Unternehmen aus der gesamten Wertschöpfungskette der spanischen Gießereiindustrie angehören. Unser Hauptziel ist die Verbesserung der Wettbewerbsfähigkeit unserer Unternehmen durch Zusammenarbeit, vor allem im Bereich der Internationalisierung, aber auch in vielen anderen Bereichen, die für den Sektor von Interesse sind. FUNDIGEX ist anerkannt und arbeitet eng mit offiziellen regionalen und nationalen Stellen sowie internationalen Institutionen zusammen, um den Mitgliedsunternehmen eine breite Palette von Dienstleistungen anbieten zu können.

FUNDIGEX, the Spanish Association for Foundries and Casting Equipment Manufacturers, is a nonprofit organisation founded in 1985, which comprises companies belonging to the entire value chain of the Spanish Foundry Industry. Our main objective is to improve the competitiveness of our companies through cooperation, mainly in the field of internationalisation, but also within many other areas of interest to the sector. FUNDIGEX is recognised by and works closely with official regional and national bodies as well as international institutions in order to provide a broad range of services to its member companies.

## GSB International

Stand: 7aA07

Die GSB International ist die weltweit erste Qualitätsorganisation für die Beschichtung von Bauteilen aus Aluminium. Die unabhängige Prüfung von Beschichtungsbetrieben, Beschichtungsmaterialien und Vorbehandlungssystemen nach den GSB-Qualitätsrichtlinien sichert eine hohe Qualität nach dem Stand der Technik und darüber hinaus. Die GSB ist damit ein verlässlicher Partner für Architekten, Metallbauer und Bauherren.

GSB International is the first quality association for the coating of aluminium building parts world-wide. The independent testing of coating plants, coating material and pre-treatment chemicals according to the GSB quality regulations guarantees highest quality as per the state of the art and even beyond. GSB is a reliable partner for building contractors, architects and metal construction companies.

## TALSAD

Stand: 4F02

Turkish Aluminium Industrialists Association (TALSAD), established on March 15, 1971, is one of the oldest industry associations in Turkey. TALSAD is celebrating its 50th year and since its establishment, it has developed its membership by reaching a large base of members and a wider national and international network through its membership of European Aluminium, and several memberships of leading national industry organizations.

TALSAD "Turkish Aluminum Industrialists Association" has been established in 1971 and, developing in a short time, has become the sole spokesman of the Turkish Aluminum Industry. Today, TALSAD has 91 members under its roof. Today it represents almost 75% of the Turkish aluminum sector's market due to the size of the member companies.

## wire & Tube 2024 Düsseldorf, Germany

Stand: 4H30

Die wire-Besucher waren primär Draht- und Kabelhersteller, kamen aus der Eisen-, Stahl- und NE-Metallindustrie oder aus der Fahrzeug- und Zulieferindustrie. Sie interessierten sich für Draht und Drahtprodukte, Maschinen und Anlagen zur Herstellung und Verarbeitung von Stangen, Draht und Band sowie für Prüftechnik, Sensorik und Qualitätssicherung für die Draht- und Kabelindustrie. Die Besucher aus der Rohrindustrie interessierten sich neben Rohren, Rohrprodukten und Zubehör für den Rohrhandel sowie für Maschinen und Anlagen zur Herstellung und Bearbeitung metallischer Rohre, für Werkzeuge und Hilfsmittel zur Herstellung und Verarbeitung von Rohren aus Metall und für Prüftechnik, Sensorik und Qualitätssicherung für die Rohrindustrie. 2024 finden wire und Tube wieder gemeinsam vom 15. bis 19. April auf dem Düsseldorfer Messegelände statt.

wire visitors were primarily wire and cable manufacturers and came from the iron, steel and non-ferrous metal industry or from the vehicle and upstream supplier industry. They were interested in wire and wire products, machinery and equipment for the production and processing of rods, wire and strip as well as test engineering, sensor technology and quality assurance for the wire and cable industry. In addition to tubes, tube products and accessories for the tube trade, visitors from the tube industry were interested in machinery and equipment for the production and processing of metallic tubes, in tools and auxiliaries for the production and processing of metal tubes and in testing technology, sensor technology and quality assurance for the tube industry. 2024 will see wire and Tube held concurrently again from 15 to 19 April at Düsseldorf Exhibition Centre.

**WGM - Wirtschaftsverband Großhandel  
Metallhalbzeug e.V.**

**Stand: 3E20**

Der Wirtschaftsverband Großhandel Metallhalbzeug e.V. (WGM) ist der Fachverband für deutsche und europäische Händler und Weiterverarbeiter von Nichteisen (NE)-Metallhalbzeugen. Fördernde Mitglieder des WGM sind nationale und internationale Halbzeug-Produzenten. Die Dienstleistungen des WGM lassen sich in fünf Geschäftsfelder gliedern: Der WGM informiert und berät, ist Geschäftsnetzwerk, bietet auf die Branche zugeschnittene Produkte im Rahmen der beruflichen Weiterbildung an, entwickelt und realisiert Branchenprojekte und vertritt die Interessen seiner Mitglieder in der Öffentlichkeit.

The Wirtschaftsverband Großhandel Metallhalbzeug e.V. (WGM) is the trade association for German and European traders and processors of non-ferrous (NF) semi-finished metal products. Sponsoring members of the WGM are national and international producers of semi-finished products. The services of the WGM can be divided into five business areas: The WGM informs and advises, is a business network, offers products tailored to the industry as part of continuing professional development, develops and implements industry projects and represents the interests of its members in public.

## Audio Guided Tours

Die Vielzahl der Aussteller der ALUMINIUM 2022 wird gewaltig. Sich auf der Weltleitmesse zurechtzufinden, kann aber herausfordernd sein. Gut, dass es die Audio Guided Tours (geführter interaktiver Hallenplan) gibt.

Die neuesten Entwicklungen im Automotive-Bereich? Neue Möglichkeiten, Fassaden zu konstruieren? Spannende Inputs im Sinne der Circular Economy? Die ALUMINIUM 2022 wird all das bieten – und noch viel mehr.

Veranstalter RX bietet daher ein besonderes Service für Besucher. Sie können einen erweiterten Tourenplaner auf ihr Handy laden, der sie über verschiedene Selektionsmöglichkeiten gezielt zu den für sie passenden Ausstellern leitet.

Diese „Guided Tours“ haben wir nun zu „Audio Guided Tours“ erweitert. Die Aussteller haben die Möglichkeit, weitere Informationsquellen wie Bilder, Videos, pdf-Dokumente oder Audiofiles in das System einzupflegen. Die Besucher erhalten damit neben Standnummern und kurzen Unternehmens-Informationen bereits vorab ein klares Bild davon, mit wem sie gleich in Kontakt treten werden.

Und damit steht einem erfolgreichen, stringent geplanten Messebesuch nichts mehr im Wege.

The sheer number of exhibitors at ALUMINIUM 2022 will be daunting. But finding your way around the world's leading trade fair can be challenging. Good thing there are the Audio Guided Tours (guided interactive hall plan).

The latest developments in the automotive sector? New ways to design facades? Exciting inputs in the spirit of the circular economy? ALUMINIUM 2022 will offer all that – and much more.

Organizer RX is therefore offering a special service for visitors. They can download an extended tour planner onto their cell phones, which will guide them specifically to the exhibitors that suit them via various selection options.

We have now expanded these „Guided Tours“ to „Audio Guided Tours“. Exhibitors have the option of adding further sources of information such as images, videos, pdf documents or audio files to the system. In addition to stand numbers and brief company information, this gives visitors a clear picture in advance of who they are about to come into contact with.

And so nothing stands in the way of a successful, stringently planned trade show visit.

# ZC 3060 5 Axis Aluminium Machine Center

## General Features

- It provides safe and continuous (pendular) working opportunity.
- In case of power failure, the spindle is automatically recovered from the profile by means of a program.
- Thanks to the UPS, the machine computer is protected and the interrupted program can be restarted from where it left off.
- The absence of any material that can be damaged in the areas where sawdust and chips fall ensures a long life.
- In the standard model, there is a chip conveyor, 10 clamps and magazine with 16 tool holders. The number of clamps can be increased optionally.
- 3 pieces of Milling Set and  $\varnothing 500$  mm Saw are supplied with the machine as standard.
- Long-lasting moving parts with automatic lubrication system.
- Robust Mechanical Design suitable for high speeds and accelerations.
- Machine management providing high performance.
- Mitsubishi control unit, internal HDD, optical communication, high speed and precision, 0.001 mm command increment and ETHERNET.
- Automatic tool length measuring system is available.

