

## Durable Equipment

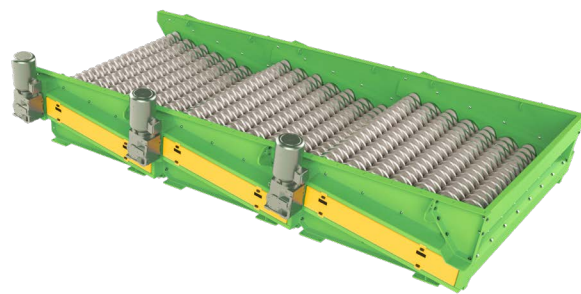

Krause's name and reputation are built on long-lasting extremely durable equipment. Processing C&D can be challenging. That's why you need a reliable brand to stand behind your operation for years to come.

**Krause Trommel Screen** is a revolving cylinder screen that separates a variety of material by shape and size. 3D holes in the barrels minimize material wrapping.

**LightsOut Air Drum Separator** uses air to remove the light fraction from high volumes of C&D material. Requires no regular maintenance, does not jam and has no wear parts.

**Krause Fines Screen** separates 2" minus material with non-wear discs that minimize jams and downtime.

**Bullet-Proof C&D Recycling Solutions**

## The Leader in C&D Recycling Solutions

Since 1963, Krause Manufacturing has been the leader in engineering and building the highest quality, longest lasting automated sorting systems for Construction & Demolition waste.

We will custom design, fabricate and install to your exact specifications. Incorporating state-of-the-art technology,

unsurpassed workmanship, and superior customer service, a turnkey system from Krause is built to last, offering dependable, high-throughput performance for decades to come.

### Contact us:

info@krausemanufacturing.com  
phone: +1 800-462-5311

### Krause Solutions:

-  System Design
-  Manufacturing
-  Installation, Retrofits & System Integration
-  Life-Time Customer Support

### Heavy Duty Machinery:

- Infeed Conveyors
- Sorting Conveyors
- Fines Screening
- Trommels Screening
- Air Drum Separation

## High Dependability, Peak Performance

Using the most durable equipment, our systems are field-proven to provide high throughput, maximum recovery rates, and the best end-product quality.

