GENERAL INFORMATION

Requirements

This Base Prospectus contains as of the date hereof all such information as investors and their professional advisers would reasonably require, and reasonably expect to find, for the purpose of making an informed assessment of the assets and liabilities, financial position, profits and losses, and prospects of the Issuers and the Guarantor and of the rights attached to the relevant Notes.

Responsibility of the Dealers

The Dealers have not independently verified the information contained herein. Accordingly, no representation, warranty or undertaking, whether expressed or implied, is made, and no responsibility is accepted, by the Dealers (in their capacity as Dealers) with respect to the accuracy or completeness of this Base Prospectus or any further information supplied in connection with the Programme. The Dealers accept no liability in relation to this Base Prospectus or its distribution or with regard to other information supplied by the Issuers or the Guarantor herein, save for mandatory provisions of law.

In addition, in the ordinary course of their business activities, certain Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or Issuer's affiliates. Certain of the Dealers or their affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Exclusiveness

Neither the Issuers nor the Guarantor have authorised the making or provision of any representation or information regarding the Issuers, the Guarantor or the Notes other than as contained or incorporated by reference in this Base Prospectus, or any final terms the form of which is described in Part F.IV of this Base Prospectus (for each tranche of Notes, the "**Final Terms**", which document may also include information relating to the relevant tranche of Notes (each a "**Tranche**") other than the relevant Terms and Conditions (as defined below)) or as approved for such purpose by the Issuers. Any such representation or information should not be relied upon as having been authorised by any Issuer or Dealer or the Guarantor.

Significance of Delivery

Neither the delivery of this Base Prospectus and any Final Terms nor the offering, sale or delivery of any Note shall in any circumstances create any implication that there has been no adverse change in the financial situation of any Issuer or the Guarantor since the date hereof.

The delivery of this Base Prospectus or any Final Terms or the offering, sale or delivery of any Note does not at any time imply that the information contained herein concerning the Issuers and the Guarantor is correct at any time subsequent to the date thereof or that any other written information delivered in connection therewith is correct as at any time subsequent to the date indicated in the document containing the same.

Restriction on Distribution

The distribution of this Base Prospectus and any Final Terms and the offering, sale and delivery of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Prospectus comes are required by the Issuers, the Guarantor and the Dealers to inform themselves about and to observe any such restrictions. For a description of certain restrictions on offers, sales and deliveries of Notes and on distribution of this Base Prospectus and other offering material relating to the Notes please refer to the Selling Restrictions set out in Part G of this Base Prospectus. In particular, the Notes

and the Guarantee have not been, and will not be, registered under the Securities Act and may include Notes in bearer form which are subject to U.S. tax law requirements. Subject to certain exceptions, the Notes and the Guarantee may not be offered, sold or delivered within the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act).

Exclusion

This Base Prospectus on its own does not constitute an offer or an invitation to subscribe for or purchase any Notes and should not be considered as a recommendation by any Issuer, the Guarantor or any Dealer that any recipient of this Base Prospectus should subscribe for or purchase any Notes. Each recipient shall be taken to have made its own investigation and appraisal of the financial condition and affairs as well as of the creditworthiness of any Issuer and of the Guarantor. This Base Prospectus may not be used for the purpose of an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation. This Base Prospectus is not intended to provide the basis of any credit or other evaluation.

Stabilisation Manager

In connection with the issue of any Tranche of Notes, the Dealer or Dealers (if any) named as the stabilisation manager(s) (or persons acting on behalf of a stabilisation manager) in the applicable Final Terms may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche or Notes and 60 days after the date of the allotment of the relevant Tranche of Notes.

Any such stabilisation action or over-allotment must be conducted by the relevant stabilisation manager (or person(s) acting on behalf of any stabilisation manager(s)) in accordance with all applicable laws and rules (including rules and other regulatory requirements governing any stock exchange where such Notes are listed).

Benchmarks Regulation

Interest amounts payable under floating rate Notes may be calculated by reference to (i) Euro Interbank Offered Rate (the "**EURIBOR**"), which is currently provided by the European Money Markets Institute ("**EMMI**"), or (ii) the Constant Maturity Swap ("**CMS**"), which is currently provided by ICE Benchmark Administration ("**IBA**"), or (iii) the Sterling Overnight Index Average ("**SONIA**"), which is currently provided by the Bank of England, or (iv) the Secured Overnight Financing Rate ("**SOFR**"), which is currently provided by the Federal Reserve Bank of New York, or (v) the Euro-Short Term Rate ("**€STR**"), which is published by the European Central Bank since 2 October 2019. As at the date of this Base Prospectus, SONIA, SOFR and €STR do not fall within the scope of Regulation (EU) 2016/1011 (the "**Benchmarks Regulation**"). As at the date of this Base Prospectus, EMMI does appear on the register of administrators and benchmarks (the "**Benchmark Register**") established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmarks Regulation, while IBA, the Bank of England, the Federal Reserve Bank of New York and the European Central Bank do not appear on the Benchmarks Register.

Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the relevant Notes and the information contained or incorporated by reference into this Base Prospectus or any supplement hereto;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including where the currency for principal or interest payments is different from the potential investor's currency;

- (iv) understand thoroughly the terms of the relevant Notes and be familiar with the behaviour of financial markets;
- (v) be aware that it may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Notes are transferred or other jurisdictions;
- (vi) ask for its own tax adviser's advice on its individual taxation with respect to the acquisition, sale and redemption of the Notes; and
- (vii) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

EEA Retail Investors

If the Final Terms in respect of any Notes include a legend entitled "*Prohibition of Sales to EEA Retail Investors*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive 2016/97/EU (as amended or superseded, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended or superseded, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

MIFID II Product Governance / Target Market

The Final Terms in respect of any Notes may include a legend entitled "*MiFID II Product Governance*" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate in each case as of the date of the relevant Final Terms. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

UK Retail Investors

If the Final Terms in respect of any Notes include a legend entitled "*Prohibition of sales to UK Retail Investors*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (8) of Article 2(1) of Commission Delegated Regulation (EU) 2017/565 (as amended) as it forms part of English law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); or (ii) a customer within the meaning of the Financial Services and Markets Act 2000, as amended ("**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97 (as amended), where that customer would not qualify as a professional client as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 (as amended) as it forms part of English law by virtue of the EUWA; or (iii) not a qualified investor as defined in point (e) of Article 2 of Regulation (EU) 2017/1129 (as amended) as it forms part of English law by virtue of the EUWA (the "**UK Prospectus Regulation**"). Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended) as it forms part of English law by virtue of EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor or in the UK may be unlawful under the UK PRIIPs Regulation.

UK MiFIR Product Governance / Target Market

The Final Terms in respect of any Notes may include a legend entitled "**UK MiFIR Product Governance**" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**UK distributor**") should take into consideration the target market assessment; however, a UK distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

GENERAL DESCRIPTION OF THE PROGRAMME

General

Notes will be issued in Tranches, one or more of which shall comprise a series ("**Series**").

Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer(s) (as defined below) and as indicated in the applicable Final Terms save that the minimum denomination of the Notes will be, if in euro, EUR 1,000, and, if in any currency other than euro, an amount in such other currency nearly equivalent to EUR 1,000 at the time of the issue of Notes. Subject to any applicable legal or regulatory restrictions, and requirements of relevant central banks, Notes may be issued in euro or any other currency. The Notes are issued in bearer form under German law.

In addition to the above paragraph, Notes issued by BMW US Capital with a maturity at issuance of 183 days or less will have a minimum denomination of USD 500,000 or its equivalent in other specified foreign currencies at the date of issue.

Under the Prospectus Regulation, prospectuses relating to notes having a maturity at issue of less than 12 months are not subject to the approval provisions.

The Notes are direct, unconditional, unsubordinated and unsecured obligations of the respective Issuer and rank equally with all its other unsecured and unsubordinated obligations.

Notes issued by BMW Finance N.V., BMW US Capital, LLC, BMW International Investment B.V. and BMW Japan Finance Corp. will have the benefit of a guarantee (the "**Guarantee**") given by BMW AG (the "**Guarantor**"). The Guarantee constitutes an irrevocable, unsecured and unsubordinated obligation of the Guarantor ranking equally with all other unsecured and unsubordinated obligations of the Guarantor (other than statutorily preferred indebtedness).

Notes may be issued with such maturities as may be agreed between the Issuer and the relevant Dealer(s), subject to a minimum maturity of 30 days, as indicated in the applicable Final Terms (except in any case, such other minimum or maximum maturity as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the Issuer or the relevant Specified Currency (as defined in the Terms and Conditions of the Notes)).

Notes may be issued at an issue price, which is at par or at a discount to, or premium over, par, as stated in the relevant Final Terms. The issue price for Notes to be issued will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the Dealers during the offer period. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine an issue price, all to correspond to the yield.

The yield for Notes with fixed interest rates will be calculated by the use of the ICMA method, which determines the effective interest rate of notes taking into account accrued interest on a daily basis.

Notes may be offered to qualified investors and/or retail investors as further specified in the relevant Final Terms.

A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. Ratings are based on current information furnished to the rating agencies by BMW AG and information obtained by the rating agencies from other sources. Because ratings may be changed, superseded or withdrawn as a result of changes in, or unavailability of, such information, a prospective purchaser should verify the current long-term and short-term ratings of BMW AG before purchasing the Notes.

Based on the provisions of Regulation (EC) No. 1060/2009 on rating agencies, as amended (the *Credit Rating Agencies Regulation* or "**CRA Regulation**"), certain institutions as further determined pursuant to Article 4 (1) of the CRA Regulation which are established in the European Union (the "**Regulated Institutions**") are subject to certain restrictions with regard to the use of ratings for regulatory purposes. Pursuant to Article 4 (1) of the Rating Regulation, Regulated Institutions may use credit ratings for regulatory purposes only if such credit ratings are issued by credit rating agencies established in the European Union and registered in accordance with the CRA Regulation (or for which the relevant registration procedure is still pending). If the relevant Issuer and/or the Guarantor and/or the Notes are rated, the relevant Final Terms, as set out within the item "Rating", will state whether the relevant rating agencies are established in the European Union or have relevant subsidiaries which are established in the European Union or not and whether they have been registered in accordance with the Rating Regulation.

The current version of the list of credit rating agencies registered in accordance with the CRA Regulation may be retrieved from the website of the European Commission at: <https://www.esma.europa.eu/supervision/credit-rating-agencies/risk>.

In accordance with Article 18 (3) of the Rating Regulation, such list is updated within 30 days, as soon as the registering competent authority of a home member state has informed the Commission of any amendment as regards the registered credit rating agencies.

Rating of BMW AG

BMW AG has been assigned a long-term rating of A2¹ by Moody's Deutschland GmbH ("**Moody's**")².

BMW AG has also been assigned a long-term rating of A³ by S & P Global Ratings Europe Limited (Niederlassung Deutschland) ("**Standard & Poor's**")⁴.

¹ Moody's defines "A2" as follows: "Obligations rated A are judged to be upper-medium grade and are subject to low credit risk. The modifier 2 indicates that the obligation ranks in the mid-range of its generic rating category."

² Moody's is established in the European Community and is registered under Regulation (EC) No. 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, amended by Regulation (EC) No. 513/2011 of the European Parliament and of the Council of 11 March 2011 (the "**CRA Regulation**"). Moody's appends long-term obligation ratings at the following levels: Aaa, Aa, A, Baa, Ba, B, Caa, Ca and C. To each generic rating category from Aa to Caa Moody's assigns the numerical modifiers "1", "2" and "3". The modifier "1" indicates that the rated company is in the higher end of its letter-rating category, the modifier "2" indicates a mid-range ranking and the modifier "3" indicates that the rated company is in the lower end of its letter-rating category. Moody's also has the option of adding further guidance (referred to as "under review") as to whether a rating is likely to be upgraded (possible upgrade), downgraded (possible downgrade) or uncertain (direction uncertain). Moody's short-term ratings are opinions of the ability of issuers to honor short-term financial obligations and range from P-1, P-2, P-3 down to NP (Not Prime).

³ Standard & Poor's defines "A" as follows: "An obligor rated A has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories."

⁴ Standard & Poor's is established in the European Community and is registered under Regulation (EC) No. 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, amended by Regulation (EC) No. 513/2011 of the European Parliament and of the Council of 11 March 2011 (the "**CRA Regulation**"). Standard & Poor's assigns long-term credit ratings on a scale from AAA to D. The ratings from AA to CCC may be modified by the addition of a "+" or "-" to show the relative standing within the major rating categories. Standard & Poor's may also offer guidance (termed a "credit watch") as to whether a rating is likely to be upgraded (positive), downgraded (negative) or uncertain (neutral). Standard & Poor's assigns short-term credit ratings for specific issues on a scale from A-1, A-2, A-3, B, C down to D. Within the A-1 category the rating can be designated with a "+".

RISK FACTORS

The following description of risk factors and their occurrence within a risk category, with the most material risk factor presented first in each category, should be understood as a description of residual risks, i.e. of the remaining risks following all counter measures taken in order to avoid such risks or limit their adverse effect. Although the most material risk factors have been presented first within each category, the order in which the remaining risk factors are presented is not necessarily an indication of the likelihood of the risks actually materialising, of the potential significance of the risks or of the scope of any potential negative impact to the Issuers' business, financial condition, results of operations and prospects. The Issuers may face a number of these risks described below simultaneously and some risks described below may be interdependent. While the risk factors below have been divided into categories, some risk factors could belong in more than one category and prospective investors should carefully consider all of the risk factors set out in this section.

The risk factors regarding the Issuers and the Guarantor are presented in the following categories depending on their nature:

- 1) Macroeconomic Risks relating to BMW AG and BMW Group
- 2) Competitive Risks relating to BMW AG and BMW Group
- 3) Operational Risks relating to BMW AG and BMW Group
- 4) Financial Risks relating to BMW AG and BMW Group
- 5) Legal and regulatory risks relating to BMW AG and BMW Group
- 6) Risks relating to the Issuers

Macroeconomic Risks relating to BMW AG and BMW Group

Macroeconomic, geopolitical or other events could adversely affect the automotive industry and BMW Group

BMW Group manufactures and sells its premium and luxury automobiles and motorcycles worldwide. As one of the largest industrial companies in Germany, BMW Group is deeply rooted in Germany and across Europe. In addition, BMW Group manufactures and sells a significant number of automobiles and motorcycles in the Americas and Asia, particularly in China. As a result, BMW Group's business and operating results are materially affected by global macroeconomic and financial market conditions, and could be adversely impacted by economic or financial crises, a global or regional economic slowdown or recession, or a decrease in consumer demand for BMW Group's products.

BMW Group is also vulnerable to the negative impact of other events outside BMW Group's control. Political instability, increased nationalist and protectionist behavior of governments, terrorist activities, military conflict, natural disasters, extreme weather events, power outages, telecommunications failures and pandemics, among other things, could have a material adverse impact on the global economy, international capital markets and the BMW Group's business, net assets, financial condition and results of operations. For example, in recent years, the uncertainty in connection with the United Kingdom's withdrawal from the European Union (*Brexit*), trade tensions between the United States and China, and the outbreak of the COVID-19 pandemic had, and continue to have, a direct and material impact on the global economy and thereby on BMW Group and its business and results of operations. More recently, the Russian invasion of Ukraine has significantly increased risks and uncertainties in the global economy and especially Eastern Europe, with far-reaching and potentially long-term adverse consequences for BMW Group's ability to procure supplies from, manufacture or market vehicles in, or otherwise do business in and with Russia and Ukraine, and regional and global economic and political conditions more generally. In addition, sanctions imposed by the EU, the United States and/or other countries on Russia as well as Russian banks, companies and individuals have adversely affected and will continue to adversely affect BMW Group's business. As a result, on 1 March 2022, BMW Group announced the

discontinuation of its local production in Russia and halted all exports of vehicles to Russia until further notice. The war in Ukraine also has a significant impact on Ukraine's automotive supply industry as a result of which BMW Group, for example, had to stop production temporarily at its Dingolfing plant. The war in Ukraine, combined with the ongoing bottleneck for semiconductors, is expected to lead to further production adjustments and downtimes at BMW Group's European plants. In addition, as a result of many international companies exiting the Russian market, the Russian government has threatened to penalize businesses leaving Russia by nationalising assets of foreign-owned companies. While the legislation that would put these plans into action has already been drafted, it is currently unclear when and if this new law will come into effect and how it will impact BMW Group's business. A continuation of the war in Ukraine or any further escalations could lead to additional sanctions and corresponding countermeasures. A gas embargo, for example, could well affect the energy supplies to manufacturing sites of the BMW Group and its suppliers, resulting in potential production interruptions.

Due to increasing interconnectedness of global economic and financial systems, any significant event in one area of the world can have an immediate and devastating impact on markets around the world, thereby adversely affecting BMW Group globally.

BMW Group maintains operations in various markets which could be affected by volatile economic or political environments and is pursuing growth opportunities in a number of newly developed and emerging markets. These investments may expose the BMW Group to heightened risks of economic, geopolitical, or other events, including governmental expropriation (nationalization) of its manufacturing facilities, local sales subsidiaries or intellectual property, restrictive currency exchange or import controls.

BMW Group is subject to the macroeconomic risk caused by supply bottlenecks, particularly for semiconductors. BMW Group believes that such bottlenecks could persist throughout 2022, with the resulting shortage of upstream products and end products causing the otherwise strong recovery of the global economy to slow down (see also "*BMW Group is dependent on its suppliers*").

In recent years, China has also been an increasingly important market for the BMW Group and a significant amount of BMW Group's manufacturing is located in China. The transition of the Chinese economy from an investment-driven market to a consumer-driven market is expected to result in slower growth rates and greater instability in financial markets. In addition, the economic consequences of the COVID-19 pandemic and the recent trade conflict with the United States are likely to continue to have an adverse impact on the Chinese economy in 2022 and potentially beyond. If the Chinese economy were to grow at a significantly slower pace than expected, or even to contract, this could lead to a decline in automobile sales growth rates or unit sales.

BMW Group is also adversely affected by rising inflation in several countries, including the European Union and the United States. Should inflation rates continue to rise and/or remain at increased levels, this would have a material adverse impact on demand in the relevant economies due to rising prices. In addition, the expected interest rate increases by central banks could also have an adverse impact on demand. Decreased demand for BMW Group's vehicles could have a material adverse effect on BMW Group's business and results of operations (see also "*Significant changes in prices of raw materials and commodities could lead to increased costs in producing and distributing BMW Group vehicles*").

The COVID-19 pandemic could continue to adversely impact BMW Group's business and results of operations

The COVID-19 pandemic continues to impact the global economy and many countries, including China, the member states of the European Union and the United States, have on several occasions reacted by re-instituting quarantines and restrictions on travel. The scale and duration of the COVID-19 pandemic has significantly adversely impacted global financial and commodity markets and regional and global economies, including BMW Group's most significant markets and the locations of its principal operations, including Germany, the United Kingdom, the United States, China and Asia as a whole. The effects of the COVID-19 pandemic have had, and may continue to have, a material adverse effect on BMW Group's business and results of operations.

Measures taken by governments to control the spread of the pandemic have contributed to, and may continue to contribute to, a material downturn of the global economy and financial markets, including in markets in which BMW Group operates, disrupting global supply chains, significantly impacting levels of consumer demand and spending as well as a number of industries, including the automobile industry. Although restrictions have been relaxed in several countries, they may be re-imposed, sometimes at short

notice, if either immunisation is insufficient or if new strains of COVID-19 emerge or other diseases develop into new epidemics or pandemics. For example, the rapid spread of a new variant of COVID-19 known as “Omicron” in December 2021 led to new restrictions in many countries and thereby increased economic uncertainty.

Significant uncertainties remain as to how long the COVID-19 pandemic will last. To the extent that the COVID-19 pandemic adversely affects BMW Group’s business, net assets, financial condition and results of operations, it may also have the effect of heightening or exacerbating many of the other risks described in this “Risk Factors” section.

Changes in consumer preferences, lifestyle and individual mobility could adversely affect the automotive industry and BMW Group

Individual mobility remains a key issue in a number of countries, both as a matter of consumer preference and in terms of political regulation and national industrial policy-making. Changing lifestyle and social norms are constantly calling for new solutions in the field of mobility.

Consumers are increasingly emphasizing environmental concerns, such as lower fuel consumption and emissions levels, in their decision to purchase new vehicles. Moreover, some consumers are adjusting their approach to individual mobility altogether and in some cases, often driven by environmental concerns, consumer preference is shifting from individual car ownership to more flexible mobility solutions (such as ride- and car-sharing offerings), and from fuel-based technologies to electric vehicles (which may be influenced by the availability of public charging infrastructure) or even alternative modes of transport not offered by BMW Group (such as public transport, bicycles and electric scooters). Consumer preferences may also change as a result of changes in vehicle taxation, such as increases or decreases in vehicle taxes, and tax credits and grants for the purchase of electric or low emission vehicles. Any decrease in demand for BMW Group’s current portfolio of products as a result of changes in consumer preference could have a material adverse effect on BMW Group’s business, net assets, financial condition and results of operations.

As alternative drive technologies (for example, electric powertrains or plug-in hybrid engines) are increasingly important to customers, a significant factor in BMW Group’s future success is its ability to recognize trends in customer requirements and technological developments in sufficient time to react to these changes and thus adapt or maintain its existing product range and its competitive position in existing or new market segments. Even when BMW Group recognizes new trends and enters into new market segments, such endeavors may be less profitable or more costly than anticipated.

BMW Group encounters research and development challenges as its products become more complex and as it introduces new, more environmentally friendly technologies. It may have difficulties in attaining stated efficiency targets without loss of product quality. Further, it has entered into cooperation arrangements to research and develop new technologies. These research and development activities may not achieve their planned objectives. Additionally, BMW Group’s competitors or their joint ventures may develop better solutions and may be able to manufacture the resulting products more rapidly, in larger quantities, with higher quality or at lower cost. This could lead to increased demand for BMW Group’s competitors’ products and result in a loss of BMW Group’s market share.

Export controls, sanctions, tariffs and other trade barriers could affect BMW Group’s ability to produce, market and sell its products across global markets and affect BMW Group’s supply chains

As a global manufacturer of premium and luxury automobiles and motorcycles, BMW sources its production materials from across the world, relies on complex global supply chains, and maintains production and sales operations in a large number of markets globally. This requires an established and efficiently connected infrastructure allowing for the cross-border transport of supplies, parts and automobiles.

In recent years, political distress, warfare, terrorist attacks, changing attitudes regarding globalization and other economic and geopolitical developments have led to the introduction of new export controls and sanctions or stricter application of existing export controls and sanctions in a number of jurisdictions around the world. For example, on 24 February 2022, the Russian military invaded Ukraine, as a result of which sanctions were imposed by the European Union, the United States and other countries on Russia as well as Russian banks, companies and individuals, which have adversely affected and will continue to adversely affect BMW Group’s business. As a result, on 1 March 2022, BMW Group announced the

discontinuation of its local production in Russia and halted all exports of vehicles to Russia until further notice.

The trade conflict between the United States and China continues to adversely impact BMW Group. BMW Group expects the political and regulatory focus to shift from tariff increases, such as those imposed by the former U.S. administration for imported steel and aluminum, to further import and export restrictions on specific technologies. The potential introduction of further trade restrictions for various goods imported into the United States from China, including automobiles and auto-parts, as well as trade restrictions imposed by China, could have a significant adverse impact on BMW Group's business operations due to less favorable conditions for the import and export of vehicles. Moreover, any countermeasures by regional or global trading partners, including the EU and China, could slow down global economic growth and also have an adverse impact on the export of vehicles manufactured in the United States and elsewhere.

Laws and regulations regarding export controls and sanctions may originate nationally, bilaterally or even multilaterally between or among participating jurisdictions with a differing reach as to national or even extraterritorial application and relevance. Typically, export controls and sanctions will apply to the transfer of pre-identified, listed products, technologies or categories of sensitive goods through the requirements of permits, limitations or prohibitions of sale.

One of the main consequences of these developments for BMW Group and the automotive industry generally is the impact on supply chains as they relate to cross-border transfers. Specifically, increased export controls and sanctions could negatively affect BMW Group's cross-border supply chain or delay the delivery of parts or automobiles from one market to another. This could lead to various disruptions to pre-established workflows and could result in an inability to meet production deadlines or adequately supply market demand for BMW Group's products.

In addition, BMW Group faces an increasing need for compliance measures, including the identification of critical goods, critical technologies, geographical sensitivities and contractual protections, as well as the adaptation of existing agreements and local sales practices and the ability to take short-term measures should events, trends or restrictions arise or increase in a way that affected BMW Group's business practices.

Consequently, BMW Group faces potential further increases in costs to be prepared for adverse developments of this type and for ongoing compliance with export controls and sanctions relating to its commercial activities. Moreover, as export controls and sanctions may change, be newly introduced on short notice, be difficult to interpret or be applied in an unexpected manner, there can be no assurances that BMW Group's internal controls and compliance systems are adequate to address all applicable risks.

Increases in or volatility of fuel prices could affect demand for BMW Group's products

As a premium vehicle manufacturer, BMW Group holds leading positions in markets for powerful premium and luxury vehicles. An increase in fuel prices from the current level, increased price volatility or reduced availability of fuel, particularly in the United States, could result in a weakening of demand for large and sporty vehicles, while increasing demand for small vehicles, which could lead to negative effects on vehicle mix and revenues as well as margins and further lead to consumer or market shifts away from segments or automotive models where BMW Group holds a leading position or has a competitive product offering. As a result, fuel price increases or volatility in price trends could lead to changes in demand across product segments or consumer preferences, which could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

Significant changes in prices of raw materials and commodities could lead to increased costs in producing and distributing BMW Group vehicles

BMW Group requires significant amounts of raw materials, commodities and energy (in particular natural gas and electricity) in the manufacture of its products. Changes in prices of raw materials, commodities and energy are monitored on the basis of a set of specific management procedures. The principal objective of these management processes is to increase planning reliability for BMW Group and its production decisions and forecasts. In particular, in the second half of 2021, certain raw material and commodity prices (e.g., for palladium and rhodium) as well as energy prices increased sharply, and BMW Group expects such prices to increase further in the short to medium term. Price risks relating to precious metals (platinum, palladium and rhodium) and non-ferrous metals (aluminum, copper, lead and nickel), and, to some extent, to steel and steel ingredients (iron ore and coking coal) and energy (gas and

electricity) are hedged using financial derivatives or supply contracts with fixed pricing arrangements. Nevertheless, changes in raw material, commodity and energy prices cannot always be predicted or hedged and are highly volatile due to various factors, including decreasing availability of certain raw materials, an unexpected increase in the demand for raw materials, disruptions in the suppliers' business and supply chains, competitive pressure among suppliers of raw materials to increase the price, and inflation. Any interruption in availability of raw materials and commodities may impair BMW Group's ability to manufacture its products on a timely and cost-effective basis. Should BMW Group fail to adequately address commodity price changes or volatility and be unable to pass price increases on to customers, BMW Group may be subject to increased costs for producing and distributing its vehicles, which could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations. See also "Macroeconomic, geopolitical or other events could adversely affect the automotive industry and BMW Group" and "Export controls, sanctions, tariffs and other trade barriers could affect BMW Group's ability to produce, market and sell its products across global markets and affect BMW Group's supply chains".

Competitive Risks relating to BMW AG and BMW Group

The automotive market is highly competitive and subject to technological innovations and developments which could affect BMW Group's competitive position

The worldwide automotive market is highly competitive. BMW Group faces intense competition from automotive manufacturers in the markets in which it operates and across vehicle segments. Competition in the automotive industry with established manufacturers has intensified in recent years and, in addition, new competitors are emerging, including competitors whose main business operations are outside the traditional automotive industry, such as in battery-electric vehicles (BEV). For example, in the United States a relatively new car manufacturer gained significant market share in certain segments.

Competition is likely to intensify further in light of, among other factors, continuing globalization in the worldwide automotive industry and technological developments in drive technologies, drive systems and vehicle control, particularly autonomous driving, possibly resulting in industry consolidation or reorganization. Factors affecting competition include product quality and features, safety, reliability, fuel efficiency, disruptive technologies and the amount of time required for innovation and development, pricing, customer service and financing terms. Increased competition could also lead to lower Group deliveries, which could result in further downward price pressure and adversely affect BMW Group's sales strategies or could require BMW Group to increase research and development or capital expenditures to offer competitive products. BMW Group's ability to respond adequately to the recent changes in the automotive market and to maintain its competitiveness in light of ongoing competitive dynamics and technological developments is integral to its performance in existing and new markets and to maintaining or expanding its market share. There can be no assurances that BMW Group will be able to compete successfully in the future.

Competition in the automotive industry could lead to pricing and sales pressures

BMW Group faces competition from a number of international companies, as well as local and regional companies in the countries in which it operates. Increased competition and unanticipated actions by competitors or customers in the automotive industry could lead to downward pressure on prices or a decline in BMW Group's market share, which would adversely affect its results and impair its growth potential.

Intense competition exists in particular with regard to prices and product quality, as well as the development and launch periods of newly developed products carrying a higher profit risk due to marketing risks and considerable expenses for market development, product launch and market penetration. Further, new expertise on the part of competitors or new market entrants increase the risk that competitors might outperform the BMW Group with respect to technological advances or vehicle development, which could lead to the BMW Group potentially losing market share and suffering significant losses in deliveries. Increased pressure on selling prices and margins caused by intense competition in global markets, particularly in Western Europe, the United States and China, also requires constant analysis and adapting to changes in circumstances and conditions.

BMW Group is dependent on market acceptance of BMW Group's products

Many factors both within and outside of BMW Group's control affect the success of new or existing BMW Group products in the marketplace. BMW Group seeks to offer highly desirable vehicles to overcome intensive price competition and meet market demand; however, BMW Group's new and existing vehicles and products might be perceived to be less desirable than those of BMW Group's competitors, whether in terms of price, quality, design, safety, overall value, fuel efficiency or other attributes. For example, if a new model were to experience quality issues at the time of launch, the vehicle's perceived quality could be affected even after the issues had been corrected, resulting in lower numbers of deliveries, market share, and profitability. The trend towards an increasing range of body styles, including "cross-over" body styles, based on customer expectations and competitive actions across the automotive industry implies that BMW Group must continually evaluate the position and market share of its individual brands and models to maintain its competitive position. In addition, with increased consumer interconnectedness through the Internet and other media, mere rumors or allegations relating to quality, safety, fuel efficiency, corporate social responsibility or other key product attributes can negatively impact BMW Group's reputation or market acceptance of its products, even where such allegations prove to be inaccurate or unfounded.

As a result of the intensity of competition in the automotive industry and the pace of technological development, BMW Group faces constant pressure to develop new products and improve existing products at ever-shorter intervals. If BMW Group misjudges, delays recognition of, or fails to adapt its products and services to trends and changes in customer requirements in individual markets or other changes in demand, its sales volumes could be adversely affected. If BMW Group makes fundamental or repeated misjudgments, it could lose customers, and the reputation of its affected brands could suffer. Such misjudgments may also lead to significantly unprofitable investments and associated costs.

If BMW Group encounters potential delays in bringing new vehicle models and technologies to market or if customers do not accept the new models BMW Group introduces, or if the other risks mentioned herein were to materialize, it could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group's success is dependent on its ability to maintain and develop its brand image

In the highly competitive automotive industry, BMW Group is dependent on maintaining and developing the brand image for its various brands. In order to maintain and develop a brand image, BMW Group must earn customers' confidence by providing safe, high-quality products that meet customer demand and appeal to customers' preferences. Moreover, as BMW Group is dependent on suppliers for several significant production components, perceptions of BMW Group's quality can also be affected by the performance and quality of third-party supply components or broader perceptions of the automotive industry generally. If BMW Group is unable to effectively maintain and develop the brand image of its BMW, MINI and Rolls-Royce brands, for example as a result of an inability to provide safe, high-quality products or as a result of the failure to promptly implement safety measures, such as recalls when necessary, vehicle unit sales or sale prices might decrease.

Operational Risks relating to BMW AG and BMW Group

Production stoppages and downtimes could adversely impact BMW Group's ability to deliver products, meet customer expectations and maintain its market position

BMW Group is dependent on its global production and sales and marketing networks to economically and efficiently produce its vehicles, supply dealers and customers and maintain its market position. A work stoppage or other limitations of production could occur at the BMW Group's or its suppliers' facilities for any number of reasons, including as a result of labor or other legal disputes, pandemics, natural or man-made disasters, tight credit markets or other financial distress, production constraints or difficulties, or other factors such as manufacturing equipment breakdowns, damage to infrastructure, logistical disruptions of new vehicle production line start-ups, IT disruptions, or for other reasons (such as fires or power failures). For example, in 2020, the COVID-19 pandemic led to the temporary shutdown of BMW Group's manufacturing plants in China, Europe, South Africa, Mexico, Brazil and Spartanburg County (South Carolina, United States), and in March 2022, the war in Ukraine had a significant impact on Ukraine's automotive supply industry as a result of which BMW Group had to stop production at its DINGOLFING plant. The war in Ukraine, combined with the ongoing bottleneck for semiconductors, is

expected to lead to further production adjustments and downtimes at BMW Group's European plants. Such shutdowns, work stoppages, downtimes or other limitations on production at BMW Group or supplier facilities could disrupt BMW Group's ability to supply products in the short or long term and thereby materially adversely affect BMW Group's reputation, its brand perception, customer preferences and BMW Group's market positions.

Defects in vehicles could lead to recalls, legal and regulatory inquiries, costs or penalties and could affect BMW Group's reputation and brand image

BMW Group's performance depends on its ability to offer competitive prices while maintaining a high level of quality. BMW Group's vehicles are complex machines that depend on precise engineering and the integration of mechanical and electrical systems sourced from a number of production and assembly plants and suppliers. In addition, the trend towards introduction of new and innovative features and technology to BMW Group's vehicles further increases vehicle complexity and the risk of defects. To achieve efficient production and economies of scale, BMW Group, like other automotive manufacturers, often uses a core set of components or systems, and a select group of suppliers across vehicle and product segments. As a result, the increased complexity of modern vehicles coupled with modular-based production requires BMW Group to maintain exacting compliance and monitoring systems, as defects in vehicular systems or supplied products can affect a large number of vehicle models.

In addition, meeting or exceeding many government-mandated safety standards is costly and often technologically challenging, especially where standards may conflict with the need to reduce vehicle weight in order to meet government-mandated emissions and fuel efficiency standards. Regulations and standards have affected and, as new standards are continually introduced, are expected to continue to affect vehicle complexity and the adoption of common systems to achieve compliance. At the same time, applicable laws and governmental standards also require manufacturers to take actions to remedy defects related to vehicle safety through safety recall campaigns, and a manufacturer is obligated to recall vehicles if it determines that the vehicles do not comply with a particular safety standard.

For example, during the year ended 31 December 2021, BMW Group recalled approximately 3.1 million vehicles worldwide because of a potential cable failure of the blower regulator wiring harness and approximately 29,000 vehicles worldwide because of effects within cells in the high-voltage storage leading to a potential fire risk. Approximately 2.9 million vehicles were part of a worldwide recall campaign on the basis of a potential defect in the exhaust gas circulation cooler leading to a potential fire risk. Approximately 470,000 vehicles were recalled in certain markets because of a potential leakage of the fuel tank. Defects in products can also lead to customer dissatisfaction and safety issues if such defects led to product failures or unsafe driving conditions, as well as reputational damage. In addition, in March 2022, BMW Group announced the recall of approximately 1 million vehicles related to the engine ventilation system and risk of valves overheating.

Should BMW Group or government safety regulators determine that a safety or other defect or non-compliance with applicable standards exists in BMW Group's vehicles prior to the start of production, the launch of such vehicles could be delayed until such defect is remedied. If defects are discovered following vehicle production and delivery, BMW Group may be required to undertake recalls or offer fixes or replacements for vehicle components, including those provided by BMW Group's suppliers.

For example, several BMW models are equipped with airbags which contain ammonium nitrate as a propellant. BMW Group is currently involved in litigation with regard to some of these airbags, including class actions and product liability lawsuits. Moreover, a part of the respective vehicle population has been recalled because of general safety concerns related to this propellant. Such recalls require the development and production of suitable replacement parts in sufficient quantities and BMW Group must rely on its specialised airbag suppliers in this regard. The remaining vehicle population is closely monitored by BMW Group and governmental authorities.

The costs associated with any protracted delay in new model launches necessary to remedy defects, follow-up costs arising from other changes in planning assumptions or the cost of recall campaigns or warranty costs to remedy defects in vehicles that have been sold, could be substantial and may be considerably higher than those budgeted by BMW Group. In such situations, BMW Group could also face regulatory investigations and fines for non-compliance with various governmental standards or rules or it could face customer claims and litigation arising from any defects and resulting consequences on product use or safety. Particularly in the United States, class action lawsuits and product liability risks could have substantial financial consequences and cause damage to BMW Group's public image. Furthermore, any such incidents could also adversely affect BMW Group's reputation or market acceptance of its products.

Product defects could lead to liability risks and the need for costly replacement measures. Therefore, BMW Group seeks to hold appropriate insurance policies and takes other precautionary measures. Due in particular to difficulties in predicting the outcome of litigation proceedings in the United States, there can be no assurances that individual product liability claims would not exceed the applicable provisions or any available insurance coverage (see “*BMW Group’s insurance coverage may not be sufficient or its insurance premiums may increase*”).

BMW Group is dependent on its suppliers

BMW Group is dependent on its suppliers in the manufacture of BMW Group’s vehicles. The increasing trend towards modular-based production with a set of common architectures covering various models and product lines has also increased BMW Group’s dependence on suppliers and their ability to deliver products on time and in the required quality.

Many components used in BMW Group’s vehicles are available only from a single supplier and cannot be sourced quickly or inexpensively from another supplier, if at all (due to, for example, long lead times or new contractual commitments that may be required by another supplier before ramping up production to provide the components or materials). As a result, market and other developments that affect suppliers and automotive production generally, such as supplier interruptions due to financial distress and natural disasters, pandemics, increased IT-related risk, as well as capacity constraints as suppliers restructure and retool to meet shifting consumer preferences across vehicle segments and features, can in turn affect BMW Group’s vehicle production.

Particularly, automotive suppliers could face increased economic distress due to a sudden and substantial drop in industry deliveries and production stoppages. Lower industry deliveries could, in turn, make existing debt obligations and fixed cost levels difficult for suppliers to manage, increasing pressure on BMW Group’s supplier base. BMW Group might be required to provide financial assistance to key suppliers to ensure an uninterrupted supply of materials and components. In addition, where suppliers have exited certain lines of business or closed facilities due to an economic downturn or other reasons, BMW Group has generally experienced additional costs associated with transitioning to new suppliers.

In addition to the general risks regarding interruption of supplies, which are particularly acute in the case of single-source suppliers, the exclusive supplier of a key component could potentially exert significant bargaining power over price, quality, warranty claims or other terms relating to a particular component or materials. In particular, suppliers could be unwilling to reduce prices and some might even request direct or indirect price increases as well as new and shorter payment terms.

The increasing complexity of the supplier network, particularly in the case of sub-suppliers whose operations can only be indirectly monitored by BMW Group, could lead to further downtimes at supplier locations and thereby have an adverse impact on BMW Group’s production. For example, strong demand on international semiconductor markets or manufacturing or other problems at suppliers has caused and is expected to continue to cause bottlenecks in the supply of electronic components BMW Group uses in production, and a shortage of such electronic components has resulted in an interruption and/or volume decrease of BMW Group’s production. In addition, the war in Ukraine is expected to lead to further supply bottlenecks interrupting BMW Group’s production in other countries, such as the stoppage of production in BMW Group’s Dingolfing plant, commencing in March 2022. The increased threat of cyberattacks along the entire value chain also affects supply security as well as the ability to protect know-how relevant to BMW Group.

While BMW Group has established a detailed supplier pre-selection process as part of its efforts to maintain relationships with high-quality, reliable suppliers, there can be no assurances that supplier issues would not have adverse consequences for BMW Group, ranging from increased expenditures to production interruptions and a corresponding reduction in sales volume. Particularly, supplier problems may require BMW Group to invest in new technological concepts and production methods, even unexpectedly, or discontinue planned innovations, increasing production costs above anticipated levels.

BMW Group is dependent on information technology and the integrity of its information and data

The importance of electronically processed data continues to increase, with information technology (IT) playing an increasingly crucial role in every aspect of BMW Group’s business. BMW Group could suffer adverse consequences if the confidentiality, integrity or availability of its sensitive information and data is not maintained.

BMW Group is dependent on the efficient and uninterrupted functionality of its servers and data processing systems. If an interruption or breakdown of BMW Group's servers or data processing systems affecting the operation of one or more of its businesses occurs, this may have a detrimental impact on BMW Group's operations. Moreover, in a centralised and standardised IT environment, excessive dependence on a single system or a single data center could lead to serious consequences for BMW Group in the event of a system failure. Due to its worldwide operations, BMW Group strongly depends on complex IT. Also, the demands placed on IT facilities, both externally and internally, are changing at a rapid pace in the face of technological developments.

As a result of the increasing complexity of electronic information and communication technology, BMW Group is exposed to various risks in this context, ranging from the loss or theft of data to stoppages and interruptions of BMW Group's IT systems. Indirectly, BMW Group could also be exposed to reputational risks, which are difficult to quantify.

BMW Group's information technology could malfunction, be subject to cybercrimes or be otherwise disrupted

BMW Group depends on its information technology and data processing systems for the operation of its business. Such systems are susceptible to malfunctions and interruptions due to equipment damage, power outages, and hardware, software and network problems. They are also susceptible to cybercrime or threats of intentional disruption, which have increased in sophistication and frequency in recent years. In addition, such cyber incidents may remain undetected for extended periods of time. BMW Group may experience system malfunctions or interruptions, which could adversely affect its ability to maintain the uninterrupted operation of its business. A malfunction or cyberattack that results in broad or sustained disruption to BMW Group's information technology systems could have a material adverse effect on its business, results of operations and financial condition, damage its reputation and subject BMW Group to regulatory actions or litigation. BMW Group depends to a significant extent on confidential business information, including car design, proprietary technology and trade secrets; to the extent the confidentiality of such information is compromised, BMW Group may lose its competitive advantage and its vehicle sales may decrease.

In addition to supporting its operations, BMW Group uses its systems to collect and store confidential and sensitive data, including information about its business, its clients and its employees. As BMW Group's technology continues to evolve, it anticipates that it will collect and store even more data in the future, and that its systems will increasingly use remote communication features. Any unauthorised access to such systems may compromise the privacy of BMW Group's customers' and employees' information and expose BMW Group to litigation, regulatory scrutiny and reputational damage. Any significant compromise in the integrity of BMW Group's data security and information technology systems could have a material adverse effect on its business, results of operations and financial condition.

The electronic control systems contained in BMW Group's vehicles could be compromised

BMW Group's vehicles contain complex systems that control various vehicle processes including engine, transmission, safety, steering, brakes, window and door lock functions. These electronic control systems, which are increasingly connected to external cloud-based systems, are susceptible to cybercrime, including threats of intentional disruptions, loss of control over the vehicle, loss of functionality or services and theft of personal information and sensitive data. These disruptions are likely to increase in terms of sophistication and frequency as the level of connectivity and autonomy in BMW Group's vehicles increases. BMW Group may also be required by law in certain jurisdictions to provide access to its electronic control systems to third parties, which could increase the risk of such control systems being compromised. In addition, BMW Group may rely on third parties for connectivity and automation technology and services, including for the collection of BMW Group's customers' data. These third parties could unlawfully resell or otherwise misuse such information, or suffer data breaches. A significant malfunction, disruption or security breach compromising the electronic control systems contained in BMW Group's vehicles could damage BMW Group's reputation, reduce BMW Group's vehicle sales, subject BMW Group to regulatory actions or litigation and have a material adverse effect on its business, financial condition and results of operations.