## Product and Service

1. Provide an integrated service from alloy design, billet casting, extrusion, drawing to other post-processing services.
2. Extensive experience in designing & producing aluminum alloys, provide comprehensive products and solution to fulfill customer' s demand.
3. Provide customized alloy design service and equip 2 tons R&D VDC casting line to support testing demand.
4. With the premium quality and proficient ability in production, our aluminum alloy products are widely applied in Aerospace, Auto, Consumer electronics, and Sports/Leisure industry.

## Quality Assurance

1. Implement MES system for production traceability and quality control
2. ISO17025 Certificated Lab provides properties analysis on various material characterization.
3. Acquire IATF 16949, AS9100 certification, and NADCAP standards recognized in the Auto and Aerospace industry.

## Environmental Sustainability

1. Reduce carbon emissions in overall production by using low-carbon primary ingot and renewable energy.
2. 100% recycle rate allowable with UL-ECVP 2809 certificated and implement in products with high appearance requirement.
3. To achieve environmental sustainability, Hodaka develop new process to utilize different series of recycled scrap for minimizing the use of primary ingot in our products.

## Innovation Plaza Sustainability & Recycling

### Hall 6, Stand 6A05

Die industrielle Produktion setzt immer mehr auf Nachhaltigkeit und Umweltfreundlichkeit. Auf der Sonderfläche Sustainability & Recycling wird gezeigt, wie Ressourcen geschont und effizienter eingesetzt und wiederverwertet werden. Zudem richtet sich das Plaza auch an Zulieferer und Akteure der Aluminium-Recyclingindustrie, wie z. B. Schrotthändler, Hersteller von Sortieranlagen, Zerkleinerungsanlagen, Brikettieranlagen Umschmelzanlagen oder Anbieter von Sekundäraluminium.

Industrial production is increasingly focusing on sustainability and environmental friendliness. The special Sustainability & Recycling Pavilion will show how resources are conserved and used and recycled more efficiently. In addition, the plaza is also aimed at suppliers and players in the aluminium recycling industry, such as scrap dealers, manufacturers of sorting plants, shredding plants, briquetting plants remelting plants or suppliers of secondary aluminium.

**WORLD MARKET LEADER IN MEASURING SYSTEMS**

**Measuring Systems  
for Aluminium  
Hot & Cold  
Rolling Mills**

- ✓ Non-contact measuring systems for measurement and detection of thickness, thickness profile, width, coating weight, sheet geometry, pinholes, flatness, surface inspection, strip- / web-tension and more
- ✓ Highest availability and reproducibility of all measuring results for optimal control of the production process
- ✓ 100% automation enables effective increase in output with simultaneous reduction of the reject rate

IMS measuring systems have been a guarantee for highest product quality in the production and processing of steel, aluminium and non-ferrous metals since 1980. Exactly reproducible measurements and evaluations in real-time optimise your production lines. The product quality of the end products is significantly increased while simultaneously reducing production costs and reject rates.

**Brands we represent:** 3River Metal Group | | ELREC | I.C.I | Pannon Metal | alphametall group

**Why visit our stand:** Wir präsentieren Projekte der E-Mobilität, Konzepte zur Nachhaltigkeit und Energieeffizienz sowie den Einsatz von Künstlicher Intelligenz (KI) in der Aluminium-Bearbeitung.

We develop innovative and sustainable aluminium products for the markets of the future. We also support companies at every step of the value chain throughout the aluminium processing industry. Our experts identify the right raw and primary materials, research suitable production facilities at home and abroad, and complete the semi-finished products in intelligent machining centres to form system components that are ready for installation. We can draw on around 50 years of experience in aluminium for this purpose.

**8Sigma** 5M42-04

Hrgovici 61  
Zagreb 10000, Croatia  
Tel.: +38517988701  
E-Mail: info@8sigma.eu  
Web: www.8sigma.eu

**Brands we represent:** 8Sigma

8Sigma is a software company that develops Manufacturing Execution System (MES) that brings Industry 4.0 and Internet of Things to production industries. 8Sigma can meet specific requirements of any client by providing consulting services in a manufacturing process improvement, custom development of MES solutions, engineering services as well as support for 3rd party MES. 8Sigma is helping companies to improve their production and product quality. 8Sigma is ISO 9001 and ISO/IEC 27001 certified.

**Aalberts Surface Technologies GmbH** 7AA06

Boelckestraße 25-57  
50171 Kerpen, Germany

E-Mail: info@aalberts-st.com  
Web: www.aalberts-st.com

**Brands we represent:** HART-COAT® | DURNI-COAT® | SELGA-COAT® | LASOX-COAT® | KEPLA-COAT® | SILA-COAT®

**Why visit our stand:** The coating makes the difference! We help your technical components made of aluminum become more resistant and durable with our functional coatings.

Aalberts surface technologies is your specialist for surface and heat treatments to improve material properties. We refine over one billion components per year for all key industries! Whether machine components in the production cycle of industrial manufacturing or technical components in the new model of an automotive company: the demands on the properties of many material surfaces are high. But not all materials are suitable from the outset to meet these high demands. We put the finishing touches to your aluminum products.

Pantervej 7  
7700 Thisted, Denmark  
Tel.: +45 97 92 47 11  
E-Mail: [info@aluminium.dk](mailto:info@aluminium.dk)  
Web: [www.aluminium.dk/home-eng](http://www.aluminium.dk/home-eng)

**Brands we represent:** Rehab | Flightindustri |  
Transportation | Electronics | Automation and Green Energy  
**Why visit our stand:** Visit us to have an informal talk about  
your projects with one of our competent sales engineers. We  
have many different manufacturing processes, and often find  
solutions that are new to the customer.

We produce everything from simple to complex aluminum  
products. With a wide range of in-house skills, as welding  
TIG & MIG, CNC machining, sheet metal working, punching,  
CNC tube bending & rolling, which mean we can process  
nearly any conceivable product in aluminum. We also  
have "ab Complete". It's the manufacturing of components,  
surface-treatment, procurement and installation of external  
components and packing in customer-designed packaging.  
We also offer advice during the initial phase, so you get the  
optimum solution for your requirements and standards.

Oberhausener Straße 33  
40472 Ratingen, Germany  
Web: [new.abb.com/products/measurement-products/de](http://new.abb.com/products/measurement-products/de)

**Why visit our stand:** Sie sind herzlich eingeladen, sich über  
das ABB Leistungsspektrum an zuverlässigen und innovativen  
Produkten, Lösungen und Serviceangeboten auf unserem  
Messestand in Halle 5, Stand 5C06 zu informieren

Wir präsentieren unser aktuelles Programm an Produkten  
und Lösungen, wie beispielsweise: Automatisierung und  
Elektrifizierung von Walzwerken und Bandanlagen; Millmate  
Banddickenmessung mit neuem Messkopf für Center-  
Messung; Millmate Bandzugmessung und Stressometer  
Planheitsmess-Systeme mit neuer digitaler Signalübertragung

ACAM Aachen Center for  
Additive Manufacturing

5M42-19

**AACHEN CENTER  
FOR ADDITIVE  
MANUFACTURING**

Campus-Boulevard 30  
52074 Aachen, Germany  
Tel.: +49 241 9426 1020  
E-Mail: [request@acam-aachen.de](mailto:request@acam-aachen.de)  
Web: [acam.rwth-campus.com](http://acam.rwth-campus.com)

**Why visit our stand:** ACAM Aachen Center for Additive Manufacturing pools resources and facilitates industry's access to the Additive Manufacturing expertise of leading scientific and research institutions.

ACAM, based on the RWTH Aachen Campus, is the one-stop-shop for Additive Manufacturing, covering the entire process chain, from design stage through to quality control and focuses on topics such as process chain automation, the development of customized materials, increasing productivity and reducing turnaround times. Additionally, ACAM offers opportunities for joint research and development, a sophisticated training and education program, as well as an online platform enabling industry members to build business connections and exchange practical knowledge.