### Canopy:

Contains manual sort stations with optional enclosure

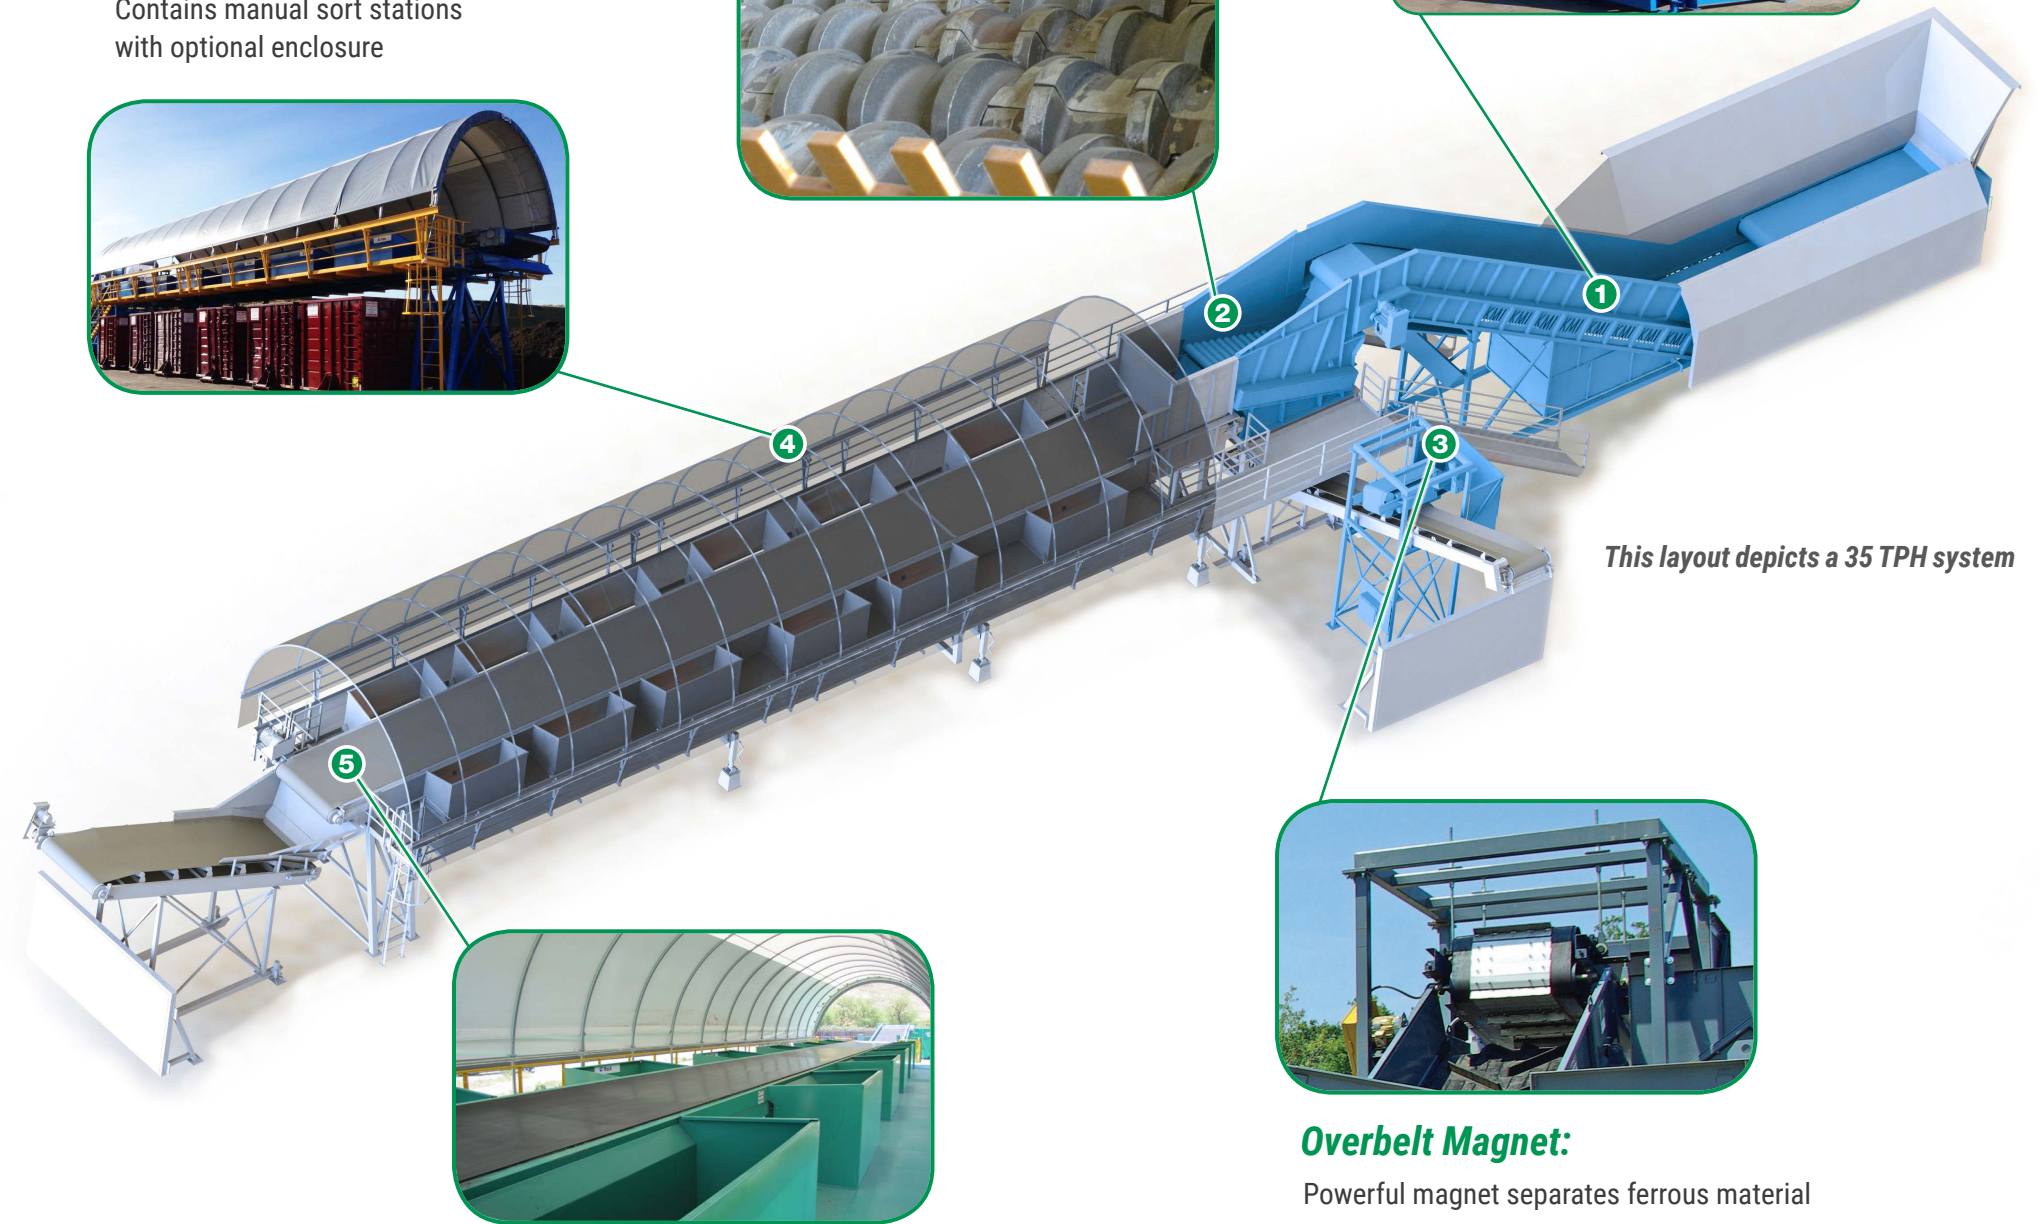

### Krause Fines Screen:

Durable, non-wear discs remove fines from large material

### Infeed Conveyors:

Durable conveyors meter material and feed system

### Heavy-Duty Conveyors:

Low-maintenance steel and rubber conveyors are built to last

### Overbelt Magnet:

Powerful magnet separates ferrous material