Autonomous driving is an emerging technology and involves significant risks and uncertainties

Autonomous driving technologies involve a number of risks, including accidents and fatalities. The safety of such technologies depends in part, on user interaction and users as well as other drivers on the roadways, who may not be accustomed to using or adapting to such technologies. To the extent accidents associated with BMW Group's autonomous driving systems occur, BMW Group could be subject to regulatory actions or litigation, negative publicity and government scrutiny. Any of the foregoing could have a material adverse effect on BMW Group's business, financial condition and results of operations.

BMW Group and other companies continue to develop autonomous vehicle technologies, and many governments across the globe, including the United States and Germany, are continuing to develop the regulatory frameworks that will govern autonomous vehicles. The evolution of the regulatory frameworks for autonomous vehicles, and the pace of the development of such regulatory frameworks, may subject BMW Group to increased costs and uncertainty, and may ultimately impact BMW Group's ability to deliver autonomous vehicles and related services that customers demand.

BMW Group's ability to effectively market and distribute its products is an integral part of its sales model

BMW Group's success in the sale of vehicles depends on its ability to market and distribute effectively based on distribution networks and sales techniques tailored to the needs of its customers. Further, in many jurisdictions, BMW Group's products are sold by independent automotive dealers, with whom BMW Group must maintain relationships and which it must integrate into its marketing, sales and product strategies. There can be no assurances that BMW Group will be able to develop sales techniques and distribution networks that effectively adapt to changing customer preferences or changes in the regulatory environment or local business practice in the major markets in which it operates.

In addition, laws and regulations in many jurisdictions govern sales practices and provide for governmental and private rights of action to address non-compliant practices. Failure to maintain well-developed sales techniques and distribution networks may result in decreased sales and market share or regulatory and legal inquiries and claims, and could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group is party to a number of "take-or-pay" contracts

BMW Group has entered into a number of long-term supply contracts that require it to purchase a fixed quantity of parts to be used in the production of its vehicles. If BMW Group's need for any of these parts were to decrease, it could still be required to purchase a specified quantity of the parts or pay a minimum amount to the seller pursuant to the take-or-pay contract, which could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group is dependent on good relationships with its employees and unions

BMW Group's success is highly dependent on its employees and their expertise. Competition for highly qualified staff and management is very intense in the industry and the regions in which BMW Group operates. BMW Group's future success also depends on the extent to which it succeeds over the long term in recruiting, integrating and retaining executives, engineers and other specialists. Because of demographic developments, BMW Group must cope with changes relating to an aging workforce and must attract a sufficient number of qualified young talent with the potential to become the next generation of highly-skilled specialists and executives.

Further, personnel expenses are a major cost for BMW Group. Employees at BMW Group's German locations and at a number of foreign subsidiaries have traditionally been heavily unionised. When current collective bargaining agreements and collective wage agreements expire, BMW Group may not be able to conclude new agreements on terms and conditions that it considers to be reasonable. Moreover, BMW Group may be able to conclude such agreements only after industrial actions, such as strikes or similar measures. In addition, BMW Group's competitors may obtain competitive advantages if they succeed in negotiating collective wage agreements on better terms and conditions than BMW Group. Foreign competitors, in particular, may also obtain competitive advantages due to more flexible legal environments.

BMW Group is dependent on good relationships with its joint venture partners and independent dealers

BMW Group has entered, and may from time to time enter, into joint ventures with strategic partners for research and development and market launches, particularly in emerging and developing markets and with respect to large projects. One of the most important such relationship relates to BMW Brilliance, which produces, markets and sells various BMW brand models for the Chinese market.

In its joint venture agreements, BMW Group has undertaken various obligations. If it were to fail to fulfill such obligations, in whole or in part, BMW Group could become subject to claims for damages and contractual penalties, or the relevant joint venture agreement could be terminated. In addition, a breach of contract by joint venture partners or unforeseen events may impair the successful implementation of a project.

Moreover, the success of BMW Group's joint ventures requires that the partners constructively pursue the same goals. If BMW Group were to decide to divest its shareholdings or to withdraw from a joint venture, it might not be able to find a buyer for its shares or be able to sell such shares for other reasons, or its joint venture partner may claim damages.

Additionally, it is possible that BMW Group's partners may use, outside of the scope of the joint venture project, technologies acquired in the course of the joint venture or otherwise misappropriate trade secrets or competitive advantages from the relationship.

If any of these risks were to materialize, BMW Group might lose orders and customers and jeopardize its strategic market position in the relevant markets which, in turn, may result in a time-consuming and costly search for alternative partners and the loss of investments already made. The occurrence of these risks could have a material adverse effect on BMW Group's business, net assets, financial condition and results of operations.

In addition, BMW Group is dependent on a network of independent dealers marketing and selling BMW Group's vehicles and providing warranty and other after-sale services, in each case, to end customers. Any deterioration in BMW Group's relationship with such dealers, for example because of supply issues or changed procedures and requirements imposed by BMW Group that adversely impact, or that are perceived by such dealers to adversely impact, dealers, could impact BMW Group's sales and have a material adverse effect on BMW Group's business, net assets, financial condition and results of operations.

Financial Risks relating to BMW AG and BMW Group

BMW Group has significant pension obligations to current and past employees which could increase due to factors beyond BMW Group's control

BMW Group's pension obligations to employees resulting from defined benefit plans are measured on the basis of actuarial reports. Future pension payments are discounted by reference to market yields on high-quality corporate bonds. These yields are subject to market fluctuation and therefore influence the level of pension obligations. Changes in other parameters, such as extended periods of low interest rates, increases in inflation and longer life expectancy, also impact pension obligations and payments. Changes in factors beyond BMW Group's control could lead to funding shortfalls relating to pension obligations, which could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group is exposed to volatility and changes in foreign currency exchange rates, arising from its international production, distribution and sales network

As an internationally operating enterprise, BMW Group conducts business in a variety of currencies, thus giving rise to currency risks. Since a substantial, and in recent years increasing, portion of BMW Group's revenue is generated outside the euro area (particularly in China (renminbi), the United States (U.S. dollar) and the United Kingdom (British pound)) and the procurement of production materials and funding is also organised on a worldwide basis, fluctuations in currency exchange rates may have a significant impact on BMW Group's earnings.

BMW Group measures currency exposure using cash-flow-at-risk models and scenario analyses. In addition, BMW Group is also exposed to currency translation risk, as the financial statements of foreign consolidated subsidiaries prepared in a foreign currency are translated into euro, with income and

expenses translated at the average currency exchange rate and assets and liabilities translated at the closing rate for the relevant period.

BMW Group seeks to manage currency exchange risks on both a strategic (medium- and long-term) and operating level (short- and medium-term). Medium- and long-term measures include increasing production volumes in non-euro-region countries (natural hedging) and increasing purchase volumes denominated in foreign currencies. Currency exchange risks are managed in the short to medium term and, for operational purposes, by means of hedging. Nevertheless, changes in currency exchange rates cannot always be predicted or hedged, and there can be no assurances that BMW Group's strategies will be successful in reducing currency exchange risks.

The success of BMW Group's financial services business depends on vehicles' residual values developments

BMW Group leases and finances a substantial amount of vehicles. For the vehicles it leases, BMW Group projects expected residual values and return volumes. Actual proceeds BMW Group realizes upon the sale of returned leased vehicles at lease termination may be lower than the amount projected, which would reduce the profitability of the lease transaction.

The residual value risk could be influenced by many different external factors. A decline in the residual value of used vehicles could be caused by initiatives to promote sales of new vehicles, which was evident during the global financial and economic crisis when incentive programs were offered by certain governments (for example, scrapping premium) and automobile manufacturers. Among other things, BMW Group was required to increase existing loss provisioning for residual value risks in the past. A similar situation could occur in the future, including due to renewed deterioration of the macroeconomic environment, including as a result of the COVID-19 pandemic.

Changes in economic conditions, including as a result of the COVID-19 pandemic, government policies, exchange rates, marketing programs, changes in customer preferences, the actual or perceived quality, safety or reliability of vehicles or fuel prices could also influence the residual value risk. For instance, driving bans for diesel vehicles could influence the residual value risk of the relevant portfolio. Due to the fact that customers might change their consumption behavior and refrain from buying diesel vehicles, these bans could have a negative impact on the corresponding market prices of such vehicles. The residual value risk could therefore increase and could materially adversely affect BMW Group's business, net assets, financial condition or results of operations.

The development of residual value risks could also be influenced by e-mobility. On the one hand, rapid technical progress in the field of battery technology that increases vehicle ranges could lead to increasing residual value risks in existing electric vehicle portfolios, as customer demand for outdated technologies declines, especially in the first few years. On the other hand, due to substitution effects, sales of electric cars as a result of changing customer behavior could have a negative impact on the residual values of conventional combustion engine vehicles. Such e-mobility developments and the impact on residual value risks are difficult to predict.

In addition, BMW Group could face an increasing residual value risk as a result of the COVID-19 pandemic. A further drop in consumer demand could require that new vehicles be sold at a significant discount, which could have a material impact on the residual value of used vehicles. In addition, consumer demand for used vehicles may also decline, which could further impact the residual values of used vehicles. Decreasing residual values and resulting residual value risks could influence both BMW Group (direct residual value risk) and the dealers which are financed by BMW Group (indirect residual value risk). Consequently, BMW Group may have to post direct write-offs on its portfolio or build higher loss allowances, which would have a material adverse effect on earnings. See also "*The COVID-19 pandemic could adversely impact BMW Group's business and results of operations.*"

BMW Group is dependent on securing financing on attractive terms to provide liquidity to develop its business.

In the normal course of business, BMW Group makes use of bonds, commercial paper and securitised transactions as well as bank credit facilities in various currencies, primarily to finance BMW Group's leasing and sales-financing business. Any negative development in the capital markets could increase BMW Group's financing costs or ability to access capital and sources of financing. More expensive refinancing would also have a negative effect on the competitiveness and profitability of BMW Group's

financial services business if it were unable to pass on the higher refinancing costs to its customers. A limitation of the financial services business would have a negative impact on the automotive business, if it affected consumers' ability to purchase BMW Group's vehicles.

In March 2020, the rating agency Moody's revised BMW AG's long-term rating to A2 (under review for downgrade) and the rating agency Standard & Poor's revised BMW AG's long-term rating to A (negative outlook). In May 2020 and March 2021, Moody's revised its outlook from "under review for further downgrade" to "negative" and "stable", respectively, in each case confirming the A2 rating. In August 2021, Standard & Poor's revised BMW AG's long-term rating to A (stable outlook). A decrease of BMW AG's credit rating could impact BMW Group's ability to obtain financing, or to obtain financing on terms favorable to BMW Group.

BMW Group is exposed to interest rate risks through its various financing programs

Interest rate risks relate to potential losses caused by changes in market interest rates, such as recently seen, and can arise when fixed interest rate periods for assets and liabilities recognised in the statement of financial position do not match. Interest rate risks are managed by raising refinancing funds with matching maturities and by employing interest rate derivatives. BMW Group monitors and manages these exposures as an integral part of its overall risk management program which recognises the unpredictability of markets and seeks to reduce potentially adverse effects on its business. Nevertheless, changes in interest rates cannot always be predicted or adequately hedged.

BMW Group is dependent on its counterparties maintaining their operations and creditworthiness

Credit and counterparty default risk arises if a contractual partner (e.g., a customer or dealer) either becomes unable, or is only partially able, to fulfil its contractual obligations, such that lower income is generated or losses are incurred. BMW Group uses a variety of rating systems in order to assess the creditworthiness of its contractual partners, but there can be no assurances that such systems will be effective in all circumstances or that contractual parties will maintain sufficient creditworthiness over the course of a contractual relationship.

Credit risk typically arises from the possibility of loss from a customer's or dealer's failure to make payments according to contract terms, particularly in BMW Group's leasing and financing business. Credit risk (which is dependent upon economic factors including unemployment, consumer debt service burdens, personal income growth, dealer profitability, and used car prices) has a significant impact on BMW Group's business. If BMW Group experiences a high or unexpected level of credit losses, it could materially adversely affect its business, net assets, financial condition or results of operations.

Changes in deliveries can have a substantial effect on BMW Group's cash flow and profitability as BMW Group has a high proportion of relatively fixed structural costs

Because BMW Group, like other manufacturers, has a high proportion of relatively fixed structural costs, even comparatively small changes in deliveries can have a substantial effect on its cash flow and profitability. If sales were to decline to levels significantly below BMW Group's planning assumptions or BMW Group's business were to be otherwise significantly disrupted, particularly in the United States, China or Europe, due to financial crises, recessions, significant currency exchange rate movements, geopolitical events, pandemics, trade barriers or other factors, it could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group's insurance coverage may not be sufficient or its insurance premiums may increase

BMW Group maintains insurance coverage in relation to a number of risks associated with its business activities that are subject to standard exclusions, such as willful misconduct. However, BMW Group may suffer losses or claimants may bring claims against BMW Group that exceed the type and scope of its existing insurance coverage. Significant losses could lead to higher insurance premium payments. In addition, there are certain risks for which BMW Group does not maintain coverage based on BMW Group's cost-benefit analysis, and it therefore has no insurance coverage against the occurrence of these events. If BMW Group sustains damage for which there is no insurance coverage or insufficient insurance coverage, or if it has to pay higher insurance premiums or encounters restrictions on insurance coverage, this could materially adversely affect its business, net assets, financial condition or results of operations.

Legal and Regulatory Risks relating to BMW AG and BMW Group

Increased safety, emissions, fuel-efficiency or other regulations could lead to substantial costs and disruptions in automotive markets

The global automotive industry is subject to substantial government regulation, which differs by state, region and country. Government regulation has developed, and proposals for additional regulation have advanced, primarily out of concern for the environment (including concerns about global climate change and its impact as well as potential implications, whether legal or factual, stemming from legal proceedings or court decisions), vehicle safety and energy independence. These regulations, particularly in the areas of fuel efficiency and safety, are continually evolving, requiring BMW Group to spend significant resources to plan for, and adapt its products to, these developments. In addition, many governments regulate local product content or impose import requirements as a means of creating jobs, protecting domestic producers and influencing the balance of payments. A number of governments, as well as non-governmental organizations, also publicly assess vehicles based on their own protocols. Such protocols could change significantly, and any negative perception regarding the performance of BMW Group's vehicles subjected to such tests could reduce future sales.

In recent years, BMW Group has achieved significant improvements regarding the overall fuel efficiency of the vehicles it produces, as well as the fuel efficiency and emissions performance of individual models, thereby reducing their greenhouse gas emissions and progressing towards compliance with future fuel consumption and carbon dioxide (CO₂) emissions regulations in the EU, the United States, Japan and China, among other jurisdictions.

For example, under Regulation (EU) 2019/631, which defines the EU fleet-wide CO₂ emission targets, manufacturers will have to meet a fleet CO₂ average in Europe that is 15% lower in 2025 as compared to 2021, as measured under Worldwide Harmonized Light Vehicles Test Procedures ("**WLTP**"), and, by 2030, the EU average will have to decrease by 37.5% compared to the 2021 target under the WLTP, each subject to certain automotive portfolio considerations and transition periods.

In general, there is a clear move towards increasingly stringent vehicle emissions regulations, particularly for conventional drive systems, not only in the developed markets of Europe and North America, but also in emerging markets such as China. Moreover, further tightening and scrutiny could be forthcoming given the ongoing focus on emissions testing and on-road performance, particularly with respect to diesel engines, which could lead to significant additional investments to comply with new regulations as well as risks of limited market availability of products. In addition, several state and local governments, and in particular those of major cities, have increased their focus on diesel emissions and have introduced or proposed regulations seeking to shift consumers from use of diesel vehicles. Such diesel vehicle restrictions could require BMW Group to take additional measures to meet applicable CO₂ emissions targets, in particular if the proportion of number of diesel vehicles sold across BMW Group's fleet decreases considerably relative to the number of other vehicles sold which have relatively higher levels of CO₂ emissions. There are limits to BMW Group's ability to achieve fuel efficiency improvements over a given timeframe, primarily relating to the cost and effectiveness of available technologies, consumer acceptance of new technologies and changes in vehicle characteristics, willingness of consumers to absorb the additional costs of new technologies, the suitability of certain technologies for use in particular vehicles, the widespread availability of supporting infrastructure for new technologies, as well as the human, engineering, and financial resources necessary to deploy new technologies across a wide range of products and powertrains in a short period of time.

Moreover, the potential threat of short-term tightening of laws and regulations, including local registration, usage restrictions, congestion charges and driving bans, as illustrated by the restrictions on issuing license plates in Chinese metropolitan areas and the banning of certain diesel-powered vehicles in certain restricted areas within some European cities, could further affect the automotive industry. In some cases, changes in customer behavior are not only brought on by new regulations but also through changes of opinion, values and environmental issues, which could be affected by perceptions of the industry as a whole. Among other factors, concerns about global climate change are affecting legislation, regulations and consumer behavior, which could affect demand for vehicles and the residual value of these vehicles, or requirements to develop new solutions for personal mobility. For example, the ongoing political and public discussion on diesel engines, particularly in Europe, could further adversely affect demand for diesel vehicles. Additionally, a potential tightening of consumer protection laws could result in a greater number of recalls.

The cost to comply with existing government regulations is substantial, and the effects of such regulations, as well as any future additional regulations could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group is required to comply with numerous laws and regulations in multiple jurisdictions

Compliance with laws is a basic prerequisite for the success of BMW Group. Current laws provide the binding framework for BMW Group's various business activities around the world. The growing international scale of operations of BMW Group, the complexity of the business world and a broad set of complex legal (including, for example, tax, antitrust, customs, export controls and sanctions) regulations potentially applicable to BMW Group's business increase the risk of non-compliance with applicable laws, simply because they are not known, fully understood or are subject to varying interpretations.

BMW Group has established a compliance organization aimed at ensuring that its representative bodies, managers and staff act in a lawful manner at all times. Nevertheless, there remains a risk that BMW Group's employees may not act in compliance with applicable statutory provisions or BMW Group's compliance systems (including with respect to antitrust, anti-corruption, export control or consumer protection laws) or that BMW Group's internal controls and compliance systems are not adequate to maintain compliance with applicable laws and that, as a result, penalties, liabilities or additional compliance costs could be imposed on BMW Group. For example, in October 2017, the European Commission carried out inspections at BMW Group's premises in connection with cartel allegations against five German car manufacturers. On 5 April 2019, BMW Group received a Statement of Objections from the European Commission. The European Commission alleged that Daimler, Volkswagen and BMW colluded to avoid competition on cleaning nitrogen oxide (NOx) emissions from diesel passenger cars better than what was required by law despite the relevant technology having been available. The proceedings were settled on 8 July 2021, and BMW Group was fined an amount of approximately €373 million. (see "Part K. Description of Bayerische Motoren Werke Aktiengesellschaft – 11. Financial Information concerning BMW AG's Assets and Liabilities, Financial Position and Profits and Losses – Legal and Arbitration Proceedings" for further information).

BMW Group is confronted with legal disputes relating, in particular, to warranty claims, sales practices, product liability and infringements of protected rights. Further, BMW Group may also be subject to information requests, inquiries, investigations and other proceedings initiated by governmental agencies, as well as legal actions relating to safety, environmental, antitrust, securities, criminal and other laws and regulations. If these or other inquiries, investigations, legal actions and/or proceedings result in unfavorable findings, an unfavorable outcome or otherwise develop unfavorably, BMW Group could be subject to significant monetary penalties, remediation requirements, vehicle recalls, process improvements, mitigation measures or other sanctions, measures and actions, including further investigations by these or other authorities and additional litigation. Further, a negative determination or finding with respect to technical or legal issues by one governmental agency could result in other agencies also adopting such determination or finding, even if such determination or finding is not within the scope of such authority's responsibility or jurisdiction. Thus, a negative determination or finding in one proceeding carries the risk of having an adverse effect on the outcome of other proceedings, also potentially leading to new or expanded investigations or proceedings.

When known and quantifiable, BMW Group seeks to recognize appropriate levels of provisions for lawsuits in accordance with applicable accounting standards. It cannot be ruled out that losses from damages could arise which are either not covered or not fully covered by provisions. Some risks cannot be assessed in full or cannot be provided for in BMW Group's accounts, and new legal risks, as yet unidentified, could also materialize.

BMW Group is also subject to data protection laws such as the German Federal Data Protection Act (*Bundesdatenschutzgesetz*) and the EU General Data Protection Regulation (the "**GDPR**"). The GDPR provides for significant potential fines for non-compliance. Unauthorized access to information stored by BMW Group or by a third party, including failure to detect such access or to notify data subjects in a timely manner, may cause damage to BMW Group's reputation, constitute infringement of administrative and criminal law and grant the affected persons a right to damage claims against BMW Group.

Recent years have seen an increase in investor and regulatory attention to environmental, social and governance ("**ESG**") matters, including diversity and inclusion, environmental stewardship and transparency. A lack of harmonization globally in relation to ESG reform and the different pace at which legislators and regulators across the globe operate creates uncertainty and the risk of fragmentation. Failure by BMW Group to comply with or meet applicable legal and regulatory requirements or

expectations in relation to ESG matters may expose BMW Group to reputational damage, fines and other sanctions.

BMW Group is dependent on its compliance and risk management systems

BMW Group's compliance and risk management systems may prove to be inadequate to prevent and discover breaches of laws and regulations and to identify, measure and take appropriate countermeasures against all relevant risks.

In connection with BMW Group's worldwide business operations, it must comply with a broad range of legal and regulatory requirements in a number of jurisdictions and local operational business processes, particularly relating to sales practices. Moreover, BMW Group has expanded its worldwide operations in recent years, particularly in China and emerging markets, increasing the scope of applicable regulations and operational practices. BMW Group has a compliance management system that supports its operational business processes, helps to ensure compliance with legislative provisions and, where necessary, initiates appropriate countermeasures. There can be no assurances that BMW Group's internal controls and compliance systems are adequate to address all applicable risks in every jurisdiction.