A. CESANA S.r.l.

**Why visit our stand:** WERKSKOMPETENZ FÜR IHR BUSINESS

Hohe Qualität – günstige Kosten: Das dokumentiert die Philosophie der alpha metall GmbH seit über 25 Jahren wohl am besten. Dabei ist das Unternehmen mit eigenen Werken sowie exklusiven Lieferpartnern gleichzeitig Hersteller, Bearbeiter von Aluminium-Halbzeugen, Entwickler von Aluminium-Fertigprodukten und Servicepartner. Das spart Zeit und Geld, denn alles aus einer Hand garantiert kurze Reaktionszeiten, niedrige Kosten und termingerechte Lieferungen.

## ALPROF SA

1A60

IC Brătianu, nr. 6,  
Lumina 907175, Romania

**Why visit our stand:** Aluminium extrusion company based in Romania. Aluminium profiles production, CNC machining, IATF 16949 certified

We extrude aluminium profiles and manufacture components for many industries, including automotive, building and construction, heavy industry, HVAC. We take pride in being a leading aluminum extrusion manufacturer, offering our customers aluminum extrusion design support, aluminum fabrication, machining and tooling, as well as parts assembly, packaging and fulfillment solutions.

**Why visit our stand:** Looking for aluminium with critical surface quality and high formability? We offer over 75-years of aluminium industry experience – ask us first!

Aluminium Duffel is a European leader in the manufacture and sale of aluminium rolled products for diverse industries worldwide. Our operations use state-of-the-art technology, including the widest automotive cold rolling mill in Europe as well as a CALP-line (Continuous Annealing Line with Pre-Treatment). With the current production capacity of 200,000 tonnes of aluminium per year, we supply products for applications ranging from architectural facade sheet materials to automotive body sheet.

ALUMINIUM Global Stand

5M14

E-Mail: [aluminium.info@rxglobal.com](mailto:aluminium.info@rxglobal.com)  
Web: [www.aluminium-exhibition.com/global](http://www.aluminium-exhibition.com/global)

The ALUMINIUM Global Network stands for all RX international events that are part of the global portfolio of the ALUMINIUM world's leading trade fair.

In the world's most important aluminium markets, the ALUMINIUM Global Network presents innovations and solutions from the aluminium industry and its main application industries such as automotive, mechanical engineering, building and construction, aerospace, electronics, packaging and transport.

Aluminium International Today

5M42-10,

7A03 Media Lounge

## ALUMINIUM INTERNATIONAL TODAY

Quartz House, 20 Clarendon Road  
Redhill, Surrey RH 1 1QX, United Kingdom  
Tel.: +44 (0)1737 855000  
E-Mail: [aluminium@quartzltd.com](mailto:aluminium@quartzltd.com)  
Web: [www.aluminiumtoday.com](http://www.aluminiumtoday.com)

**Why visit our stand:** Make sure to visit the Aluminium International Today booth to receive the latest copy of the magazine and meet with the team!

Aluminium International Today (AIT) is the leading bi-monthly English language journal dedicated to all sectors and regions of the international aluminium manufacturing and processing industry. With over 30 years' experience, AIT is committed to delivering up-to date global news, events, and statistics, as well as more detailed technical articles, company and country profiles, conference reports and regular regional economic briefings. AIT has changed dramatically since its formation and publishes news regularly on its website: [www.aluminiumtoday.com](http://www.aluminiumtoday.com) as well as a free weekly newsletter.

ALUMINIUM KURIER 5L02, 7A03 Media Lounge

Kirchplatz 8  
82538 Geretsried, Germany

E-Mail: info@pse-redaktion.de  
Web: www.alu-news.de

**Brands we represent:** ALUMINIUM KURIER | alu-news.de | metall-markt.net | MEINMetall

**Why visit our stand:** We are here for you! As a trade publication for aluminium applications, we are your partner for public relations. Talk to us about innovations, reports and the latest company news.

The trade journal ALUMINIUM KURIER is the source of information for industrial and craft companies in German-speaking countries and the Benelux countries. We report on semi-finished products and nine developments. Further topics are: Technologies, machines and tools for the processing of aluminium, casting, heat treatment, cutting, joining, stamping, bending, surface treatment. A monthly newsletter and the alu-news.de platform always provide you with the latest information from the aluminium industry - all completely free of charge.

Aluminium Stewardship Initiative (ASI) Partner

PO Box 4061, Balwyn East  
Melbourne Vic 3103, Australia  
E-Mail: info@aluminium-stewardship.org  
Web: www.aluminium-stewardship.org

The Aluminium Stewardship Initiative (ASI) is a global non-profit standard setting and certification organisation. We bring together producers, users and stakeholders in the aluminium value chain with a commitment to maximise the contribution of aluminium to a sustainable society. Working together, we aim to collaboratively foster responsible production, sourcing and stewardship of aluminium.

- Partner of ALUMINIUM 2022 / No booth -

ALUMINIUM Welcome Desk 7.0A01

E-Mail: aluminium.info@rxglobal.com  
Web: www.aluminium-exhibition.com

In the Welcome Area of ALUMINIUM 2022, history and future of the ALUMINIUM trade fair come together. At one of the first points of contact at the fair, visitors have the opportunity to plan their visit to the fair, ask questions or simply linger.

Alu Québec 6A49

# AMAG

## AUSTRIA METALL

Postfach 3  
5282 RANSHOFEN, Austria

**Why visit our stand:** You want to know more about our new AMAG AL4@ever product line with guaranteed low CO<sub>2</sub> footprint? Come and visit us on our booth in E69 in Hall 3

AMAG Austria Metall AG is a supplier of primary aluminum and premium cast and rolled aluminum products. At our integrated site in Ranshofen, Austria we fully leverage our core competencies in recycling, casting, rolling, heat-treatment, and surface finishing. With a 75-80 % share of scrap in the raw material mix we set the industry benchmark regarding recycling. Thanks to our investment in the hydro-electric powered Canadian smelter Alouette, we are also at the forefront when it comes to the sustainable production of primary aluminum.

## AMARI METALS LTD

#### Brands we represent: Astaş

**Why visit our stand:** Wir freuen uns Sie auf der Messe zu sehen und marktgerechte Angebote zu machen. In unserer Firma produzieren wir alle aus einer Hand. Werkzeugbau, Eloxieren, Pulverbeschichtung, mechanische Bearbeitung

Seit 1974 produzieren wir hochwertige Alu- Profile mit Oberflächenbehandlungen wie eloxieren und beschichten zu denen auch mechanische Bearbeitungen gemacht werden. Astas Aluminium ist einer der führenden Unternehmen in der Aluminium Branche und erweitert sich weiter im Export. Unsere jährliche Kapazität derzeit mit 3 Pressen (6,7 und 8 inch) bei 24.000 Tonnen. In unseren Unternehmen werden die Werkzeuge auch selbst gebaut und wir sind mit Qualitätszertifikate ausgestaetet. Zu unserem Sortiment gehören auch Holzdekor und auch thermisch getrennte Profile zu produzieren.

**Brands we represent:** Supratherm | Athermalu

**Why visit our stand:** Atherm, original manufacturer of high efficiency Immersion Heaters, proposes the most efficient and economical solution for non ferrous liquid metal heating.

Atherm, original manufacturer Immersion Heaters, proposes the most efficient solution for non ferrous liquid metal heating. Our heaters are used in many light metal industries: Aluminium, Zinc (including galvanization), Magnesium are the preferred environments for our heaters. After more than 20 years of existence, our proven technology is suitable for:

- High pressure die casting
- Gravity die casting
- Low pressure die casting
- Degassing & filtration unit
- Transport ladle re-heating
- Hot dip galvanizers

**Brands we represent:** ATM ATILIM TEKNİK MAKİNA

**Why visit our stand:** Visitors can find the machine producer and experience for all recycling plant machines as furnaces, shredders, billet production plants, ingot production plants, briquetting press in ATM stand.

ATM Atılım Teknik Makine was built in 1999. ATM designs and manufactures the machines in 20.000 m<sup>2</sup> closed area in Türkiye. ATM is specialized about casting machinery and recycling machinery.

- Recycling machines and plants (rotary furnaces, melting&holding furnaces, shaft type, double chamber and side well furnaces, filtration systems, turnkey billet production plants, turnkey ingot production plants, ingot stacking-strapping-marking plants, shredders, briquetting press etc.)
- Casting machines (greensand and resin sand)

ATM exported its machines to 28 countries and continue to exportation.

