

iFlex Single RackEnd Barrier

Designed to protect the end of racking aisles where turning vehicles and equipment can impact vulnerable racking structures.

This RackEnd barrier provides heavy duty protection to shield racking systems from high impact accidents and prevent damage.

The circular end posts provide enhanced protection at the barrier ends which are most susceptible to impact. Innovative spinning collars further deflect and dissipate impact forces.

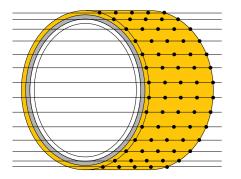

MEMAPLEX

Ultimate strength polymer

created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled strength and flexibility.

Advanced Engineering Molecular

reorientation during manufacturing creates a unique built-in memory that enables the barrier to fully recover following impacts.

Energy Absorption System

A patented 3-phase system that activates sequentially for unparalleled energy absorption.

Memaplex[™] rail flexes to absorb impact, initiating the rail pin to slide forward and transfer load energy to the compression pocket.

Compression of the pocket continues to disperse energy as the coupling rotates around the post pin to activate further absorption.

3 At peak energy, the coupling twists further, engaging the post pin and instigating torsion of the post to dispel remaining forces.

Compression Pocket

Unrivalled recovery through a unique built-in memory that allows the barrier to flex, cushion and reform repeatedly upon impact, saving vast amounts in barrier and vehicle repairs.

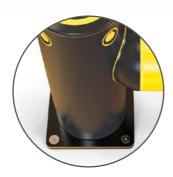

Huge return on investment from incident prevention and downtime avoidance as barriers, vehicles, floors and equipment do not need replacing or repair.

Features and benefits

Rotating wear collars deflect force from repeat glancing blows preventing expensive on-going maintenance costs.

Self coloured and UV stabilised for continued visibility and long lasting aesthetics with no repainting.

Zinc nickel, electrophoretic coating on base plates as standard, provides advanced protection against corrosion damage.

Exclusive modularity allows rails and posts to be replaced in-situ without removing adjacent barrier sections.

Hygiene seals remove ingress points.

Ergonomic design with no sharp edges.

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

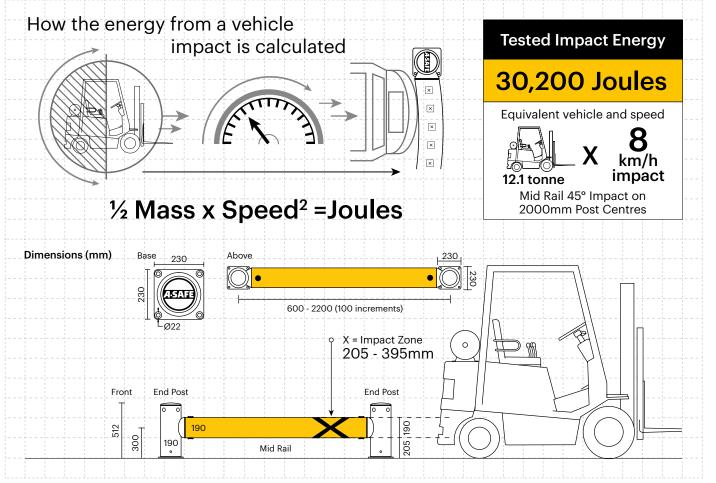

Environmentally friendly and 100% recyclable.

No floor damage 80% of impact force is absorbed, transferring just 20% to the floor.

Material Properties	MEMAPLEX		
Temperature Range	-10°C to 50°C		
Ignition Temperature	370°C to 390°C		
Flash Point	350°C to 370°C		
Toxicity	Not Hazardous		
Chemical Resistance	Excellent - ISO/TR 10358		
Weathering Stability (Grey Scale)	5/5*		
Light Stability (Blue Wool Scale)	7/8**		
Static Rating (Surface Resistivity)	1015 - 1016 Ω		
Hygiene Seals	Yes		

* Weathering scale 1 is very poor and 5 is excellent ** Light stability scale 1 is very poor and 8 is excellent