Members of BMW Group's governing bodies, employees, authorised representatives or agents may intentionally or unintentionally violate applicable laws and internal standards and procedures. BMW Group may not be able to identify such violations, evaluate them correctly or take appropriate countermeasures. Furthermore, BMW Group's compliance and risk management systems may not be appropriate given its size, complexity and geographical diversification and may fail for various reasons.

The occurrence of these risks may result in reputational loss and adverse legal consequences, such as the imposition of fines, sanctions and penalties on BMW Group or the members of BMW Group's governing bodies or employees and could lead to the assertion of damages claims by third parties or to other detrimental legal consequences, including civil and criminal penalties. BMW Group is particularly exposed to these risks with respect to its minority interests and joint ventures, where it is difficult and, in some cases, possible only to a limited extent, to integrate these entities fully into BMW Group's compliance and risk management system.

Unusual or significant litigation, governmental investigations or adverse publicity could adversely affect BMW Group

Compliance with governmental standards does not necessarily prevent individual or class action lawsuits, which can entail significant cost and risk. In certain circumstances, courts may permit tort claims even where BMW Group's vehicles comply with applicable laws and regulations. Furthermore, simply responding to actual or threatened litigation or governmental investigations of BMW Group's compliance with regulatory standards, competition laws or other legal requirements, whether related to BMW Group's products or business or commercial relationships, may require significant expenditures of time and resources. Litigation also is inherently uncertain, and BMW Group could experience significant adverse results. In addition, adverse publicity surrounding an allegation may cause significant reputational harm that could affect public perception of BMW Group's brands or market demand for its products. For example, the SEC's investigation regarding BMW Group's vehicle sales and sales reporting practices and the allegations included therein may have had and could continue to have a material adverse impact on BMW Group's reputation.

In addition, in March 2022, the European Commission has conducted inspections at the premises of several car manufacturers and industry associations in several Member States. In parallel, the European Commission has sent out requests for information to car manufacturers, including BMW AG. The inspections and requests for information concern a possible collusion by companies and associations in relation to the collection, treatment and recovery of end-of-life cars and vans. The inspections were conducted in coordination with the UK Competition and Markets Authority that has initiated formal proceedings. As the investigations were recently initiated and are ongoing, possible risks for BMW Group cannot be quantified at present.

A decrease in or cessation or claw-back of government incentives could affect BMW Group's results of operations

BMW Group receives economic benefits from national, state, and local governments in various regions of the world in the form of incentives designed to encourage manufacturers to establish, maintain, or increase investments, workforces or production.

These incentives may take various forms, including grants, loan subsidies, and tax abatements or credits. The impact of these incentives can be significant in a particular market. A decrease in, expiration without renewal of, or other cessation or claw-back of government incentives for any of BMW Group's business units, as a result of administrative decision or otherwise, could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations.

BMW Group's international operations give rise to complex tax and customs matters

BMW Group is subject to tax and customs audits in all countries where it operates. Ongoing or future tax and customs audits may lead to demands for additional taxes, customs, interest thereon, penalties and similar payments. Such payments may arise, for example, from the full or partial non-recognition of intra-group transfer prices. In countries where there are factually, or as a practical matter, no statutes of limitation (such as China), BMW Group may also face demands for additional taxes relating to periods prior to a tax and customs audit period. As a result, BMW Group's provisions for tax and customs risks may be insufficient to cover any actual settlement amount. Risks may also arise due to changes in tax or customs laws or accounting principles or their interpretation by the tax and customs payer, by tax and customs authorities or by courts. Such changes may also have a retroactive effect. If any of these risks were to materialize, this could have a material adverse effect on BMW Group's business, net assets, financial condition or results of operations. See also "*Macroeconomic, geopolitical or other events could adversely affect the automotive industry and BMW Group*" and "*Export controls, sanctions, tariffs and other trade barriers could affect BMW Group's ability to produce, market and sell its products across global markets and affect BMW Group's supply chains.*"

Risks relating to the Issuers

(i) General

The Issuers are financing subsidiaries within BMW Group, and as such, the purposes of the Issuers' activities are to assist in the financing of the activities and in managing interest and foreign exchange risks for BMW Group, primarily in the Netherlands, United States and Japan, and to provide services in connection therewith. The ability of the Issuers to satisfy their obligations under the Notes will depend, among other things, upon payments to the Issuers by members of BMW Group. The assets of the Issuers should not therefore be primarily relied upon by prospective investors in making an investment decision to purchase the Notes.

(ii) BMW Finance

The risk exposure of BMW Finance can be broken down into the following two main categories: non-financial and financial risks.

Non-financial Risks

Operating Risks

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW Finance uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW Finance depends on the timely receipt of funds from external institutions who act as counterparties to financial transactions, such as bonds, swaps or other derivative financial instruments. To avoid negative impacts of system failures, all key systems are set up in parallel and/or backup facilities or available within BMW Group.

Financial Risks

The formal procedures and policies operated by BMW Finance to cover banking, foreign exchange and other treasury matters are consistent with objectives and policies for financial risk management within BMW Group. BMW Finance's policy is not to take positions in derivative financial instruments with the aim of profit realisation.

Financial risks arise mainly from liquidity risk, the risk of an increase in credit spreads, currency risk, interest rate risk, credit risk and fair market value risk.

Liquidity Risk

Liquidity risk refers to potential negative impacts on the operations of BMW Finance as a result of the inability to generate sufficient funds to pay liabilities when due and to finance BMW Group companies and participations.

To manage the liquidity, BMW Finance depends mainly on the issuance of term debt, principally in the European capital markets and from 2019 onwards also in the China and US capital markets. Therefore, BMW Finance depends on broad access to these capital markets and investors. Changes in demand for term debt instruments on capital markets could limit the ability of BMW Finance to fund operations. The participation of BMW Finance in the EUR 50.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW US Capital, BMW International Investment and BMW Japan Finance, as well as the participation in the EUR 5.0 billion Multi-Currency Commercial Paper Programme established by BMW AG, BMW Finance and BMW International Investment support flexible and broad access to capital markets. Since May 2006, BMW Finance acts as an issuer under the EUR 2.0 billion French Commercial Paper (*Billets de Trésorerie*) Programme established by BMW Finance. In the first half year of 2019, BMW Finance issued a corporate bond in China for the first time, a so-called, Panda Bond, of CNY 3.0 billion. In the second half year of 2019, BMW Finance participated as a new issuer of 144a bonds in the US capital markets. Debt issuances under these programs have unconditional and irrevocable guarantees from BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Furthermore, BMW Finance uses committed and uncommitted credit lines with banks and bank loans to cover liquidity needs. In this context BMW Finance depends on the willingness of banks to provide credit lines or loans. In the light of the financial crisis, banks have become more selective in providing credit lines or loans to the interbank and corporate sector. In order to reduce and minimise the dependence on banks, BMW Finance has taken measures to maintain access to capital markets. Besides local committed and uncommitted credit lines BMW Finance can draw under a EUR 8.0 billion Multi-Currency Revolving Credit Facility (including a EUR 2.0 billion Swingline Option) under which it, BMW AG, and BMW US Capital are eligible borrowers.

Risk of an Increase in Credit Spreads

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Finance. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW Finance participates, a weakening credit profile of BMW Group and a decreasing willingness of banks to provide credit lines and loans.

Currency Risk

Currency risk or exchange rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW Finance. In order to mitigate the impact of currency risk arising from operational, financing and investment activities, BMW Finance continually assesses its exposure to this risk. Currency risk is managed and hedged through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, un-hedged positions could arise.

Interest Rate Risk

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Finance holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives for operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Finance. In order to mitigate the impact of interest rate risk, BMW Finance continually assesses its exposure to this risk. Interest rate risk is managed and hedged through the use of derivative financial instruments, such as interest rate swaps and forward rate agreements. When deemed appropriate, there might be un-hedged positions.

Credit Risk

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the balance sheet of BMW Finance for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfil their contractual obligations. In the case of derivative financial instruments, BMW Finance is also exposed to credit risk, which results from the non-performance of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Finance participates in a BMW Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

Fair Market Value Risk

IFRS 9, *Financial Instruments*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values. In the case that hedge accounting is applied and that a hedge is a fair value hedge, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the income statement. Furthermore, if, contrary to the normal case within BMW Finance, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the income statement. This can lead to significant fluctuations in the position "Result from financial transactions" in the income statement.

(iii) BMW US Capital

The risk exposure of BMW US Capital can be broken down into the following two main categories: non-financial risks and financial risks.

Non-financial Risks

Operating Risks

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW US Capital uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can therefore lead to delays in payment processes, or the evaluation or settlement of financial transactions.

Legal and Regulatory Risks

Non-financial risks could arise from legal and regulatory risks. Risks mainly result from the possibility of new laws or regulations that could be adopted in light of current conditions in the global financial markets and increased regulatory focus on the regulation of the financial services industry, including the segment in which BMW US Capital operates. BMW US Capital's activities are subject to governmental regulations, and compliance with new laws and regulations can result in significant additional costs and/or restrictions on its business. In addition, various governmental agencies may from time to time conduct inquiries or investigations into various aspects of auto finance companies practices.

Financial Risks

The formal procedures and policies operated by BMW US Capital to cover banking, foreign exchange and other treasury matters are consistent with the objectives and policies for financial risk management within BMW Group. BMW US Capital's policy is not to speculate in financial instruments.

Financial risks arise mainly from volatility relating to liquidity, credit spreads, interest rates, currency, credit and fair market value evaluations of derivative instruments.

Liquidity Risk

Liquidity risk refers to potential negative impacts on the operations of BMW US Capital resulting from the inability to generate sufficient funds to pay liabilities when due and to extend short- and long-term advances to support the financing activities of the companies of BMW Group and its affiliates.

To manage liquidity, BMW US Capital depends mainly on the issuance of short and term debt, principally in the European and US capital markets. Changes in demand for term debt instruments on capital markets could limit the ability of BMW US Capital to fund operations. With its access to the USD 144A market, the Euro Medium Term Note Program and a USD 7.0 billion US Commercial Paper Program, BMW US Capital has ample alternatives to mitigate this risk. Debt issuances under these programs have unconditional and irrevocable guarantees from BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Furthermore, BMW US Capital has the capability of drawing under a EUR 8.0 billion Multi-Currency Revolving Credit Facility (including a EUR 2.0 billion Swingline Option).

Risk of an Increase in Credit Spreads

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW US Capital. Increases in credit spreads could arise from changes in demand for term debt instruments on capital markets, the removal of the unconditional and irrevocable guarantees of BMW AG from the above-mentioned debt issuance programs in which BMW US Capital participates, a weakening credit profile of BMW Group and from a decreasing willingness of banks to provide credit lines and loans.

Currency Risk

Currency risk or exchange risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in exchange rates. Changes in exchange rates can have adverse effects on the financial position and operating result of BMW US Capital. In order to mitigate the impact of foreign exchange risk arising from operational, financing and investment activities, BMW US Capital continually assesses its exposure to this risk. Currency exchange risk is managed through the use of derivative financial instruments, such as forward contracts, options and cross currency swaps. When deemed appropriate, un-hedged positions could arise.

Interest Rate Risk

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW US Capital holds a substantial volume of interest rate sensitive financial assets, liabilities and derivatives from operational, financing and investment activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW US Capital. In order to mitigate the impact of interest rate risk, BMW US Capital continually assesses its exposure to this risk. Interest rate risk is managed by matching maturities and through the use of derivative financial instruments, such as interest rate swaps and options. When deemed appropriate, there might be un-hedged positions.

Credit Risk

Credit risk results from the risk of default of internal or external counterparties. The amount recognised in the statement of financial position of BMW US Capital for financial assets is, ignoring any collateral received, the maximum credit risk in the case that counterparties are unable to fulfil their contractual obligations. In the case of derivative financial instruments, BMW US Capital is also exposed to credit risk, which results from the non-fulfilment of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of investment grade credit standing. Furthermore, BMW US Capital participates in a BMW Group-wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

Fair Market Value Risk

IFRS 9, *Financial Instruments*, requires that all derivative instruments be recorded on the statement of financial position at their respective fair values. With respect to fair value hedges, the results of the fair value measurement of the derivative financial instrument and of the related hedged item are recognised in the statement of comprehensive income. Furthermore, if, contrary to the normal case within BMW US Capital, hedge accounting cannot be applied, the gains and losses from the fair value measurement of derivative financial instruments are recognised immediately in the statement of comprehensive income. This can lead to significant fluctuations in the "Financial result" on the Statements of Comprehensive Income for BMW US Capital.

(iv) BMW International Investment

The risk exposure of BMW International Investment can be broken down into the following two main categories: non-financial and financial risks.

Non-financial Risks

Operating Risks

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and information technology. BMW International Investment uses computer systems to monitor financial positions and daily cash flows and to process payments to internal and external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. Investment continually assesses its exposure to this risk. Interest rate risk is managed and hedged through the use of derivative financial instruments, such as interest rate swaps and forward rate agreements. When deemed appropriate, there might be un-hedged positions.

(v) BMW Japan Finance

The risk exposure of BMW Japan Finance can be broken down into the following two main categories: non-financial and financial risks.

Non-financial risks

Operational risks

Non-financial risks could arise from operating risks. Risks mainly result from the use of computer systems and modern information technology. BMW Japan Finance uses computer systems to monitor financial positions and daily cash flows and to process payments to external counterparties. System failures can, therefore, lead to delays in payment processes. Further operating risks can arise in connection with the settlement of financial transactions. The management of daily cash flows at BMW Japan Finance depends on the timely receipt of funds from external parties for retail and wholesale business as well as financial transactions, such as loans, bonds and swaps. Operating risks are mitigated through constant monitoring and improving of operational processes in the both managements of Operational Risk and Internal Control System.

Financial Risks

The formal procedures and policies operated by BMW Japan Finance to cover banking and other treasury matters are consistent with objectives and policies for financial risk management within BMW Group. BMW Japan Finance's policy is not to trade or speculate in financial instruments.

Financial risks arise mainly from liquidity risk, risk of an increase in credit spreads, credit risk and interest rate risk.

Liquidity Risk

Liquidity risk refers to potential negative impacts on the operations of BMW Japan Finance as a result of the inability to generate sufficient funds to pay liabilities when due.

BMW Japan Finance uses group loan to cover short-term liquidity needs. These settings are based on the sound profitability of BMW Japan Finance and BMW Group.

Furthermore, BMW Group Capital Markets Division is involved in a broad range of banking activities of BMW subsidiaries.

For sound and diversified funding, BMW Japan Finance is engaged in long-term funding sources, such as loans, bonds and Asset Backed Securities (ABS). The participation of BMW Japan Finance in the EUR 50.0 billion Euro Medium Term Note Programme established by BMW AG, BMW Finance, BMW US Capital, BMW International Investment and BMW Japan Finance supports flexible and broad access to capital markets. Debt issuance under this program has unconditional and irrevocable guarantees by BMW AG. The removal of the guarantees from these programs could limit access to certain investors and investor groups.

Risk of an Increase in Credit Spreads

Increases in the credit spreads could negatively affect the cost of borrowing and, therefore, the operating results of BMW Japan Finance. Increases in credit spreads could arise from changes in demand from creditors, such as banks for short-term loans and institutional investors for long-term loans or bonds.

Interest Rate Risk

Interest rate risk refers to potential changes of value in financial assets, liabilities or derivatives in response to fluctuations in interest rates. BMW Japan Finance holds a substantial volume of interest rate sensitive liabilities for financing activities. Changes in interest rates can have adverse effects on the financial position and operating result of BMW Japan Finance. In order to mitigate the impact of interest rate risk, BMW Japan Finance continually assesses and manages its exposure to this risk and hedges those liabilities through the use of derivative financial instruments, such as interest rate swaps.

Credit Risk

Credit risk results from the risk of default in retail and wholesale business. Credit risks for retail business are steered by credit scorecards and policy rules, which have been locally developed based on historical defaults that BMW Japan Finance experienced and those are annually validated. Credit risks for wholesale business are steered by the credit rating system which is developed globally by the head-quarter in Munich.

In the case of derivative financial instruments, BMW Japan Finance is also exposed to credit risk, which results from the non-performance of contractual agreements on the part of the counterparty. This credit risk is mitigated by entering into such contracts only with parties of first-class credit standing. Furthermore, BMW Japan Finance is participating in a BMW Group wide limit system that continually assesses and limits the credit exposure to any single external counterparty.

Residual Value Risk

BMW Japan Finance faces residual value risk as it has residual value risk bearing products in its portfolio. The residual value risk is caused by the uncertainty with regards to the future value of the underlying vehicle assets of the loan or lease contracts which BMW Japan Finance guarantees the residual value at the contract termination for its customers.

The profits or losses as the result of these guarantees of residual value are shared with BMW Japan Corp., based on an agreement between BMW Japan Corp. and BMW Japan Finance.

Currently there are two retail products which BMW Japan Finance bears residual value risks. One is the operating lease and the other is a loan product called "Future Value Loan". Business share of the operating lease is small, on the other hand, Future Value Loan has been well developed since its launch in 2016. The total share of residual value risk bearing product counts approximately one-fifth in total retail portfolio.

An appropriate residual value setting is the key to manage the residual value risk. BMW Japan Finance uses the methodology which is fully compliant with the global one supported by the head-quarter in Munich.

Risks relating to the Notes

The risk factors regarding the Notes are presented in the following categories depending on their nature with the most material risk factor presented first in each category:

Risks related to the nature of the Notes

Market Price Risk

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Note. The holders of note (the "**Noteholders**") are therefore exposed to the risk of an unfavorable development of market prices of their Notes which materialise if the Noteholders sell the Notes prior to the final maturity of such Notes. If Noteholders decide to hold the Notes until final maturity, the Notes will be redeemed at the amount set out in the relevant Final Terms.

Noteholders of notes with a fixed interest rate (the "**Fixed Rate Notes**") are particularly exposed to the risk that the price of such Notes falls as a result of changes in the market interest rate levels. While the nominal interest rate of a Fixed Rate Note as specified in the applicable Final Terms is fixed during the life of such Notes, the current interest rate on the capital market typically changes on a daily basis. As the market interest rate changes, the price of Fixed Rate Notes also changes, but in the opposite direction. If the market interest rate increases, the price of Fixed Rate Notes typically falls, until the yield of such Notes is approximately equal to the market interest rate of comparable issues. If the market interest rate falls, the price of Fixed Rate Notes typically increases, until the yield of such Notes is approximately equal to the market interest rate of comparable issues. If Noteholders of Fixed Rate Notes hold such Notes until maturity, changes in the market interest rate are without relevance to such Noteholders as the Notes will be redeemed at a specified redemption amount, usually the principal amount of such Notes.

Noteholders of notes with a floating interest rate (the "**Floating Rate Notes**") are particularly exposed to the risk of fluctuating interest rate levels and uncertain interest income. Fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Notes in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Notes.

Liquidity Risk

Application has been made to the Luxembourg Stock Exchange for Notes issued under this Programme to be listed on the official list and admitted to trading on the Regulated Market of the Luxembourg Stock Exchange and to be listed on the official list of the Luxembourg Stock Exchange. In addition, the Programme provides that Notes may be listed on other or further stock exchanges or may not be listed at all. Regardless of whether the Notes are listed or not, there can be no assurance regarding the future development of a market for the Notes or the ability of Noteholders to sell their Notes or the price at which Noteholders may be able to sell their Notes. If such a market were to develop, the Notes could trade at prices that may be higher or lower than the initial offering price depending on many factors, including prevailing interest rates, the Issuer's operating results, the market for similar securities and other factors, including general economic conditions, performance and prospects, as well as recommendations of securities analysts. The liquidity of, and the trading market for, the Notes may also be adversely affected by declines in the market for debt securities generally. Such a decline may affect any liquidity and trading of the Notes independent of the Issuer's financial performance and prospects. If Notes are not listed on any exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices.

Risks related to specific Terms and Conditions of the Notes

Risk of Early Redemption

At the Issuer's option, the Notes may be redeemed prior to the Maturity Date at par plus accrued interest if, as a result of a future change of the laws applicable in Germany, the Issuer will be obliged to pay Additional Amounts (as defined in the Terms and Conditions).

If provided for in the Final Terms for a particular Tranche of Notes, the Notes may be redeemed prior to the Maturity Date at the option of the Issuer on any specified Call Redemption Date. If the Issuer redeems the Notes of any Tranche prior to maturity, the Noteholders of such Notes are exposed to the risk that due to such early redemption their investment will have a lower than expected yield. The Issuer can be expected to exercise his call right if the yield on comparable Notes in the capital market has fallen which means that the investor may only be able to reinvest the redemption proceeds in comparable Notes with a lower yield. On the other hand, the Issuer can be expected not to exercise his call right if the yield on comparable Notes in the capital market has increased. In this event an investor will not be able to reinvest the redemption proceeds in comparable Notes with a higher yield. It should be noted, however, that the Issuer may exercise any call right irrespective of market interest rates on a call date.

Risks associated with the reform of EURIBOR and other interest rate 'benchmarks'

The Euro Interbank Offered Rate (EURIBOR) and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**") have become the subject of regulatory scrutiny and recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such Benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to such a Benchmark.

International proposals for reform of Benchmarks include the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmarks Regulation**").

The Benchmarks Regulation could have a material impact on Notes linked to a Benchmark, including in any of the following circumstances:

- a rate or index which is a Benchmark may only be used if its administrator obtains authorisation or is registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is considered equivalent (Article 30 Benchmarks Regulation), the administrator is recognised (Article 32 Benchmarks Regulation) or the Benchmark is endorsed (Article 33 Benchmarks Regulation) (subject to applicable transitional provisions). If this is not the case, Notes linked to such Benchmarks could be impacted; and
- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmarks Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could impact the Notes, including Calculation Agent determination of the rate.