## ATS ATES MAKINE VE METAL SAN. TIC. LTD 4A55

Beylikdüzü Osb, Mustafa Kurdoğlu Cad No 30  
Istanbul 34520, Turkey

**Brands we represent:** ATS Aluminium

**Why visit our stand:** Over 40 years long experience about 1000 series aluminium disc and plate manufacturing, leads ATS to be proud of having the best match for your raw material need.

ATS, besides manufacturing discs, slugs and plates, offers you spun, drawn and impact extruded products

## August Mössner GmbH + Co. KG 5C37

Hohenstaufenstr 3

E-Mail: [vertrieb@moessner-kg.de](mailto:vertrieb@moessner-kg.de)  
Web: [www.moessner-kg.de](http://www.moessner-kg.de)

**Why visit our stand:** Entdecken Sie die Sägetechnologie und Automatisierung von MÖSSNER. Im Bereich der Aluminiumtechnik bieten wir präzise Säge- und Fräsanlagen für die Primär- und Sekundäraluminiumproduktion.

Mössner entwickelt und baut Sonderlösungen in den Bereichen des Maschinenbaus, der Automatisierungstechnik und der Robotik. Mit unseren 140 Mitarbeitern sind wir in der Lage auch größere Projekte abzuwickeln – ohne die nötige Flexibilität für Sonderlösungen zu verlieren. An unserem Standort in Eschach entwickeln, fertigen und montieren wir Ihre Anlage und nehmen diese für Sie weltweit in Betrieb.

## Austin AI Europe

6F09

Helsinki u. 128.  
Budapest 1238, Hungary  
Tel.: +36 309 545 146  
E-Mail: [info@austina-eu.com](mailto:info@austina-eu.com)  
Web: [www.austina-eu.com](http://www.austina-eu.com)

**Brands we represent:** Austin AI

**Why visit our stand:** Austin AI offers the most advanced LIBS-based sensor sorters for alloy-specific sorting of Aluminium scrap. We represent the future of aluminium recycling!

With the utmost importance of the use of specific recycled Aluminium and other special alloys, an increasing need prevailed for very precise, high-speed, high-capacity automated sorting systems. Austin AI's expertise on applied spectroscopy in automation technologies ensured a unique opportunity to develop their new model, the worldwide patented LIBS spectroscopy-based sensor sorter for light scrap fractions. In 2020 Austin AI opened the European Office in Budapest responsible for the EMEA regions - beyond sales and service obligations, it also acts as a LIBS demo and test center.

**Why visit our stand:** 1972-2022. Celebrate the fifty years of Compes with us! Half a century of reliability, professionalism, quality and passion; values to meet the demands of our customers.

## DIES FOR ALUMINIUM EXTRUSION.

CO.M.P.E.S. S.p.A. is considered reliable and indispensable partner by the most important groups of extruders in the world in the manufacture of dies for aluminium. It is thanks to the experience in the field of aluminium extrusion that Compes products have an excellent reputation in the world market. The constant search for quality, punctual and efficient service, assistance and advice, innovation in technology are elements that the company has made over the years, cornerstones of its business.

## Constellium

3A49

Washington Plaza 40-44, rue Washington  
75008 PARIS, France  
Web: [www.constellium.com](http://www.constellium.com)

**Why visit our stand:** Together we care, together we grow. Discover Constellium's innovative aluminum solutions that help to create a lighter, safer and more sustainable future for us all.

Constellium is a global leader in the development and manufacturing of high value-added aluminium products and solutions. We design and manufacture advanced alloys and engineered solutions for a broad scope of markets and applications, including automotive, aerospace and packaging. Through constant innovation, we go beyond the material to create with our customers endless possibilities. From beverage cans to pickup trucks, fuselages to space launchers, our R&D centers constantly explore the many ways to transform this material and help build a more sustainable future.

**CONTROLE MESURE SYSTEMES****4H34**

6 rue des Lochés  
71100 SEVREY, France  
Tel.: +33385941414  
E-Mail: [contactcms@cmseddyscan.com](mailto:contactcms@cmseddyscan.com)  
Web: [www.cmseddyscan.com](http://www.cmseddyscan.com)

**Why visit our stand:** During your visit at our stand we will show all our Eddy Current and Ultrasonic testing equipment as well as our latest developments and new products.

Controle Mesure Systemes, a leader in Non-destructive Testing for nearly 35 years, designs and develops a full range of high performance equipment including instruments, ET and UT rotating heads, ET probes and UT transducers, as well as a full range of accessories. Thanks to its extensive knowledge in both mechanical and electrical design, CMS is able to provide customized turnkey systems, and handles all the stages of a project: from the design & conception to the manufacturing and on-site installation. CMS is collaborating with the Aerospace, Automotive, Nuclear or Metal Industry.

Web: www.danieli.com

**Brands we represent:** Innoval Technology | Danieli Fata Hunter | Danieli Fröhling | Danieli Breda | Danieli Olivotto Ferrè | Danieli Corus | Danieli Centro Recycling | Danieli Automation | Danieli Environment

**Why visit our stand:** Discover the latest technology innovations developed by Danieli Team to produce quality Aluminium flat and long products in the most competitive, sustainable way.

Danieli designs, manufactures and installs metal producing plants and equipment worldwide, either on a turnkey basis or supplied as individual units, with company-owned technologies and process know-how.

Danieli plants are run by Danieli Automation process control, power and instrumentation systems.

Sustainable production is guaranteed by energy-saving processes and Danieli Environment ecological solutions.

D-Cube 1D09

Steliou Kazantzidi 47, Thermi I Building, Office D2  
55535 Pylaia, Thessaloniki, Greece  
Tel.: +302310471010  
E-Mail: info@d-cube.eu  
Web: www.d-cube.eu

**Why visit our stand:** Meet the only solution in the world that guarantees early scrap identification, prevents unnecessary downstream processing & can be applied to aluminum industries with maximum production efficiency.

D-cube specializes in cutting-edge Quality Assurance solutions for aluminium industries, using computer vision, machine learning, artificial intelligence and big data analytics. Our team combines research, strong scientific background with customer-centric design to deploy disruptive machine vision solutions to industries that are willing to transform.

Decomecc 3A60

Bilzerweg 8  
3600 Genk, Belgium  
Tel.: +491718183692  
E-Mail: franz.stimmel@decomecc.de  
Web: www.decomecc.be

**Why visit our stand:** Decomecc has been a reliable partner in aluminium, steel and stainless steel processing for over 25 years. Our experts advise you on choosing the best available technique to achieve the best result.

Our processes covers decoiling & cutting into rectangle, trapezoid, bow-cut and any shape blanks. Furthermore we have slitting, sawing, CNC-milling and laser-blanking lines. All metal processing takes place in our high-tech ISO 9001 certified production facility in Genk. Decomecc commits to deliver optimal quality based on your needs, specifications and instructions. Our highly digitized processes empower us to manage our production, stock and logistics in the most efficient way. We guarantee continuity and fast, reliable delivery times for all our services.

DECORAL SYSTEM S.R.L.

7AA26

Viale del Lavoro 5  
37040 ARCOLE (VR), Italy  
Tel.: +39 045 7639111  
E-Mail: [info@decoral-system.com](mailto:info@decoral-system.com)  
Web: [www.decoral-system.com](http://www.decoral-system.com)

**Brands we represent:** Decoral System | Gi Color  
**Why visit our stand:** Machines, powder coatings, heat-transfer films, we do everything to enable our customers to create high-resolution wood grain, marble, brushed effects, custom logos, and other decorative finishes.

Decoral® System is the only company in the world that manufactures in-house all the materials required for metal decoration process. Our patented technology, based on the physical process of sublimation, consists of applying a layer of our coating powders Qualicoat approved and then transferring a pattern on the same surface from a film printed with sublimation inks. This way, we can create wood, marble, corten and other effects on aluminium profiles, sheets and 3D objects. There are countless application possibilities: doors & windows, facades, lighting systems, urban furniture and so on.

DEFORMAZIONE

 E-Mail: [estral@estral.it](mailto:estral@estral.it)  
 Web: [www.estral.it](http://www.estral.it)

**Why visit our stand:** Visit us because we are all human, we love smiling and meeting people to find a solution. Life is too short, face it smiling!

