It's time to uncover the adherence pandora box.
All it takes is a tap.
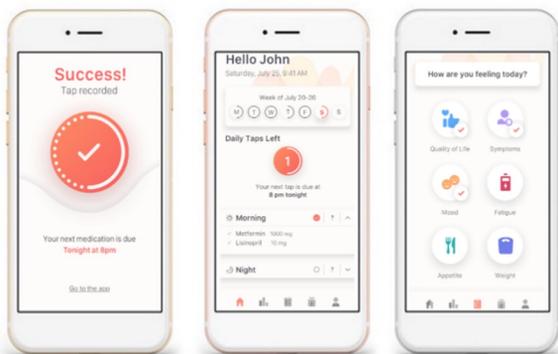

Introducing Tappt™ Health

A **digitally connected medication companion**
for remote patient and therapeutic monitoring.

Fully customizable to any condition, medication, formulation,
administration mode, and packaging system.

Seamless Patient Experience

Personalized to each patient's medication
schedule and unique care journey, without
the need to download any app, self-report
adherence, or interact with a device.

Integrated in Clinical Workflows

HIPAA Compliant dashboard, with 360°
view of patients' objective real-time data,
with actionable insights & alerts for
proactive care and improved performance.

The Smart Label That *Connects*

Smart Labels	Capture patients' adherence and intake behaviors in real-time
Reminders & Alerts	Nudge patients to stay adherent and engaged in care
Timely Surveys	Capture barriers to adherence, patient reported outcomes, social determinants of health, and other outcomes
Education & Resources	Support patients with trust-worthy disease- and treatment-specific resources
Trigger-Based Algorithms	Create digital and human touchpoints for patients with timely linkage to needed care and services
Risk-Stratified Alerts	Enable proactive and targeted patient monitoring, follow-up, and management
Clinician Centralized Hub	Allow easy data review, patient management, and team coordination

The Tappt™ Difference:

Tappt meets patients where they are at and when needed in their care journey.
It empowers and motivates patients to engage in and maintain positive health behaviors via personalized alerts, reminders, incentives, and educational resources – while allowing them to build trust and open communication with clinical teams.

Clinical teams also have a real-time view of their patients' health status, medication adherence, and care journey at individual- and population levels – and are equipped with effective tools to ensure proactive outreach and escalation of care.

UN*TAP* THE POTENTIAL TO
MAXIMIZE VALUE AND OUTCOMES

For specialty pharmacies, Tappt Health presents a unique opportunity to enhance patient care and operational efficiency

Improved Medication Refills

- Real-time adherence data enables proactive refill management, ensuring continuous therapy and reducing gaps in medication.

- **Reducing Time to Medication Initiation**
- **Optimizing Time to Fill**
- **Minimizing Medication Abandonment**
- **Identifying Reasons for Nonadherence**

Enhanced Patient Retention & Experience

- Personalized care based on patient-reported outcomes increases patient satisfaction, enhancing loyalty and retention.

Elevated Patient Services

- Tailor education and support based on insightful data, improving the overall quality of patient services offered.
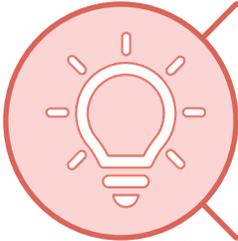

Seamless Collaboration with Patient Hubs & Services

- A unified approach to patient care through integration with patient hubs, ensuring consistency and quality in patient services.

Setting New Standards in Patient Care

- Tappt Health technology advances patient health outcomes and enhances the operational efficiency of your pharmacy services.
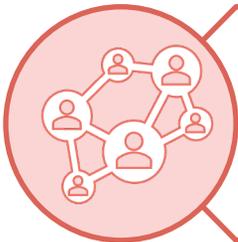

Uniquely Designed for a Successful Enterprise-Wide Approach

Next-gen digital platform to engage patients, drive innovation, and accelerate growth
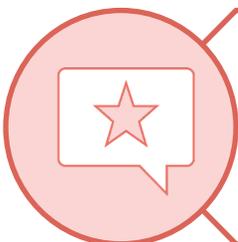

Scalable plug-n-play platform for seamless integration and easy implementation across brands

Flexible and custom design to match different patient cohorts based on condition, medication, and needs

White glove service for full onboarding and implementation support from program launch to reconciliation

White-labeled and API-enabled platform to create single and cohesive experience for patients

Deliver the Right Level of Care at the Right Time.

Help your organization drive better outcomes at a lower cost with our all-in-one solution

Getting Started

1. Schedule an introductory call with our team to understand your challenges and needs

2. Set-up your account based on patient populations, medications, and team workflows

3. Receive on-boarding support, team training, and patient welcome kit with labels

Onboard & Monitor Your Patients

1. Invite Patients via access code

2. Set up Treatment plan in the Tappt® system

3. Receive alerts for nonadherence & poor outcomes

If you need support at any point, our full-service success navigators are available for your team and patients.