If a Benchmark were to be discontinued or otherwise unavailable, the rate of interest for Floating Rate Notes which are linked to such Benchmark will be determined for the relevant period by the fall-back provisions applicable to such Notes, which in the end could lead, inter alia, to a previously available rate of the Benchmark being applied until maturity of the Floating Rate Notes, effectively turning the floating rate of interest into a fixed rate of interest, or, to determination of the applicable interest rate on the basis of another benchmark determined by the Issuer in its discretion or to an early termination of the relevant Notes at the option of the Issuer.

Any changes to a Benchmark as a result of the Benchmarks Regulation or other initiatives, could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Although it is uncertain whether or to what extent any of the above-mentioned changes and/or any further changes in the administration or method of determining a Benchmark could have an effect on the value of any Notes linked to the relevant Benchmark, investors should be aware that any changes to a relevant Benchmark may have a material adverse effect on the value or liquidity of, and the amounts payable on, Floating Rate Notes whose rate of interest is linked to such Benchmark.

Under the terms of the Benchmarks Regulation, the European Commission has also been granted powers to designate a replacement for certain critical benchmarks contained in contracts governed by the laws of an EU Member State, where that contract does not already contain a suitable fallback. It is currently unclear whether the fallback provisions of the Notes would be considered suitable, and there is therefore a risk that if the consent to solicitation is not successful the Notes would be required to transition to a replacement benchmark rate selected by the European Commission. There is no certainty at this stage what any such replacement benchmark would be.

Risks associated with new reference rates such as SONIA, SOFR and €STR

Interest rates of Floating Rate Notes may be linked to SONIA, SOFR and €STR. SONIA is based on actual transactions and reflects the average of the interest rates that banks pay to borrow sterling overnight from other financial institutions. Investors should be aware that the market continues to develop in relation to the SONIA as a reference rate in the capital markets and its adoption as an alternative to Sterling LIBOR. The market or a significant part thereof may adopt an application of SONIA that differs significantly from that set out in the Terms and Conditions. It may be difficult for investors in Notes which reference a SONIA rate to reliably estimate the amount of interest which will be payable on such Notes. Further, if the Notes become due and payable, the rate of interest payable shall be determined on the date the Notes became due and payable. Investors should consider these matters when making their investment decision with respect to any such Notes.

On 22 June 2017, the Alternative Reference Rates Committee ("**ARRC**") convened by the Board of Governors of the Federal Reserve System and the Federal Reserve Bank of New York identified the SOFR as the rate that represented best practice for use in certain new U.S. dollar derivatives and other financial contracts. The Federal Reserve Bank of New York notes that use of the SOFR is subject to important limitations and disclaimers. SOFR is published based on data received from other sources. There can be no guarantee that the SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in the respective Notes. If the manner in which the SOFR is calculated is changed, that change may result in a reduction of the amount of interest payable on the Notes and the trading prices of the Notes. SOFR has been published by the Federal Reserve Bank of New York since April 2018. Investors should not rely on any historical changes or trends in the SOFR as an indicator of future changes in the SOFR. Also, since the SOFR is a relatively new market index, the Notes will likely have no established trading market when issued. Trading prices of the Notes may be lower than those of later-issued indexed debt securities as a result. Similarly, if the SOFR does not prove to be widely used in securities like the Notes, the trading price of the Notes may be lower than those of debt securities linked to indices that are more widely used. Investors in the Notes may not be able to sell the Notes at all or may not be able to sell the Notes at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk. Investors should consider these matters when making their investment decision with respect to any such Notes.

In light of these developments and similar to the approaches in the United States and the United Kingdom, the Governing Council of the European Central Bank ("**ECB**") has decided to develop a euro short-term rate ("**€STR**") based on data already available to the eurosystem. €STR reflects the wholesale euro unsecured overnight borrowing costs of euro area banks, complements existing benchmark rates provided by the private sector and is published on each TARGET2 banking day since 2 October 2019. Given that it cannot be excluded that further changes will be implemented and, in particular, that there is no historical data or trends that investors could rely on and that the transition from existing reference rates to €STR could result in further uncertainties and limitations, investors in the Notes should consider all these factors when making their investment decision with respect to any such Notes.

Currency Risk

Noteholders of Notes denominated in a foreign currency (i.e. a currency other than euro) are particularly exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors, such as macro-economic factors, speculative transactions and interventions by central banks and governments.

A change in the value of any foreign currency against the euro, for example, will result in a corresponding change in the euro value of Notes denominated in a currency other than euro and a corresponding change in the euro value of interest and principal payments made in a currency other than euro in accordance with the terms of such Notes. If the underlying exchange rate falls and the value of the euro rises

correspondingly, the price of the Notes and the value of interest and principal payments made thereunder expressed in euro falls.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, investors may receive less interest or principal than expected.

Risks related to Renminbi denominated Notes

Renminbi is not freely convertible at present. This may adversely affect the liquidity of the Renminbi denominated Notes; the availability of Renminbi funds for servicing the Renminbi denominated Notes may be subject to future limitations imposed by the People's Republic of China (the "**PRC**") government. The PRC government continues to regulate conversion between Renminbi and foreign currencies, including the euro, despite the significant reduction over the years by the PRC government of control over routine foreign exchange transactions under current accounts. Currently participating banks in, inter alia, Frankfurt, London, Singapore, Hong Kong, Macau and Taiwan have been permitted to engage in the settlement of Renminbi trade transactions. This represents a current account activity.

While there have been several reforms to further reduce governmental control over foreign exchange transactions in recent years, there is no assurance that the PRC government will continue to liberalise a control over cross-border Renminbi remittances in the future or that new PRC regulations will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. In the event that funds cannot be repatriated outside the PRC in Renminbi, this may affect the overall availability of Renminbi outside the PRC and the ability of the Issuer to source Renminbi to perform its obligations under Renminbi denominated Notes.

There is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Renminbi denominated Notes and the Issuer's ability to source Renminbi outside the PRC to service the Renminbi denominated Notes

As a result of the restrictions imposed by the PRC government on cross-border Renminbi fund flows, the availability of Renminbi outside of the PRC is limited. Currently, licensed banks in Singapore, Hong Kong and Taiwan may offer limited Renminbi denominated banking services to Singapore residents, Hong Kong residents, Taiwan residents and specified business customers. The People's Bank of China ("**PBOC**") has also established a Renminbi clearing and settlement system for participating banks in Hong Kong, Singapore, Taiwan, London, Frankfurt and Seoul. Each of Industrial and Commercial Bank of China, Singapore Branch, Bank of China (Hong Kong) Limited, Bank of China, Taipei Branch, China Construction Bank (London) Limited, Bank of China, Frankfurt Branch and Bank of Communications, Seoul Branch (each a "**Renminbi Clearing Bank**") has entered into settlement agreements with the PBOC to act as the Renminbi clearing bank in Singapore, Hong Kong, Taiwan, London, Frankfurt and Seoul, respectively.

However, the current size of Renminbi-denominated financial assets outside the PRC is limited. Renminbi business participating banks do not have direct Renminbi liquidity support from the PBOC. The relevant Renminbi Clearing Bank only has access to onshore liquidity support from the PBOC for the purposes of squaring open positions of participating banks for limited types of transactions, including open positions resulting from conversion services for corporations relating to cross-border trade settlement. The relevant Renminbi Clearing Bank is not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services and the participating banks will need to source Renminbi from the offshore market to square such open positions.

Although it is expected that the offshore Renminbi market will continue to grow in depth and size, its growth is subject to many constraints as a result of PRC laws and regulations on foreign exchange. There is no assurance that new PRC regulations will not be promulgated or the settlement agreements will not be terminated or amended in the future which will have the effect of restricting availability of Renminbi offshore. The limited availability of Renminbi outside the PRC may affect the liquidity of the Renminbi Notes. To the extent the Issuer is required to source Renminbi in the offshore market to service its Renminbi Notes, there is no assurance that the Issuer will be able to source such Renminbi on satisfactory terms, if at all.

The PRC government has gradually liberalised the regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. Consequently, the trading price of Notes denominated in Renminbi will vary with fluctuations in Renminbi interest rates. If a Noteholder tries to sell such Notes before their maturity, he may receive an offer that is less than his original investment. The value of Renminbi against the Euro or other foreign currencies fluctuates and is affected by changes in the PRC and international political and economic conditions and by many other factors. Except in the limited

circumstances as described in the terms and conditions, the Issuer will make all payments of interest and principal with respect to the Renminbi Notes in Renminbi. As a result, the value of these Renminbi payments in euro or other applicable foreign currency terms may vary with the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the euro or other applicable foreign currency, the value of a Noteholder's investment in euro or other applicable foreign currency terms will decline.

If the Issuer cannot obtain Renminbi and is not able, or it is impracticable for it, to satisfy its obligation to pay interest and principal on the Renminbi Notes when due, in whole or in part, in Renminbi in the relevant Renminbi Settlement Centre as a result of Inconvertibility, Non transferability or Illiquidity (each, as defined in § 4 of the Terms and Conditions), the Issuer shall be entitled to postpone any such payment or, on giving not less than five or more than 30 days' irrevocable notice to the Noteholders prior to the due date for payment, to settle any such payment, in whole or in part, in U.S. dollars on the due date at the USD Equivalent (as defined in in § 4 of the Terms and Conditions) of any such interest or principal amount otherwise payable in Renminbi, as the case may be.

Risks related to the German Act on Debt Securities of 2009 (Schuldverschreibungsgesetz)

Since the Terms and Conditions of Notes issued under the Programme provide for meetings of Noteholders of a series of Notes or the taking of votes without a meeting, the Terms and Conditions of such Notes may be amended (as proposed or agreed by the Issuer) by majority resolution of the Noteholders of such Notes and any such majority resolution will be binding on all Noteholders. Any Noteholders is therefore subject to the risk that its rights against the Issuer under the Terms and Conditions of the relevant series of Notes are amended, reduced or even cancelled by a majority resolution of the Noteholders. Any such majority resolution will even be binding on Noteholders who have declared their claims arising from the Notes due and payable based on the occurrence of an event of default but who have not received payment from the Issuer prior to the amendment taking effect. According to the German Act on Debt Securities of 2009 (*Schuldverschreibungsgesetz* – "**SchVG**"), the relevant majority for Noteholders' resolutions is generally based on votes cast, rather than on the aggregate principal amount of the relevant Notes outstanding. Therefore, any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the relevant Notes outstanding.

Under the SchVG, an initial common representative (*gemeinsamer Vertreter*) of the Noteholders (the "**Noteholders' Representative**") may be appointed in the terms and conditions of an issue.

However, no initial Noteholders' Representative might be appointed in the Terms and Conditions at the issue date. Any appointment of a Noteholders' Representative at a later stage will, therefore, require a majority resolution of the Noteholders of the Notes. If the appointment of a Noteholders' Representative is delayed, this will make it more difficult for Noteholders to take collective action to enforce their rights under the Notes.

If a Noteholders' Representative will be appointed by majority decision of the Noteholders it is possible that Noteholders may be deprived of their individual right to pursue and enforce its rights under the Terms and Conditions against the Issuer, if such right was passed to the Noteholders' Representative by majority vote who is then exclusively responsible to claim and enforce the rights of all the Noteholders.

Payments under the Notes may be subject to withholding tax pursuant to FATCA and national legislation implementing FATCA/respective intergovernmental agreements

Payments of interest on the Notes and to "foreign financial institutions" with respect to the Notes by BMW US Capital may, under certain circumstances, be subject to withholding of U.S. tax at a rate of 30.00% pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986, as amended and the regulations promulgated thereunder ("**FATCA**") unless the payee foreign financial institution (i) enters into an agreement with the U.S. Internal Revenue Service (or other relevant taxing authority) to, among other things, disclose the identity of certain U.S. account holders at the institution (or the institution's affiliates), annually report certain information about such accounts or, (ii) where an applicable intergovernmental agreement between the United States and another jurisdiction applies, disclose and provide such information to the taxing authority in such jurisdiction and comply with applicable rules or laws implementing such intergovernmental agreement implementing FATCA in a specific jurisdiction or (iii) is otherwise deemed compliant with FATCA. A foreign financial institution is defined broadly under FATCA to include non-U.S. banks, non-U.S. custodians and certain non-U.S. investment vehicles engaged in

investing, reinvesting or trading in financial assets. Payments of the foregoing amounts made to certain other foreign entities that do not disclose certain information about any substantial U.S. owners (or certify that they do not have any substantial U.S. owners) may also be subject to withholding at the rate of 30.00% under FATCA.

With respect to Notes issued after the date that is six months after the date that final U.S. treasury regulations define the term "foreign passthru payment" (the "**Passthru Payment Grandfathering Date**") or Notes materially modified after the Passthru Payment Grandfathering Date by any Issuer other than BMW US Capital, the Issuer may, beginning on the date that is two years after the date that final U.S. treasury regulations define the term "foreign passthru payment", under certain circumstances, be required under FATCA, to withhold U.S. tax at a rate of 30.00% on all or a portion of payments of interest which are treated as "passthru payments" made to certain holders that do not comply with certain information requests and to foreign financial institutions that do not comply with the requirements described in the preceding paragraph.

The United States and a number of other jurisdictions have entered into intergovernmental agreements to facilitate the implementation of FATCA in such jurisdiction (each, an "**IGA**"). Pursuant to FATCA and the "Model 1" and "Model 2" IGAs released by the United States, a foreign financial institution (a "**FFI**") in an IGA signatory country which is in compliance with applicable legal requirements could be treated as a "**Reporting FI**" that is generally not subject to withholding under FATCA on any payments it receives. Further, an FFI in a Model 1 IGA⁵ jurisdiction would generally not be required to withhold under FATCA, any other IGA or any law implementing an IGA, from payments it makes (unless it has agreed to do so under the U.S. "qualified intermediary", "withholding foreign partnership", or "withholding foreign trust" regimes). The Model 2 IGA⁶ leaves open the possibility that a Reporting FI might in the future be required to withhold on foreign passthru payments and payments that it makes to holders that do not provide the requisite information. Under each Model IGA, regardless of any withholding required to be made, a Reporting FI would be required to report certain information in respect of its account holders and investors to the tax authority of the relevant IGA signatory country or to the U.S. Internal Revenue Service, as applicable.

The Federal Republic of Germany and the Netherlands have each entered into an IGA with the United States based largely on the Model 1 IGA. Germany has also adopted legislation to implement the IGA into national law. Japan has entered into an IGA with the United States based largely on the Model 2 IGA. The government of each of these countries is required to pass legislation to impose the IGA obligations under local law. The implications of the FATCA regime to financial institutions (or investors holding notes through financial institutions) in such jurisdictions will depend on the final form of this implementing legislation, associated guidance and the manner in which it is administered. There can be no assurance that any Issuer will be treated as a Reporting FI or that it would not be required to withhold under FATCA or pursuant to an applicable IGA.

If an amount in respect of U.S. withholding tax were to be deducted or withheld from interest or other payments on the Notes as a result of a holder's failure to comply with FATCA, none of the Issuer, the Guarantor (if any), any paying agent or any other person would pursuant to the conditions of the Notes be required to pay additional amounts as a result of the deduction or withholding of such tax.

If, on or after the Passthru Payment Grandfathering Date pursuant to § 10 (*Substitution*) in the Terms and Conditions of the Notes, a New Issuer is substituted for the Issuer of Notes outstanding on the Passthru Payment Grandfathering Date and if such substitution results in a deemed exchange of the Notes for U.S. federal income tax purposes, then such Notes would be considered "materially modified" under FATCA and would not be treated as outstanding as of the Passthru Payment Grandfathering Date so could become subject to withholding under FATCA.

In addition, if on or after the Passthru Payment Grandfathering Date, pursuant to § 11 (*Further Issues, Purchases and Cancellation*) in the Terms and Conditions of the Notes, the Issuer issues additional Notes, such Notes would not be treated as outstanding as of the Passthru Payment Grandfathering Date unless they are issued pursuant to a "qualified reopening" for U.S. federal income tax purposes. If such additional

⁵ The term "**Model 1 IGA**" means an agreement or arrangement between the United States or the Treasury Department and a foreign government or one or more agencies thereof to implement FATCA through reporting by financial institutions to such foreign government or agency thereof, followed by automatic exchange of the reported information with the IRS. The IRS will publish a list identifying all countries that are treated as having in effect a Model 1 IGA.

⁶ The term "**Model 2 IGA**" means an agreement or arrangement between the United States or the Treasury Department and a foreign government or one or more agencies thereof to facilitate the implementation of FATCA through reporting by financial institutions directly to the IRS in accordance with the requirements of an FFI agreement, supplemented by the exchange of information between such foreign government or agency thereof and the IRS. The IRS will publish a list identifying all countries that are treated as having in effect a Model 2 IGA.

Notes are not issued in a "qualified reopening", such additions and the Notes would become subject to withholding under FATCA.

Noteholders may face risks relating to the proposed financial transactions tax ("FTT")

On 14 February 2013, the European Commission published a proposal (the "**Commission's proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**").

The Commission's proposal has very broad scope and could, if introduced, apply to certain dealings in Notes (including secondary market transactions) in certain circumstances.

FTT could apply in certain circumstances to persons both within and outside of the participating member states.

However, the FTT proposal remains subject to negotiation between participating member states. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU member states may decide to participate. Alternatively, some Member States might even decide to introduce an own national FTT.

Prospective investors of Notes are advised to seek their own professional advice in relation to the FTT.

Noteholders may face risks relating to the Netherland Withholding Tax Act (Wet bronbelasting 2021)

As of 1 January 2021, the Netherlands applies a withholding tax on interest and royalty payments to "related entities" tax resident in a "listed jurisdiction". The new withholding tax will generally apply to interest payments made by an entity tax resident in the Netherlands, like BMW Finance and BMW International Investment. If payments in respect of the Notes were to become subject to this new withholding tax, BMW Finance and BMW International Investment would make the required withholding or deduction for the account of the Noteholder and would not be required to pay additional amounts in respect of the withholding or deduction (see § 7 (*Taxation*)).

Prospective investors in the Notes should consult their own tax advisers as to whether this new withholding tax on interest in the Netherlands could be relevant to them.

Other related Risks

Risks related to Credit Ratings

One or more independent credit rating agencies may assign credit ratings to the Notes. The ratings may not reflect the potential impact of all risks related to the structure, market, additional risk factors discussed herein and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal by the rating agency at any time. No assurance can be given that a credit rating will remain constant for any given period of time or that a credit rating will not be reduced or withdrawn entirely by the credit rating agency if, in its judgment, circumstances so warrant. Rating agencies may also change their methodologies for rating securities in the future. Any suspension, reduction or withdrawal of the credit rating assigned to the relevant Notes by one or more of the credit rating could adversely affect the value and trading of such Notes.

ISSUE PROCEDURES

General

The relevant Issuer and the relevant Dealer(s) will agree on the terms and conditions applicable to each particular Tranche of Notes (the "**Conditions**"). The Conditions will be constituted by the relevant set of Terms and Conditions of the Notes set forth below (the "**Terms and Conditions**") as further specified by the Final Terms (the "**Final Terms**") as described below.

Options for sets of Terms and Conditions

A separate set of Terms and Conditions applies to each type of Notes, as set forth below. The Final Terms provide for the relevant Issuer to choose between the following Options:

- Option I – Terms and Conditions for Notes with fixed interest rates;
- Option II – Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The relevant Issuer may document the Conditions of an individual issue of Notes in either of the following ways:

- The Final Terms shall be completed as set out therein. The Final Terms shall determine which of the Option I or Option II, including certain further options contained therein, respectively, shall be applicable to the individual issue of Notes by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Base Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions, which will be attached to each global note representing the Notes of the relevant Tranche. This type of documentation of the Conditions will be required where the Notes are publicly offered, in whole or in part, or are to be initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine which of Option I or Option II and of the respective further options contained in each of Option I or Option II are applicable to the individual issue by referring to the relevant provisions of the relevant set of Terms and Conditions as set out in the Base Prospectus only. The Final Terms will specify that the provisions of the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus, taken together, shall constitute the Conditions. Each global note representing a particular Tranche of Notes will have the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus attached.

Determination of Options / Completion of Placeholders

The Final Terms shall determine which of the Option I or Option II shall be applicable to the individual issue of Notes. Each of the sets of Terms and Conditions of Option I or Option II contains also certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in the Base Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

Determination of Options

The relevant Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference of the Final Terms to the respective sections of the relevant set of Terms and Conditions as set out in the Base Prospectus. If the Final Terms do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Conditions.

Completion of Placeholders

The Final Terms will specify the information with which the placeholders in the relevant set of Terms and Conditions will be completed. In the case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Conditions.

Controlling Language

As to the controlling language of the respective Conditions, the following applies:

- In the case of Notes (i) publicly offered, in whole or in part, in the Federal Republic of Germany, or (ii) initially distributed, in whole or in part, to non-qualified investors in the Federal Republic of Germany, German will be the controlling language.
- In other cases, the relevant Issuer will elect either German or English to be the controlling language.

In addition to the specification of the controlling language for the respective Conditions, the Final Terms will specify whether a non-binding English/German language translation, as the case may be, will be prepared for convenience purposes.

**TERMS AND CONDITIONS OF THE NOTES
(GERMAN LANGUAGE VERSION)**

Die Emissionsbedingungen (die "**Emissionsbedingungen**") der Schuldverschreibungen sind nachfolgend in zwei Optionen aufgeführt:

Option I umfasst den Satz der Emissionsbedingungen, der auf Tranchen von Schuldverschreibungen mit fester Verzinsung Anwendung findet.

Option II umfasst den Satz der Emissionsbedingungen, der auf Tranchen von Schuldverschreibungen mit variabler Verzinsung Anwendung findet.

Der Satz von Emissionsbedingungen für jede dieser Optionen enthält bestimmte weitere Optionen, die entsprechend gekennzeichnet sind, indem die jeweilige optionale Bestimmung durch Instruktionen und Erklärungen in eckigen Klammern innerhalb des Satzes der Emissionsbedingungen bezeichnet wird.

In den Endgültigen Bedingungen wird die Emittentin festlegen, welche der Option I oder Option II (einschließlich der jeweils enthaltenen bestimmten weiteren Optionen) für die einzelne Emission von Schuldverschreibungen Anwendung findet, indem entweder die betreffenden Angaben wiederholt werden oder auf die betreffenden Optionen verwiesen wird.

Soweit weder die Emittentin noch die Garantin zum Zeitpunkt der Billigung des Basisprospektes Kenntnis von bestimmten Angaben hatte, die auf eine einzelne Emission von Schuldverschreibungen anwendbar sind, enthält dieser Basisprospekt Leerstellen in eckigen Klammern, die maßgeblich durch die Endgültigen Bedingungen zu vervollständigenden Angaben enthalten.

[Im Fall, dass die Endgültigen Bedingungen, die für eine einzelne Emission anwendbar sind, nur auf die weiteren Optionen verweisen, die im Satz der Emissionsbedingungen der Option I oder Option II enthalten sind, ist folgendes anwendbar: Die Bestimmungen dieser Emissionsbedingungen gelten für diese Schuldverschreibungen so, wie sie durch die Angaben der beigefügten endgültigen Bedingungen (die "**Endgültigen Bedingungen**") vervollständigt werden. Die Leerstellen in den auf die Schuldverschreibungen anwendbaren Bestimmungen dieser Emissionsbedingungen gelten als durch die in den Endgültigen Bedingungen enthaltenen Angaben ausgefüllt, als ob die Leerstellen in den betreffenden Bestimmungen durch diese Angaben ausgefüllt wären; alternative oder wählbare Bestimmungen dieser Emissionsbedingungen, deren Entsprechungen in den Endgültigen Bedingungen nicht ausgefüllt oder gestrichen sind, gelten als aus diesen Emissionsbedingungen gestrichen; sämtliche auf die Schuldverschreibungen nicht anwendbaren Bestimmungen dieser Emissionsbedingungen (einschließlich der Anweisungen, Anmerkungen und der Texte in eckigen Klammern) gelten als aus diesen Emissionsbedingungen gestrichen, so dass die Bestimmungen der Endgültigen Bedingungen Geltung erhalten. Kopien der Endgültigen Bedingungen sind kostenlos bei der bezeichneten Geschäftsstelle der Emissionsstelle und bei der Hauptgeschäftsstelle der Emittentin erhältlich; bei nicht an einer Börse notierten Schuldverschreibungen sind Kopien der betreffenden Endgültigen Bedingungen allerdings ausschließlich für die Inhaber (wie in § 1 (5) definiert) solcher Schuldverschreibungen erhältlich.]

[Bei Schuldverschreibungen der Bayerische Motoren Werke Aktiengesellschaft, der BMW Finance N.V., der BMW International Investment B.V. oder der BMW Japan Finance Corp., einfügen:

(3) *Vorläufige Globalurkunde – Austausch.*

- (a) Die Schuldverschreibungen sind anfänglich durch eine vorläufige Globalurkunde (die "**Vorläufige Globalurkunde**") ohne Zinsscheine verbrieft. Die vorläufige Globalurkunde und die Dauerglobalurkunde (jeweils eine "**Globalurkunde**") tragen jeweils die

eigenhändigen oder faxsimilierten Unterschriften zweier ordnungsgemäß bevollmächtigter Vertreter der Emittentin und sind jeweils von der Emissionsstelle oder in deren Namen mit einer Kontrollunterschrift versehen. Einzelkunden und Zinsscheine werden nicht ausgegeben.

- (b) Die vorläufige Globalurkunde wird an einem Tag gegen die Dauerglobalurkunde ausgetauscht, der nicht weniger als 40 Tage nach dem Tag der Ausgabe der vorläufigen Globalurkunde liegen darf. Zinszahlungen auf durch eine vorläufige Globalurkunde verbrieft Schuldverschreibungen erfolgen erst nach Vorlage solcher Bescheinigungen. Eine gesonderte Bescheinigung ist hinsichtlich einer jeden solchen Zinszahlung erforderlich. Jede Bescheinigung, die am oder nach dem 40. Tag nach dem Tag der Ausgabe der vorläufigen Globalurkunde eingeht, wird als ein Ersuchen behandelt werden, diese vorläufige Globalurkunde gemäß Absatz (b) dieses § 1 (3) auszutauschen. Wertpapiere, die im Austausch für die vorläufige Globalurkunde geliefert werden, sind nur außerhalb der Vereinigten Staaten (wie in § 4 (3) definiert) zu liefern.]

(4) *Clearing System.*

- [(a)] [Die][Jede] [vorläufige] Globalurkunde [(falls diese nicht ausgetauscht wird) und/oder jede Dauerglobalurkunde] wird solange von einem oder im Namen eines Clearing Systems verwahrt, bis sämtliche Verbindlichkeiten der Emittentin aus den Schuldverschreibungen erfüllt sind. **"Clearing System"** bedeutet **[Bei mehr als einem Clearing System einfügen: jeweils]** Folgendes: [Clearstream Banking AG, Mergenthalerallee 61, 65760 Eschborn, Bundesrepublik Deutschland ("**CBF**")] [Clearstream Banking S.A., 42 Avenue JF Kennedy, 1855 Luxemburg, Großherzogtum Luxemburg ("**CBL**")] [Euroclear Bank SA/NV, Boulevard du Roi Albert II, 1210 Brüssel, Belgien ("**Euroclear**")] [CBL und Euroclear jeweils ein "**ICSD**" und zusammen die "**ICSDs**"] [,] [und] **[anderes Clearing System angeben]** oder jeder Funktionsnachfolger, der die Funktionen **[Bei mehr als einem Clearing System einfügen: jedes der Clearing Systeme]** **[Falls ein Clearing System, einfügen: des Clearing Systems]** übernimmt.

über den Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen, und eine zu diesen Zwecken von einem ICSD jeweils ausgestellte Bestätigung mit dem Gesamtnennbetrag der so verbrieften Schuldverschreibungen ist ein schlüssiger Nachweis über den Inhalt des Registers des jeweiligen ICSD zu diesem Zeitpunkt.

Bei Rückzahlung oder Zahlung einer Rate oder einer Zinszahlung bezüglich der durch die Globalurkunde verbrieften Schuldverschreibungen bzw. bei Kauf und Entwertung der durch die Globalurkunde verbrieften Schuldverschreibungen stellt die Emittentin sicher, dass die Einzelheiten über Rückzahlung und Zahlung bzw. Kauf und Löschung bezüglich der Globalurkunde *pro rata* in die Unterlagen der ICSDs eingetragen werden, und dass nach dieser Eintragung vom Gesamtnennbetrag der in die Register der ICSDs aufgenommenen und durch die Globalurkunde verbrieften Schuldverschreibungen der Gesamtnennbetrag der zurückgekauften bzw. gekauften und entwerteten Schuldverschreibungen bzw. der Gesamtbetrag der so gezahlten Raten abgezogen wird.]

STATUS, VERPFLICHTUNGSERKLÄRUNG[, GARANTIE]

(1) *Status.* Die Schuldverschreibungen stellen direkte, unbedingte, nicht nachrangige und nicht besicherte Verbindlichkeiten der Emittentin dar, die den gleichen Rang (ausgenommen Verbindlichkeiten aufgrund von nationalen oder lokalen Steuervorschriften, anderen gesetzlichen Ausnahmeregelungen, gesetzlichen Vorschriften und Verwaltungsvorschriften) mit allen anderen unbesicherten und nicht nachrangigen Verbindlichkeiten haben.

(2) *Verpflichtungserklärung der Emittentin.* Die Emittentin hat sich in einer separaten Erklärung (im Folgenden die "**Verpflichtungserklärung**" genannt) gegenüber den Inhabern verpflichtet, solange bis Kapital, etwaige Zinsen und etwaige zusätzliche Beträge gemäß § 7 (1) im vollen Umfang bei der jeweiligen Zahlstelle oder einer anderen gemäß § 6 ernannten Zahlstelle bereitgestellt worden sind, keine gegenwärtigen oder zukünftigen Verbindlichkeiten (einschließlich Verbindlichkeiten aus Garantien oder Sicherheiten) aus anderen internationalen Kapitalmarktverbindlichkeiten (wie nachfolgend definiert) durch irgendwelche Grund- oder Mobiliarpfandrechte an ihrem gegenwärtigen oder zukünftigen Grundbesitz oder Vermögenswerten sicherzustellen oder sicherstellen zu lassen, es sei denn, dass diese Schuldverschreibungen zu gleicher Zeit und im gleichen Rang anteilig an dieser Sicherstellung teilnehmen. Ausgenommen hiervon sind Grund- oder Mobiliarpfandrechte und andere Besicherungen von Verbindlichkeiten aufgrund von nationalen oder lokalen Steuervorschriften, anderen gesetzlichen Ausnahmeregelungen, gesetzlichen Vorschriften und Verwaltungsvorschriften. Im Falle einer Besicherung dieser Schuldverschreibungen durch die Emittentin gemäß dieses § 2 (2) sind zugunsten der Inhaber die Sicherheiten mit den üblichen Rechten und Pflichten zu bestellen. Wenn ein Inhaber nach Eintritt eines der in § 9 aufgeführten Kündigungsgründe, die die Inhaber zur Kündigung berechtigen, wegen des Kapitals von nicht schon aus anderen Gründen fälligen Schuldverschreibungen eine für die Schuldverschreibungen gegebene Sicherheit in Anspruch nimmt, gelten die betreffenden Schuldverschreibungen in jeder Beziehung als fällig.

(3) *Sicherheiten für Asset-Backed-Securities.* Um etwaige Zweifel zu vermeiden, die in diesem § 2 enthaltene Verpflichtung gilt nicht in Bezug auf Sicherheiten, die in Zusammenhang mit asset-backed securities (strukturierte Wertpapiere, die mit Vermögenswerten besichert sind) gestellt werden, die von einer Zweckgesellschaft begeben werden, und bei denen die Emittentin die ursprüngliche Inhaberin der zugrunde liegenden Vermögenswerte ist.

(4) *Internationale Kapitalmarktverbindlichkeit.* Für die Zwecke dieser Emissionsbedingungen bedeutet "**internationale Kapitalmarktverbindlichkeit**" jede Emission von Schuldverschreibungen mit einer ursprünglichen Laufzeit von mehr als einem Jahr.

(5) *Garantie.* Die Bayerische Motoren Werke Aktiengesellschaft (die "**Garantin**") hat gegenüber den Inhabern die unbedingte und unwiderrufliche Garantie für die ordnungsgemäße und pünktliche Zahlung des Kapitals und etwaiger Zinsen einschließlich gegebenenfalls gemäß § 7 (1) zusätzlich erforderlicher Beträge in Übereinstimmung mit diesen Emissionsbedingungen übernommen (die "**Garantie**"). Die Garantie gibt jedem Inhaber das Recht, Erfüllung der in der Garantie übernommenen Verpflichtungen unmittelbar von der Garantin zu verlangen und diese Verpflichtungen unmittelbar gegen die Garantin durchzusetzen.

(6) *Verpflichtungserklärung der Garantin.* Die Garantin hat sich in der Verpflichtungserklärung gegenüber den Inhabern verpflichtet, solange bis Kapital und etwaige Zinsen sowie etwaige zusätzliche Beträge gemäß § 7 (1) bei der jeweiligen Zahlstelle oder einer anderen gemäß § 6 ernannten Zahlstelle bereitgestellt worden sind, keine gegenwärtigen oder zukünftigen Verbindlichkeiten (einschließlich Verbindlichkeiten aus Garantien oder Sicherheiten) aus anderen internationalen Kapitalmarktverbindlichkeiten durch irgendwelche Grund- oder Mobiliarpfandrechte an ihrem gegenwärtigen oder zukünftigen Grundbesitz oder Vermögenswerten sicherzustellen oder sicherstellen zu lassen, es sei denn, dass diese Schuldverschreibungen zu gleicher Zeit und im gleichen Rang anteilig an dieser Sicherstellung teilnehmen. Ausgenommen hiervon sind Grund- oder Mobiliarpfandrechte und andere Besicherungen aufgrund von nationalen oder lokalen Steuervorschriften, anderen gesetzlichen Ausnahmeregelungen, gesetzlichen Vorschriften und Verwaltungsvorschriften. Im Falle einer Besicherung dieser Schuldverschreibungen durch die Garantin gemäß dieses § 2 (6) sind zugunsten der Inhaber die Sicherheiten mit den üblichen Rechten und Pflichten zu bestellen. Wenn ein Inhaber nach Eintritt eines der in § 9 aufgeführten Kündigungsgründe, die die Inhaber zur Kündigung berechtigen, wegen des Kapitals von nicht schon aus anderen Gründen fälligen Schuldverschreibungen eine für die Schuldverschreibungen gegebene Sicherheit in Anspruch nimmt, gelten die betreffenden Schuldverschreibungen in jeder Beziehung als fällig.

(7) *Sicherheiten für Asset-Backed-Securities.* Um etwaige Zweifel zu vermeiden, die in diesem § 2 enthaltene Verpflichtung gilt nicht in Bezug auf Sicherheiten, die in Zusammenhang mit asset-backed-securities (strukturierte Wertpapiere, die mit Vermögenswerten besichert sind) gestellt werden, die von einer Zweckgesellschaft begeben werden, und bei denen die Garantin die ursprüngliche Inhaberin der zugrunde liegenden Vermögenswerte ist.]

§ 3 ZINSEN

(1) *Zinssatz und Zinszahlungstage.* Die Schuldverschreibungen werden in Höhe ihres Gesamtnennbetrags verzinst, und zwar vom **[Verzinsungsbeginn]** (der "**Verzinsungsbeginn**") (einschließlich) bis zum Fälligkeitstag (wie in § 5 (1) definiert) (ausschließlich) mit jährlich **[Zinssatz]**%.

Die Zinsen sind nachträglich am **[Festzinstermine]** eines jeden Jahres, vorbehaltlich einer Anpassung gemäß § 4 (5), zahlbar (jeweils ein "**Zinszahlungstag**"). (2) *Zinslauf.* Der Zinslauf der Schuldverschreibungen endet an dem Tag, der dem Tag vorangeht, an dem sie zur Rückzahlung fällig werden. Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht einlöst, endet die Verzinsung des ausstehenden Nennbetrags der Schuldverschreibungen nicht an dem

Tag, der dem Tag der Fälligkeit vorangeht, sondern erst an dem Tag, der dem Tag der tatsächlichen Rückzahlung der Schuldverschreibungen vorangeht. Weitergehende Ansprüche der Inhaber bleiben unberührt.

(3) *Unterjährige Berechnung der Zinsen.* Sofern Zinsen für einen Zeitraum von weniger als einem Jahr zu berechnen sind, erfolgt die Berechnung auf der Grundlage des Zinstagequotienten (wie nachstehend definiert).]

(4) *Zinstagequotient.* "**Zinstagequotient**" bezeichnet im Hinblick auf die Berechnung des Zinsbetrags auf eine Schuldverschreibung für einen beliebigen Zeitraum (der "**Zinsberechnungszeitraum**"):

der Anzahl der Tage in dem Zinsberechnungszeitraum, die in die nächste Feststellungsperiode fallen, geteilt durch das Produkt (1) der Anzahl der Tage in dieser Feststellungsperiode und (2) der Anzahl der Feststellungstermine (wie in § 3 (1) angegeben) in einem Kalenderjahr.

"**Feststellungsperiode**" ist die Periode ab einem Zinszahlungstag oder, wenn es keinen solchen gibt, ab dem Verzinsungsbeginn (jeweils einschließlich desselben) bis zum nächsten oder ersten Zinszahlungstag (ausschließlich desselben).]

[Im Fall von 30/360 einfügen: die Anzahl von Tagen in der Periode ab dem letzten Zinszahlungstag (oder wenn es keinen solchen gibt, ab dem Verzinsungsbeginn) (jeweils einschließlich desselben) bis zum betreffenden Zahlungstag (ausschließlich desselben) (wobei die Zahl der Tage auf der Basis von 12 Monaten zu jeweils 30 Tagen berechnet wird), geteilt durch 360.]

[Im Fall von Actual/365 (Fixed) und im Fall von Schuldverschreibungen, deren festgelegte Währung Renminbi ist, einfügen: die tatsächliche Anzahl von Tagen im Zinsberechnungszeitraum dividiert durch 365.]

- [(i)] aufgrund einer Rechtsänderung zu zahlen sind, welche später als 30 Tage nach Fälligkeit der betreffenden Zahlung von Kapital oder Zinsen oder, wenn dies später erfolgt, ordnungsgemäßer Bereitstellung aller fälligen Beträge und einer diesbezüglichen Bekanntmachung gemäß § 12 wirksam wird; oder

Für den Fall, dass (i) der Referenzsatz nicht nur vorübergehend, sondern dauerhaft eingestellt wird und infolgedessen ein Zinssatz am [betreffenden] Zinsfestlegungstag auf der maßgeblichen Bildschirmseite nicht oder nicht für den betreffenden Zeitraum erscheint und/oder (ii) eine Zulassung, Registrierung, Anerkennung, Übernahme, ein Beschluss über die Gleichwertigkeit, eine Genehmigung oder eine Aufnahme in ein öffentliches Register in Bezug auf den Referenzsatz oder den Administrator des Referenzsatzes nicht erteilt wurde oder wird bzw. nicht erfolgt ist oder nicht erfolgen wird oder durch die zuständige Behörde oder sonstige zuständige öffentliche Stelle abgelehnt, verweigert, ausgesetzt oder entzogen wurde oder wird oder die zuständige Behörde oder eine sonstige öffentliche Stelle die Verwendung des Referenzsatzes verbietet, jeweils mit der Folge, dass es der Emittentin und/oder der Berechnungsstelle oder einer anderen Person nach den derzeit oder künftig anwendbaren Gesetzen oder Vorschriften nicht gestattet ist, den betreffenden Referenzsatz im Zusammenhang mit der Erfüllung ihrer jeweiligen Verpflichtungen unter den Schuldverschreibungen zu verwenden, soll der Referenzsatz durch einen Zinssatz ersetzt werden (der "**Nachfolge-Referenzsatz**"), der sich gemäß untenstehender Reihenfolge I bis III am jeweiligen Zinsfestlegungstag bestimmt:]

- I) Der Referenzsatz wird durch den Nachfolge-Referenzsatz ersetzt, der durch den Administrator des Referenzsatzes, die zuständige Zentralbank oder eine Regulierungs- oder Aufsichtsbehörde als Nachfolger des Referenzsatzes für die Laufzeit des Referenzsatzes bekannt gegeben wird und in Übereinstimmung mit geltendem Recht genutzt werden darf.
- II) Soweit eine Bekanntgabe nach I) nicht erfolgt, wird der Unabhängige Sachverständige (wie nachstehend definiert) nach billigem Ermessen (§ 317 BGB) den Nachfolge-Referenzsatz bestimmen, der am ehesten mit dem Referenzsatz vergleichbar ist, wobei der Unabhängige Sachverständige einen branchenweit als am ehesten mit dem Referenzsatz vergleichbar akzeptierten Referenzsatz als Nachfolge-Referenzsatz bestimmen muss, und eine Bildschirmseite bestimmen, die in Verbindung mit dem Nachfolge-Referenzsatz verwendet werden soll und von der Berechnungsstelle akzeptiert wird (die "**Nachfolge-Bildschirmseite**").

Ferner wird der Unabhängige Sachverständige bei Bedarf und nach billigem Ermessen (gemäß § 317 BGB) eine Anpassungsspanne (wie nachstehend definiert) bestimmen und verwenden, welche wirtschaftliche Nachteile oder Vorteile der Inhaber reduziert oder ausschließt, welche durch die Ersetzung des Referenzsatzes durch den Nachfolge-Referenzsatz entstehen könnten. Dabei bezeichnet die "**Anpassungsspanne**" eine Spanne, welche:

- (a) im Fall eines Nachfolge-Referenzsatzes formell im Zusammenhang mit der Ersetzung des Referenzsatzes durch den Nachfolge-Referenzsatz vom Unabhängigen Sachverständigen empfohlen wird; oder
- (b) durch den Unabhängigen Sachverständigen (sofern keine Empfehlung abgegeben wurde) als anerkannter und berücksichtigter Industriestandard für "over-the-counter"-Derivative-Transaktionen mit Bezug auf den Referenzsatz, bei denen dieser durch den Nachfolge-Referenzsatz ersetzt wurde, bestimmt wird; oder
- (c) vom Unabhängigen Sachverständigen als angemessen erachtet wird (sofern dieser bestimmt, dass es keinen anerkannten und berücksichtigten Industriestandard gibt).

Jegliche Bezugnahme auf die Bildschirmseite in diesem Dokument gilt ab dem Datum der Festlegung eines Nachfolge-Referenzsatzes als Bezugnahme auf die Nachfolge-Bildschirmseite und die Regelungen dieses Absatzes gelten entsprechend. Der Unabhängige Sachverständige wird die Emittentin und die Berechnungsstelle über solche Festlegungen am 10. Tag vor einem Zinsfestlegungstag informieren. Anschließend wird die Emittentin die Inhaber gemäß § 12 informieren.

Gleichzeitig mit dieser Mitteilung hat die Emittentin der Emissionsstelle einen durch zwei Unterschriftsberechtigte der Emittentin unterzeichneten Nachweis zu übergeben, (x) der bestätigt, dass ein Einstellungsereignis eingetreten ist, (y) der den Nachfolge-Referenzsatz benennt und (z) der eine etwaige Anpassungsspanne bestimmt, gemäß den Bestimmungen dieses § 3.

Der Nachfolge-Referenzsatz und die Anpassungsspanne (sofern zutreffend) sind in der Form des Nachweises (mit Ausnahme von offensichtlichen Fehlern oder Bösgläubigkeit bei der Festlegung des Nachfolge-Referenzsatzes oder der Anpassungsspanne (sofern zutreffend)) bindend für die Emittentin, die Emissionsstelle, die Berechnungsstelle, die Zahlstelle und die Inhaber.

- III) Sollte der Unabhängige Sachverständige innerhalb von [30] [●] Tagen nach seiner Bestellung keinen Nachfolge-Referenzsatz ermittelt haben, hat er dies der Emittentin unverzüglich mitzuteilen. Nach Erhalt einer solchen Mitteilung oder im Fall, dass die Emittentin trotz Bemühens nach besten Kräften innerhalb von [30] [●] Tagen nachdem die Emittentin ein Einstellungsereignis festgestellt hat und keinen unabhängigen Sachverständigen bestellen kann, ist sie zur vorzeitigen Rückzahlung der Schuldverschreibungen berechtigt. Eine solche Kündigung wird der Berechnungsstelle und den Inhabern von der Emittentin gemäß § 12 mitgeteilt. In dieser Mitteilung muss enthalten sein:
 - (a) die Serie von Schuldverschreibungen, die von der Kündigung betroffen ist; und
 - (b) das Rückzahlungsdatum, welches nicht weniger als **[Anzahl]** [Tage] [Geschäftstage] [TARGET-Geschäftstage] nach dem Datum sein darf, an dem die Mitteilung der Emittentin an die Inhaber erfolgt ist und in jedem Fall nicht auf ein Datum gelegt wird, welches vor dem Datum der tatsächlichen Einstellung des Referenzsatzes liegt.

Sofern sich die Emittentin entscheidet, die Schuldverschreibungen zu kündigen oder nicht vorzeitig zurückzuzahlen, oder falls es der Emittentin oder dem unabhängigen Sachverständigen nicht möglich ist, die Berechnungsstelle über einen Nachfolge-Referenzsatz am 10. Tag vor einem Zinsfestlegungstag zu informieren, ist der Zinssatz für den Maßgeblichen Zeitraum (wie nachfolgend definiert) der Referenzsatz oder das arithmetische Mittel der Referenzsätze auf der Bildschirmseite, wie vorstehend beschrieben, an dem letzten Tag vor dem Zinsfestlegungstag, an dem der Referenzsatz bzw. die Referenzsätze angezeigt wurden **[im Fall einer Marge einfügen: [zuzüglich] [abzüglich] der Marge (wobei jedoch, falls für die relevante Zinsperiode eine andere Marge als für die unmittelbar vorhergehende Zinsperiode gilt, die relevante Marge an die Stelle der Marge für die vorhergehende Zinsperiode tritt)]. [Im Falle einer Marge, die zuzüglich des (relevanten) Referenzsatzes gezahlt wird, einfügen: Nimmt der ermittelte Referenzsatz einen negativen Wert an, wird er gegen die Marge verrechnet, so dass er die Marge verringert.]**

In diesem Unterabsatz bezeichnet "**Maßgeblicher Zeitraum**":

- (i) im Falle einer Kündigung, den Zeitraum vom Zinszahlungstag (einschließlich), der dem Tag der Kündigung unmittelbar vorangeht, bis zum Tag der Rückzahlung (ausschließlich); oder
- (ii) sollte die Emittentin von ihrem Recht der Kündigung keinen Gebrauch machen, den Zeitraum vom letzten Zinszahlungstag (einschließlich) bis zum darauffolgendem Zinszahlungstag (ausschließlich).

"**Unabhängiger Sachverständiger**" bezeichnet eine unabhängige international anerkannte Bank oder einen unabhängigen Finanzberater mit jeweils einschlägiger Expertise, die bzw. der von der Emittentin

zu wirtschaftlich angemessenen Bedingungen unter zumutbaren Bemühungen bestellt wird. Die Berechnungsstelle kann als Unabhängiger Sachverständiger bestellt werden, sofern die Berechnungsstelle zustimmt, als Unabhängiger Sachverständiger zu handeln.

[(3)][(4)] Zinsbetrag. Die Berechnungsstelle wird zu oder baldmöglichst nach jedem Zeitpunkt, an dem der Zinssatz zu bestimmen ist, den auf die Schuldverschreibungen zahlbaren Zinsbetrag in Bezug auf jede festgelegte Stückelung (der "**Zinsbetrag**") für die entsprechende Zinsperiode berechnen. Der Zinsbetrag wird ermittelt, indem der Zinssatz und der Zinstagequotient (wie nachstehend definiert) auf jede festgelegte Stückelung angewendet werden, wobei der resultierende Betrag **[Falls die festgelegte Währung Euro ist einfügen:** auf den nächsten Euro 0,01 auf oder abgerundet wird, wobei Euro 0,005 aufgerundet werden] **[Falls die festgelegte Währung nicht Euro ist, einfügen:** auf die kleinste Einheit der festgelegten Währung auf- oder abgerundet wird, wobei 0,5 solcher Einheiten aufgerundet werden].

[(4)][(5)] Mitteilungen von Zinssatz und Zinsbetrag. Die Berechnungsstelle wird veranlassen, dass der Zinssatz, der Zinsbetrag für die jeweilige Zinsperiode, die jeweilige Zinsperiode und der relevante Zinszahlungstag der Emittentin und den Inhabern gemäß § 12 baldmöglichst, aber keinesfalls später als am vierten auf die Berechnung jeweils folgenden **[Falls die Berechnungsstelle eine bezeichnete Geschäftsstelle an einem vorgeschriebenen Ort zu unterhalten hat, einfügen:** Geschäftstag, am Ort der bezeichneten Geschäftsstelle der Berechnungsstelle ist,] **[Falls die Berechnungsstelle keine bezeichnete Geschäftsstelle an einem vorgeschriebenen Ort zu unterhalten hat, einfügen:** **[TARGET-] [Londoner] Geschäftstag]** und jeder Börse, an der die betreffenden Schuldverschreibungen zu diesem Zeitpunkt notiert sind und deren Regeln eine Mitteilung an die Börse verlangen, umgehend, aber keinesfalls später als zu Beginn der jeweiligen Zinsperiode mitgeteilt werden. Im Falle einer Verlängerung oder Verkürzung der Zinsperiode können der mitgeteilte Zinsbetrag und Zinszahlungstag ohne Vorankündigung nachträglich angepasst (oder andere geeignete Anpassungsregelungen getroffen) werden. Jede solche Anpassung wird umgehend allen Börsen, an denen die Schuldverschreibungen zu diesem Zeitpunkt notiert sind, sowie den Inhabern gemäß § 12 mitgeteilt.

[(5)][(6)] Verbindlichkeit der Festsetzungen. Alle Bescheinigungen, Mitteilungen, Gutachten, Festsetzungen, Berechnungen, Quotierungen und Entscheidungen, die von der Berechnungsstelle für die Zwecke dieses § 3 gemacht, abgegeben, getroffen oder eingeholt werden, sind (sofern nicht ein offensichtlicher Irrtum vorliegt) für die Emittentin, die Emissionsstelle, die Zahlstellen und die Inhaber bindend.

[(6)][(7)] Zinslauf. Der Zinslauf der Schuldverschreibungen endet an dem Tag, der dem Tag vorangeht, an dem sie zur Rückzahlung fällig werden. Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht einlöst, endet die Verzinsung des ausstehenden Nennbetrags der Schuldverschreibungen nicht an dem Tag, der dem Tag der Fälligkeit vorangeht, sondern erst an dem Tag, der dem Tag der tatsächlichen Rückzahlung der Schuldverschreibungen vorangeht. Der jeweils geltende Zinssatz wird gemäß diesem § 3 bestimmt. Weitergehende Ansprüche der Inhaber bleiben unberührt.

[(7)][(8)] Zinstagequotient. "**Zinstagequotient**" bezeichnet im Hinblick auf die Berechnung des Zinsbetrags auf eine Schuldverschreibung für einen beliebigen Zeitraum (der "**Zinsberechnungszeitraum**"):

[Im Fall von Actual/Actual (Actual/365) einfügen: die tatsächliche Anzahl von Tagen im Zinsberechnungszeitraum dividiert durch 365 (oder falls ein Teil des Zinsberechnungszeitraumes in ein Schaltjahr fällt, die Summe von (A) der tatsächlichen Anzahl von Tagen in dem Teil des Zinsberechnungszeitraums, die in das Schaltjahr fallen, dividiert durch 366 und (B) die tatsächliche Anzahl von Tagen in dem Teil des Zinsberechnungszeitraums, die nicht in ein Schaltjahr fallen, dividiert durch 365).]

[Im Fall von Actual/365 (Fixed) und im Fall von Schuldverschreibungen, deren festgelegte Währung Renminbi ist, einfügen: die tatsächliche Anzahl von Tagen im Zinsberechnungszeitraum dividiert durch 365.]

[Im Fall von Actual/360 einfügen: die tatsächliche Anzahl von Tagen im Zinsberechnungszeitraum dividiert durch 360.]

Option I comprises the set of Terms and Conditions that apply to Tranches of Notes with fixed interest rates.

Option II comprises the set of Terms and Conditions that apply to Tranches of Notes with floating interest rates.

The set of Terms and Conditions for each of these Options contains certain further options, which are characterised accordingly by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the set of Terms and Conditions.

In the Final Terms, the Issuer will determine whether Option I or Option II including certain further options contained therein, respectively, shall apply with respect to an individual issue of Notes, either by replicating the relevant provisions or by referring to the relevant options.

To the extent that upon the approval of the Base Prospectus neither the Issuer nor the Guarantor had knowledge of certain items which are applicable to an individual issue of Notes, this Base Prospectus contains placeholders set out in square brackets which include the relevant items that will be completed by the Final Terms.

[In the case, the Final Terms applicable to an individual issue only refer to the further options contained in the set of Terms and Conditions for Option I or Option II, the following applies: The provisions of these Terms and Conditions apply to the Notes as completed by the terms of the final terms which are attached hereto (the "**Final Terms**"). - II) If there is no announcement pursuant to I), the Independent Expert (as defined below) will in its reasonable discretion (§ 317 German Civil Code (BGB)) determine the Reference Rate that is most comparable to the Reference Rate, whereby the Independent Expert must determine such reference rate as Successor Reference Rate that is an industry accepted reference rate which is most comparable to the Reference Rate, and determine a screen page which shall be used in connection with the Successor Reference Rate which is also acceptable for the Calculation Agent (the "**Successor Screen Page**").

In addition, the Independent Expert will determine and apply, if required and at its discretion (pursuant to § 317 German Civil Code (BGB)), an Adjustment Spread (as defined below), which reduces or eliminates any economic prejudice or benefit to Noteholders that may arise a result of the replacement for the Reference Rate with the Successor Reference Rate. Any reference to the Screen Page herein shall, from the date of the determination of a Successor Reference Rate, be read as a reference to the Successor Screen Page and the provisions of this paragraph shall apply *mutatis mutandis*. The Independent Expert will notify the Issuer and the Calculation Agent at least 10 days prior to the Determination Date about such determinations. The Issuer shall thereafter inform the Holders in accordance with § 12.

The Successor Reference Rate and the Adjustment Spread (if any) shall be binding on the Issuer, the Fiscal Agent, the Calculation Agent, the Paying Agent and the Holders as evidenced (except in the case of manifest error or bad faith in determining the Successor Reference Rate or the Adjustment Spread (if any)).

- III) If the Independent Expert has not determined a Successor Reference Rate within a period of [30] [●] days after its appointment, it shall notify this fact to the Issuer without delay. Upon receipt of such notice or in the case that the Issuer, despite its best efforts, is not able to appoint an independent expert within a period of [30] [●] days after the Issuer determined that a Discontinuation Event had occurred, the Issuer is entitled to early terminate the Notes. [MiFID II PRODUCT GOVERNANCE / [PROFESSIONAL INVESTORS AND ELIGIBLE COUNTERPARTIES ONLY TARGET MARKET] [RETAIL INVESTORS TARGET MARKET] – As at the date of these Final Terms and solely for the purposes of [the/each] manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties[,] [and] professional clients [and retail clients], each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); and (ii) all channels for distribution of the Notes are appropriate [including investment advice, portfolio management, non-advised sales and pure execution services]. **[Consider any negative target market]** Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturer[s/s] target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer[s/s] target market assessment) and determining appropriate distribution channels[, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable].][Insert further details on target market, client categories etc.]

MiFID II PRODUKTÜBERWACHUNGSPFLICHTEN / [ZIELMARKT PROFESSIONELLE INVESTOREN UND GEEIGNETE GEGENPARTEIEN] [ZIELMARKT KLEINANLEGER] – Die Zielmarktbestimmung im Hinblick auf die Schuldverschreibungen hat – zum Datum dieser Endgültigen Bedingungen und ausschließlich für den Zweck des Produktgenehmigungsverfahrens [des/jedes] Konzepteurs – zu dem Ergebnis geführt, dass (i) der Zielmarkt für die Schuldverschreibungen geeignete Gegenparteien[,] [und] professionelle Kunden [und Kleinanleger], jeweils im Sinne der Richtlinie 2014/65/EU (in der jeweils gültigen Fassung, "**MiFID II**"), umfasst; [und] (ii) alle Kanäle für den Vertrieb der Schuldverschreibungen angemessen sind [einschließlich Anlageberatung, Portfolio-Management, Verkäufe ohne Beratung und reine Ausführungsdienstleistungen]. **[Negativen Zielmarkt berücksichtigen]** Jede Person, die in der Folge die Schuldverschreibungen anbietet, verkauft oder empfiehlt (ein "**Vertriebsunternehmen**") soll die Beurteilung des Zielmarkts [des/der] Konzepteur[s/e] berücksichtigen; ein Vertriebsunternehmen, welches MiFID II unterliegt, ist indes dafür verantwortlich, seine eigene Zielmarktbestimmung im Hinblick auf die Schuldverschreibungen durchzuführen (entweder durch die Übernahme oder durch die Präzisierung der Zielmarktbestimmung [des/der] Konzepteur[s/e]) und angemessene Vertriebskanäle[nach Maßgabe der Pflichten des Vertriebsunternehmens unter MiFID II im Hinblick Geeignetheit bzw. Angemessenheit], zu bestimmen.][Weitere Details bezüglich Zielmarkt, Kundenkategorie etc. einfügen.]

[PROHIBITION OF SALES TO EEA INVESTORS - The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "**EEA**"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended or superseded, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.]¹

[Vertriebsverbot an Privatinvestoren im EWR - Die Schuldverschreibungen sind nicht dazu bestimmt, dass sie Privatinvestoren im Europäischen Wirtschaftsraum (der "EWR") angeboten, verkauft oder auf anderem Wege zur Verfügung gestellt werden und dementsprechend Privatinvestoren im EWR nicht angeboten, verkauft oder auf anderem Wege zur Verfügung gestellt werden. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Notes or otherwise making them available to re-tail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.]³

Ein Privatinvestor im Sinne dieser Vorschrift ist eine Person, die mindestens einer der folgenden Kategorien zuzuordnen ist: (i) ein Kleinanleger im Sinne von Artikel 2 Nummer 8 von Verordnung (EU) Nr. 2017/565 in der Gestalt, in der diese Bestandteil nationalen Rechts auf der Grundlage des European Union (Withdrawal) Act 2018 ("EUWA") ist; (ii) ein Kunde im Sinne der Bestimmungen der FSMA und alle Regeln und Verordnungen gemäß FSMA zur Umsetzung der Richtlinie (EU) 2016/97, der nicht als professioneller Kunde im Sinne von Artikel 2 Absatz 1 Nummer 8 der Verordnung (EU) Nr. 600/2014 in der Gestalt, in der diese Bestandteil nationalen Rechts auf der Grundlage des EUWA ist, einzustufen ist; oder (iii) ein Anleger, der kein qualifizierter Anleger ist im Sinne des Artikels 2 der Verordnung (EU) Nr. 2017/1129 in der Gestalt, in der diese Bestandteil nationalen Rechts auf der Grundlage des EUWA ist. Folglich wurde kein Informationsdokument, wie nach Verordnung (EU) Nr. 1286/2014 in der Gestalt, in der diese Bestandteil nationalen Rechts auf der Grundlage des EUWA ist, (die "GB PRIIPs Verordnung") für Angebote, Vertrieb und die sonstige Zurverfügungstellung der Schuldverschreibungen an Privatinvestoren in GB erforderlich, erstellt und dementsprechend könnte das Angebot, der Vertrieb oder die sonstige Zurverfügungstellung von Schuldverschreibungen an Privatinvestoren in GB nach der GB PRIIPs Verordnung unzulässig sein.]⁴

ECB eligibility
Verwahrung in EZB-fähiger Form

If the note is issued in Classical Global Note form and it is intended to be held in a manner which would allow ECB eligibility

[Note that if this item is applicable it simply means that the Classical Global Note is intended to be deposited directly with Clearstream Banking AG, Frankfurt which does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria (ECB eligibility)]⁽⁵³⁾ [Not applicable]

Wenn die Urkunde in Form einer Classical Global Note begeben wird und die Verwahrung in einer Weise beabsichtigt ist, welche die EZB-Fähigkeit bewirkt

[Im Fall der Anwendbarkeit dieses Punktes ist damit beabsichtigt, die Classical Global Note direkt bei Clearstream Banking AG, Frankfurt einzuliefern. Das bedeutet nicht notwendigerweise, dass die Schuldverschreibungen zum Zeitpunkt ihrer Emission oder zu einem anderen Zeitpunkt während ihrer Laufzeit als geeignete Sicherheit im Sinne der Geldpolitik des Eurosystems und für Zwecke der untertägigen Kreditfähigkeit durch das Eurosystem anerkannt werden. Eine solche Anerkennung hängt von der Erfüllung der Kriterien der Eignung des Eurosystems ab (EZB-Fähigkeit).]⁽⁵⁴⁾ [Nicht anwendbar]

If the note is issued in New Global Note (NGN) form and it is intended to be held in a manner which would allow ECB eligibility

[Note that if this item is applicable it simply means that the Notes are intended upon issue to be deposited with one of the international central securities depositories (ICSDs) as common safekeeper and does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria (ECB eligibility)]⁽⁵⁵⁾ [Not applicable]

⁴⁹ Specify "Applicable" if the Notes may constitute "packaged" products pursuant to the PRIIPs Regulation and no key information document will be prepared in the EEA.

⁵⁰ "Anwendbar" wählen, wenn die Schuldverschreibungen als "verpackte Produkte" nach der PRIIPs Verordnung einzuordnen sein könnten und kein Basisinformationsblatt im EWR erstellt wird.

⁵¹ Specify "Applicable" if the Notes may constitute "packaged" products pursuant to the PRIIPs Regulation and no key information document will be prepared in the UK.

Sofern die Urkunde in Form einer New Global Note (neuen Globalurkunde – NGN) begeben wird und die Verwahrung in einer Weise beabsichtigt ist, welche die EZB-Fähigkeit bewirkt

[Im Fall der Anwendbarkeit dieses Punktes ist damit beabsichtigt, dass die Schuldverschreibungen zum Zeitpunkt ihrer Emission bei einer der internationalen zentralen Verwahrstellen (ICSDs) als gemeinsame Sicherheitsverwahrstelle (common safekeeper) verwahrt werden. Das bedeutet nicht notwendigerweise, dass die Schuldverschreibungen zum Zeitpunkt ihrer Emission oder zu einem anderen Zeitpunkt während ihrer Laufzeit als geeignete Sicherheit im Sinne der Geldpolitik des Eurosystems und für Zwecke der untertägigen Kreditfähigkeit durch das Eurosystem anerkannt werden. Eine solche Anerkennung hängt von der Erfüllung der Kriterien der Eignung des Eurosystems ab (EZB-Fähigkeit).]⁵⁶ [Nicht anwendbar]

If the note is issued in New Global Note (NGN) form and is **not** intended to be held in a manner which would allow ECB eligibility

[Note that whilst this item is applicable at the date of these Final Terms, should the Eurosystem eligibility criteria be amended in the future such that the Notes are capable of meeting them the Notes may then be deposited with one of the ICSDs as common safekeeper. Note that this does not necessarily mean that the Notes will then be recognised as eligible collateral for Eurosystem monetary policy and intra day credit operations by the Eurosystem at any time during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]
[Not applicable]

*Sofern die Urkunde in Form einer New Global Note (neuen Globalurkunde – NGN) begeben wird und **keine** Verwahrung in einer Weise beabsichtigt ist, welche die EZB-Fähigkeit bewirken würde*

*[Obschon dieser Punkt zum Datum dieser Endgültigen Bedingungen Anwendung findet, ist zu beachten, dass die Eignungskriterien des Eurosystems in Zukunft in einer Weise geändert werden könnten, dass die Schuldverschreibungen diese Kriterien erfüllen. In diesem Fall können die Schuldverschreibungen bei einer der internationalen zentralen Verwahrstellen (ICSDs) als gemeinsame Sicherheitsverwahrstelle (common safekeeper) eingereicht werden. Ferner ist zu beachten, dass die Schuldverschreibungen in einem solchen Fall nicht notwendigerweise zu irgendeinem Zeitpunkt während ihrer Laufzeit als geeignete Sicherheit im Sinne der Geldpolitik des Eurosystems und für Zwecke der untertägigen Kreditfähigkeit durch das Eurosystem anerkannt werden. Eine solche Anerkennung hängt davon ab, ob die EZB die Kriterien der Eignung des Eurosystems als erfüllt ansieht.]

DESCRIPTION OF RULES REGARDING RESOLUTIONS OF NOTEHOLDERS

The Terms and Conditions may provide that the Noteholders may agree to amendments or decide on other matters relating to the Notes by way of majority resolution to be passed by taking votes without a meeting pursuant to § 18 and § 9 et seq. SchVG (*Abstimmung ohne Versammlung*). Any such resolution duly adopted by majority resolution of the Noteholders shall be binding on each Noteholder of the respective issue of Notes, irrespective of whether such Noteholder took part in the vote and whether such Noteholder voted in favour or against such resolution.

Under the SchVG, these rules are largely mandatory, although they permit in limited circumstances supplementary provisions set out in or incorporated into the Conditions.

The following is a brief summary of some of the statutory rules regarding the taking of votes without meetings, the passing and publication of resolutions as well as their implementation and challenge before German courts.

Specific Rules Regarding Votes without Meeting

The voting shall be conducted by the person presiding over the taking of votes. Such person shall be (i) a notary public appointed by the Issuer, (ii) where a common Noteholders' Representative has been appointed, the Noteholders' Representative if the vote was solicited by the Noteholders' Representative, or (iii) a person appointed by the competent court.