We produce aluminium extruded profiles on demand. Do you have a project? You can realise it with us. Estral, 48 years of experience, own foundry for eco-aluminium, 5 extrusion lines, machining dept. and painting line dept. We are your supplier, never your competitor. People who never laugh are not serious people!

## Etem Gestamp Aluminium Extrusions SA

3D68

Promishlena zona Iliyantsi, bul. „Iliyantsi“ 119A  
 Sofia 1220, Bulgaria  
 E-Mail: [office@etemgestamp.com](mailto:office@etemgestamp.com)  
 Web: [etemgestamp.com](http://etemgestamp.com)

**Why visit our stand:** We are a leader in aluminium extrusion. Meet our team on stand 3D68 to find out more about our manufacturing capacity and the countless application of aluminium that we provide.

ETEM GESTAMP, with more than 50 years of experience in aluminium extrusion, is one of the leading companies in Europe that can produce aluminum profiles that meet the highest standards of the automotive industry. Aluminum profiles are further fabricated and shipped internationally to the most renowned clients and OEMs in the automotive industry, including BMW, Audi, Daimler, Porsche, VW, and others. From customized extrusions to entirely fabricated components, our team can support you with designing, extrusion, and manufacturing your solutions and needs.

 Web: www.fabal.com.tr/firma

**Why visit our stand:** Under same roof, we have billet cating, extrusion lines, die production, anodizing, powder coating and profile fabrication machining departments.

Fabal Aluminum is a family-owned company and founders are in the aluminum sector since 1974. Fabal is one of the leading aluminum extruder with its modern factories which are situated on 94.000 m2 of land, offering a covered production area of 27,000 m2 with high-tech equipment. We serve our customers with high quality standard because of our experienced staff and technological plant.

**Favi S.A**
**6A61**

14 rue Louis Deneux  
80490 Hallencourt, France  
Tel.: +33 (0)322282050  
E-Mail: favi@favi.com  
Web: www.favi.com

**Why visit our stand:** You are looking for Aluminium solutions, come and meet us, it will be a pleasure for us to exchange with you.

FAVI, provider of technical solutions, is a french foundry specialized in aluminium, brass and copper pressure die casting. Well-known to produce high quality components for e-mobility and powertrain, shift forks for gearboxes, complete aluminium sub-assemblies, technical parts in aluminium for various sectors such as agriculture or luxury goods. Thanks to our high insutrial know-how, we are able to develop new alloys and complete technical assembled solutions to satisfy your needs. FAVI brings on the market a reliable and industrial solution.

**Feal Deutschland GmbH**
**1C13**

Kemptener Str. 99  
88131 Lindau, Germany

**Why visit our stand:** FEAL is in the market more than 40 years and has a long tradition in the processing of aluminium.

We are specialized in designing aluminium systems and the further processing of aluminium. Bearing in mind the dynamic and demanding market that is constantly changing, we answered with the modern equipment of the plant for aluminum extrusion, electrostatic powder coating and anodizing, as well as machinery for the processing of aluminium profiles. The products that we market are various types of aluminium structures used in construction and industry.

**FERRAM, a.s.**
**4G08**

Drahobejlova 2931/13

**Brands we represent:** FOM GROUP | FST | COMALL | PROFTEQ | GRAF

Fom Industrie, founded in 1972, is a leader in the cutting and machining of extruded aluminium. The company offers a range of high technology machine tools that is one of the broadest on the market. The range varies from automatic cutting and machining lines, to 3-4-5 axis work centres, single and double head sawing machines and traditional machines.

Fonderia Torri Srl

6A66

Via Fontanini 21  
25027 Quinzano Dòglio (BS), Italy  
Tel.: +39 0309923044  
E-Mail: [marketing@torrifonderie.com](mailto:marketing@torrifonderie.com)  
Web: [www.torrifonderie.com](http://www.torrifonderie.com)

Torri Fonderie has been operating for over 40 years in the field of die casting and mechanical processing. Representing a single, competent contact for the entire industrial production process. We offer complete management of the production cycle: mould design and construction, casting, machining and finish, warehouse management and delivery of the product to the customer in a short time period.

Fontes Refractories

6A44

33 Route de Castres  
31250 Revel, France  
Tel.: +33562713232  
E-Mail: [info@fontes-refractories.com](mailto:info@fontes-refractories.com)  
Web: [www.fontes-refractories.com](http://www.fontes-refractories.com)

**Why visit our stand:** Fontes Refractories manufactures shaped and unshaped refractory products for primary aluminium, chemical industry and housing with clays extracted from its own quarry.

With a production capacity of 20,000 tonnes per year, FONTES REFRACTORIES is offering products of an exceptional quality.

The company is capable of dealing with large-scale projects for the construction of new plants, as well as regular and ad hoc maintenance of refractory lining in existing facilities.

The company's production line is specially optimised for the manufacture of large volumes such as bricks for electrolytic cells. With its own quarry Fontes Refractories controls the entire process without intermediaries.

E-Mail: [service@forgialluminio.it](mailto:service@forgialluminio.it)  
Web: [www.forgialluminio.it/?lang=en](http://www.forgialluminio.it/?lang=en)

**Why visit our stand:** Since 1963 we are specialized in the production of light Aluminum alloys forgings, particularly of high resistance. Our long experience allows us to meet High Quality standards required by our customers

Our mechanical presses allow us to produce components up to 50 Kg each and with shapes whose limit is within Ø 600mm or a 1200mm length. The HQ standard is the result of a refined working procedure due to many years of experience along with the first-rate metal and structural properties of raw materials and with the controls carried out during manufacturing. The production cycles are completed by heat-treatments in case of ageing alloys, performed in a computer-controlled equipment, and by surface finishes through different processes according to the various needs and fields of application.

**Forging Group Monale SRL**
**5H12**

Str. Castellero, 18/20  
14013 Monale, Italy  
Tel.: +3934011192

**Why visit our stand:** FOUNDRY ECOCER is a highly regarded major company in Italy, involved in the production and marketing of products and consumables to non-ferrous aluminium foundries worldwide.

FOUNDRY ECOCER consumables for the treatment of molten aluminum and casting processes:

- Granulated Fluxes
- Flux injection machines
- Degassing machines
- Master Alloying tablets
- Ceramics (Launderers, hot tops, spouts, etc.)
- Filter Boxes
- Lubricants for extrusion
- Lubricants and parting agents

All of them for various processes such as:

- Billet casting
- Continuous casting
- Cu and brass casting
- Gravity die-casting (GDC)
- Low pressure die-casting (LPDC)

**Why visit our stand:** We will present you new solutions in the field of lightweight, smart functions, special aluminium treatment, etching and anodizing.

We are a manufacturer of high quality aluminum products, specializing in the manufacture of technical and decorative components.

**GAP Engineering SA 6C65**

Route de Chippis 71  
3966 Chalais, Switzerland  
Tel.: +41274555714  
E-Mail: info@gap-engineering.ch  
Web: www.gap-engineering.ch

**Why visit our stand:** Come and discover our services and skills in the field of automation, lot, energy management and mechanics for aluminum casting plants

Vertical continuous casting is undeniably a potential high risk operation – both for the equipment used and particularly for operators. The safety of operators is to be prioritized and keeping operators away from sources of danger is the first measure that should be implemented. Keeping operators away from the casting machine requires the machine with highly precise sensors, reactive actuators and start-up tools that enable the process to be managed without the involvement of operators as part of an automated system, thereby paving the way to „hands-free“ casting.

**GARANT-Filter GmbH 5C38**

Europastraße 2/1  
77933 Lahr, Germany

**Brands we represent:** Grenzebach

**Why visit our stand:** Friction stir welding – the new dimension in welding. Boost your production to the next level! Grenzebach is your lifecycle partner for friction stir welding.

Friction Stir Welding (FSW) technology stands for durable, solid, media and pressure-tight welding joints between workpieces. Friction Stir Welding does without melting, which means no pores or hot-cracking. This innovative joining technology shows its strength especially when joining subcomponents of aluminum and aluminum combinations, such as casting and sheet metal material. High-quality welding joints with an outstanding surface finish are being produced. Extensive rework, such as deburring of welded seams, is eliminated.

