

EHI Direct

EHIDirect is an innovative tool that helps our customers manage their travel programs, along with a variety of other everyday expenses, and is designed to save your company time and money. We offer it to you free of charge.

EHIDirect offers you the ability to book not only rental cars, but also make airline and hotel reservations. This feature alone relieves a lot of pain for many smaller companies, who do not have managed travel programs in place.

EHIDirect simplifies the process by offering a single site to which you can upload traveler profiles, compare and book flights, shop for great deals on hotel rooms — and of course, book an Enterprise or National rental car based on location, price or type. The tool also compiles itineraries and expense reports, automating tasks that otherwise can prove a burden for smaller operations.

The **EHIDirect** Web portal includes a handy feature for shipping and tracking packages by FedEx or UPS, along with a link to a massive online catalog of products such as office supplies, furniture, IT equipment, and cleaning and janitorial supplies.

EHIDirect puts buying power right at your fingertips!

EHI Direct features:
