

zetClean®

The 3-step system for soft bottles

Skin protection

Skin cleaning

Skin care

Protect your personal tools: your hands

The 3-step system:

Protect – clean – care

Those who frequently come into contact with oils, paints or acids and bases in their daily work, must take very particular care of their hands. The **zetClean**[®] 3-step system from **ZVG**[®] is the right solution for these situations. Long-term skin damage can only be avoided through the combination of protection, cleaning, and care.

In the **zetClean**[®] product line, in addition to the creams listed, there are many other hand washing lotions (liquid soaps, cream soaps or foam soaps) that likewise have a gentle and skin-friendly effect. Moreover, they are dermatologically tested: **HWL Premium, HWL Rosé, HWL Apfel, HWL Öko, HWL neutral, DES antibacterial, HR liquid**, etc. Further information can be obtained by calling +49 2241 484-0 or on the Internet at www.zvg-troisdorf.de.

Skin protection before and during work

You should protect your hands before starting work and after work breaks. Cream, carefully applied, provides an invisible protective film over the skin, so that skin irritations or even contact eczema can usually be avoided. Even “habitual” contaminants penetrate less easily into the skin. Thus cleaning after work becomes easier.

Skin cleaning – during and after work

In industry and trade, people work with a wide variety of materials. In the **zetClean**[®] product line there are various skin cleaning creams and gels for removal of residues – whether cleaning agents, acids, bases, greases, glues or adhesives. The products are thoroughly rubbed onto wetted hands – particularly under the fingernails and in the nail bed – until the grime is dissolved. Then rinse off thoroughly with water.

Skin care – after work

After work is done, hands must be cleaned. However this should not be all. Particularly after cleaning the skin thoroughly, it is necessary to reactivate the skin’s natural protective film. A care cream restores the moisture that the skin needs, and thus protects it from drying out and cracking. The restorative and regenerative effect of the cream is not just for the hands, but rather it can also be used on all other parts of the body.

Multisoft® Protect Flexi

Hand protection cream protects against penetration of grime, oils, and greases

Multisoft® Protect Flexi is a protection cream for prevention of contact eczema and skin irritations due to handling or coming into contact with oil-soluble and water-soluble work materials, such as cleaning agents, acids, bases, oils, greases, cooling lubricants, cutting oil, drilling emulsion, glue and adhesive, etc.

Produces an invisible protective film that also protects the skin from habitual contaminants.

- Lasts for several hours
- Easy to wash off
- Silicone-free
- Dermatologically tested

Protection – Cleaning – Care

Hand cleaner 880 (Liquid) Plus

pH
6,5

Hand cleaning cream for the most extreme, stubborn contaminants

Hand cleaner 880 (Liquid) Plus has been especially developed for removal of paints, adhesives, resins, varnish, printing ink, greases, lubricating oil, etc. It is used for workshops, print shops, auto body repair shops, and in painting firms. Esters and natural plant oil give the hand cleaner a higher level of skin-friendliness than is provided by comparable, solvent-based hand cleaners. The product also contains an apple scent that lingers on the hands long after washing. Unlike other hand cleaners, the viscous paste can be applied on dry and/or slightly moistened hands.

- Creamy
- Non-alkaline, free of solvents and silicone
- Dermatologically tested
- Micro-fine scrubbing agents

Hand cleaner 880 Plus

Multisoft® Cura

pH
6

Skin care cream with anti-inflammatory active ingredients

Multisoft® Cura is a skin care cream that supports the build-up of the skin's natural protective film. In addition, it protects the skin from drying out. Ideally **Multisoft® Cura** is used during work to protect the skin, or after cleansing the skin it is applied as a care agent.

- Thanks to a pH-neutral structure it can be used several times a day
- Suitable for all parts of the body
- Dermatologically tested

Multisoft® Cura skin care cream

Soft bottle dispenser

With a large view window for better product identification

The bottles are placed in the dispenser upside down, so that the cream automatically flows to the opening. Thus a pump mechanism can be completely dispensed with. Light pressure on the dispenser lever doses and releases the desired amount of cream. The large view window enables clear identification of the product, incl. area of application and composition.

Soft bottle dispenser

suitable for soft bottles with 1 L and 2 L contents · item 60203-00

suitable for the **zetClean**® items:

50102-020 · 50103-020 · 50230-020 · 50263-010 · 50264-010

Other soft bottle dispensers and dosing pumps on request.

zetMatic® dosing dispenser

The creams and gels from the **zetClean**® 3-step system can be optimally dosed with the aid of a suitable dispenser. Compatible with other dispenser systems available on the market.

HWP LAVO

Hand wash paste for oily contaminants

HWP LAVO is a sand-free cleaning concentrate that is gentle on the skin and removes moderate to medium contaminants, in particular contamination that contains oil or heavy metal, in industry, workshop and trade. Through use of highly-effective skin protection components and low alkalinity, HWP Lavo is particularly skin-friendly.

- Deep pore cleaning effect that is gentle on the skin
- With excellent skin protection and lipid regulating components
- Based on wood flour
- Dermatologically tested