**Brands we represent:** Hazelett

**Why visit our stand:** Learn about the most sustainable, fully-integrated melting, casting, & rolling lines for continuous cast aluminum strip/sheet offered by HAZELETT, together with other EBNER GROUP Members and MINO SpA.

HAZELETT, a member of the EBNER Group, is a global leader in the design and manufacture of continuous casting machines for the aluminum industry. The HAZELETT® Twin-Belt Casting Machine offers the world's lowest cost process route for rolled aluminum strip and sheet along with smallest carbon footprint. With a capability of producing strip up to two meters wide at rates of up to 50 tonnes/hour, HAZELETT casting machines are used to produce high-quality sheet for demanding applications, including packaging, transportation, and building construction.

**Why visit our stand:** Wir geben Ihrem Profil die richtige Form.

Das Biegen von einfachen bis sehr komplexen Profilen aus Aluminium, Stahl, Edelstahl, Messing, Titan usw. gehört zu unseren absoluten Stärken. Unser Know-how ist in den Bereichen Schienenfahrzeugbau, Automobilindustrie, Flugzeugbau, Fördertechnik, sowie in verschiedenen anderen Industrie- und Technologiebereichen gefragt. In Ergänzung zum Biegen bieten wir auch Walzen, Schweißen und die mechanische Bearbeitung gebogener Teile an. Diverse Zertifikate geben Ihnen die Sicherheit, dass wir für Sie die richtigen Partner sind. Von der Prototypenherstellung bis zu Großserien sind wir bestens gerüstet.

**Why visit our stand:** YOTO is one of the Top 5 Aluminium producer in China, which runs two Aluminium mills. Annual output is more than 720,000mt. Production Management has been qualified by ISO14001: 2015 & ISO9001: 2015.

YOTO Aluminium was established in Gongyi city in 2006. It occupies an area of nearly 200,000 square meters and has more than 1500 employees. Produced aluminum products cover 1 ~8 series aluminum alloy, mainly including Aluminium sheet, Coil, Circle, Tread plate, Strip, Foil and Pre-painted coil, etc. Products are qualified by SGS, ROHS, MSDS. Since the establishment of the company, we have set up the subsidiaries in Zhengzhou and Shanghai city, mainly engaged in international business. Products are exported to America, Canada, Europe, Middle East, Africa and Southeast Asian countries.

Company Heneken was founded in 2007 as a trading company. Through all these years we walked on an exciting path of growth and became a supplier of non-ferrous metals and overhead conductors. We started with trading of aluminium and aluminium alloys. Continuous development and synergy effects within industry created opportunities to trade also other commodities like silicon, magnesium, Mg alloys, lead, Pb alloys, zinc, Zn alloys and non-ferrous scrap. Last but not least, we supply high quality aluminium-based master alloys, which we produce using modern technology and processes.

E-Mail: info@kurtz.de  
Web: www.kurtzrsa.de

**Why visit our stand:** Technologies from Kurtz Ersa offer comprehensive solutions for lightweight construction and e-mobility. They optimise the production of chassis parts and ensure a sustainable future in the long term.

In the field of low pressure casting Kurtz provides machines which are operated with permanent molds and machines for sand-, plaster- or ceramic molds – so called „lost molds“. Low pressure casting is one of the most efficient processes for manufacturing chassis parts in series production. For small batch sizes, special materials and complex geometries, additive manufacturing plays to its strength. Its tool-free production is the fastest way from the idea to the production of the metal part. Without any limits in design, the part can be printed according to your individual requirements.

**Why visit our stand:** MOR Aluminum is an aluminum extrusion plant based in Ankara, Turkey. MOR will meet your aluminum profiles requirements as a expert supplier.

In addition to standard profiles, MOR Aluminum supplies several customers in various areas; shop exhibition construction, building and construction industry, architectural needs, solar energy and household appliances, office furniture/furniture industry and individual designs. It is important that to build long-term, reliable and solution oriented for bussiness partnerships. Considering this goal, MOR Aluminum serves it's customers with experienced and quality-conscious employees of top priority.  
Material Aluminum alloys; (1050 / 1070 / 6005 / 6060 / 6063 / 6082)

**Morgan Molten Metal Systems GmbH 6E60**

**Why visit our stand:** ACE are advanced ceramic technology products for efficient degassing + improved melt quality. Our products can create an edge through consistent performance, substantial value + reliability.

One of the major concerns in aluminium casting industry is aluminium alloy cleanliness. With the increasing demands for improved casting properties, the requirements for molten metal cleanliness have become extremely stringent. The removal of dissolved hydrogen & unwanted particles from the melt using rotary degassing has become a widely used practice. Morgan has developed 1&2 piece SIC rotor & shaft for use in this process. Morgan rotary degassing rotor has a high resistance in service & has excellent anti oxidation properties providing a cost effective consumable for use in degassing processes

**Brands we represent:** Nitrex | Nitrex Vacuum | United Process Controls | Nitrex Heat Treating Services

**Why visit our stand:** Nitrex turnkey systems effectively improve die wear resistance to withstand thermal and mechanical stresses, resulting in maximum die life, throughput, and product quality.

NITREX is a provider of fully integrated surface treatment solutions and technologies. Founded in 1984 (Montreal, Canada) operates three business units – Nitrex Turnkey Systems (NTS) a leader of turnkey nitriding, nitrocarburizing, and vacuum heat treat systems; Heat Treating Services (HTS) a worldwide network of commercial heat-treating service centers; and UPC, a leading provider of controls upgrade and automation solutions for surface treatment and combustion. NITREX serves its customers globally from 16 locations and sells in over 60 countries through a network of representatives.

# nokra

Max-Planck-Straße 12  
 52499 Baesweiler, Germany  
 Tel.: +49 (0)2401-6077-0  
 E-Mail: info@nokra.de  
 Web: www.nokra.de

**Brands we represent:** alpha.ti Dickenmessung | alpha.fi Ebenheit/Kontur | alpha.glass Windschutzscheiben | alpha.hot3D Schmiedeteilvermessung

**Why visit our stand:** At the nokra system exhibited, we will show you why the laser sensors measure so reliably and precisely that you can use the results to comply with selected DIN standards.

nokra manufactures laser-optical measuring systems for the inspection of geometric sizes. With the help of laser sensors, parameters such as flatness, straightness, profile, thickness and width are measured contactless in the production flow. Areas of application are the flatness measurement of sheets and plates, the thickness measurement of strip materials, the curvature of windshields and 3D measurement of hot forged parts. Manufacturing processes can be controlled and audited, and products can be qualified with the MSA capable measuring equipment.

**Brands we represent:** Mayer

**Why visit our stand:** State-of-the-art design, heavy, solid construction and high-precision components place Mayer® panel saws and pressure beam saws among the best worldwide. Mayer is part of the Felder Group since 2019.

Since 1950 the Otto Mayer Maschinenfabrik in Lombach has been producing panel-sizing and beam saws for the processing of panel materials made of wood, plastics, non-ferrous metals and base material. The family business is run by Hans and Kurt Mayer. The two well-established family businesses thus combine their know-how in the development, production, sales and servicing of pressure beam saws and manufacture quality machines for processing a wide range of materials and for use in trade, business and industry.

**Why visit our stand:** Fully automatic controls and radius measurement in focus.

With our innovative solution for fully automatic radius measurement, we are presenting a highlight at Aluminum 2022.

We, the Swiss PBT AG, develop and produce 3-roller profile bending machines and digital controls that meet the highest standards of quality and technical performance. In close cooperation with our customers, we design technical solutions for the efficient production of even complex bending tasks. Our technologies are used in practically all segments of the metalworking industry: automotive, aerospace, Window/ façade construction, lighting industry, conveyor technology and special areas.

**PBT Germany GmbH**
**5L03**

Industriestr. 17  
57076 Siegen, Germany

**Brands we represent:** INDUMASCH

**Why visit our stand:** With our innovative solution for fully automatic radius measurement, we are presenting a highlight at Aluminum 2022.

For 40 years we have been a provider of solutions for bending tasks that were previously impossible or difficult to solve. The technical objectives are: to reduce the limit of the minimum bending radius for three-roller bending machines; thereby increasing the flexibility of the user and realizing further rationalization potential with the bending technology.