The notice soliciting the Noteholders' votes shall set out the period within which votes may be cast. During such voting period, the Noteholders may cast their votes to the person presiding over the taking of votes. Such notice shall also set out in detail the conditions to be met for the votes to be valid.

The person presiding over the taking of votes shall ascertain each Noteholder's entitlement to cast a vote based on evidence provided by such Noteholder and shall prepare a list of the Noteholders entitled to vote. If it is established that no quorum exists, the person presiding over the taking of votes may convene a meeting of the Noteholders. Within one year following the end of the voting period, each Noteholder participating in the vote may request a copy of the minutes of such vote and any annexes thereto from the respective Issuer.

Each Noteholder participating in the vote may object in writing to the result of the vote within two weeks following the publication of the resolutions passed. The objection shall be decided upon by the person presiding over the taking of votes. If he remedies the objection, he shall promptly publish the result. If the person presiding over the taking of votes does not remedy the objection, he shall promptly inform the objecting Noteholder in writing.

The Issuer shall bear the costs of the vote and, if the court has convened a meeting, also the costs of such proceedings.

Rules Regarding Noteholders' Meetings Applicable to Votes without Meeting

In addition, the statutory rules applicable to the convening and conduct of Noteholders' meetings will apply *mutatis mutandis* to any vote without a meeting. The following summarises some of such rules.

Meetings of Noteholders may be convened by the Issuer or the Noteholders' Representative, if any. Meetings of Noteholders must be convened if one or more Noteholders holding 5% or more of the outstanding Notes so require for specified reasons permitted by statute.

Meetings may be convened not less than 14 days prior to the date of the meeting. Attendance and exercise of voting rights at the meeting may be made subject to prior registration of Noteholders. The convening notice will provide what proof will be required for attendance and voting at the meeting. The place of the meeting in respect of a German issuer is the place of the issuer's registered office, provided,

however, that where the relevant Notes are listed on a stock exchange within the European Union or the European Economic Area, the meeting may be held at the place of such stock exchange.

The convening notice shall be made publicly available together with the agenda of the meeting setting out the proposals for resolution.

Each Noteholder may be represented by proxy. A quorum exists if Noteholders' representing by value not less than 50% of the outstanding Notes participate in the vote. If the quorum is not reached, a second meeting may be called at which no quorum will be required, provided that where a resolution may only be adopted by a qualified majority, a quorum requires the presence of at least 25% of the aggregate principal amount of outstanding Notes.

All resolutions adopted must be properly published. In the case of Notes represented by one or more Global Notes, resolutions which amend or supplement the Conditions have to be implemented by supplementing or amending the relevant Global Note(s).

In insolvency proceedings instituted in Germany against an Issuer, a Noteholders' Representative, if appointed, is obliged and exclusively entitled to assert the Noteholders' rights under the Notes. Any resolutions passed by for such purpose by majority resolution the Noteholders are subject to the provisions of the Insolvency Code (*Insolvenzordnung*).

If a resolution constitutes a breach of the statute or the Conditions, Noteholders may bring an action to set aside such resolution. Such action must be filed with the competent court within one month following the publication of the resolution.

Recent Events

On 24 February 2022, the Russian military invaded Ukraine, which has significantly increased risks and uncertainties in the global economy and especially Eastern Europe, with far-reaching and potentially long-term adverse consequences for BMW Group's ability to procure supplies from, manufacture or market vehicles in, or otherwise do business in and with Russia and Ukraine, and regional and global economic and political conditions more generally. In addition, sanctions imposed by the EU, the United States and other countries on Russia as well as Russian banks, companies and individuals have adversely affected and will continue to adversely affect BMW Group's business. As a result, on 1 March 2022, BMW Group announced the discontinuation of its local production in Russia and halted all exports of vehicles to Russia until further notice. The war in Ukraine also has a significant impact on Ukraine's automotive supply industry as a result of which BMW Group, for example, had to stop production temporarily at its Dingolfing plant. The war in Ukraine, combined with the ongoing bottleneck for semiconductors, is expected to lead to further production adjustments and downtimes at BMW Group's European plants, which in turn is likely to negatively affect automobile sales figures for the year ended 31 December 2022. See also risk factor "*Macroeconomic, geopolitical or other events could adversely affect the automotive industry and BMW Group*"

Effective 11 February 2022, BMW AG acquired a majority stake in its Chinese joint venture BMW Brilliance Automotive Ltd. ("**BBA**") and increased therewith its indirect shareholding in BBA from 50% to 75%. As of this date, BBA will be fully consolidated in the group financial statements of BMW AG.

Purpose of BMW AG

According § 2 of its articles of association, the general purpose of BMW AG is to engage in the production and sale of engines, engine-equipped vehicles, related accessories and products of the machinery and metalworking industry as well as the rendering of services related to the aforementioned items.

BMW AG shall be entitled to take all actions and measures, which appear necessary or beneficial in order to accomplish the foregoing purposes. In particular, BMW AG shall be entitled to acquire or sell land, set up domestic and foreign branches, establish, acquire and participate in other companies and enter into affiliation and similar agreements.

Principal Activities

BMW Group is organised into four segments:

- *Automotive*: The Automotive segment develops, manufactures and sells automobiles as well as spare parts and accessories manufactured in-house, by foreign subsidiaries and by external suppliers, and performs services related to these products. Sales activities are carried out primarily through branches, subsidiaries, independent dealerships and importers.

The segment also includes the operating companies BMW (UK) Investments Ltd. and Bavaria Lloyd Reisebüro GmbH, which are not allocated to one of the other segments. The Other Entities segment is not considered part of BMW Group's primary business.

Principal Markets

Despite global challenges such as semiconductor component supply issues and the impact of the coronavirus pandemic, the BMW Group can be satisfied with the positive course of business in the financial year 2021. Driven by brisk demand and an attractive product range, automobile deliveries grew by a solid 8.4 % to a total of 2,521,514¹ BMW, MINI and Rolls-Royce brand vehicles (2020: 2,325,179¹ units), enabling the BMW Group to extend its lead in the premium segment.

Europe	37.6%	39.3%
thereof Germany	10.6%	12.3%
thereof United Kingdom	6.5%	7.0%
Americas	17.9%	16.3%
thereof United States	14.6%	13.2%
Asia ¹	42.4%	42.4%
thereof China ¹	33.6%	33.5%

Retail Vehicle Delivery Data

BMW Group's definition of "deliveries" is as follows:

"A new or used vehicle will be recorded as a delivery once handed over to the end user. End users also include leaseholders under lease contracts with BMW Financial Services and – in the US and Canada – dealers when they designate a vehicle as a service loaner or demonstrator vehicle. In the case of used vehicles, end users may include dealers and other third parties when they purchase a vehicle at auction or directly from BMW Group. Vehicles designated for the end user and suffering total loss in transit will also be recorded as deliveries. Deliveries may be made by BMW AG, one of its international subsidiaries, a BMW Group retail outlet, or independent dealers. The vast majority of deliveries – and hence the reporting to BMW Group of deliveries – is made by independent dealers."

With effect from the year 2020, BMW Group has applied revised policies and procedures for the reporting of retail vehicle delivery data for automobiles in order to further improve the reliability and validity of its retail vehicle delivery data, in particular with respect to the timing of the recognition of retail vehicle deliveries. The preparation of BMW Group's retail vehicle delivery data involves a variety of estimates and judgments, some of which are complex and all of which are inherently subjective, and is subject to other uncertainties. In addition, as BMW Group continues to enhance its policies and procedures regarding retail vehicle delivery data, it may not always be practicable for BMW Group to adjust prior period data (and any such adjustments not made are of a de minimis nature and do not materially impact the comparability of periods). Examples of the foregoing include:

- The vast majority of deliveries of vehicles are carried out by independent dealerships or other third parties, and BMW Group is reliant on such third parties to correctly report relevant data to BMW Group.
- The definition of deliveries includes vehicles delivered in the United States and Canada if the relevant dealers designate such vehicles as service loaner vehicles or demonstrator vehicles.

- In 2020, deliveries of service loaner vehicles and demonstrator vehicles in the United States and Canada represented approximately 16.2% and 3.7%, respectively, of BMW Group's total retail vehicle deliveries of automobiles in the United States and Canada.
- In 2021, deliveries of service loaner vehicles and demonstrator vehicles in the United States and Canada represented approximately 8.6% and 15.2%, respectively, of BMW Group's total retail vehicle deliveries of automobiles in the United States and Canada.
- In the United States, approximately 92% of the service loaner vehicles and approximately 98% of the demonstrator vehicles delivered in the years 2020 through 2021 were, within one year from the relevant date of delivery, sold by the relevant dealer as used or new automobiles to consumers, and in Canada, approximately 98% of the service loaner vehicles and approximately 96% of the demonstrator vehicles delivered in the years 2020 through 2021 were, within one year from the relevant date of delivery, sold by the relevant dealer as used or new automobiles to consumers; such subsequent sales were not counted as deliveries.
- In 2021, the average number of days for which a vehicle was designated as a service loaner vehicle or demonstrator vehicle before it was sold by the relevant dealer was 219 and 67, respectively, in the United States, and 120 and 118 days, respectively, in Canada.
- BMW Group generally reports used vehicles as retail deliveries when they are made available to an end user. However, if a used vehicle has reached a certain threshold of kilometers/miles driven and time passed since initial registration, it may already be recorded as delivered at the time when a dealer or any other third party purchases such vehicle at auction or directly from BMW Group.
- Retail vehicle delivery data presented in this base prospectus include an immaterial number of vehicles that suffered a total loss while being in transit, provided they were intended to be made available to end users, regardless of whether or not such loss was covered by insurance.
- In the United States and Canada, the period start and end dates for the reporting of retail vehicle deliveries may immaterially deviate from the beginning and end of calendar years or calendar quarters, respectively, and instead follow global industry-standard reporting calendars.

BMW Group believes the retail vehicle delivery data presented in this Base Prospectus are materially correct in accordance with BMW Group's current definition and related policies and procedures of retail vehicle deliveries.

Retail vehicle deliveries during a given reporting period do not correlate directly to the revenue that BMW Group recognizes in respect of such reporting period.

BMW Group continued to deploy robust liquidity-related measures throughout 2021 to ensure its ability to act flexibly and independently at all times. Thanks to the combination of financing measures taken and the high free cash flow generated during the year, liquidity on hand totalled €20.2 billion at 31 December 2021 and was therefore significantly higher than the previous year's corresponding figure of €17.8 billion.

BMW Group also has access to a syndicated credit line, which was renegotiated in July 2017. The syndicated credit line of €8 billion has a term ending in July 2024 and is being made available by a consortium of 44 international banks. The credit line was not being utilised at 31 December 2021.

Expected Financing of BMW Group's activities

A broad range of instruments on international money and capital markets is used to refinance worldwide operations. Funds raised are used almost exclusively to refinance the BMW Group's Financial Services business. The overall objective of Group financing is to ensure the solvency of the BMW Group at all times, focusing on three areas:

¹ Moody's defines "A2" as follows: "Obligations rated A are considered upper-medium-grade and are subject to low credit risk

The modifier 2 indicates that the obligation ranks in the mid-range of its generic rating category."

² Moody's defines "P-1" as follows: "Issuers rated P-1 (Prime-1) have a superior ability to repay short-term debt obligations."

³ Standard & Poor's defines "A" as follows: "An obligor rated A has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus(+) or minus(-) sign to show relative standing within the major rating categories."

⁴ Standard & Poor's defines "A-1" as follows: "An obligor rated A-1 has strong capacity to meet its financial commitments. It is rated in the highest category by S&P Global Ratings."

The overall objective of Group financing is to ensure the solvency of BMW Group at all times, focusing on three areas:

1. The ability to act through permanent access to strategically important capital markets
2. Autonomy through the diversification of refinancing instruments and investors
3. Focus on value through the optimisation of financing costs

Financing measures undertaken at corporate level ensure access to liquidity for BMW Group's operating subsidiaries at standard market conditions and consistent credit terms. Funds are acquired in line with a target liability structure, comprising a balanced mix of financing instruments. The use of longer-term instruments to refinance the Group's Financial Services business and the maintenance of a sufficiently high liquidity reserve serves to rule out any imminent liquidity risk for the portfolio. This conservative financial approach also has a favourable effect on BMW Group's rating.

Legal and Arbitration Proceedings

Cartel Allegations Regarding Emissions-reducing Technologies

In July 2017, cartel allegations against five German car manufacturers appeared in the press. In October 2017, the European Commission carried out inspections at BMW Group's premises. In relation to these allegations, numerous class action lawsuits have been brought in the United States and Canada as well as several private lawsuits in South Korea. The class action lawsuits in the United States were consolidated, and were dismissed three times, most recently in October 2020 with prejudice. The plaintiffs have appealed the dismissal of their claims. There are two groups of plaintiffs in this class action, the car manufacturers' customers and the car manufacturers' dealers. In August 2021, the customer plaintiffs decided to no longer pursue the claims in question and, therefore, filed for dismissal of the appeal, thereby terminating the customers' class action with prejudice. In October 2021, the dealers' appeal was dismissed by the court of appeals. The dealers' petition for rehearing was dismissed in January 2022. In April 2022, they filed a petition for writ of certiorari with the U.S. Supreme Court. The class action lawsuits in Canada and the private lawsuits in South Korea remain at an early stage.

In April 2019, BMW Group received a Statement of Objections from the European Commission, to which it responded in December 2019.

Based on BMW AG's submissions, the European Commission significantly narrowed the scope of its charges. In its revised Statement of Objections, the European Commission alleged that Daimler, Volkswagen and BMW colluded to avoid competition on cleaning nitrogen oxide emissions from diesel passenger cars better than what was required by law despite the relevant technology having been available. The proceedings were settled in July 2021, and BMW Group was fined an amount of approximately €373 million.

Furthermore, cartel investigations on the same subject have been launched by Chinese, Korean and Turkish authorities. In each proceeding, BMW Group has responded to requests for information. With respect to the investigations by the Korean authorities, BMW AG recognised an appropriate provision. It is not yet possible to definitively assess the potential impact of the investigations in China and Korea. The Turkish authority issued its decision in January 2022, refraining from issuing a fine.

SEC Investigation and Class Action Regarding BMW Group's Unit Sales of New Vehicles

In December 2019, BMW Group was informed by the U.S. Securities and Exchange Commission ("**SEC**") that the SEC had commenced an inquiry into BMW Group's vehicle sales and sales reporting practices. On 22 January 2020, the SEC formally opened an investigation into potential violations of U.S. securities laws by BMW Group relating to disclosures regarding BMW Group's unit sales of new vehicles. On 24 September 2020, BMW AG and two of its U.S. subsidiaries settled the matter with the SEC and, without admitting or denying the allegations, consented to the entry of an order (the "**SEC Order**") finding violations of Sections 17(a)(2) and 17(a)(3) of the U.S. Securities Act and agreed to pay a penalty of U.S. \$18 million. The SEC Order alleged, among other things, that the disclosures that BMW Group had provided to investors in its U.S. bond offerings conducted under Rule 144A from 2016 to 2019 had contained material misstatements and omissions regarding BMW Group's U.S. retail vehicle deliveries.

On 27 October 2020, a purported holder of American Depositary Receipts ("**ADRs**") of BMW AG filed a putative class action lawsuit in the U.S. District Court for the District of New Jersey against BMW AG, BMW (US) Holding Corp. ("**BMW US**") and certain current and former officers and directors of BMW AG and BMW US, as defendants. The plaintiff purports to represent a class of persons who acquired BMW AG ADRs during the period from 3 November 2015 through 24 September 2020, inclusive. The complaint claims that certain alleged practices rendered false and/or misleading BMW AG's disclosed U.S. sales figures as publicly reported in SEC filings and press releases between 23 November 2015 and 3 December 2019. In September 2021, plaintiffs filed their amended complaint. On 30 November 2021, plaintiffs voluntarily dismissed the individual defendants without prejudice. The defendants deny the claims asserted against them. The parties have entered into an agreement in principle to settle the action, subject to court approval. (See "*Part K. Description of Bayerische Motoren Werke Aktiengesellschaft – 6. Business Overview – Retail Vehicle Delivery Data*" for further information.)

Other Matters

In December 2017, a class action lawsuit was filed against BMW AG and BMW of North America, LLC claiming that sunroofs in certain BMW models can explode or shatter unexpectedly. In addition, in March and April 2018, two class action complaints regarding certain diesel emission technologies were filed against certain entities of BMW Group in New Jersey; these complaints have been consolidated. The complaints relate to certain BMW X5 vehicles (model years 2009 through 2013) and BMW 335d vehicles (model years 2009 to 2011). The plaintiffs have filed an amended complaint on 20 September 2019. BMW of North America, LLC's motion to dismiss was granted in part, dismissing the claims based on the Federal Racketeer Influenced and Corrupt Organizations Act. That dismissal was later given effect with respect to BMW AG as well. The plaintiffs' interlocutory appeal to overturn the dismissal of these claims was unsuccessful. In turn, BMW AG's motion to dismiss the remaining claims for lack of jurisdiction was denied for the time being and discovery has commenced at BMW of North America, LLC and BMW AG.

Further class action lawsuits were filed in 2018 against BMW of North America, LLC on behalf of car owners whose vehicles were affected by a safety recall over possible issues with (i) the defective blower-motor wiring systems or (ii) positive crankcase ventilation valve heaters. These class actions seek damages based on various grounds, including for allegedly failing to provide a timely remedy and diminution in value of the vehicles due to the recall. BMW Group is currently also involved in litigation with regard to some BMW models that are equipped with airbags which contain ammonium nitrate as a propellant of these airbags, including class actions and product liability lawsuits. Possible risks for BMW Group cannot be quantified at present with respect to any of these legal proceedings.

In 2018, several BMW vehicles in South Korea caught fire due to a defect in the vehicles' exhaust gas recirculation ("**EGR**") unit. In December 2018, the South Korean Ministry of Land, Infrastructure and Transport ("**MoLIT**") announced that the leakage of coolant from the EGR cooler was the root cause of the occurrence of such thermal events. On 12 April 2019, MoLIT imposed a fine of KRW 11.8 billion (approximately €9.0 million as of 31 July 2019) on BMW South Korea, alleging delayed action in response to such thermal events. In July 2019, BMW South Korea filed an appeal against the April 2019 MoLIT fine. The court proceedings are suspended to await the outcome of the criminal proceedings. MoLIT separately filed a criminal complaint against BMW South Korea with the South Korean public prosecutor, and several third parties filed criminal complaints against BMW South Korea, BMW AG and certain of their employees and senior executives. In October 2019, the investigating police department transferred the case to the Prosecutor's Office with an indictment recommendation regarding eight BMW Group employees. The Prosecutor's Office investigation is ongoing. BMW Group is cooperating with the South Korean authorities with respect to all inquiries and investigations relating to such complaints. In addition, several civil lawsuits for damages arising from the EGR thermal events were filed against BMW Group in South Korea. These civil proceedings are at an early stage and possible risks to BMW Group cannot be quantified at present.

In May 2019, a class action lawsuit was filed alleging that BMW twin-turbo V8 petrol engines are affected by an oil burning defect causing the vehicles to consume excess amounts of engine oil with regular use. In February 2021, a settlement was agreed with the plaintiffs, which received final court approval in January 2022.

For several years, lawsuits have been filed in Germany against BMW Bank GmbH ("**BMW Bank**") in which consumers claim the withdrawal of their loan and leasing contracts on the basis of allegedly incorrect and insufficient pre-contractual information provided by BMW Bank. The focus of such lawsuits is on loan contracts. Since 2017, BMW Bank has won the vast majority of these lawsuits. In November 2019, the German Federal Court of Justice ("**BGH**") adopted a decision of principle in favor of BMW Bank, confirming the accuracy of consumer-relevant information in the relevant loan contracts. In addition, in October 2020, the BGH decided in a case in which BMW Bank was not involved that consumers are generally obliged to pay a compensation after a successful withdrawal. However, since the beginning of 2020, several requests for a preliminary ruling on the interpretation of the Consumer Credit Directive (Directive 2008/48/EC) have been filed by a German regional court with the European Court of Justice ("**ECJ**"). On 9 September 2021, the ECJ handed down its preliminary ruling concerning the requirements on the terms and conditions in consumer credit agreements, in particular with regard to default interest and prepayment penalty. Based on this ECJ ruling, the BGH requested another ECJ preliminary ruling on whether the concept of abuse of rights in connection with consumer credit agreements is still applicable under certain circumstances. Although this is technically not a final decision, the BGH mentioned in the reasoning part of its decision that it does not consider BMW Bank's terms and conditions in consumer credit agreements to fulfill the requirements set by the September 2021 ECJ ruling. Therefore, there is a risk that borrowers might withdraw consumer credit agreements of BMW Bank with reference to the proceeding submitted to the ECJ and the ECJ decision as of 9 September 2021. However, BMW Bank's right to be compensated by the borrower for the use of the car is still applicable. The possible financial impact cannot be definitively assessed at this stage.

In March 2022, the European Commission has conducted inspections at the premises of several car manufacturers and industry associations in several Member States. In parallel, the European Commission has sent out requests for information to car manufactures, including BMW AG. The inspections and requests for information concern a possible collusion by companies and associations in relation to the collection, treatment and recovery of end-of-life cars and vans. The inspections were conducted in coordination with the UK Competition and Markets Authority that has initiated formal proceedings. As the investigations were recently initiated and are ongoing, possible risks for BMW Group cannot be quantified at present.

Several companies of BMW Group are facing diesel emissions-related court claims in England. Approximately 17,000 claims – out of more than 42,000 initially announced in a letter before action – have been issued as of 19 April 2022. BMW Group has not yet received the particulars of claim and is therefore not able to assess inherent risks. BMW Group expects that the claimants will apply for a group litigation order.

Significant Change in BMW Group's Financial Position

There has been no significant change in BMW Group's financial position which has occurred since the date of its last unaudited and unreviewed published interim financial statements as of and for the three-month period ended 31 March 2022.