**Why visit our stand:** QSIL Ingenieurkeramik stands for more than 30 years of experience and competence in the production of high-performance ceramic materials and composites.

Our specialty are silicon nitride and silicon carbide based ceramic materials. With modern equipment, components are made from these materials using various shaping and sintering technology, especially according to application-specific requirements of our customers and partners. The complete from the powder to the ready-to-install ceramic components is carried out in the Rauenstein and Sonneberg sites. From optimized or customized ceramic materials we produce prototypes, special components and small to medium series, as well as particularly large, complex and high-precision components.

**QUAKER HOUGHTON**
**5E46**

Industrieweg 7  
1422AH Uithoorn, The Netherlands  
Tel.: +31 (0) 297.544.600  
E-Mail: [marketingemea@quakerhoughton.com](mailto:marketingemea@quakerhoughton.com)  
Web: [home.quakerhoughton.com](http://home.quakerhoughton.com)

**Brands we represent:** Quaker Houghton

**Why visit our stand:** With R&D labs on three continents, Quaker Houghton continually refines our products, and creates new solutions, so that our aluminum customers can stay ahead in a changing world.

As the global leader in industrial process fluids, we continually improve and innovate so our customers can stay ahead in a changing world. If it's made of metal, if it's rolled, cut, drawn or cast, Quaker Houghton is there, optimizing processes, reducing costs, advancing safety and sustainability... and driving progress. We take on our customers' challenges as our own, bringing the right combination of science, engineering, and business savvy so they can meet the future fully confident that their operations will run even more efficiently, even more effectively... whatever comes next.

**Québec**
**6A49**

380, rue Saint-Antoine Ouest  
Montréal, Quebec G7X 8L6, Canada  
Tel.: +1 514-647-3846  
E-Mail: [charles.boisvert@invest-quebec.com](mailto:charles.boisvert@invest-quebec.com)  
Web: [www.investquebec.com/quebec/en](http://www.investquebec.com/quebec/en)

**Why visit our stand:** Québec is the aluminum hub of North America with 9 smelters producing 2.9 million tons of low-carbon aluminium yearly; world renowned equipment manufacturers; strong R&D centers and great processors.

Our role is to promote and encourage the growth and influence of Québec's aluminum ecosystem. Québec's aluminum industry enjoys international visibility, thanks to the presence of Alcoa, Rio Tinto and Alouette. Together, these world-class primary aluminum producers operate 9 smelters that are the foundation for a dynamic and prosperous aluminum industry ecosystem, which makes up the Québec Aluminum Cluster.

QuinLogic

5F46

Heider-Hof-Weg 23, 52080 Aachen  
52080 Aachen, Germany  
Tel.: +4924054799940  
E-Mail: [info@quinlogic.com](mailto:info@quinlogic.com)  
Web: [www.quinlogic.com](http://www.quinlogic.com)

**Why visit our stand:** Our booth is worth visiting, because we present a unique and integrated quality assurance solution - QES (R). Knowledge based decision software - from rules to AI.

SMS-QuinLogic provides an easy-to-use quality assurance software solution for steel & aluminum production facilities. The SMS-QuinLogic Software secures reliable quality of your product for the challenging markets, e.g. for automotive-, airplanes-, machinery-, defense industries. It also provides proactive support, to immediately address production problems and therefore minimize deficiencies in customer products. Its seamless communication interfaces to existing MES, ERP and gauging systems allows fully integrated systems in all existing but also new production lines. Welcome to our booth!

Rauschert Heinersdorf-Pressig GmbH

6A54

Bahnhofstrasse 1  
96332 Pressig, Germany

E-Mail: [info@prg.rauschert.de](mailto:info@prg.rauschert.de)  
Web: [www.rauschert.com](http://www.rauschert.com)

Rauschert is an independent family business. Thanks to its broad industry know-how, the continuous optimisation of its product, process and material range, the company has also established itself in innovative markets. Rauschert is also active in the fields of renewable energies, filtration technology, tool and special machine construction, automation technology and robotics. Rauschert's range of services extends from material development, tool construction, prototype production to series production and component assembly.

REAL ALLOY GERMANY GMBH

6F02

Aluminiumstr.3  
41515 Grevenbroich, Germany  
Tel.: +49 2181 1645 160  
E-Mail: [commercial@realalloy.eu](mailto:commercial@realalloy.eu)  
Web: [www.realalloy.com/eu](http://www.realalloy.com/eu)

REAL ALLOY is the global market leader in third-party aluminium recycling and specification alloy production. We convert aluminium and magnesium scrap, as well as by-products, into reusable metal for a growing number of applications across various industries. Our customers can choose from an extensive range of cast and wrought alloys, made from aluminium and magnesium scrap, delivered to their door in the form of molten metal, ingots, RSIs, or cones. Committed to real sustainability, we also close the loops of by-products such as salt slags.

90411 Nürnberg, Germany  
Tel.: +49 9115218-0  
E-Mail: carbon@riedhammer.de  
Web: www.riedhammer.de

**Brands we represent:** Sacmi

**Why visit our stand:** Visit our stand and contact us about complete solutions from renewing up to new turn-key solutions for baking anodes, electrodes, cathodes and fine grain carbon.

RIEDHAMMER (RH) is the leading technology supplier of industrial kilns and delivers innovative technologies for various industries. For the Carbon Industry, RH only offers complete solutions and its proven furnace technologies for baking anodes, cathodes, electrodes, and special carbon products. Today, Riedhammer gives you the perfect answer for rebuilding and modernization demands, up to turn-key plants based on the most advanced technology. We combine as best your needs with our experience.

RIFTEC GmbH

5H34

Mercatorstraße 65 b  
21502 Geesthacht, Germany  
Tel.: +494152136930  
E-Mail: info@riftec.de  
Web: www.riftec.de

**Why visit our stand:** RIFTEC is THE service provider for friction stir welding. Assemblies or just a single weld, prototypes or series. Save yourself the investment in systems and expertise - we take care of it for you!

RIFTEC has been your competent service provider for the friction stir welding of aluminium and other light metals since 2003. 20 years ago, we were the first to bring the process into industrial application. Today, we weld everything made of aluminium, including multi-material joints from aluminium and steel, copper or magnesium, with low distortion and certainly media-tight. Our customers receive custom-made components from us: From the raw material to aluminium welding to assembly and finishing. We supply our components throughout Europe - whether prototypes or series components.

**Brands we represent:** STAS

**Why visit our stand:** STAS is a world leader in the supply of various equipment to improve the productivity and quality of aluminium.

STAS Inc. is a Canadian based company specialized in the development, fabrication and commercialisation of process equipment for the global aluminium industry more than 30 years. Our head office is located in Chicoutimi, in the Saguenay Lac St-Jean region, one of the world capitals for aluminium production. The equipment offered by STAS is covering various segments of the aluminium industry:

- Metal treatment and casthouse technologies, Crucible shop, Electrolysis, Carbon and rodding shop, SEED rheocasting and Aluminium extruders and distributors.

**Why visit our stand:** Learn how our LEAN pretreatment chemicals can add value to your product by minimizing wastes and increasing productivity & robustness of your pretreatment line.

LEAN metal pretreatment & metal working chemicals, approved by QUALICOAT & GSB Int.  
Our LEAN metal pretreatment chemicals offer minimized wastes, such as:  
waste-water (0 bath discharge),  
energy (use of heaters/chillers),  
defects (0-corrosion & excellent wet adhesion performance),  
complexity (easy to use & automate).  
With 30 years experience on the pretreatment chemicals business we offer top quality products coupled with excellent technical support and state-of-the-art R&D capabilities.  
That is why some of Europe's largest extruders trust us for more than 10 years of Cr-free applications.

**Why visit our stand:** Based in Telford UK, Thermserve provides innovative solutions to both the casthouse and extrusion sectors.

All of Thermserve's products are engineered and manufactured in-house, ensuring total control of the entire process from sale to commissioning. Products include:

- Billet Heaters
- Die Ovens
- Dross Presses
- Ageing Ovens
- DC Casting Systems
- Melting Furnaces
- Drop Quench
- Hot & Cold Saw Systems
- Billet Sawing & Shears

**Thoni Alutec Sp z o.o. 6H52**

Przyszowska 1  
Stalowa Wola 37-450, Poland  
Tel.: +48 15 814 98 00  
E-Mail: post@thoni-alutec.pl  
Web: www.thoni-alutec.pl/en

**Why visit our stand:** Casting production at Thoni Alutec is divided into many highly specialised departments. Visit us at the stand, see what our foundry has to offer and learn more about our technical background.

At Thoni Alutec, our services cover not only sand casting, permanent mould casting, and low pressure die casting, but also further process such as: fettling, heat treatment, CNC machining, painting, assembly, packing and delivery. The moulding lines in the aluminium foundry cover the whole process, starting from sand preparation, and ending with knock-out. The technologically advanced moulding lines allow for both large casting production (unique in the world) and smaller castings with complex shapes used in aerospace or automotive.

**Brands we represent:** Siemens | Rockwell | Allen-Bradley | Schneider-Electric | Pilz | SEW

**Why visit our stand:** According to our guiding principle "We are only satisfied when our customer is satisfied too" we count on highest quality and user friendliness when realizing our projects.

For our clients we realize complex projects in the area of automation – starting with an idea and ending with a turn-key equipment. More than 40 years of experience, openness for innovative technologies as well as the enormous experience and personal responsibility of our personnel are basis for successfully realized projects – this gives security of investments to our clients. Whatever you are going to automatize – we accept the challenge and escort you into an exciting future.

Walter - Kompetenz in Aluminium 5M38

**Why visit our stand:** Möchten Sie gemeinsam mit den Fachleuten von Walter die optimale Werkzeug-Strategie ausgearbeitet haben? Das Team von Walter ist für Sie und Ihre spannenden Aluminium-Bearbeitungsaufgaben bereit.

Lösungen für Herausforderungen von morgen. Engineering Kompetenz ist ein Versprechen. In der modernen Zerspanung geht es um mehr als Drehen, Fräsen, Bohren und Gewinden. Perfektion und Präzision sind nur noch Grundvoraussetzung. Es geht um viel mehr. Um Ziele, die jetzt noch als unerreichbar gelten. Und um Lösungen, die heute noch unvorstellbar sind – aber morgen schon zum neuen Maßstab werden. Wenn Sie Lösungen für die Herausforderungen von morgen suchen, finden Sie Walter. Darauf haben Sie unser ganz eigenes Wort: Engineering Kompetenz.

WEFA Inotec GmbH 6E41

**Why visit our stand:** Our pioneer spirit and precision lead to your success. You will find us at the booth of our cooperation partner extrutech GmbH.

For 50 years WEFA has been manufacturing high performance, durable and nearly maintenance-free extruding dies for its customers. Thanks to an exceptional level of innovation, we continue to set new standards in the industry, such as with our revolutionary patented CVD-coated dies (CED®). This allows WEFA to deliver uniquely efficient solutions both to leading aluminium companies as well as innovative mid-sized extrusion plants. Around 300 employees at five locations worldwide are committed to customer satisfaction on a daily basis.

So what makes us different? We believe that wavelength matters. Why does wavelength matter? Because thoughtful wavelength selection can dramatically reduce or even eliminate errors due to optical obstructions, emissivity variation, background reflections, and misalignment. With thousands of successful installations all over the world, we have developed a wealth of information on how Williamson Infrared Pyrometers can improve productivity and quality in just about any application.

## ALUGLOBALBRO S.R.L.

1E60

VIA FLERO 46, CENTRO DIREZIONALE „TRE TORRI“  
25125 BRESCIA, Italy  
Tel.: +39 3453575430  
E-Mail: office@aluglobalbro.com  
Web: www.aluglobalbro.com

**Brands we represent:** JINDAL ALUMINIUM LTD | ELITE EXTRUSION LLC | RIGA BASE METAL

**Why visit our stand:** After 15 years of experience in the extrusion sector and 6 years in the Flat Rolled sector, we offer our customers the possibility of sourcing semi-finished products from new sources.

We are a company operating in the field of semi-finished aluminium products for many years.

With the recent strategic moves by the European Community against Chinese extruders and rolling mills, together with our customers we are evaluating and creating new horizons to meet their own demands.

## DURALINE ALUMINIUM

3A25

Köseler Mahallesi, 37. Cadde No:12  
Dilovası 41455, Turkey  
Tel.: +90 (262) 751 2070  
E-Mail: info@duralinealu.com  
Web: www.duralinealu.com

**Brands we represent:** ALPS CO. B.V | DURADIŞ TİCARET | DURAPLASTİK

**Why visit our stand:** High quality extrusion company. If you're looking for sustainable, guaranteed and risk-free profiles. You are at the right place.

Our journey started in 1993 with PVC accessories. As time went by, we expanded our product range and started with the aluminum profile production. In 2021, we built our 21.000 m<sup>2</sup> factory located in Gebze/Turkey. It has been 12 years since we are in the sector of aluminum and have exported to many countries in the world like Germany, The Netherlands, Belgium, Serbia, Hungary, Algeria, Israel and The US. We create custom profiles that are only designed for you with European quality.

## ergolines Lab s.r.l.

6C49

Padriciano 99, c/o Area Science Park, Building R3  
34149 Trieste, Italy  
Tel.: +39 0403755419  
E-Mail: infosteel@ergolines.it  
Web: www.ergolines.it

Ergolines is a market leader in stirring technology, providing customized EMSs for steel and non-ferrous alloys industries. Our customer-oriented approach enables extreme design flexibility and personalized engineering in order to guarantee maximum efficiency and satisfy specific requirements, thus making ergolines a real strategic partner. Our worldwide references in the supply, installation and commissioning of EMS systems for continuous casters, arc furnaces and melting/alloying furnaces witness the quality of our efforts to optimize production process and increase products quality.

## Exal s.r.o.

4B43

Hadovská cesta 5  
Komárno 945 01, Slovakia

## HENAN MINGTAI AL INDUSTRIAL CO., LTD

5L39

No 11, Changchun Road  
Zhengzhou 450001, China

**MKK AC**
**6F24**

**MKK**  
 www.mkk.ac

Lensegata 12  
 Mosjøen 8656, Norway  
 Tel.: +47 75113090  
 E-Mail: post@mkk.ac  
 Web: www.mkk.ac

**Brands we represent:** MKK A/C systems | MKK Cooling systems | MKK Air Cleaning systems | MKK HVAC

**Why visit our stand:** Efficient and trouble-free AC solution regardless of the challenges

MKK designs, develops and supplies customized HVAC units for the global market. With over 20 years experience, we specialize in temperature control in demanding working conditions. Our product range is comprehensive and our flexibility and approach allow us to meet most customer needs.

**Stolfig Group Leichtmetall GmbH**
**7AF28-07**

Neunkirchener Straße 12  
 07952 Pausa, Germany

**Why visit our stand:** WIR LEBEN LEICHTBAU !!!

In Stahl, Aluminium und unserer Spezialität, Magnesium realisieren wir Ihre Ideen. Wir bieten Ihnen maßgeschneiderte Lösungen von der ersten Idee bis zur Serienproduktion.

**LEICHTBAU LEICHT GEMACHT !!!**

Wir realisieren in einer Woche schon Ihr Guss- sowie Blech-Prototypenteil aus Aluminium oder Magnesium.

Bezahlbarer Leichtbau ist unsere Berufung, den Kosten und der Umwelt zu Liebe. Mit der Erfahrung und der Flexibilität unserer Mitarbeiter optimieren wir Ihre Bauteile bis zur Serienreife.

Aluminium dominiert den Leichtbau und kann auf unterschiedlichste Anwendungsbereiche angepasst werden.

**MAGNESIUM IST UNSERE SPEZIALITÄT**

Magnesiumbauteile sind 30 % leichter bzw. steifer als vergleichbare Bauteile aus Aluminium.

**Yıldız Metal San. Tic. Ltd.Sti**
**5K45**

Akse mahallesi 534 sokak Numara:5  
 ÇAYIROVA, Turkey  
 Tel.: +90 5416265282  
 E-Mail: bekir@yildizmetal.com  
 Web: www.yildizmetal.com

**Why visit our stand:** We are working to make all processes of aluminum billet production traceable.

We produce aluminum billet materials in 5', 6', 7', 8', 9' and 10' sizes and AA6060, AA6063, AA6082, AA5083 many quality alloys.

We call it trade fair.  
Our exhibitors say:
